How has or will this be integrated with the HMP and how does this reduce risk? It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: <ol style="list-style-type: none"> (1) regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; (2) require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; (3) control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters; (4) control filling, grading, dredging and other development which may increase erosion or flood damages; (5) regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands, and; (6) qualify and maintain for participation in the National Flood Insurance Program.

RESPONSE/RECOVERY PLANNING

Comprehensive Emergency Management Plan	Yes	Comprehensive Emergency Management Plan (CEMP)	County	OES
--	-----	--	--------	-----

How has or will this be integrated with the HMP and how does this reduce risk?

The CEMP defines the scope of preparedness and emergency management activities necessary in the County. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.

Continuity of Operations Plan	Yes	Chapter 2: Continuity of Government	Local	Village Board
--------------------------------------	-----	-------------------------------------	-------	---------------

How has or will this be integrated with the HMP and how does this reduce risk?

The New York State Defense Emergency Act, in section twenty-nine, thereof authorizes political subdivisions of the state to provide for the continuity of their governments in the event of an actual or imminent attack upon the United States by an enemy or foreign nation. The General Municipal Law, in section sixty thereof, authorized political subdivisions to provide for the continuity of their governments in the event of other public disasters, catastrophes, or emergencies. Based on the authority contained in such laws Chapter 2 is adopted so that on such occasions the government of the Village of Gowanda, New York may continue to function properly and efficiently under emergency conditions.

19.3.2 Development and Permitting Capability

Table 19-3 summarizes the capabilities of Gowanda to oversee and track development.

Table 19-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits? <ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? <ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	No	-
Describe the level of buildout in your jurisdiction.	N/A	There is land available for future development in the Village.

19.3.3 Administrative and Technical Capability

Table 19-4 summarizes potential staff and personnel resources available to Gowanda and their current responsibilities that contribute to hazard mitigation.

Table 19-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Village Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Village comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Village; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Village subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Village Board.
Zoning Board of Adjustment	Yes	The Board of Appeals may interpret the Zoning Chapter in cases of uncertainty as to the meaning of any of its provisions; review any order, requirement, decision, or determination made by any administrative official charged with the enforcement of Chapter 30: Zoning; vary or modify the application of the provisions of Chapter 30: Zoning subject to appropriate conditions and safeguards where there are practical difficulties or unnecessary hardships in the way of carrying out the strict letter of Chapter 30: Zoning so that the spirit of the Zoning Code shall be observed, public safety, and welfare secured, and substantial justice done. Such hardship shall be due to the unique circumstances of the parcel of land for which a

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
		variance is required. Variances may only be granted where the essential character of the district in which located will not be materially altered; grant a permit, subject to appropriate conditions and safeguards, wherever, it is provided in Chapter 30: Zoning that the approval of the Board is required.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Village of Gowanda Public Works Department is the operations component of Village government. The Department manages, operates and maintains the streets, storm water drainage system, landfill post closure operations, parks, water treatment plant, water distribution system, wastewater treatment plant, New York State Department of Health approved Environmental Lab, wastewater collection system, municipal parking, sidewalks, equipment maintenance garage and refuse and garbage disposal.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	Yes	Village of Gowanda Police Department. The Village is divided into two counties at the Cattaraugus Creek. The Cattaraugus County portion of the Village is located in the Town of Persia and the Erie County portion is located in the Town of Collins. The Gowanda Fire Department serves the Gowanda Community and surrounding areas with Fire protection and Emergency/Rescue needs on a Volunteer basis.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Village of Gowanda Public Works manages, operates and maintains the streets, storm water drainage system, landfill post closure operations, parks, water treatment plant, water distribution system, wastewater treatment plant, New York State Department of Health approved Environmental Lab, wastewater collection system, municipal parking, sidewalks, equipment maintenance garage and refuse and garbage disposal.
Mutual aid agreements	Yes	County and surrounding municipalities for emergency response
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other: Tree Committee	Yes	The Village Tree Committee consists of a minimum of three (3) members and an ex officio member who is a Trustee of

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
		the Village Board. The terms of office is three years or until their successors are appointed. The Committee shall study the problems and determine the needs of the Village in connection with the Village's urban forestry program; shall submit to the Village Board of Trustees at the last Board meeting in December a comprehensive Village Tree Plan for approval. That plan shall include as a minimum, the care, preservation, pruning, planting, replanting, removal or disposition of trees or shrubs in public parks, and other Village public areas; shall establish and maintain the Village Tree Inventory; shall, working with the Erie and Cattaraugus County Foresters and others as appropriate, establish and amend as necessary, the list of type and kind of trees acceptable for planting in the Village public areas; shall assist the officials of the Village, as well as residents in dissemination of information regarding the selection, planting, and maintenance of trees within the Village, whether on public or private property; shall make recommendations to the Village Board of Trustees as to desirable legislation concerning the tree program and associated activities; shall oversee the implementation and execution of the official comprehensive Village Tree Plan as approved and funded; may identify trees both public and private as "Heritage Trees" and organize "Heritage Tree" programs.
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	Village Engineer
Planners or engineers with an understanding of natural hazards	Yes	Village Engineer
Staff with expertise or training in benefit/cost analysis	Yes	Village Engineer
Professionals trained in conducting damage assessments	Yes	Village Engineer
Personnel skilled or trained in GIS and/or Hazus applications	No	County Training
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	Yes	Nicholas Crassi, Disaster Coordinator
Grant writers	No	-
Resilience Officer	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

19.3.4 Fiscal Capability

Table 19-5 summarizes financial resources available to Gowanda.

Table 19-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

19.3.5 Education and Outreach Capability

Table 19-6 summarizes the education and outreach resources available to Gowanda.

Table 19-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Emergency Management
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	Code Red/911
Natural disaster/safety programs in place for schools	Yes	Internal Training
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-

Outreach Resources	Available? (Yes/No)	Comment
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

19.3.6 Community Classifications

Table 19-7 summarizes classifications for community programs available to Gowanda.

Table 19-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

— = Unavailable

19.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 19-8 summarizes the adaptive capacity for each identified hazard of concern and the Village’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 19-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Wildfire	Moderate

19.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 19-1 is responsible for maintaining this information.

19.4.1 NFIP Statistics

Table 19-9 summarizes the NFIP policy and claim statistics for Gowanda.

Table 19-9. Gowanda NFIP Summary of Policy and Claim Statistics

# Policies	57
# Claims (Losses)	136
Total Loss Payments	\$2,332,780.40
# Repetitive Loss Properties (NFIP definition)	10
# Repetitive Loss Properties (FMA definition)	1
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

19.4.2 Flood Vulnerability Summary

Table 19-10 provides a summary of the NFIP program in Gowanda.

Table 19-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas prone to flooding in the Village are within the FEMA-defined SFHAs.
Do you maintain a list of properties that have been damaged by flooding?	No

NFIP Topic	Comments
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Unknown
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	<ul style="list-style-type: none">Point Peter Brook Reservoir repairs to correct PW575 & PW576 from flood 2013 date of completion Dec 2024, construction bid award.Thatcher Brook Task Force project.Village of Gowanda Thatcher Brook Diversion Channel, southside of Village, in the design phase.
How do you make Substantial Damage determinations?	No process in place
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Unknown
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	Unknown
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Yes, however the maps are outdated.
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement Department
Are any certified floodplain managers on staff in your jurisdiction?	Code Enforcement/Building Inspectors
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	Yes (all aspects)
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Village Engineer on staff
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Code enforcement
What are the barriers to running an effective NFIP program in the community, if any?	None currently
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	The violations include failure to properly elevate air conditions and generators above the BFE in the floodplain, and properly storing mobile homes or campers within a flood zone.
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: November 2, 2009 CAV: May 13, 2021
What is the local law number or municipal code of your flood damage prevention ordinance?	Chapter 86: Flood Damage Protection
What is the date that your flood damage prevention ordinance was last amended?	April 9, 2019

NFIP Topic	Comments
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Yes, it meets the minimum requirements.
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	The Village Board is planning board reviews all variances/plans with Code Officers
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	Currently working with Army Corp of Engineers which will improve Community Rating System

19.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 19-11 through Table 19-13.

Table 19-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 19-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There has been no recent major development or infrastructure between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 19-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
US Army Corps – Thatcher Brook bypass channel	Natural Infrastructure	1	Parallel from north side of railroad tracks from Thatcher Brook to Cattaraugus Creek	Flood	In the study phase, scheduled for construction to begin early 2027

19.6 JURISDICTIONAL RISK ASSESSMENT

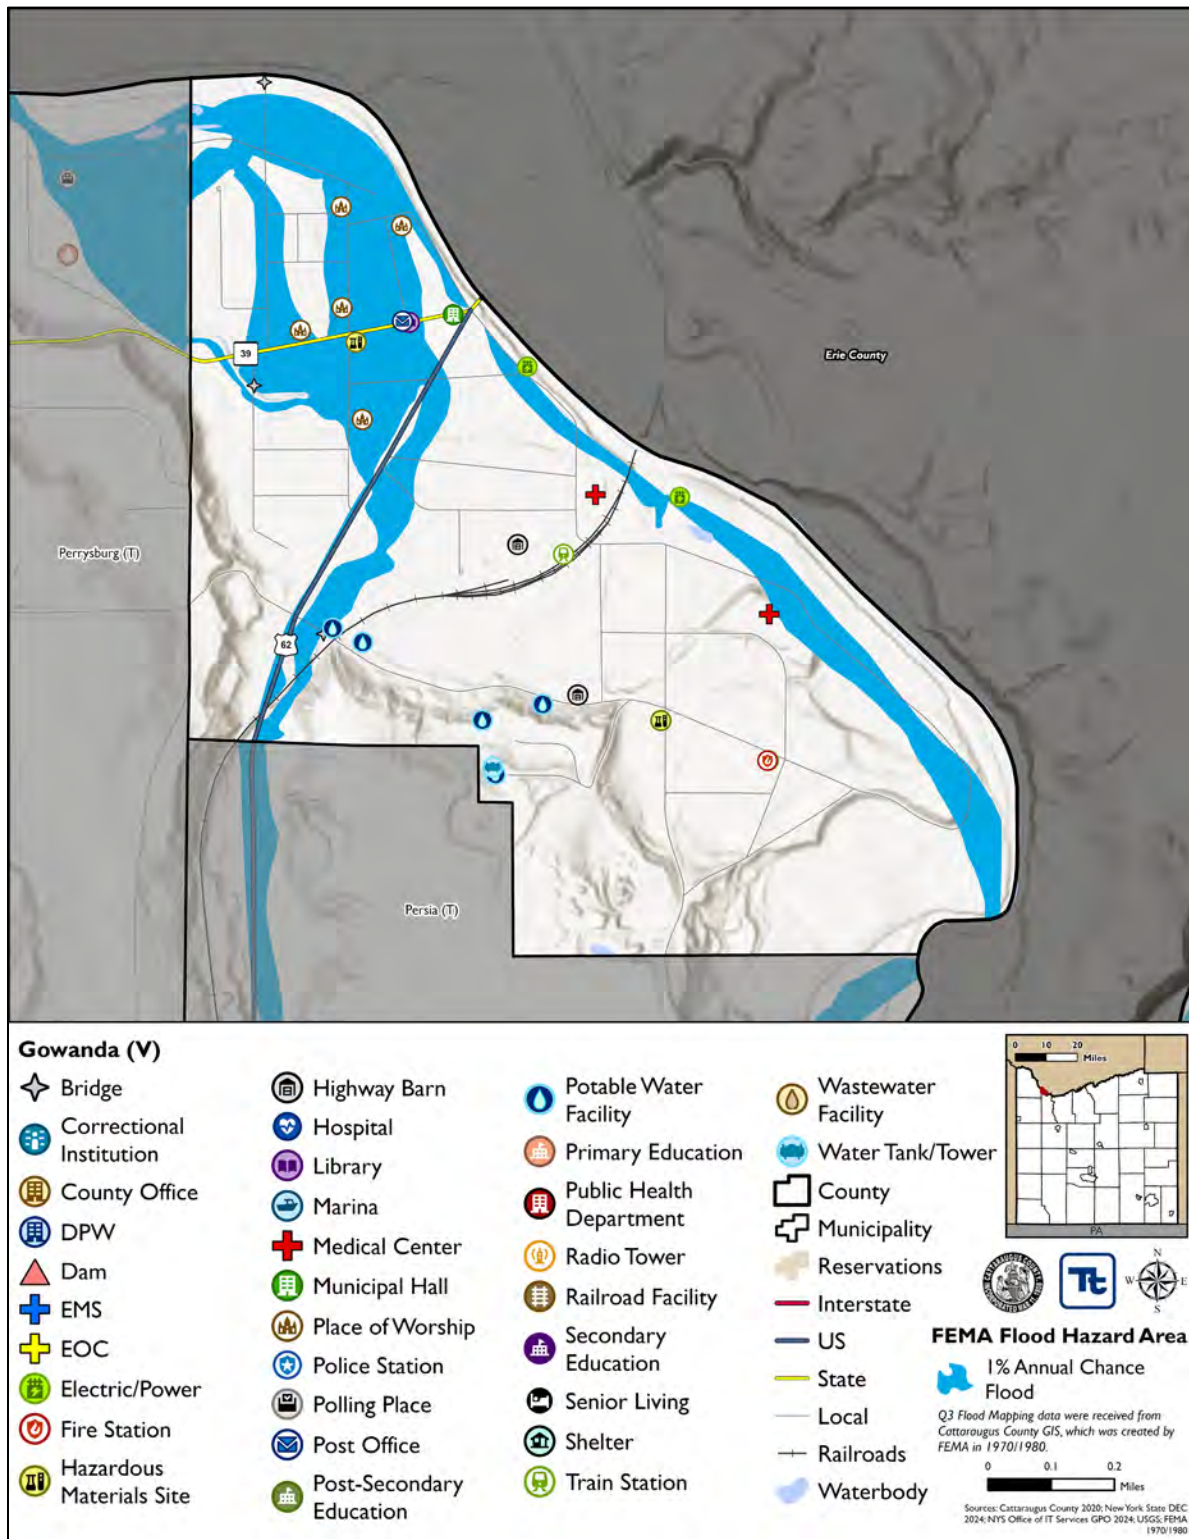

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Gowanda's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

19.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Village are shown in Figure 19-1 through Figure 19-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Gowanda has significant exposure. The maps show the location of potential new development, where available.

Figure 19-1. Gowanda Flood Hazard Area Extent and Location Map

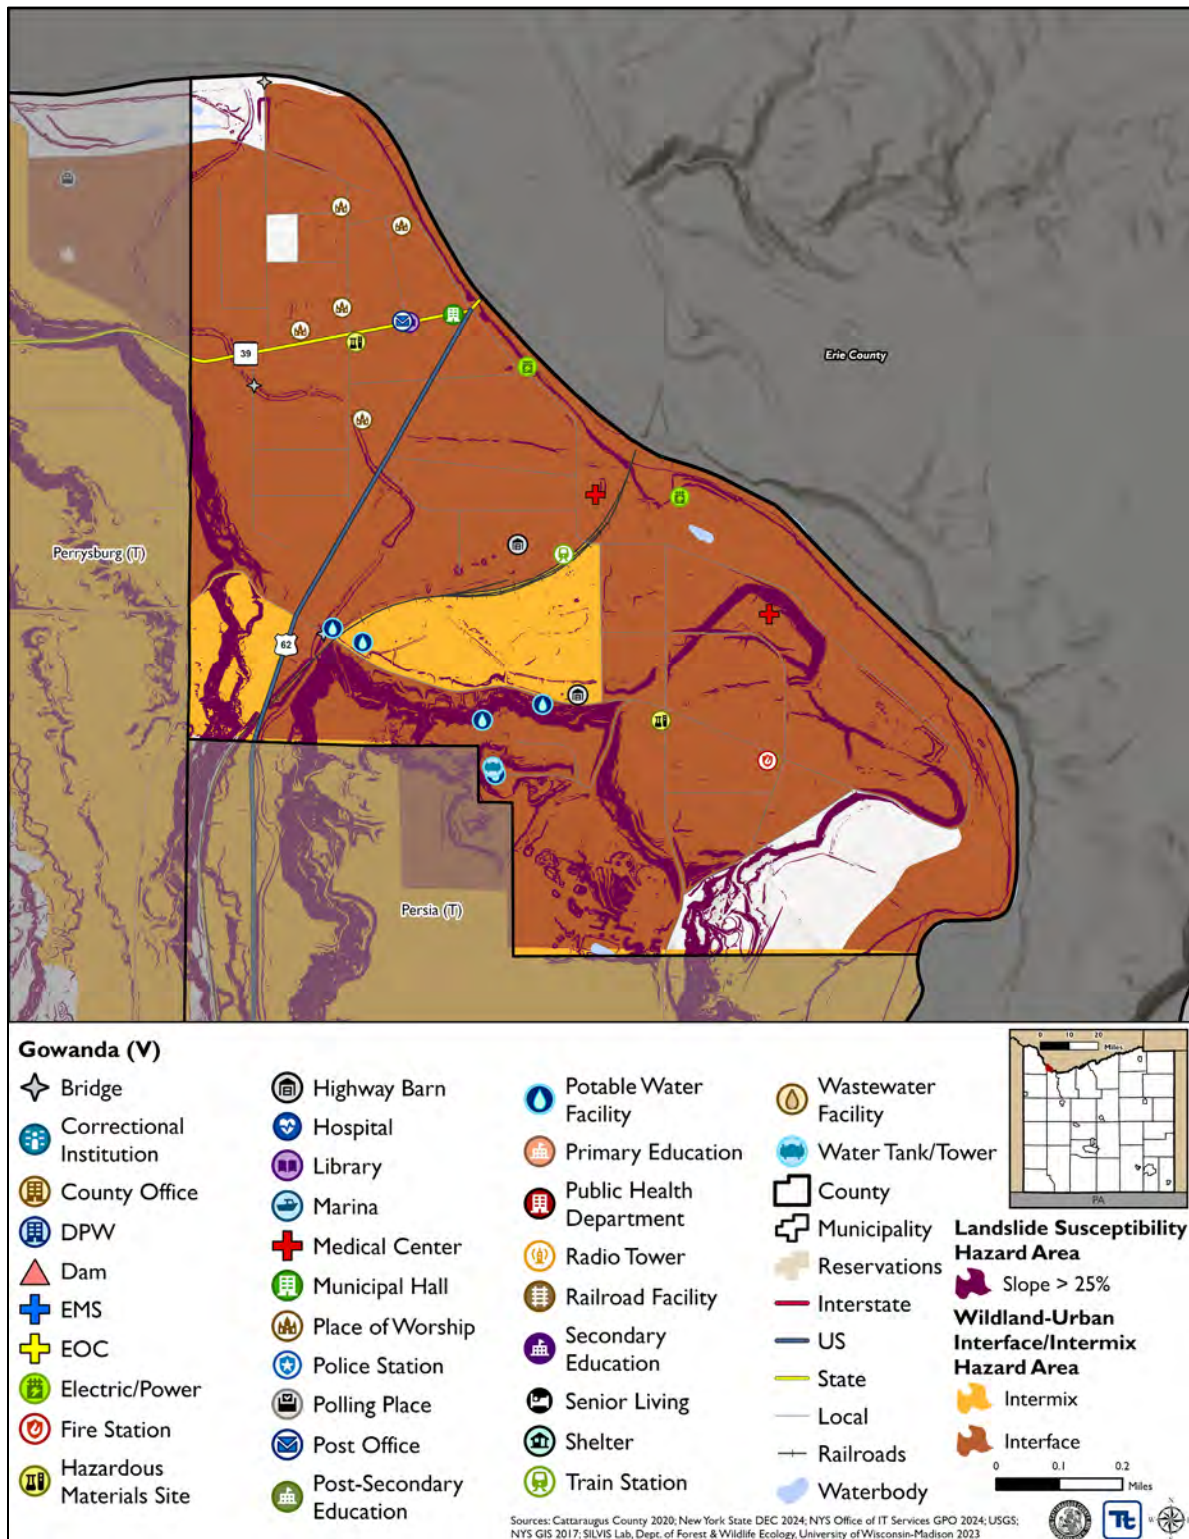

Note: The flood hazard area shown is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

The boundary for the Village shown is restricted to Cattaraugus County. The Village's boundary extends into the neighboring Erie County.

Figure 19-2. Gowanda Landslide and Wildfire Hazard Area Extent and Location Map

Note: The boundary for the Village shown is restricted to Cattaraugus County. The Village's boundary extends into the neighboring Erie County.

19.6.2 Hazard Event History

The history of natural and non-natural hazard events in Gowanda is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 19-14 provides details on loss and damage in Gowanda during hazard events since the last hazard mitigation plan update.

Table 19-14. Hazard Event History in Gowanda

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Gowanda
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	No damages or losses in the Village.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	No damages or losses in the Village.
January 12, 2020	High Wind	N/A	High wind	No damages or losses in the Village.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	No losses. Fire Department and Highway Department facilities lost electricity.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	No damages or losses in the Village.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	No damages or losses in the Village.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	No damages or losses in the Village.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	No damages or losses in the Village.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	No damages or losses in the Village.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	No damages or losses in the Village.
March 6, 2022	High Wind	N/A	High wind	No damages or losses in the Village.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	No damages or losses in the Village.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	Additional snow removal

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

19.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Gowanda .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Gowanda reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Village indicated the following:

- There is no risk to the Dam and Levee Failure hazard, as there are no nearby dams which may impact the Village.
- The Landslide hazard has been decreased from 'Medium' to 'Low' due to the minimally impacted areas to the hazard.

Table 19-15 shows Gowanda's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 19-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	No Risk
Flood	High
Landslide	Low
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 19-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 19-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event

Source: Cattaraugus County 2024

19.6.4 Identified Issues

After a review of Gowanda's hazard event history, hazard rankings, hazard location, and current capabilities, Gowanda identified the following vulnerabilities within the community:

- The Village has numerous critical facilities in the Special Flood Hazard Area and may have an increased risk to flooding impacts. The following critical facilities are located in the Village in Cattaraugus and/or Erie County:
 - Verizon CO (VZ-NY62848)
 - Gowanda Free Library
 - Gowanda Post Office
 - Emmanuel Lutheran Church
 - First Baptist Church
 - Free Methodist Church
 - St Mary's Episcopal Church
 - United Methodist Church
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded roadways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Village which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Johnson Street
 - West Main Street
 - Jamestown Street (near the railroad)
- Thatcher Brook is prone to woody debris jams which increases flood risk. The Brook has one trash rack which is effective at reducing the debris. The trash rack at Point Peter Brook is undersized and should be increased in size to maintain the capacity needed. Additional mitigation is needed at both sites.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway

flooding instances and impacting the integrity of the culverts. Several culverts in the Village are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:

- Union Street Culvert (Town of Collins, Erie County)
- Buffalo Street Culvert (NYSDOT)
- Rail Road Bridge Culvert (Erie County IDA)
- Cemetery Hill Culvert (Town of Collins, Erie County)
- Chapel Street Bridge Culvert (Cattaraugus County)
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The Village has 11 repetitive loss properties, but other properties may be impacted by flooding as well.
- The Village does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- The Village faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.
- The Village faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.
- The Village faces significant risk from the flood hazard; however, there is no warning system in place to detect when waters are breaching banks and to notify the public of the impending hazard. Flood waters can cause negative impacts to private and public property, close routes for travel and evacuation, and have the potential to cause health risks due to contaminated waters and debris.
- The Village faces risk from landslide but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Persia 13

19.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

19.7.1 Past Mitigation Action Status

Table 19-17 indicates progress on the Village's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

19.7.2 Additional Mitigation Efforts

Gowanda did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 19-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Gowanda-001	Critical Facilities Outreach	Flood	FPA	<p>Problem: The village has numerous critical facilities in the Special Flood Hazard Area. These facilities are not municipally owned:</p> <ul style="list-style-type: none"> Verizon CO (VZ-NY62848) Gowanda Free Library Emmanuel Lutheran Church First Baptist Church Free Methodist Church St Mary's Episcopal Church United Methodist Church <p>Solution: The FPA will conduct outreach to facility managers to discuss flood exposure and potential mitigation actions.</p>	<p>1. No Progress</p> <p>2. Due to other Village priorities this action has not been completed.</p>	<p>1. Include</p> <p>2. Update with any additional critical facilities</p> <p>3. Not applicable</p>
2020-Gowanda-002	Flood Warning System	Flood	FPA, OEM	<p>Problem: Flood prone areas require a warning system.</p> <p>Solution: The village will evaluate areas that need a flood warning system constructed and construct the system where necessary. The system will place specific emphasis on warnings for water and sewer facilities. The Thatcher Brook Diversion Channel is currently in design phase. The System will also be able to be used to distribute warnings regarding other emergency events.</p>	<p>1. In Progress</p> <p>2. Code Red is only part of an early warning system. There is a desire to install a mechanism to identify high water events which will communicate with the Disaster Coordinator. That individual will then utilize Code Red to notify the public of impending hazard events.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Gowanda-003	Flood Risk Management	Flood	FPA	<p>Problem: Flooding is a regional problem, and natural watercourses need to kept clear of debris to reduce flooding.</p>	<p>1. Ongoing Capability</p> <p>2. Annual removal of debris from Thatcher Brook.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Project complete</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Feasibility Study			Solution: Continue to support Flood Risk management Feasibility Study in the Village of Gowanda, and Towns of Perrysburg, Persia, and Dayton, as well as Erie County and the Town of Collins. The project includes debris removal in waterways.		
2020-Gowanda-004	Landslide study	Landslide	Engineer	<p>Problem: The Gowanda water reservoir on Point Peter Rd is prone to landslides along its banks.</p> <p>Solution: Study slide conditions in the Village of Gowanda near the Gowanda water reservoir on Point Peter Rd and conduct bank stabilization.</p>	<p>1. Complete</p> <p>2. Project completed in October 2024. This particular section of road is within the jurisdiction of the Town of Persia. The Town has conducted some preliminary investigation into developing a plan to help reduce the erosion of the steep bank.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Project complete</p>
2020-Gowanda-005	Establish Tree Maintenance Program	Severe Storm, Severe Winter Storm, Utility Failure	DPW	<p>Problem: Falling tree branches can result in property damage and utility failure.</p> <p>Solution: The village will establish a tree maintenance program to reduce the likelihood of falling tree branches.</p>	<p>1. Complete</p> <p>2. Tree Committee has been established and is working with the Highway Department for maintenance.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Project complete</p>
2020-Gowanda-006	Stream Bank Erosion Mitigation	Severe Storm, Flood, Landslide	SWCD, DPW	<p>Problem: Allen Springs and Thatcher Brook have stream bank erosion issues.</p> <p>Solution: The village will work with SWCD to identify locations to mitigate stream bank erosion through seeding, rip rap, and stream bank stabilization. The village will secure necessary permits and complete the identified mitigation actions.</p>	<p>1. Ongoing Capability</p> <p>2. Banks are actively monitored by Public Works, who takes action when needed. This is a LEWPA project scheduled for completion in 2025.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Project complete</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Gowanda-007	Emergency Operations Plan	All hazards	OEM	<p>Problem: The village lacks an emergency operations plan.</p> <p>Solution: The village will write and adopt an emergency operations plan. The plan will be integrated with the proposed flood warning system.</p>	<p>1. Complete</p> <p>2. The Village has a CEMP/EOP in place, which is updated annually.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Project complete</p>
2020-Gowanda-008	Stormwater Improvements	Flood, Severe Storm	Engineer, DPW	<p>Problem: Johnson Street, West Main Street, and Jamestown Street (near the railroad) requires stormwater drainage to be established to eliminate residential flooding.</p> <p>Solution: The Village Engineer will design the necessary stormwater improvements and new features. The DPW will install the stormwater system components designed by the Engineer.</p>	<p>1. In Progress</p> <p>2. The project will be included in an upcoming Diversion Channel Project.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Gowanda-009	Thatcher Brook Trash Rack	Flood, Severe Storm	Engineer	<p>Problem: Thatcher Brook is prone debris jams which increases flood risk. The Brook has one trash rack which is effective at reducing the debris. Additional mitigation is needed.</p> <p>Solution: The village will work to gain the necessary permitting and install a second trash rack on Thatcher Brook.</p>	<p>1. In Progress</p> <p>2. In discussion phase with the Towns of Dayton and Persia. Evaluating alternatives.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Gowanda-010	Culvert Upgrades	Flood, Severe Storm	Public Works	<p>Problem: The following culverts in Gowanda have incurred damages and require to be upsized:</p> <ul style="list-style-type: none">• Grannis Brook• Union Street• Buffalo Street	<p>1. In Progress</p> <p>2. Discussion occurring but no physical action. The Village of Gowanda does not own or maintain any of the structures listed. The New York State DOT and the Town of Collins</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				<ul style="list-style-type: none">• Rail Road Bridge• Cemetery Hill culvert• Thatcher Brook• Chapel Street Bridge <p>Solution: The village will make the necessary upgrades to the identified culverts.</p>	own these structures. The Village will not perform the work to upgrade the structures listed, however, the Village will insist with the appropriate jurisdictions and lobby for upgrades/replacements.	
2020-Gowanda-011	Gowanda Historic Hollywood Theater	Flood	Village, County, Facility manager	<p>Problem: The Gowanda Historic Hollywood Theater at 39 W. Main Street is a non-profit cultural asset that is also commonly used for outreach on hazards and emergency management education events. The corner of the building rests in the floodplain and the structure has been impacted by flooding in the past.</p> <p>Solution: The village will work with Cattaraugus County to assist the Gowanda Historic Hollywood Theater as it works to identify potential mitigation actions and carry them out. The most likely actions would involve floodproofing the facility.</p>	<p>1. Complete</p> <p>2. Flood proofing was conducted at the site as part of various facility upgrades.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Flood proofing was conducted at the site as part of various facility upgrades.</p>
2020-Gowanda-012	Repetitive Loss Properties	Flood, Severe Storm	NFIP Floodplain Administrator, supported by homeowners	<p>Problem: Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The village has 46 repetitive loss properties.</p> <p>Solution: Conduct outreach to 60 flood-prone property owners, including RL/SRL property owners and provide information on</p>	<p>1. In Progress</p> <p>2. The Village is currently working the Army Corps of Engineers and FEMA on a Diversion Channel project to reduce or eliminate flood risk.</p>	<p>1. Include</p> <p>2. Update with current repetitive loss property number</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				mitigation alternatives. After preferred mitigation measures are identified, collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/ moving/ elevating residential homes in the flood prone areas that experience frequent flooding (high risk areas).		
2020-Gowanda-013	Temporary and Permanent Housing	All hazards	Village administration, county	<p>Problem: The village has not identified appropriate locations for the placement of temporary and permanent housing.</p> <p>Solution: The village will work with the county to identify appropriate locations for temporary and permanent housing.</p>	<p>1. Complete</p> <p>2. The Village has identified the Gowanda Fire Hall, Gowanda High School, and the Free Methodist Church as locations for temporary and permanent housing.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Project complete</p>

19.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Gowanda participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 "Selecting Appropriate Mitigation Measures for Floodprone Structures" (March 2007)
- FEMA "Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards" (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Gowanda would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Village priorities.

Table 19-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 19-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 19-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure										
Flood	X	X			X			X	X	X
Landslide				X			X			
Pandemic				X			X			
Severe Storm	X	X			X			X	X	
Severe Winter Storm	X	X			X				X	
Utility Failure		X							X	
Wildfire				X			X			

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 19-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-GowandaV-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-GowandaV-02	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-GowandaV-03	Thatcher Brook and Peter Point Brook Trash Racks	1	1	1	1	1	0	1	1	1	0	1	1	0	1	11	High
2025-GowandaV-04	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-GowandaV-05	Repetitive Loss Properties	1	1	1	1	1	0	1	1	1	0	1	1	0	1	11	High
2025-GowandaV-06	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-GowandaV-07	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-GowandaV-08	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-GowandaV -09	Flood Warning System	1	1	1	1	1	0	1	1	1	1	1	1	0	1	12	High
2025-GowandaV-10	Landslide Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-GowandaV-11	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-GowandaV-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers						
Supporting Agencies:	Village Board						
Hazard(s) of Concern:	<div><input type="checkbox"/> Dam and Levee Failure</div> <div><input checked="" type="checkbox"/> Flood</div> <div><input type="checkbox"/> Landslide</div> <div><input type="checkbox"/> Pandemic</div> <div><input type="checkbox"/> Severe Storm</div> <div><input type="checkbox"/> Severe Winter Storm</div> <div><input type="checkbox"/> Utility Failure</div> <div><input type="checkbox"/> Wildfire</div>						
Description of the Problem:	<p>The Village has numerous critical facilities in the Special Flood Hazard Area and may have an increased risk to flooding impacts. The following critical facilities are located in the Village in Cattaraugus and/or Erie County:</p> <ul style="list-style-type: none">• Verizon CO (VZ-NY62848)• Gowanda Free Library• Gowanda Post Office• Emmanuel Lutheran Church• First Baptist Church• Free Methodist Church• St Mary's Episcopal Church• United Methodist Church						
Description of the Solution:	<p>The Village will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the Village will carry out the option.</p>						
Estimated Cost:	Medium						
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Village Budget						
Implementation Timeline:	Within 5 Years						
Goals Met:	1, 3, 5						
Benefits:	Ensures continuity of operations of several critical facilities in the Village.						
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.						
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.						
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.						
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.						
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.						
Mitigation Category	<div><input type="checkbox"/> Local Plans and Regulations (LPR)</div> <div><input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)</div> <div><input type="checkbox"/> Natural Systems Protection (NSP)</div> <div><input type="checkbox"/> Education and Awareness Programs (EAP)</div>						
CRS Category	<div><input type="checkbox"/> Preventative Measures (PR)</div> <div><input type="checkbox"/> Property Protection (PP)</div> <div><input type="checkbox"/> Public Information (PI)</div> <div><input type="checkbox"/> Natural Resource Protection (NR)</div> <div><input checked="" type="checkbox"/> Structural Flood Control Projects (SP)</div> <div><input type="checkbox"/> Emergency Services (ES)</div>						
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low				
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists
Action	Evaluation						
No Action	Current problem exists						

	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area
	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.

DRAFT

Action 2025-GowandaV-02. Floodprone Roads

Lead Agency:	Highway Department		
Supporting Agencies:	Building Code Enforcement, Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Village which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including: <ul style="list-style-type: none"> • Johnson Street • West Main Street • Jamestown Street (near the railroad). 		
Description of the Solution:	The Village will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include: <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Village Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Village's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all flood-prone road system		Not feasible
	Raise all flood prone roads		Cost prohibitive

Action 2025-GowandaV-03. Thatcher Brook and Peter Point Brook Trash Racks

Lead Agency:	Engineering										
Supporting Agencies:	NYS DEC										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Thatcher Brook is prone to woody debris jams which increases flood risk. Debris jams typically occur during periods of heavy rainfall, common with severe storms. The Brook has one trash rack which is effective at reducing the debris. The trash rack at Point Peter Brook is undersized and should be increased in size to maintain the capacity needed. Additional mitigation is needed at both sites.										
Description of the Solution:	The Village will work to gain the necessary permitting and install a second trash rack on Thatcher Brook and upsize the trash rack at Peter Point Brook.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, Village Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4										
Benefits:	This installation of a second trash rack and upsize of another will reduce the likelihood of a debris jam caused by refuse and ultimately decrease overall risk to flooding occurrences.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding from Thatcher Brook and Peter Point Brook due to the debris jams.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	The action adds a second trash rack, increasing the Village's capability to reduce flooding surrounding Thatcher Brook and Peter Point Brook.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Action 2025-GowandaV-04. Undersized Culverts

Lead Agency:	Highway Superintendent										
Supporting Agencies:	Building Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	<p>Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Village are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including the following culverts:</p> <ul style="list-style-type: none"> • Union Street Culvert (Town of Collins, Erie County) • Buffalo Street Culvert (NYSDOT) • Rail Road Bridge Culvert (Cattaraugus County IDA) • Cemetery Hill Culvert (Town of Collins, Erie County) • Chapel Street Bridge Culvert (Cattaraugus County) 										
Description of the Solution:	The Village Engineer and Highway Department will support New York State DOT and the Town of Collins in the lobbying for appropriate upgrades and/or replacements for the culverts that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, NYS DOT, Town of Collins										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove roadway</td> <td>Roadway cannot be removed</td> </tr> <tr> <td>Raingardens</td> <td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.		
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-GowandaV-05. Repetitive Loss Properties

Lead Agency:	Code Enforcement										
Supporting Agencies:	Village Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The Village has 11 repetitive loss properties, but other properties may be impacted by flooding as well.										
Description of the Solution:	The Village will conduct outreach to the impacted properties and will provide information on mitigation alternatives. After preferred mitigation measures are identified, the Village will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating of the affected properties that experience frequent flooding. The parameters for this initiative would be funding, benefits versus cost, and willing participation of property owners.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA FMA, FMA SWIFT, Village Budget, County Budget, Property Owners										
Implementation Timeline:	3 years										
Goals Met:	1										
Benefits:	This action would foster comprehensive floodplain management by removing at risk properties from the flood hazard area or elevating properties to reduce the flood risk.										
Impact on Socially Vulnerable Populations:	Collecting data regarding homeowners that reside within flood prone areas provides an opportunity to introduce location-specific opportunities for assistance. Socially vulnerable populations may be able to have houses elevated or acquired when it would otherwise be unaffordable.										
Impact on Future Development:	Increased outreach to homeowners within a flood prone area will limit construction in areas that are prone to hazard events. Homes may be acquired, which will remove those structures from the floodplain and prevent future development on those sites.										
Impact on Critical Facilities/Lifelines:	Removing structures from the floodplain decreases the demand on utilities and emergency services including health and medical, law enforcement, and search and rescue.										
Impact on Capabilities:	Outreach which promotes the removal of risk from the immediate floodplain via acquisition of properties will free up resources for search and rescue and other emergency operations as needed. This action will enhance the Village's current NFIP capabilities.										
Climate Change Considerations:	Climate change is likely to increase the frequency and severity of severe rainfall, flash flooding, riverine flooding, and coastal flooding from sea level rise and storm surge events. Removing structures from the floodplain will reduce the response and recovery costs as a result of these events and decrease the loss of human life as a result of these events. Elevating structures will reduce the recovery costs.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Levee around floodplain</td><td>Costly, not enough room.</td></tr><tr><td>Deployable flood barriers</td><td>Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Levee around floodplain	Costly, not enough room.	Deployable flood barriers	Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.
Action	Evaluation										
No Action	Current problem exists										
Levee around floodplain	Costly, not enough room.										
Deployable flood barriers	Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.										

Action 2025-GowandaV-06. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Village Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The Village does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Village will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Village officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources following disaster events</td> <td>Resources may not be available during major widespread events</td> </tr> <tr> <td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td> <td>A plan outlining responsibility is still necessary to prevent missing important requirements</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-GowandaV-07. Wildfire Education and Outreach

Lead Agency:	Village Board										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire										
Description of the Problem:	The Village faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Village events, the Village newsletters, social media, the Village website, and having the materials on display for the public at Village libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Village by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Village.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Village's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Village										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-GowandaV-08. Pandemic Education and Outreach

Lead Agency:	Village Board										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Village faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Village events, the Village newsletters, social media, the Village website, and having the materials on display for the public at Village libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Village by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Village.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Village's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><tr><th>Action</th><th>Evaluation</th></tr><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources</td><td>Resources may be generalized and not specific to the risks in the Village</td></tr><tr><td>Use only a few methods for distribution</td><td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td></tr></table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Village	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Village										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-GowandaV-09. Flood Warning System

Lead Agency:	Village Board										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Village faces significant risk from the flood hazard; however, there is no warning system in place to detect when waters are breaching banks and to notify the public of the impending hazard. Flood waters can cause negative impacts to private and public property, close routes for travel and evacuation, and have the potential to cause health risks due to contaminated waters and debris.										
Description of the Solution:	The Village will evaluate areas that need a flood warning system constructed and construct the system where necessary. The system will place specific emphasis on warnings for water and sewer facilities. The Thatcher Brook Diversion Channel is currently in design phase. The System will also be able to be used to distribute warnings regarding other emergency events.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, NWS, USGS, Village Budget										
Implementation Timeline:	3 years										
Goals Met:	1, 4, 5, 6										
Benefits:	This action will improve the alert and warning capabilities of the Village by being able to alert and notify the public, business owners, and visitors of potential or impending flooding conditions.										
Impact on Socially Vulnerable Populations:	Vulnerable populations who are impacted by flooding conditions would have an earlier warning of impending or possible flooding conditions.										
Impact on Future Development:	Not applicable.										
Impact on Critical Facilities/Lifelines:	Critical facilities and community lifelines which are impacted by flooding conditions would have an earlier warning of impending or possible flooding conditions.										
Impact on Capabilities:	This action would build upon the existing warning system capabilities of the Village by expanding these capabilities to include a flood warning system.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. The projection for an increase in heavy rainfall events means there is a heightened chance of flooding events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on the NWS updates</td> <td>Do not provide real-time information, delay in information could impact the village on responding properly</td> </tr> <tr> <td>Conduct manual readings by emergency personnel</td> <td>Inaccurate and time consuming</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Rely on the NWS updates	Do not provide real-time information, delay in information could impact the village on responding properly	Conduct manual readings by emergency personnel	Inaccurate and time consuming		
Action	Evaluation										
No Action	Current problem exists										
Rely on the NWS updates	Do not provide real-time information, delay in information could impact the village on responding properly										
Conduct manual readings by emergency personnel	Inaccurate and time consuming										

Action 2025-GowandaV-10. Landslide Education and Outreach

Lead Agency:	Village Board										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Village faces risk from landslide but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on landslide risks and methods of mitigation measures. Methods of distribution may include Village events, the Village newsletters, social media, the Village website, and having the materials on display for the public at Village libraries and offices. Outreach materials will be specified with education and information for the landslide hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Village by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the landslide hazard which may impact them in the Village.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the landslide hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Village's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the landslide hazard and how climate change may exacerbate those risks.

Action 2025-GowandaV-11. Bridge Evaluations

Lead Agency:	Highway Department		
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> Persia 13 		
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.		
Impact on Socially Vulnerable Populations:	Not applicable		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Remove bridges	May cause significant traffic problems	
	Replace bridges	Cost prohibitive	

20. TOWN OF GREAT VALLEY

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Great Valley with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Great Valley, describes who participated in the planning process, assesses Great Valley's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

20.1 HAZARD MITIGATION PLANNING TEAM

The Town of Great Valley identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 20-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 20-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Daniel Brown, Supervisor Address: 4808 Route 219, Great Valley, NY 14741 Phone Number: 716-945-4200, ext. 102 Email: danbrown5346@gmail.com	Name/Title: Richard Rinko, Code Officer Address: 4808 Route 219, Great Valley, NY 14741 Phone Number: 716-945-4200 Email: beanrinko@atlanticbb.net
National Flood Insurance Program Floodplain Administrator	
Name/Title: Richard Rinko, Code Enforcement Officer Address: 4808 Route 219, Great Valley, NY 14741 Phone Number: 716-945-4200 Email: beanrinko@atlanticbb.net	

20.2 COMMUNITY PROFILE

The Town of Great Valley lies in the central part of Cattaraugus County in western New York State. The Town of Great Valley has a total area of 49.67 square miles. The Alleghany River and Great Valley, Wrights, Porter, Forks, Haines, Ten Mile, Wind Fall, and Willoughby Creeks flow through the town. The town is bordered to the north by the Town of Ellicottville, to the east by the towns of Humphrey and Allegany, to the south by the Town of Carrollton, and to the west by the Towns of Salamanca and Little Valley and the City of Salamanca. There are five hamlets within the Town of Great Valley: Great Valley, Kill Buck, Peth, Sugartown, and Willoughby.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction

quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 3.9 percent of the population is 5 years of age or younger, 21 percent is 65 years of age or older, 0.6 percent is non-English speaking, 2.8 percent is below the poverty threshold, and 13.8 percent is considered disabled.

20.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Great Valley performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Great Valley to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

20.3.1 Planning and Regulatory Capability and Integration

Table 20-2 summarizes the planning and regulatory tools that are available to Great Valley.

Table 20-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 2, 2022: New York State Uniform Fire Prevention and Building Code	State and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) in this Town. This chapter is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter.				
Zoning/Land Use Code	Yes	Local Law 1, 2008: Town of Great Valley Zoning Law	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
<p>It is the intent and purpose of this law to promote the public health, safety, and general welfare. Specifically, the purposes of this law are:</p> <ol style="list-style-type: none"> 1. To secure safety for the residents of the Town of Carrollton from flood, fire and other dangers. 2. To provide adequate light and air. 3. To prevent the overcrowding of land and to avoid undue concentration of population. 4. To prevent congestion on the streets and roadways in the Town. 5. To facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements. 				
Subdivision Code	Yes	Local Law 1, 2008: Town of Great Valley Zoning Law, Article 3	Local	Planning Board
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>Empowers local authoritative body to approve plats showing lots, blocks or sites, with or without streets or highways, to approve the development of entirely or partially undeveloped plats already filed and to approve preliminary plats within jurisdictional boundaries. This ensures that all approved plats for land development fall within local rules and regulations for environmental preservation, building code standards and wildfire protection ordinances.</p>				
Site Plan Code	Yes	Local Law 1, 2008: Town of Great Valley Zoning Law, Article 9	Local	Planning Board
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>The purpose of site plan approval is to determine compliance with the objectives of this article in zoning districts where inappropriate development may cause a conflict between uses in the same or adjoining zoning district by creating unhealthful and unsafe conditions and thereby adversely affect the public health, safety, and general welfare.</p>				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.</p>				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Flood Damage Prevention Ordinance	Yes	Local Law 1, 2001: Flood Damage Prevention	Federal, State, County and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Emergency Management Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Climate Change Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
PLANNING DOCUMENTS				
General/Comprehensive Plan	Yes	Town of Great Valley Comprehensive Plan, 2007	Local	Comprehensive Plan/Zoning Committee
How has or will this be integrated with the HMP and how does this reduce risk? The purpose of this Comprehensive Plan is to promote and protect the health, safety and general welfare of the people of the Town of Great Valley, while taking into consideration the needs of the wider region of Cattaraugus County. The Comprehensive Plan will provide a policy basis for making decisions about land use within the Town. The Comprehensive Plan is intended to promote the preservation of the rural and agricultural character of the community, while at the same time promoting orderly development in accordance with the goals and policies that are contained in this document. The Comprehensive Plan will also serve as the basis for the development of a Zoning Ordinance.				
Capital Improvement Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Disaster Debris Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?

20.3.2 Development and Permitting Capability

Table 20-3 summarizes the capabilities of Great Valley to oversee and track development.

Table 20-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?	No	-

	Yes/No	Comment
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		
Describe the level of buildout in your jurisdiction.	N/A	5%

20.3.3 Administrative and Technical Capability

Table 20-4 summarizes potential staff and personnel resources available to Great Valley and their current responsibilities that contribute to hazard mitigation.

Table 20-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	<p>The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town of Great Valley subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.</p> <p>The Planning Board and Zoning Board of Appeals shall consist of seven members and two alternates, and these seven members and two alternates shall serve on both the Planning Board and Zoning Board of Appeals.</p>
Zoning Board of Adjustment	Yes	<p>With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested by Section 267 of NYS Town Law, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Zoning Officer charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Zoning Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.</p>

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
		The Planning Board and Zoning Board of Appeals shall consist of seven members and two alternates, and these seven members and two alternates shall serve on both the Planning Board and Zoning Board of Appeals.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	County and neighboring towns
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	Yes	Town Engineer/Planning Board
Engineers or professionals trained in building or infrastructure construction practices	Yes	Town Engineer/Planning Board
Planners or engineers with an understanding of natural hazards	Yes	Town Engineer/Planning Board
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Southern Tier West
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

20.3.4 Fiscal Capability

Table 20-5 summarizes financial resources available to Great Valley.

Table 20-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

20.3.5 Education and Outreach Capability

Table 20-6 summarizes the education and outreach resources available to Great Valley.

Table 20-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	Yes	Southern Tier West
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	
Citizen boards or commissions that address issues related to hazard mitigation	No	-

Outreach Resources	Available? (Yes/No)	Comment
Warning systems for hazard events	Yes	Cattaraugus County Emergency Management/Local Fire Department
Natural disaster/safety programs in place for schools	Yes	
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	Yes	Cattaraugus County Emergency Management/Local Fire Department

20.3.6 Community Classifications

Table 20-7 summarizes classifications for community programs available to Great Valley.

Table 20-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

20.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 20-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 20-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

20.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 20-1 is responsible for maintaining this information.

20.4.1 NFIP Statistics

Table 20-9 summarizes the NFIP policy and claim statistics for Great Valley.

Table 20-9. Great Valley NFIP Summary of Policy and Claim Statistics

# Policies	16
# Claims (Losses)	18
Total Loss Payments	\$134,846.37
# Repetitive Loss Properties (NFIP definition)	1
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

20.4.2 Flood Vulnerability Summary

Table 20-10 provides a summary of the NFIP program in Great Valley.

Table 20-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	219 north of Rt 98 intersection, Klawitter Rd, 219 by Peth and by Porter Hollow
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Substantial damage is 50% of value.
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	50% or more of value of structure
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: May 2, 2005 CAV: May 12, 2017

NFIP Topic	Comments
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law 1, 2001: Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	April 13, 2001
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Any activity in a floodplain requires a floodplain development permit
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

20.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 20-11 through Table 20-13.

Table 20-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	8	0	10	18
Permits within SFHA	1	0	0	1
2020				
Total Permits	12	0	15	27
Permits within SFHA	0	0	2	2
2021				
Total Permits	6	0	10	16
Permits within SFHA	1	0	0	1
2022				
Total Permits	13	0	3	16
Permits within SFHA	0	0	1	1
2023				
Total Permits	3	0	11	14
Permits within SFHA	1	0	0	1
2024				
Total Permits	-	-	-	-
Permits within SFHA	-	-	-	-

SFHA = Special Flood Hazard Area (1% flood event)

At the time of this plan update, the building permit information for 2024 was unavailable.

Table 20-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 20-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any known or anticipated major development or infrastructure in the next five years.					

20.6 JURISDICTIONAL RISK ASSESSMENT

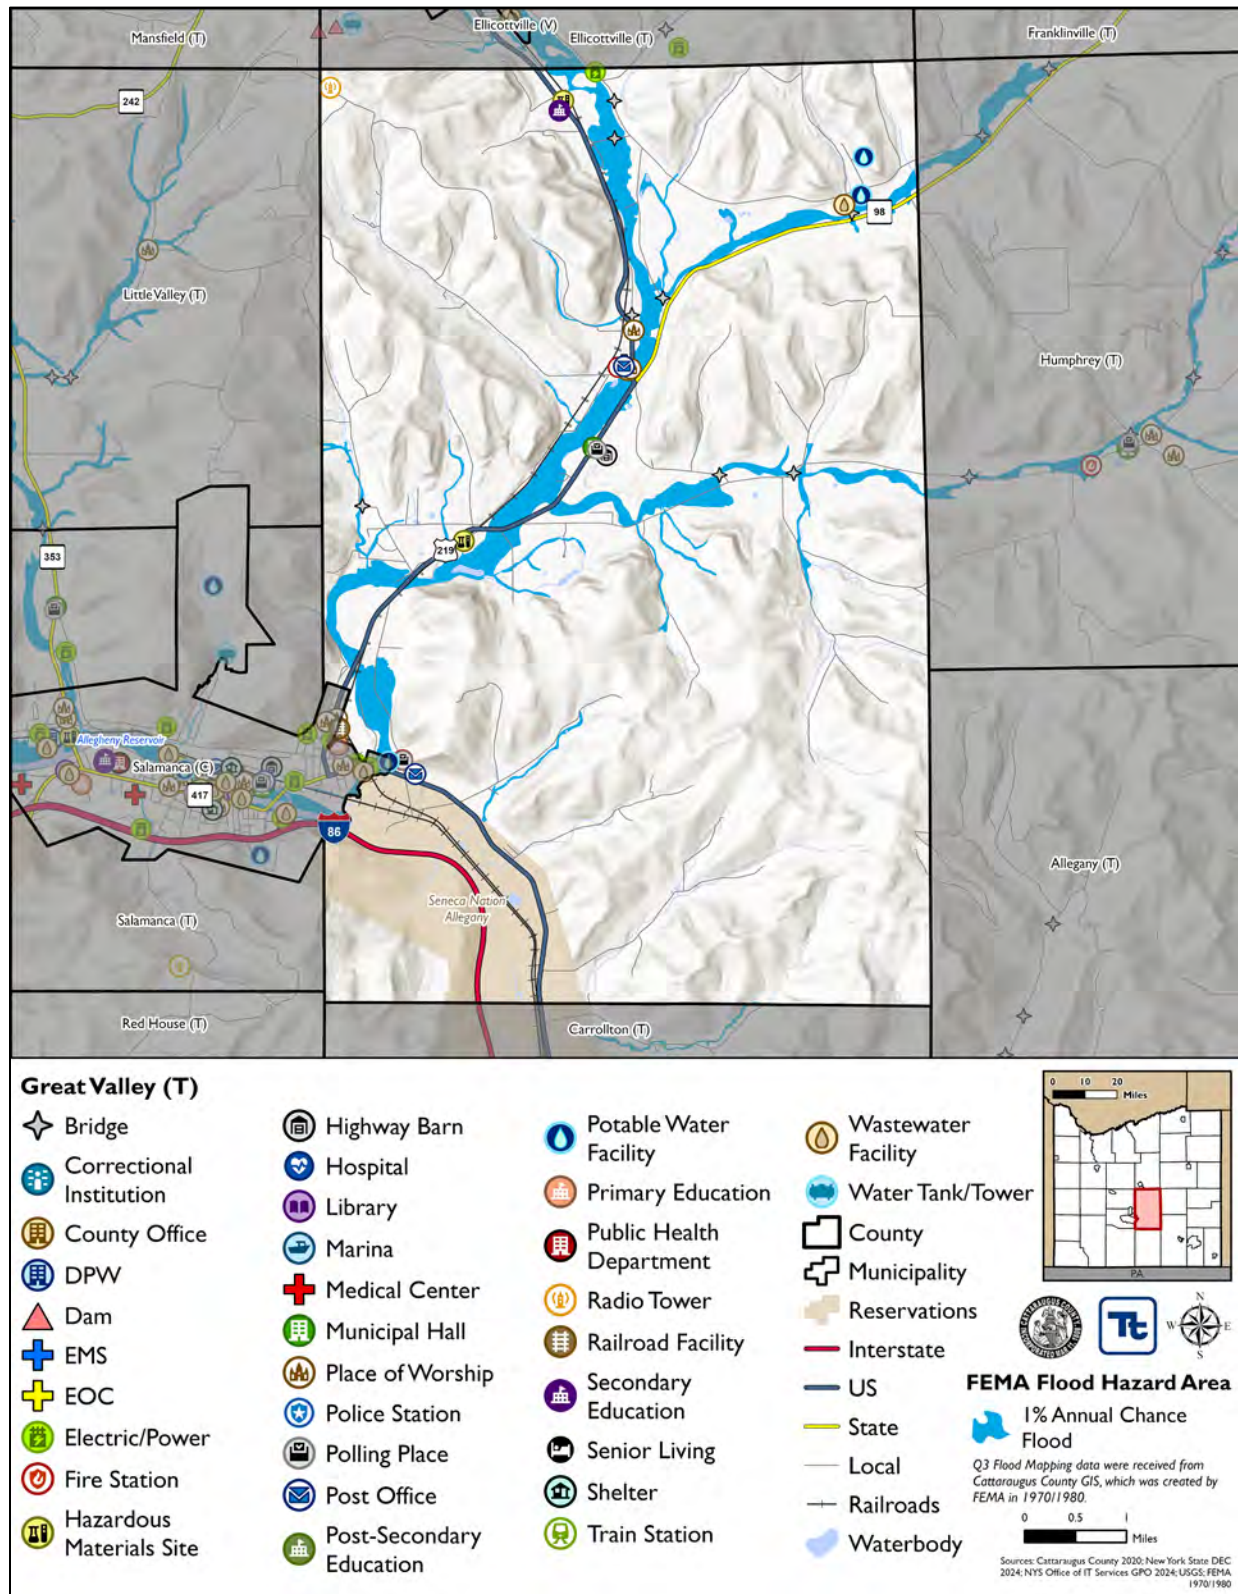

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Great Valley's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

20.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 20-1 through Figure 20-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Great Valley has significant exposure. The maps show the location of potential new development, where available.

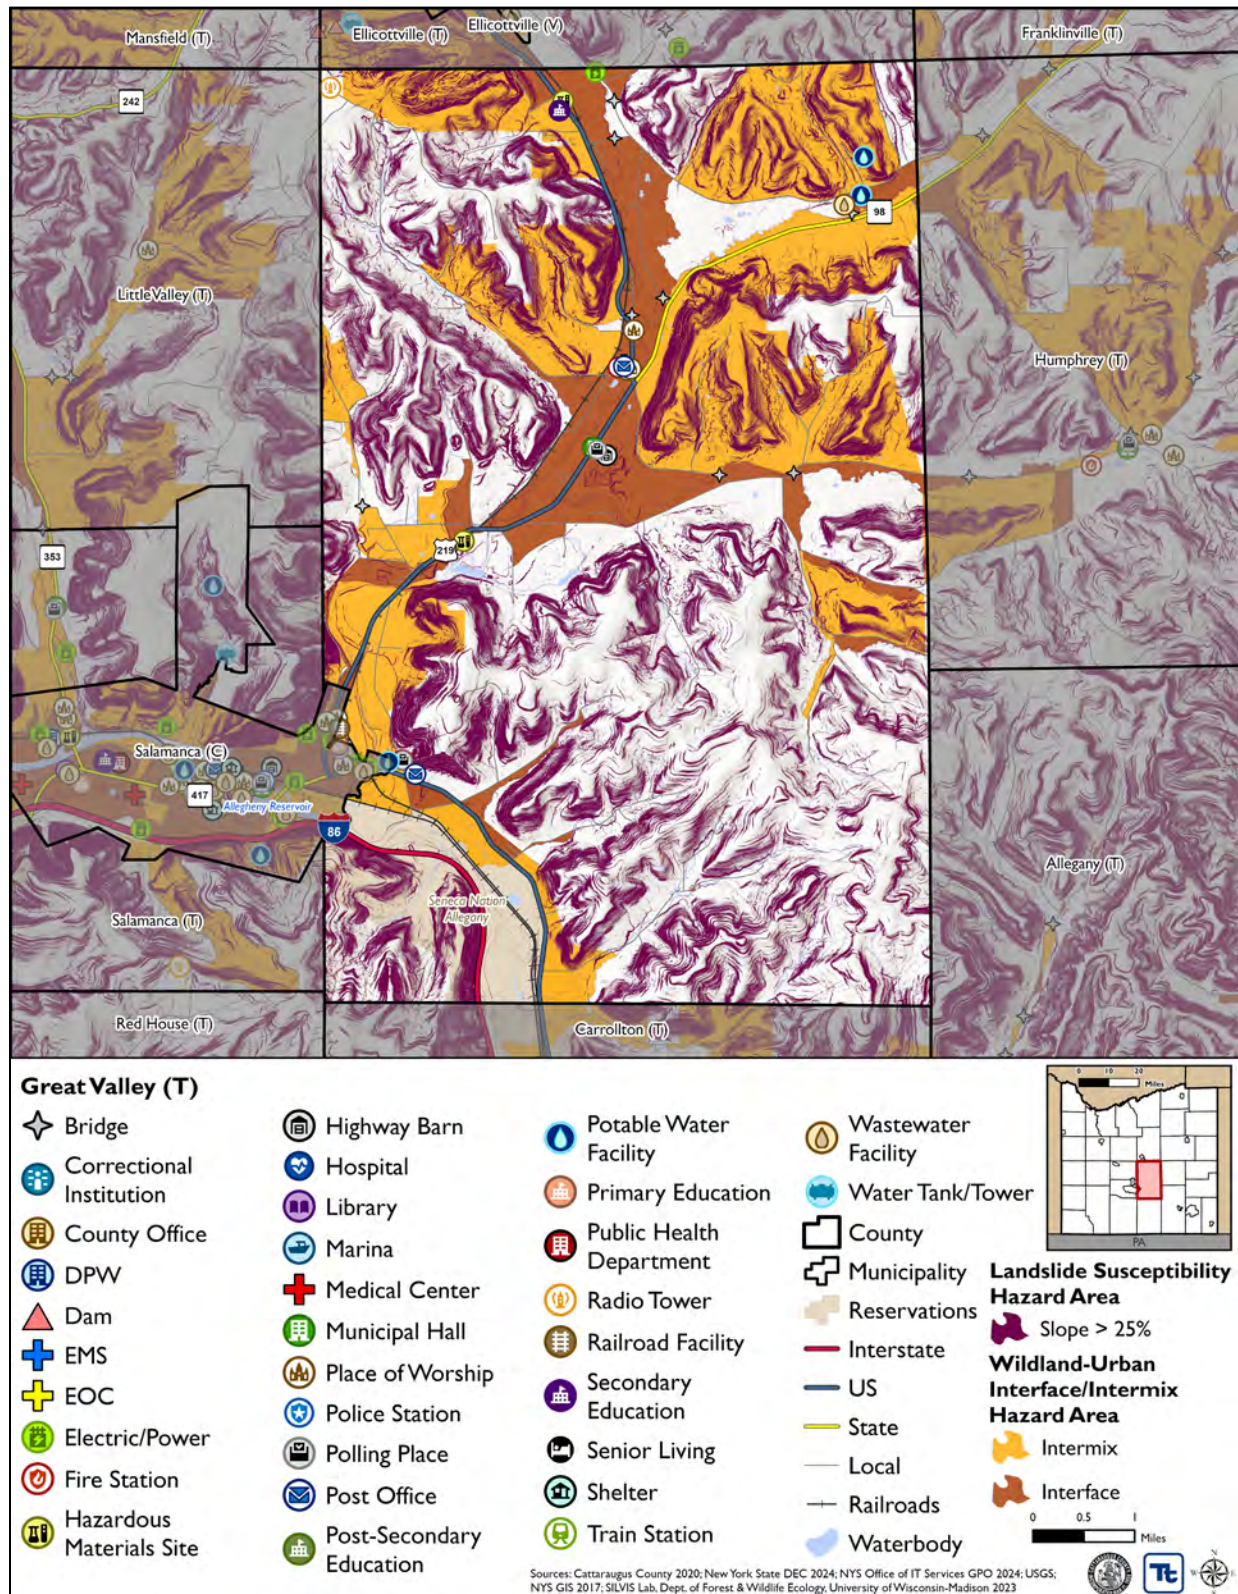

Figure 20-1. Great Valley Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 20-2. Great Valley Landslide and Wildfire Hazard Area Extent and Location Map

20.6.2 Hazard Event History

The history of natural and non-natural hazard events in Great Valley is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 20-14 provides details on loss and damage in Great Valley during hazard events since the last hazard mitigation plan update.

Table 20-14. Hazard Event History in Great Valley

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Great Valley
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damages or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town abided by social distancing, masking mandates, and work from home orders.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damages or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damages or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Great Valley
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

20.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Great Valley .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Great Valley reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town agreed with the hazard rankings.

Table 20-15 shows Great Valley's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 20-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Low
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Low

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 20-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

20.6.4 Identified Issues

After a review of Great Valley's hazard event history, hazard rankings, hazard location, and current capabilities, Great Valley identified the following vulnerabilities within the community:

- The United Methodist Church of Great Valley is located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Klawitter Rd
 - U.S. Route 219, North of its Rt 98 intersection with State Route 98
 - U.S. Route 219 by Peth Road
 - U.S. Route 219 by Porter Hollow Road
- The Town has dams within its jurisdiction. Despite not being identified as high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The Town has one repetitive loss property, but other properties may be impacted by flooding as well.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.

- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Christian Hollow Road
 - Thorpe Hollow Road
 - Plum Brook Road
- Christian Hollow Road has been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms in Great Valley Creek and its tributary. Christian Hollow Road may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding.
- There are internet access issues in the Town which negatively influences emergency communication. A lack of ability to communicate can impact an individual's ability to understand or learn how to reduce their risk to hazards and mitigate those risks. A lack of internet connectivity can also impact first responders, as they must be able to communicate during events or incidents associated with all hazards of concern.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Great Valley 09
 - Great Valley 10
 - Great Valley 17
 - Great Valley 19
 - Great Valley 20

20.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

20.7.1 Past Mitigation Action Status

Table 20-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

20.7.2 Additional Mitigation Efforts

Great Valley did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 20-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Great Valley-001	United Methodist Church of Great Valley Outreach	Flood	FPA	<p>Problem: The United Methodist Church of Great Valley is located in the Special Flood Hazard Area.</p> <p>Solution: The FPA will conduct outreach to the facility manager to discuss the facility's flood exposure and potential mitigation actions</p>	<p>1. No Progress</p> <p>2. Other projects took precedent.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Great Valley-002	Increase Cell Coverage	All Hazards	Administration	<p>Problem: Limited cell service and internet access reduces the capability of emergency staff to alert the community of hazard events.</p> <p>Solution: The town will work with cell phone and internet providers to increase emergency communications and public access to vital information</p>	<p>1. In Progress</p> <p>2. Utility companies have taken steps to increase reception.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Great Valley-003	Culvert Upgrades	Flood, Severe Storm	Engineer	<p>Problem: Culverts on Thorpe Hollow Road and Plum Brook Road require replacement.</p> <p>Solution: The town will replace the 6' diameter boiler shell on Thorpe Hollow and 3 or 4 culverts on Plum Brook Road.</p>	<p>1. In Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Great Valley-004	Christian Hollow Road Stabilization	Flood, Severe Storm	Engineer	<p>Problem: Christian Hollow Road has erosional issues.</p> <p>Solution: The town will secure the shoulders of Christian Hollow Road. Areas where the hillside is slumping into the road will be carved back. Areas where the road bank is eroded away will be regraded and secured.</p>	<p>1. In Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Great Valley-005	Christian Hollow Road Culvert	Flood, Severe Storm	Engineer	<p>Problem: ~35" and ~42" outdated culverts are hydraulically undersized and environmentally insensitive.</p> <p>Solution: The town will replace and upgrade size and relocate culverts in streambed to improve currently limited trout propagation and improve drainage.</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Great Valley-006	FPA Training	Flood	Administration	<p>Problem: Floodplain administration staff require additional training.</p> <p>Solution: The Town FPA and staff who assist with floodplain administration will attend trainings and workshops offered by FEMA and NYS to develop additional floodplain administration skills.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Great Valley-007	Wildfire Outreach	Wildfire	Administration	<p>Problem: Additional public education on wildfire risk is needed.</p> <p>Solution: The town will conduct outreach to residents, business owners, and organizations about what they can do to protect their structures from wildfires.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Great Valley-008	Flood Damage Prevention Ordinance	Flood	NFIP Floodplain Administrator	<p>Problem: The Town of Great Valley's flood damage prevention ordinance requires update.</p> <p>Solution: The town will adopt an updated flood damage prevention ordinance to maintain NFIP compliance.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Great Valley-009	Repetitive Loss Properties	Flood, Severe Storm	NFIP Floodplain Administrator, supported by homeowners	<p>Problem: Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The Town of Great Valley has four repetitive loss properties. However, additional properties have likely also been impacted by flooding.</p> <p>Solution: Conduct outreach to 15 flood-prone property owners, including RL/SRL property owners and provide information on mitigation alternatives. After preferred mitigation measures are identified, collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating residential homes in the flood prone areas that experience frequent flooding (high risk areas).</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

20.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Great Valley participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 "Selecting Appropriate Mitigation Measures for Floodprone Structures" (March 2007)
- FEMA "Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards" (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Great Valley would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 20-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 20-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 20-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					
Flood	X	X		X	X		X		X	
Landslide	X				X					
Pandemic				X			X			
Severe Storm	X	X			X				X	
Severe Winter Storm	X	X			X				X	
Utility Failure	X	X							X	X
Wildfire				X			X			

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 20-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-GreatValley-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-GreatValley-02	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-GreatValley-03	Dam Owner Partnership	1	1	1	1	1	1	0	1	1	0	1	1	1	0	11	High
2025-GreatValley-04	Repetitive Loss Properties	1	1	1	1	1	0	1	1	1	0	1	1	0	1	11	High
2025-GreatValley-05	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-GreatValley-06	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-GreatValley-07	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-GreatValley-08	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-GreatValley-09	Road Erosion Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-GreatValley-10	Internet Accessibility	1	1	1	1	0	0	0	1	1	1	0	1	1	0	9	Medium
2025-GreatValley-11	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-GreatValley-12	Landslide Prone Roads Inventory	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-GreatValley-13	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-GreatValleyT-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The United Methodist Church of Great Valley is located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.										
Description of the Solution:	<p>The Town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the Town will carry out the option.</p>										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Town.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-GreatValleyT-02. Floodprone Roads

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Engineering, NYS DOT, US DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	<p>Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none">• Klawitter Rd• U.S. Route 219, North of its Rt 98 intersection with State Route 98• U.S. Route 219 by Peth Road• U.S. Route 219 by Porter Hollow Road										
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none">• Elevation of roadways• Installation or improvement of drainage systems• Regrading of roadway and soils• Resurfacing or reshaping roadways										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate all flood-prone road system</td><td>Not feasible</td></tr><tr><td>Raise all flood prone roads</td><td>Cost prohibitive</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Relocate all flood-prone road system	Not feasible	Raise all flood prone roads	Cost prohibitive		
Action	Evaluation										
No Action	Current problem exists										
Relocate all flood-prone road system	Not feasible										
Raise all flood prone roads	Cost prohibitive										

Action 2025-GreatValleyT-03. Dam Owner Partnership

Lead Agency:	Town Board										
Supporting Agencies:	NYS DEC, Dam Owner										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Town has a dam within its jurisdiction. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.										
Description of the Solution:	The Town will work with the owners of the dams to ensure inspections and safety procedures are up to date. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Dam Owner will pursue funding support, permit approval from NYS DEC, and implement the cost-effective measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3										
Benefits:	This action will improve the safety and security of those who live near the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness for those living near areas where the dams are located.										
Impact on Future Development:	Future development near the dams will be more secure as safety procedures and inspections are regularly performed on the dams.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Utilize information from NYS DEC</td> <td>Owners may not be required to submit a safety plan to the State</td> </tr> <tr> <td>Utilize information from the National Inventory of Dams</td> <td>Not all dams are listed on the inventory</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State	Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory	
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State										
Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory										

Action 2025-GreatValleyT-04. Repetitive Loss Properties

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The Town has one repetitive loss property, but other properties may be impacted by flooding as well.										
Description of the Solution:	The Town will conduct outreach to the impacted properties and will provide information on mitigation alternatives. After preferred mitigation measures are identified, the Town will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating of the affected properties that experience frequent flooding. The parameters for this initiative would be funding, benefits versus cost, and willing participation of property owners.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA FMA, FMA SWIFT, Town Budget, County Budget, Property Owners										
Implementation Timeline:	3 years										
Goals Met:	1										
Benefits:	This action would foster comprehensive floodplain management by removing at risk properties from the flood hazard area or elevating properties to reduce the flood risk.										
Impact on Socially Vulnerable Populations:	Collecting data regarding homeowners that reside within flood prone areas provides an opportunity to introduce location-specific opportunities for assistance. Socially vulnerable populations may be able to have houses elevated or acquired when it would otherwise be unaffordable.										
Impact on Future Development:	Increased outreach to homeowners within a flood prone area will limit construction in areas that are prone to hazard events. Homes may be acquired, which will remove those structures from the floodplain and prevent future development on those sites.										
Impact on Critical Facilities/Lifelines:	Removing structures from the floodplain decreases the demand on utilities and emergency services including health and medical, law enforcement, and search and rescue.										
Impact on Capabilities:	Outreach which promotes the removal of risk from the immediate floodplain via acquisition of properties will free up resources for search and rescue and other emergency operations as needed. This action will enhance the Town's current NFIP capabilities.										
Climate Change Considerations:	Climate change is likely to increase the frequency and severity of severe rainfall, flash flooding, riverine flooding, and coastal flooding from sea level rise and storm surge events. Removing structures from the floodplain will reduce the response and recovery costs as a result of these events and decrease the loss of human life as a result of these events. Elevating structures will reduce the recovery costs.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Levee around floodplain</td><td>Costly, not enough room.</td></tr><tr><td>Deployable flood barriers</td><td>Requires deployment. Action	Evaluation										
No Action	Current problem exists										
Levee around floodplain	Costly, not enough room.										
Deployable flood barriers	Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.										

Action 2025-GreatValleyT-05. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.										
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.										
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.										
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.										
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.										
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.										
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Update only freeboard requirements</td> <td>Other areas of the ordinance which need to be updated would not be</td> </tr> <tr> <td>Leave NFIP</td> <td>Residents lose flood insurance coverage</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Update only freeboard requirements	Other areas of the ordinance which need to be updated would not be	Leave NFIP	Residents lose flood insurance coverage
Action	Evaluation										
No Action	Current problem exists										
Update only freeboard requirements	Other areas of the ordinance which need to be updated would not be										
Leave NFIP	Residents lose flood insurance coverage										

Action 2025-GreatValleyT-06. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><tr><th>Action</th><th>Evaluation</th></tr><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources</td><td>Resources may be generalized and not specific to the risks in the Town</td></tr><tr><td>Use only a few methods for distribution</td><td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td></tr></table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-GreatValleyT-07. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-GreatValleyT-08. Undersized Culverts

Lead Agency:	Highway										
Supporting Agencies:	Code Enforcement, Engineer										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads: <ul style="list-style-type: none"> • Christian Hollow Road • Thorpe Hollow Road • Plum Brook Road 										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts in Town that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove roadway</td> <td>Roadway cannot be removed</td> </tr> <tr> <td>Raingardens</td> <td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-GreatValleyT-09. Road Erosion Mitigation

Lead Agency:	Highway Department		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Christian Hollow Road has been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms in Great Valley Creek and its tributary. Christian Hollow Road may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding.		
Description of the Solution:	The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include: <ul style="list-style-type: none"> Elevation of roadways Installation or improvement of drainage systems Regrading of roadway and soils Resurfacing or reshaping roadways 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all eroded road system		Not feasible
	Raise all eroded roads		Cost prohibitive

Action 2025-GreatValleyT-10. Internet Accessibility

Lead Agency:	Town Board										
Supporting Agencies:	Cable and Internet Providers										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	There are internet access issues in the Town which negatively influences emergency communication. A lack of ability to communicate can impact an individual's ability to understand or learn how to reduce their risk to hazards and mitigate those risks. A lack of internet connectivity can also impact first responders, as they must be able to communicate during events or incidents associated with all hazards of concern.										
Description of the Solution:	The Town will work with cable and internet providers to identify locations which are still experiencing problems with connectivity. Cable and internet providers will improve lines to ensure connectivity and reduce the risk of utility failure.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, Cable and Internet Providers										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	Residents, business owners, first responders, and workers within the Town will have better access to internet. Access to internet is beneficial in learning how to prepare and mitigate risk associated with natural and manmade hazards. Furthermore, internet connectivity can result in the better facilitation of education and outreach.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may not have the financial means to purchase an internet service with high speeds to ensure connectivity with current capabilities. This action will assist in providing these populations with adequate internet.										
Impact on Future Development:	Connectivity will be available for individuals living in future developed areas.										
Impact on Critical Facilities/Lifelines:	Critical facilities may benefit from this action because it allows them to have increased communication and connections to other critical facilities and emergency responders.										
Impact on Capabilities:	This action will increase the Town's ability to effectively conduct outreach via the internet.										
Climate Change Considerations:	Climate change is leading to an increase in severity and frequency in severe weather.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)										
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Town buys signal extender for all properties</td><td>Cost prohibitive</td></tr><tr><td>Switch providers</td><td>May be restrictive due to availability</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Town buys signal extender for all properties	Cost prohibitive	Switch providers	May be restrictive due to availability
Action	Evaluation										
No Action	Current problem exists										
Town buys signal extender for all properties	Cost prohibitive										
Switch providers	May be restrictive due to availability										

Action 2025-GreatValleyT-11. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-GreatValleyT-12. Landslide Prone Roads Inventory

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.										
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, The Engineer will work with the Highway Department to prioritize roadways and identify possible mitigation measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	3 years										
Goals Met:	1, 4, 6										
Benefits:	This action will identify locations with steep grades (above 20 percent) and provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.										
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.										
Impact on Future Development:	The identification of at-risk roads may lead to restrictions for future development.										
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action may improve the Town's regulatory capabilities.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Do not use inventory to inform a steep slope ordinance</td> <td>Would not restrict future development, could increase at risk properties and structures</td> </tr> <tr> <td>Do not use inventory to inform future projects</td> <td>Risk would not be reduced</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Do not use inventory to inform a steep slope ordinance	Would not restrict future development, could increase at risk properties and structures	Do not use inventory to inform future projects	Risk would not be reduced
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Do not use inventory to inform a steep slope ordinance	Would not restrict future development, could increase at risk properties and structures										
Do not use inventory to inform future projects	Risk would not be reduced										

Action 2025-GreatValleyT-13. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none"> • Great Valley 09 • Great Valley 10 • Great Valley 17 • Great Valley 19 • Great Valley 20 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

21. TOWN OF HINSDALE

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Hinsdale with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Hinsdale, describes who participated in the planning process, assesses Hinsdale's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

21.1 HAZARD MITIGATION PLANNING TEAM

The Town of Hinsdale identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 21-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 21-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Jeff VanDeCar, Town Supervisor Address: 4129 NYS RT 16 PO 95, Hinsdale, NY 14743 Phone Number: 716-557-2478 Email: hinsdale.supervisor@gmail.com	Name/Title: Jeremy Guthrie, Highway Superintendent Address: POB 95 Hinsdale, NY 14743 Phone Number: 716-328-4022 Email: hinsdalehighway@gmail.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Ryan Reed, Code Enforcement Officer Address: 4129 NYS RT 16 PO 95, Hinsdale, NY 14743 Phone Number: 585-968-0129 Email: reed.NYcodes@gmail.com	

21.2 COMMUNITY PROFILE

The Town of Hinsdale lies on the eastern border of Cattaraugus County in western New York State. The Town of Hinsdale has a total area of 38.77 square miles. The town is bordered to the northwest by the Town of Humphrey, north by the Town of Ischua, the east border is formed by the towns of Cuba and Clarksville in Allegany County, south by Town of Olean and the Town of Portville, and southwest by the Town of Allegany. There are three hamlets located within the town: Haskell Flats, Hinsdale, and Maplehurst.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 6.6 percent of the

population is 5 years of age or younger, 21.2 percent is 65 years of age or older, 0 percent is non-English speaking, 14.6 percent is below the poverty threshold, and 23.3 percent is considered disabled.

21.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Hinsdale performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Hinsdale to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

21.3.1 Planning and Regulatory Capability and Integration

Table 21-2 summarizes the planning and regulatory tools that are available to Hinsdale.

Table 21-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 2, 2022: NYS Uniform Fire and Building Code	State and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk?				
This local law provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the Town of Hinsdale. This local law is adopted pursuant to section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, the Energy Code other state law, or other section of this local law, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this local law and repealing Local Law #2-2007.				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Site Plan Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Local Law #1, 1989 – Flood Damage Prevention	Federal, State, County and Local	Town Board / Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? It is the purpose of this local law to promote the public health, safety, and general welfare, to reduce degradation of the environment, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: <ol style="list-style-type: none">1. regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;2. require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;3. control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;4. control filling, grading, dredging, and other development which may increase erosion or flood damages;5. regulate the construction of flood barriers which will unnaturally divert flood waters, or which may increase flood hazards to other lands; and6. qualify and maintain participation in the National Flood Insurance program				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Change Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
PLANNING DOCUMENTS				
General/Comprehensive Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Capital Improvement Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Disaster Debris Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Floodplain Management or Watershed Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Open Space Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?				
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan	Yes	Cattaraugus County Comprehensive Emergency Management Plan	County	Cattaraugus County Office of Emergency Services
How has or will this be integrated with the HMP and how does this reduce risk? Identifies available resources, resource gaps, vulnerable areas and populations, and communication methods for response to emergencies. This provides a foundation for the development of hazard mitigation goals, objectives, and actions to ensure any gaps and needs are addressed and all capabilities are being effectively utilized.				
Continuity of Operations Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Substantial Damage Response Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Threat and Hazard Identification and Risk Assessment	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Post-Disaster Recovery Plan	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?

Public Health Plan	Yes	PHEP	County	Health Department
How has or will this be integrated with the HMP and how does this reduce risk? Planning for public health emergencies can identify tactics and needed resources to prevent the spread of disease or infection before it occurs.				

Other	No	-	-	-
--------------	----	---	---	---

How has or will this be integrated with the HMP and how does this reduce risk?

21.3.2 Development and Permitting Capability

Table 21-3 summarizes the capabilities of Hinsdale to oversee and track development.

Table 21-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	
Do you have a buildable land inventory?		
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	No	-
Describe the level of buildout in your jurisdiction.	N/A	

21.3.3 Administrative and Technical Capability

Table 21-4 summarizes potential staff and personnel resources available to Hinsdale and their current responsibilities that contribute to hazard mitigation.

Table 21-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	No	-
Planning Department	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Emergency response with neighboring communities
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	Clark, Patterson, Lee-Olean Building, Mark Allianello, Ellicottville-Water
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	Yes	Town Supervisor
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	Yes	
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

21.3.4 Fiscal Capability

Table 21-5 summarizes financial resources available to Hinsdale.

Table 21-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

21.3.5 Education and Outreach Capability

Table 21-6 summarizes the education and outreach resources available to Hinsdale.

Table 21-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	Yes	Southern Tier West
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Website, TV and Radio
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Cattaraugus County Emergency Services
Warning systems for hazard events	Yes	County
Natural disaster/safety programs in place for schools	Yes	School has plan with County contract with Town and VFD for emergency services

Outreach Resources	Available? (Yes/No)	Comment
Organizations that conduct outreach to socially vulnerable populations and underserved populations	Yes	Hinsdale Food Pantry, Hinsdale Volunteer Fire Company
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	Yes	Cattaraugus County, Hinsdale Volunteer Fire Department

21.3.6 Community Classifications

Table 21-7 summarizes classifications for community programs available to Hinsdale.

Table 21-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	6/6Y	2019
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

21.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 21-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 21-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

21.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 21-1 is responsible for maintaining this information.

21.4.1 NFIP Statistics

Table 21-9 summarizes the NFIP policy and claim statistics for Hinsdale.

Table 21-9. Hinsdale NFIP Summary of Policy and Claim Statistics

# Policies	5
# Claims (Losses)	6
Total Loss Payments	\$9,875.84
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

21.4.2 Flood Vulnerability Summary

Table 21-10 provides a summary of the NFIP program in Hinsdale.

Table 21-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas within the SFHA
Do you maintain a list of properties that have been damaged by flooding?	No

NFIP Topic	Comments
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Unknown
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Unknown
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	If the improvement is valued at 50 percent or more of the existing structure's value.
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: June 16, 2011 CAV: July 14, 2009
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1989 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	November 3, 1989
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements

NFIP Topic	Comments
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	No
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

21.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 21-11 through Table 21-13.

Table 21-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	4	0	2	6
Permits within SFHA	0	0	0	0
2024				
Total Permits	5	0	1	6
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 21-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
------------------------------	---------------------	-------------------------	---	---------------------	-------------------------------------

The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.

* Only location-specific hazard zones or vulnerabilities identified.

Table 21-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
------------------------------	---------------------	-------------------------	---	---------------------	-------------------------------------

The Town did not indicate any known or anticipated major development or infrastructure in the next five years.

21.6 JURISDICTIONAL RISK ASSESSMENT

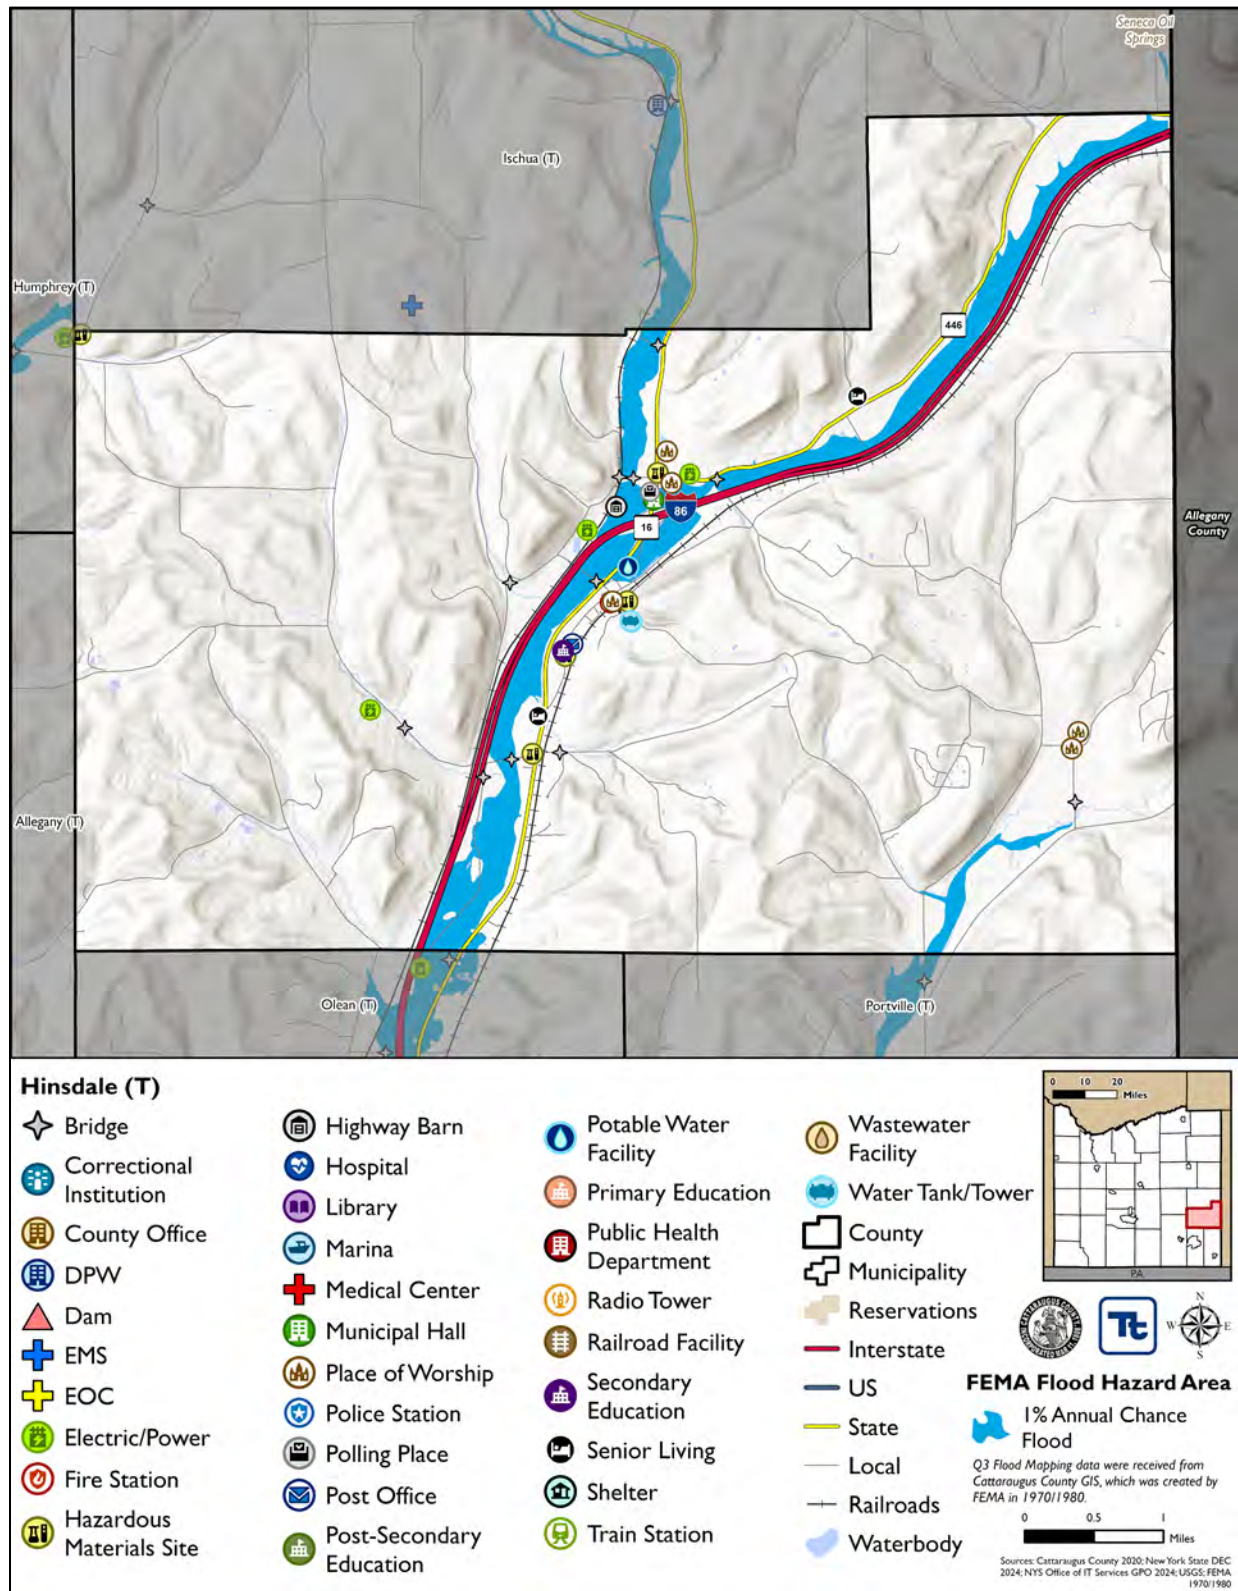

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Hinsdale's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

21.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 21-1 through Figure 21-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Hinsdale has significant exposure. The maps show the location of potential new development, where available.

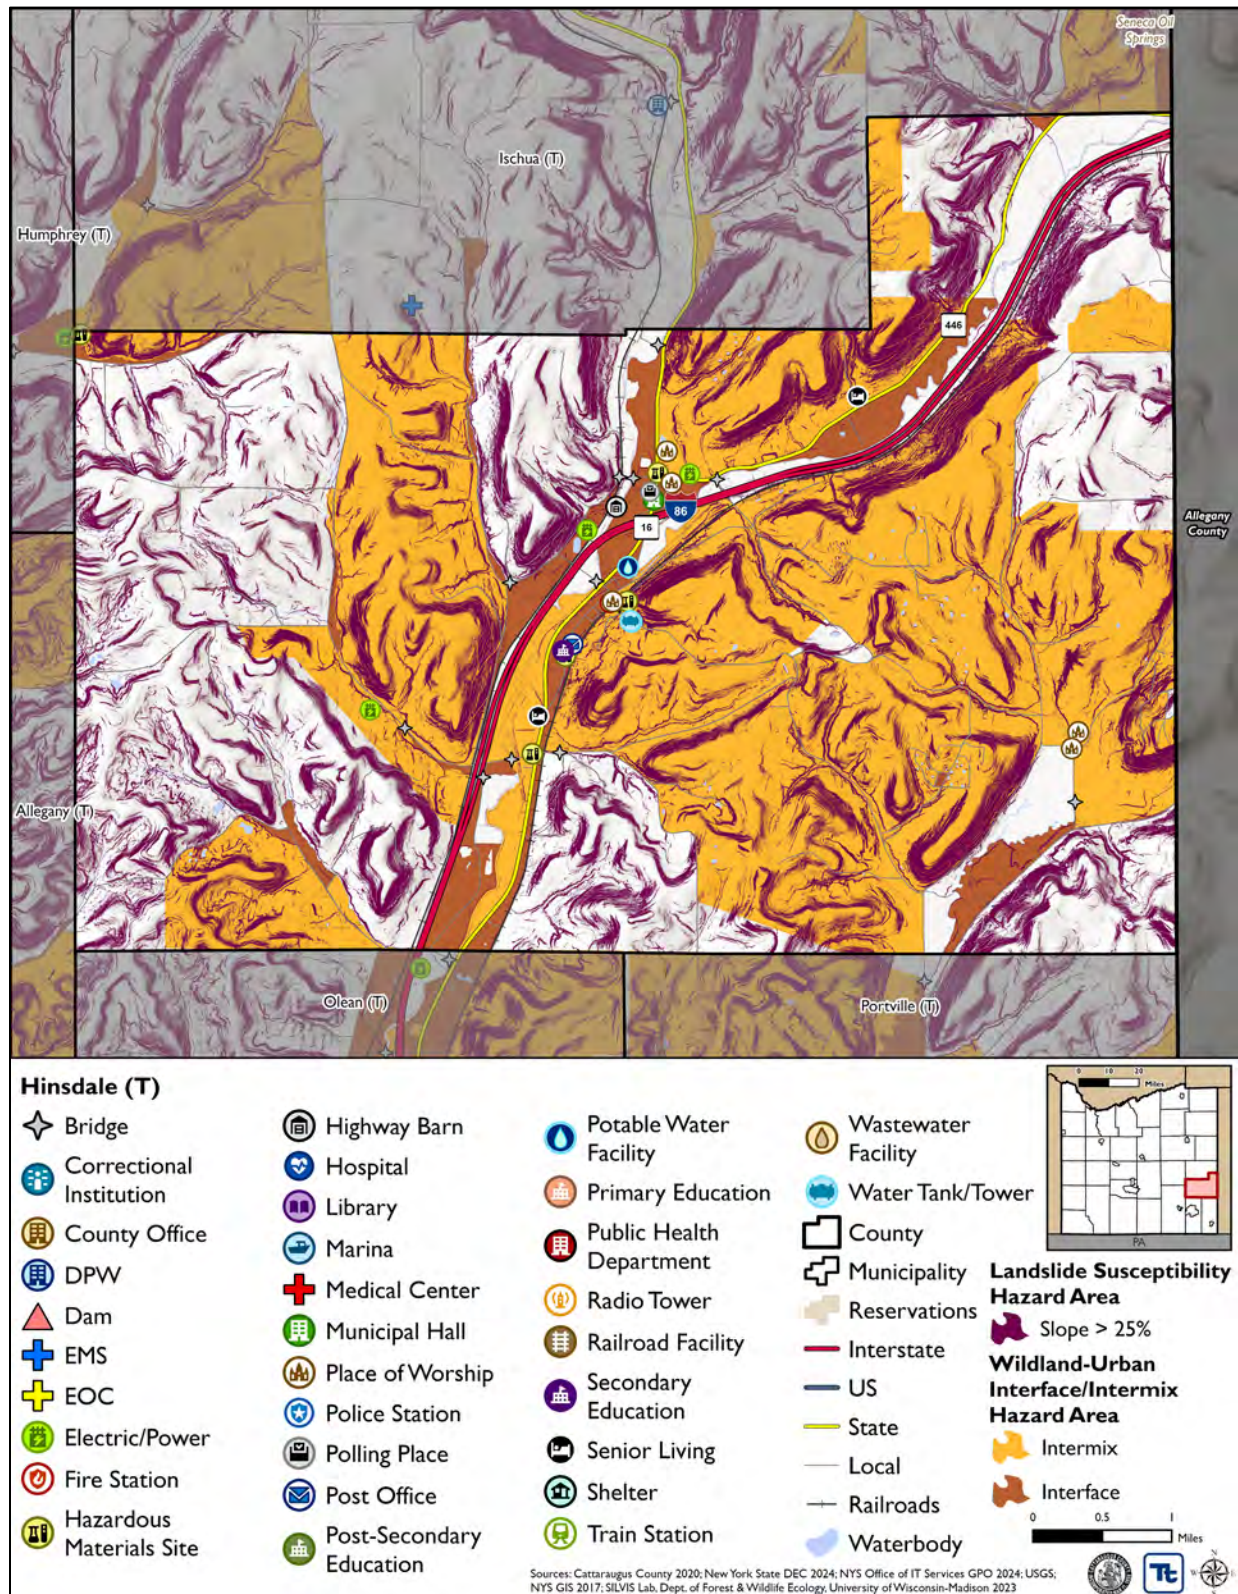

Figure 21-1. Hinsdale Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 21-2. Hinsdale Landslide and Wildfire Hazard Area Extent and Location Map

21.6.2 Hazard Event History

The history of natural and non-natural hazard events in Hinsdale is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 21-14 provides details on loss and damage in Hinsdale during hazard events since the last hazard mitigation plan update.

Table 21-14. Hazard Event History in Hinsdale

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Hinsdale
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damage or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town did not incur any documented damage or losses.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damage or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damage or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damage or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damage or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damage or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damage or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damage or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damage or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damage or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

21.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Hinsdale.

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Hinsdale reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town agreed with the preliminary rankings.

Table 21-15 shows Hinsdale's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 21-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Low
Flood	Medium
Landslide	Medium
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 21-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 21-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event

21.6.4 Identified Issues

After a review of Hinsdale's hazard event history, hazard rankings, hazard location, and current capabilities, Hinsdale identified the following vulnerabilities within the community:

- The Municipal Hall, Highway Barn, and a Potable Water Facility are located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.
- The Town has dams within its jurisdiction. Despite not being identified as high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Conditions on Plank Road make it susceptible to landslides. Landslides may be able to be mitigated by cutting banks to prevent erosion.
- Water under the bridge on Pennsylvania Road backs up and causes flooding, which leads to road damage, bank erosion, flooding, and sitting water. Flooding on the bridge and on Pennsylvania Road can not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:

- Jollytown Road
- Sherlock Hollow Road
- Pennsylvania Road
- The area surrounding Willow Road Creek is prone to flooding and is approaching nearby roads and properties. Willow Road Creek has bank erosion issues, threatening encroachment onto nearby roads. Creek banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.
- During extreme rain events have caused washouts on Union Valley Road and erosion of personal property occur. There are two homes in imminent danger of being destroyed as well as three other private properties which have had repeated damage during the past 10 years. Other properties may be impacted by flooding in Town as well.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering.
- Critical facilities require backup power to ensure continuity of operations. The Town Hall does not have back-up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- Salt and sand exposed to the open-air leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow. The salt sand shed at 4129 Route 16 is losing money due to salt dust/dirt blowing on residential properties.
- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- National Fuel Gas Supply Corp, Niagara Mohawk Power Corp, Crosbys #0774-1085 3511 Rt 16, Hinsdale – USID water tank 95363 1437 Congress Rd, and Underwood Manor, an assisted living facility, are potentially exposed to wildfires. Protecting these properties and infrastructure from wildfires is crucial to

ensuring continuity of operations and services for their consumers. Exposure to this hazard can cause damage or destruction.

- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Hinsdale 26
 - Hinsdale 42
 - Hinsdale 57
 - Hinsdale 62

21.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

21.7.1 Past Mitigation Action Status

Table 21-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

21.7.2 Additional Mitigation Efforts

Hinsdale did not identify any additional mitigation efforts completed since the last HMP.

Table 21-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Hinsdale-001	Protect the Town of Hinsdale Highway Barn to the 0.2% annual chance flood event	Flood	Engineer, facility operator	<p>Problem: The Town of Hinsdale Highway Barn is in the special flood hazard area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.</p> <p>Solution: The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Highway Barn to protect it to the 0.2% annual chance level. Options include:</p> <ul style="list-style-type: none">•Elevation of facility•Floodproofing of facility•Mobile flood barriers <p>Once the most cost-effective option is identified, the town will carry out the option.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-002	Protect the Town of Hinsdale Municipal Hall to the 0.2% annual chance flood event	Flood	Engineer, facility operator	<p>Problem: The Town of Hinsdale Municipal Hall is in the special flood hazard area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				<p>Solution: The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Municipal Hall to protect it to the 0.2% annual chance level. Options include:</p> <ul style="list-style-type: none">•Elevation of facility•Floodproofing of facility•Mobile flood barriers <p>Once the most cost-effective option is identified, the town will carry out the option.</p>		
2020-Hinsdale-003	Protect the Town of Hinsdale Potable Water Facility to the 0.2% annual chance flood event	Flood	Engineer, facility operator	<p>Problem: The Town of Hinsdale Potable Water Facility is in the special flood hazard area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.</p> <p>Solution: The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Potable Water Facility to protect it to the 0.2% annual chance level. Options include:</p>	<p>1. No Progress 2. Other projects took precedent.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				<ul style="list-style-type: none">•Elevation of facility•Floodproofing of facility•Mobile flood barriers Once the most cost-effective option is identified, the town will carry out the option.		
2020-Hinsdale-004	Update the Flood Damage Prevention Ordinance	Flood	Town board	<p>Problem: The Town of Hinsdale lacks an updated flood damage prevention ordinance.</p> <p>Solution: The town will develop an updated flood damage prevention ordinance.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-005	Repave/stabilize Plank Road and mitigate risk of landslide	Landslide	Highway Department	<p>Problem: Landslide on Plank Rd</p> <p>Solution: Repave/stabilize road to mitigate the risk of future landslides on Plank Rd</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-006	Expand bridge on Pennsylvania Road	Flood, Severe Storm	Highway Department	<p>Problem: Water under the bridge on Pennsylvania Rd backs up and causes flooding.</p> <p>Solution: Detailed flood study at this location, designing the bridge to allow the base flood to pass underneath</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Hinsdale-007	Resize culvert on Jollytown Road	Flood, Severe Storm	Highway Department	Problem: Culvert is undersized at Jollytown Road Solution: Replace culvert to mitigate flooding	1. In Progress 2. Study is being completed by Cattaraugus County Soil and Water, the County DPW, and NYS DEC.	1. Include 2. Working with Cattaraugus County Soil and Water. Looking at using a DEC grant. 3. -
2020-Hinsdale-008	Debris removal of Willow Road Creek	Flood, Severe Storm	Cattaraugus County Soil and Water, DEC	Problem: The creek is getting close to Willow Road causing flooding and washout Solution: Remove debris from creek on a regular basis to prevent Will Road from flooding	1. In Progress 2. Emergency permit issued by NYS DEC on April 16, 2025. Work has not yet been performed.	1. Include 2. No Changes 3. -
2020-Hinsdale-009	Extend culvert and pipe on Sherlock Hollow	Flood, Severe Storm	Highway Department	Problem: Flooding along Sherlock Hollow to extend culvert and pipe on roadway. Solution: Extend culvert and pipe	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-010	Union Valley Road culvert and stream remediation	Flood, Severe Storm	Highway Department	Problem: During extreme rain events washouts on road and erosion to personal property occur. Two homes in imminent danger of being destroyed as well as three other private have had repeated damage during the past 10 years.	1. In Progress 2. Financial constraints	1. Include 2. Severely is impacting people's property. Every time there is a severe precipitation event, the stream moves closer. 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: Construct a culvert along road to mitigate flooding and erosion. Complete full hydrology study of the creek from Morgan Hollow Road to NYS Route 16.		
2020-Hinsdale-011	Floodplain Administrator to attend training on floodplain management	Flood	Cattaraugus County Emergency Management/Cattaraugus County Codes Department	Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Solution: Obtain/host training and certification for floodplain managers	1. In Progress 2. Lack of training availability.	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-012	Provide information to residents, business owners, and organizations about what they can do to prevent their structures from wildfires.	Wildfires	Town board	Problem: Additional public education on wildfire risk is needed. Solution: The town will develop an outreach program to educate the public about wildfires and what they can do to protect their structures.	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-013	Identify temporary housing location(s) for residents in the	All Hazards	Town Supervisor/Town Clerk	Problem: The Town of Hinsdale currently does not have a temporary housing location in the event of an emergency.	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	event of an emergency.			Solution: The town will confirm locations and determine what improvements need to be made to comply with building and fire codes.		
2020-Hinsdale-014	Generator for Town Hall	All Hazards	Town	<p>Problem: Town Hall does not have back up power in the event the power goes out</p> <p>Solution: Purchase and install a 30 kW generator with auto disconnect switch</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-015	Generator for Hinsdale Water Treatment Plant	All Hazards	Town	<p>Problem: Lack of backup power for the Water Treatment Plant</p> <p>Solution: Purchase and install a 45 kW 3-phase generator with auto disconnect switch</p>	1. Completed 2. ARPA funds were used to complete this.	1. Discontinue 2. Not applicable 3. ARPA funds were used to complete this.
2020-Hinsdale-016	Upgrade culvert on Pennsylvania Rd	Flood, severe storm	Town Hwy Dept., County, NYS and Railroad	<p>Problem: Pennsylvania Rd near Fay Hollow frequently floods. Olean Creek drainage also needs to be cleaned</p> <p>Solution: Upgrade culvert on Pennsylvania Road to mitigate the risk of flooding</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Hinsdale-017	Potential acquisition or elevation project	Flood	Town, homeowners	<p>Problem: Three homes on Union Valley Road that need to be protected from flooding.</p> <p>Solution: Assess and determine best action to protect homes from flooding (through elevation or buyout)</p>	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-018	Environmental Controls for salt sand shed	Severe storm	Town	<p>Problem: Salt sand shed at 4129 Route 16 is losing money due to salt dust/dirt blowing on residential properties</p> <p>Solution: Determine the best controls to prevent the loss of salt and sand</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-019	Update the Emergency Operations Plan	All Hazards	County, Town	<p>Problem: Outdated emergency operation plan</p> <p>Solution: The town will work with the county on an update to the county CEMP.</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Hinsdale-020	Update Building Codes	All Hazards	County, Town	<p>Problem: Outdated building codes</p> <p>Solution: Update the town's building codes</p>	1. Completed 2. Building codes were updated in October 2022	1. Discontinue 2. No Changes 3. Building codes were updated in October 2022

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Hinsdale-021	Assess the site-specific vegetation conditions and determine necessary mitigation measures to protect facilities from wildfires	Wildfire	Town, Facility owners	<p>Problem: National Fuel Gas Supply Corp, Niagara Mohawk Power Corp, Crosbys #0774-1085 3511 Rt 16, Hinsdale – USID water tank 95363 1437 Congress Rd, and Underwood Manor- Assisted Living potentially exposed to wildfires</p> <p>Solution: Assess the site-specific vegetation conditions and determine necessary mitigation measures to protect critical facilities</p>	<p>1. No Progress 2. Other projects took precedent.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>

21.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Hinsdale participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Hinsdale would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 21-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 21-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 21-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					X
Flood	X	X	X	X	X	X	X	X	X	X
Landslide	X	X			X					X
Pandemic	X			X			X			X
Severe Storm	X	X	X		X	X		X	X	X
Severe Winter Storm	X	X	X		X			X	X	X
Utility Failure	X	X			X				X	X
Wildfire	X	X		X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 21-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-HinsdaleT-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High

2025-HinsdaleT-14	Salt and Sand Storage Shed	0	0	1	1	1	0	1	1	1	1	1	1	1	0	10	Medium

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-HinsdaleT-15	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-HinsdaleT-16	Critical Facility Wildfire Mitigation Measures	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-HinsdaleT-17	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-HinsdaleT-18	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-HinsdaleT-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The Municipal Hall, Highway Barn, and a Potable Water Facility are located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.		
Description of the Solution:	The Town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include: <ul style="list-style-type: none"> Elevation of facility Floodproofing of facility Mobile flood barriers Once the most cost-effective option is identified, the Town will carry out the option.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget		
Implementation Timeline:	Within 5 Years		
Goals Met:	1, 3, 5		
Benefits:	Ensures continuity of operations of several critical facilities in the Town.		
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.		
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.		
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.		
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.		
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate facility		Relocation is expensive and results in loss or delay of critical services in the immediate area
	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events		Reduction in response times and delay of critical services in the immediate area.

Action 2025-HinsdaleT-02. Dam Owner Partnership

Lead Agency:	Town Board										
Supporting Agencies:	NYS DEC, Dam Owners										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Town has dams within its jurisdiction. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.										
Description of the Solution:	The Town will work with the owners of the dams to ensure inspections and safety procedures are up to date. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Dam Owner will pursue funding support, permit approval from NYS DEC, and implement the cost-effective measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3										
Benefits:	This action will improve the safety and security of those who live near the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness for those living near areas where the dams are located.										
Impact on Future Development:	Future development near the dams will be more secure as safety procedures and inspections are regularly performed on the dams.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Utilize information from NYS DEC</td> <td>Owners may not be required to submit a safety plan to the State</td> </tr> <tr> <td>Utilize information from the National Inventory of Dams</td> <td>Not all dams are listed on the inventory</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State	Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory	
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State										
Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory										

Action 2025-HinsdaleT-03. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources following disaster events</td> <td>Resources may not be available during major widespread events</td> </tr> <tr> <td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td> <td>A plan outlining responsibility is still necessary to prevent missing important requirements</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-HinsdaleT-04. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-HinsdaleT-05. Landslide Mitigation

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Conditions on Plank Road make it susceptible to landslides. Landslides may be able to be mitigated by cutting banks to prevent erosion.										
Description of the Solution:	<p>The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigate landslide risk on Plank Road. Possible mitigation measures include:</p> <ul style="list-style-type: none">• Construction of retaining walls, soil nailing, ground anchor walls• Install horizontal drains to reduce soil saturation• Cut banks along water ways to prevent oversaturated soils from falling• Install netting										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide on Plan Road. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Reconstruct roadway outside of hazard area</td><td>Not feasible</td></tr><tr><td>Close road and reroute traffic around hazard area</td><td>Not feasible, would cause confusion amongst travelers</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Reconstruct roadway outside of hazard area	Not feasible	Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers		
Action	Evaluation										
No Action	Current problem exists										
Reconstruct roadway outside of hazard area	Not feasible										
Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-HinsdaleT-06. Pennsylvania Road Bridge

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Water under the bridge on Pennsylvania Road backs up and causes flooding, which leads to road damage, bank erosion, flooding, and sitting water. Flooding on the bridge and on Pennsylvania Road can not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible.										
Description of the Solution:	The Town Engineer will lead an assessment of the bridge to determine what repairs are necessary or may be feasible. Once a course of action has been identified, the Town will make the improvements.										
Estimated Cost:	High										
Potential Funding Sources:	Town Budget, NYS DOT, BRIDGENY, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	Infrastructure will be protected from future hazard damages. Ensures at least a single transportation route remains accessible to the community.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations reach needed service provided by the Town.										
Impact on Future Development:	Future development in the impacted area will be able to access critical facilities and community lifelines.										
Impact on Critical Facilities/Lifelines:	Ensures transportation routes remain open and accessible to the public for daily use and evacuation needs. Provides a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridge.										
Impact on Capabilities:	Increases community resiliency to flooding events in vulnerable areas that would normally be vulnerable to prolonged isolation after high-water events.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. This could lead to further degradation of the bridge.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Remove bridge</td><td>Not feasible, costly</td></tr><tr><td>Build new bridge</td><td>Not feasible, costly</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Remove bridge	Not feasible, costly	Build new bridge	Not feasible, costly
Action	Evaluation										
No Action	Current problem exists										
Remove bridge	Not feasible, costly										
Build new bridge	Not feasible, costly										

Action 2025-HinsdaleT-07. Undersized Culverts

Lead Agency:	Highway										
Supporting Agencies:	Code Enforcement, Engineer										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads: <ul style="list-style-type: none"> • Jollytown Road • Sherlock Hollow Road • Pennsylvania Road 										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts in Town that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove roadway</td> <td>Roadway cannot be removed</td> </tr> <tr> <td>Raingardens</td> <td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-HinsdaleT-08. Willow Road Creek Erosion

Lead Agency:	Engineering										
Supporting Agencies:	Code Enforcement										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The area surrounding Willow Road Creek is prone to flooding and is approaching nearby roads and properties. Willow Road Creek has bank erosion issues, threatening encroachment onto nearby roads. Creek banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.										
Description of the Solution:	The Town Engineer will assess the feasibility and cost-effectiveness of various stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements to prevent future flooding surrounding Willow Road Creek. With the permit granted from NYS DEC, the Town will regularly remove debris from creek to prevent Willow Road from flooding										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, Town Budget, NYS DEC										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage to properties.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development surrounding Willow Road Creek will have its risk of flood impacts reduced.										
Impact on Critical Facilities/Lifelines:	Critical facilities and community lifelines near Willow Road Creek, including the Fire Hall, Library, and Substations, would have a reduced risk to the flood hazard.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events can lead to an influx of water, resulting in flooding conditions.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input checked="" type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Elevate nearby roads</td> <td>Cost prohibitive</td> </tr> <tr> <td>Acquire all properties which flood</td> <td>Cost prohibitive</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Elevate nearby roads	Cost prohibitive	Acquire all properties which flood	Cost prohibitive		
Action	Evaluation										
No Action	Current problem exists										
Elevate nearby roads	Cost prohibitive										
Acquire all properties which flood	Cost prohibitive										

Action 2025-HinsdaleT-09. Residential Property Flood Mitigation

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board, Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	During extreme rain events have caused washouts on Union Valley Road and erosion of personal property occur. There are two homes in imminent danger of being destroyed as well as three other private properties which have had repeated damage during the past 10 years. Other properties may be impacted by flooding in Town as well.		
Description of the Solution:	<p>The Town will conduct outreach to the impacted properties and will provide information on mitigation alternatives. After preferred mitigation measures are identified, the Town will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating of the affected properties that experience frequent flooding. The parameters for this initiative would be funding, benefits versus cost, and willing participation of property owners.</p> <p>The Town will evaluate the feasibility of constructing a culvert along Union Valley Road to mitigate flooding and erosion. The Town will complete full hydrology study of the creek from Morgan Hollow Road to NYS Route 16.</p>		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA FMA, FMA SWIFT, Town Budget, County Budget, Property Owners		
Implementation Timeline:	3 years		
Goals Met:	1		
Benefits:	This action would foster comprehensive floodplain management by removing at risk properties from the flood hazard area or elevating properties to reduce the flood risk.		
Impact on Socially Vulnerable Populations:	Collecting data regarding homeowners that reside within flood prone areas provides an opportunity to introduce location-specific opportunities for assistance. Socially vulnerable populations may be able to have houses elevated or acquired when it would otherwise be unaffordable.		
Impact on Future Development:	Increased outreach to homeowners within a flood prone area will limit construction in areas that are prone to hazard events. Homes may be acquired, which will remove those structures from the floodplain and prevent future development on those sites.		
Impact on Critical Facilities/Lifelines:	Removing structures from the floodplain decreases the demand on utilities and emergency services including health and medical, law enforcement, and search and rescue.		
Impact on Capabilities:	Outreach which promotes the removal of risk from the immediate floodplain via acquisition of properties will free up resources for search and rescue and other emergency operations as needed. This action will enhance the Town's current NFIP capabilities.		
Climate Change Considerations:	Climate change is likely to increase the frequency and severity of severe rainfall, flash flooding, riverine flooding, and coastal flooding from sea level rise and storm surge events. Removing structures from the floodplain will reduce the response and recovery costs as a result of these events and decrease the loss of human life as a result of these events. Elevating structures will reduce the recovery costs.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input checked="" type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Levee around floodplain		Costly, not enough room.

	Deployable flood barriers	Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.
--	---------------------------	--

DRAFT

Action 2025-HinsdaleT-10. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-HinsdaleT-11. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-HinsdaleT-12. Temporary Sheltering

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County Office of Emergency Services, Neighboring Jurisdictions, American Red Cross										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering.										
Description of the Solution:	The Town Supervisor will lead efforts to identify a suitable location to temporarily relocate residents or visitors in need of temporary sheltering. The Town will consider options to partner with neighboring jurisdictions for a regional location. The Town will contact the Cattaraugus County Office of Emergency Services for assistance as needed to identify a suitable, approved location.										
Estimated Cost:	Medium										
Potential Funding Sources:	Town Budget, County Budget, Neighboring Jurisdictions, American Red Cross, HSGP										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4, 6										
Benefits:	Providing a safe, climate-controlled location for individuals in need following an emergency can provide a sense of gratitude and normalcy to an otherwise negative event. Removing individuals from at-risk locations and offering temporary locations for impacted persons to gather, increases the safety of the overall community.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations are often the most risk during emergencies and disaster events. Offering a safe location for these populations can ensure their health is looked after and they are removed from harm's way.										
Impact on Future Development:	The temporary sheltering facility will be able to support population increases brought in from potential future development.										
Impact on Critical Facilities/Lifelines:	This action would create, or expand on already existing, critical facilities, as sheltering locations are critical facilities.										
Impact on Capabilities:	This action will create a new capability of the Town by offering a resource for its visitors and residents to utilize should they be in need of temporary sheltering.										
Climate Change Considerations:	The changing climate may lead to the Town, its residents, and visitors being exposed to hazards more frequently. Extreme temperatures have occurred more often in recent years which lead to drought; heavier rainfalls during severe storms have increased the occurrence of flooding. A temporary sheltering facility can provide a safe location for impacted individuals.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Utilize County facilities</td><td>May require signed agreements; reliant on County opening facilities</td></tr><tr><td>Utilize American Red Cross facilities</td><td>Reliant on American Red Cross opening a facility</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Utilize County facilities	May require signed agreements; reliant on County opening facilities	Utilize American Red Cross facilities	Reliant on American Red Cross opening a facility		
Action	Evaluation										
No Action	Current problem exists										
Utilize County facilities	May require signed agreements; reliant on County opening facilities										
Utilize American Red Cross facilities	Reliant on American Red Cross opening a facility										

Action 2025-HinsdaleT-13. Generators at Critical Facilities

Lead Agency:	Engineering										
Supporting Agencies:	Town Board										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Town Hall does not have back-up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at the critical facility. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for the critical facilities and their operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of critical facilities that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>-</td> </tr> <tr> <td>Microgrid</td> <td>Costly and difficult to implement.</td> </tr> <tr> <td>Solar panels and battery backup</td> <td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td> </tr> </tbody> </table>		Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement.	Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.	
Action	Evaluation										
No Action	-										
Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-HinsdaleT-14. Salt and Sand Storage Shed

Lead Agency:	Highway Department										
Supporting Agencies:	NYS DEC, Cattaraugus County Water and Conservation District										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Salt and sand exposed to the open-air leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow. The salt sand shed at 4129 Route 16 is losing money due to salt dust/dirt blowing on residential properties.										
Description of the Solution:	A secure, protective location will reduce loss of material to erosion and leaching from rain and snow melt and ensure that there are enough critical materials for roadway treatment during storms. The Town was awarded a NYS DEC grant in December 2024 to construct a salt storage building. This is a joint project with Cattaraugus County Water and Conservation District. The Town has selected a vendor but still has not received the contract NYS. Once the contract is received, the project will move forward.										
Estimated Cost:	Medium										
Potential Funding Sources:	NYS DEC, Town Budget										
Implementation Timeline:	Within 2 years										
Goals Met:	1, 4, 5										
Benefits:	This action will support the continuity of operations for the critical services within the Town, including the Highway Department and first responders. The Highway Department will maintain its capability to provide road treatments in time of need, ensuring roads are accessible for first responders and regular travelers.										
Impact on Socially Vulnerable Populations:	Vulnerable populations will have access to maintained roads, ensuring safe travel,										
Impact on Future Development:	Individuals living within future development in the Town will have access to safe, treated roadways.										
Impact on Critical Facilities/Lifelines:	This structure will enhance the transportation lifeline by ensuring roads are safe to traverse during severe winter storms.										
Impact on Capabilities:	This action will ensure the Highway Department is able to maintain its capabilities.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events would further expose materials exposed to the elements, degrading not just the materials, but pushing them into the environment, potentially disrupting the ecosystem.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Install underground salt and sand facility</td><td>Not feasible</td></tr><tr><td>Share a facility with another municipality</td><td>Administratively burdensome</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Install underground salt and sand facility	Not feasible	Share a facility with another municipality	Administratively burdensome

No Action	Current problem exists										
Install underground salt and sand facility	Not feasible										
Share a facility with another municipality	Administratively burdensome										

Action 2025-HinsdaleT-15. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Integrate hazard mitigation principles in only hazard appendices</td> <td>The plan will miss integration opportunities in the basic plan and annexes</td> </tr> <tr> <td>Ask County to integrate hazard mitigation into the County CEMP</td> <td>Town CEMP will remain undeveloped</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Current problem exists	Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes	Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped	
Action	Evaluation										
No Action	Current problem exists										
Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-HinsdaleT-16. Critical Facility Wildfire Mitigation Measures

Lead Agency:	Facility Owners		
Supporting Agencies:	Fire Department, Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire		
Description of the Problem:	National Fuel Gas Supply Corp, Niagara Mohawk Power Corp, Crosbys #0774-1085 3511 Rt 16, Hinsdale – USID water tank 95363 1437 Congress Rd, and Underwood Manor, an assisted living facility, are potentially exposed to wildfires. Protecting these properties and infrastructure from wildfires is crucial to ensuring continuity of operations and services for their consumers. Exposure to this hazard can cause damage or destruction.		
Description of the Solution:	Assess the site-specific vegetation and slope conditions and determine necessary mitigation measures to protect National Fuel Gas Supply Corp, Niagara Mohawk Power Corp, Crosbys #0774-1085 3511 Rt 16, Hinsdale – USID water tank 95363 1437 Congress Rd, and Underwood Manor, an assisted living facility, from wildfires.		
Estimated Cost:	TBD depending on identified mitigation measures		
Potential Funding Sources:	FEMA HMA, Town Budget, Facility Budgets		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 5		
Benefits:	This action will reduce the risk of the wildfire hazard to critical facilities, ensuring continuity of operations. The continued operation of these facilities is crucial to the facilities' service area.		
Impact on Socially Vulnerable Populations:	Populations living near and working at or near the critical facilities would have enhanced protections from the wildfire and landslide hazards. Services from these critical facilities would remain intact to consumers.		
Impact on Future Development:	Future development near the existing critical facilities would have enhanced protections from the wildfire hazard.		
Impact on Critical Facilities/Lifelines:	The identified critical facilities, as well as other facilities nearby, would have enhanced protections from the wildfire hazard. This action will assist in ensuring continuity of operations.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. Wildfires may be exacerbated by increased extreme heat and drought occurrences.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate facilities		Cost prohibitive, not feasible
	Cut down all trees		Cost prohibitive, degrades the environment

Action 2025-HinsdaleT-17. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-HinsdaleT-18. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none"> • Hinsdale 26 • Hinsdale 42 • Hinsdale 57 • Hinsdale 62 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Action	Evaluation										
No Action	Current problem exists										
Remove bridges	May cause significant traffic problems										
Replace bridges	Cost prohibitive										

22. TOWN OF HUMPHREY

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Humphrey with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Humphrey, describes who participated in the planning process, assesses Humphrey's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

22.1 HAZARD MITIGATION PLANNING TEAM

The Town of Humphrey identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 22-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 22-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Jason Pearl, Highway Superintendent Address: 4500 Humphrey Road, Great Valley, NY 14741 Phone Number: 716-945-1010 Email: humphreyhighwaydep@gmail.com	Name/Title: Carrie Childs, Supervisor Address: 4500 Humphrey Road, Great Valley, NY 14741 Phone Number: 716-945-2319 Email: humphreysupervisor@gmail.com
National Flood Insurance Program Floodplain Administrator

22.2 COMMUNITY PROFILE

The Town of Humphrey is an interior town in the eastern half of Cattaraugus County in western New York State. The Town of Humphrey has a total area of 36.61 square miles. Wrights Creek flows past the hamlets: Humphrey and Humphrey Center. The town is bordered to the west by the Town of Great Valley and south of the Town of Franklinville. The east town line is shared by the towns of Hinsdale and Ischua and to the south is the Town of Allegany.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 1.1 percent of the

population is 5 years of age or younger, 11.1 percent is 65 years of age or older, 0 percent is non-English speaking, 14.9 percent is below the poverty threshold, and 8.5 percent is considered disabled.

22.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Humphrey performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Humphrey to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

22.3.1 Planning and Regulatory Capability and Integration

Table 22-2 summarizes the planning and regulatory tools that are available to Humphrey.

Table 22-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 2, 2022: Uniform Fire Prevention and Building Code	State and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk?				
This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) in this Town. This chapter is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter.				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Site Plan Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Local Law #1, 1992 – Flood Damage Prevention	Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? It is the purpose of this local law to promote the public health, safety, and general welfare, to reduce degradation of the environment, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: <ol style="list-style-type: none">1. regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;2. require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;3. control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;4. control filling, grading, dredging, and other development which may increase erosion or flood damages;5. regulate the construction of flood barriers which will unnaturally divert flood waters, or which may increase flood hazards to other lands; and6. qualify and maintain participation in the National Flood Insurance program				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Change Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
PLANNING DOCUMENTS				
General/Comprehensive Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Capital Improvement Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Disaster Debris Management Plan How has or will this be integrated with the HMP and how does this reduce risk? The plan establishes procedures and guidelines for managing disaster debris in a coordinated, environmentally responsible, and cost-effective manner.	Yes	Disaster Debris Management Plan	County	OES
Floodplain Management or Watershed Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Open Space Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Urban Water Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Habitat Conservation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Economic Development Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Community Wildfire Protection Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Community Forest Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Transportation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Agriculture Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Action/ Resilience/Sustainability Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Tourism Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Business/ Downtown Development Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan How has or will this be integrated with the HMP and how does this reduce risk? Identifies available resources, resource gaps, vulnerable areas and populations, and communication methods for response to emergencies. This provides a foundation for the development of hazard mitigation goals, objectives, and actions to ensure any gaps and needs are addressed and all capabilities are being effectively utilized.	Yes	Cattaraugus County Comprehensive Emergency Management Plan	County	Cattaraugus County Office of Emergency Services
Continuity of Operations Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Substantial Damage Response Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Threat and Hazard Identification and Risk Assessment How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Post-Disaster Recovery Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Public Health Plan How has or will this be integrated with the HMP and how does this reduce risk? Planning for public health emergencies can identify tactics and needed resources to prevent the spread of disease or infection before it occurs.	Yes	PHEP	County	Health Department
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

22.3.2 Development and Permitting Capability

Table 22-3 summarizes the capabilities of Humphrey to oversee and track development.

Table 22-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits? <ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? <ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	No	-
Describe the level of buildout in your jurisdiction.	N/A	There is area for future development in the Town.

22.3.3 Administrative and Technical Capability

Table 22-4 summarizes potential staff and personnel resources available to Humphrey and their current responsibilities that contribute to hazard mitigation.

Table 22-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	The Building Department enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	Yes	Town of Humphrey Fire Department
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Highway Department maintains the Town roads and grounds.
Mutual aid agreements	Yes	Surrounding municipalities for emergency response
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

22.3.4 Fiscal Capability

Table 22-5 summarizes financial resources available to Humphrey.

Table 22-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	No
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

22.3.5 Education and Outreach Capability

Table 22-6 summarizes the education and outreach resources available to Humphrey.

Table 22-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-

Outreach Resources	Available? (Yes/No)	Comment
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	County
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

22.3.6 Community Classifications

Table 22-7 summarizes classifications for community programs available to Humphrey.

Table 22-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

22.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 22-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 22-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

22.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 22-1 is responsible for maintaining this information.

22.4.1 NFIP Statistics

Table 22-9 summarizes the NFIP policy and claim statistics for Humphrey.

Table 22-9. Humphrey NFIP Summary of Policy and Claim Statistics

# Policies	1
# Claims (Losses)	0
Total Loss Payments	\$0.00
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

22.4.2 Flood Vulnerability Summary

Table 22-10 provides a summary of the NFIP program in Humphrey.

Table 22-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas within the SFHA
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Unknown
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Unknown
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	If the improvement is valued at 50 percent or more of the existing structure's value.
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: May 21, 1992 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1992 – Flood Damage Prevention

NFIP Topic	Comments
What is the date that your flood damage prevention ordinance was last amended?	November 4, 1992
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	No
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

22.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 22-11 through Table 22-13.

Table 22-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 22-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 22-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any known or anticipated major development or infrastructure in the next five years.					

22.6 JURISDICTIONAL RISK ASSESSMENT

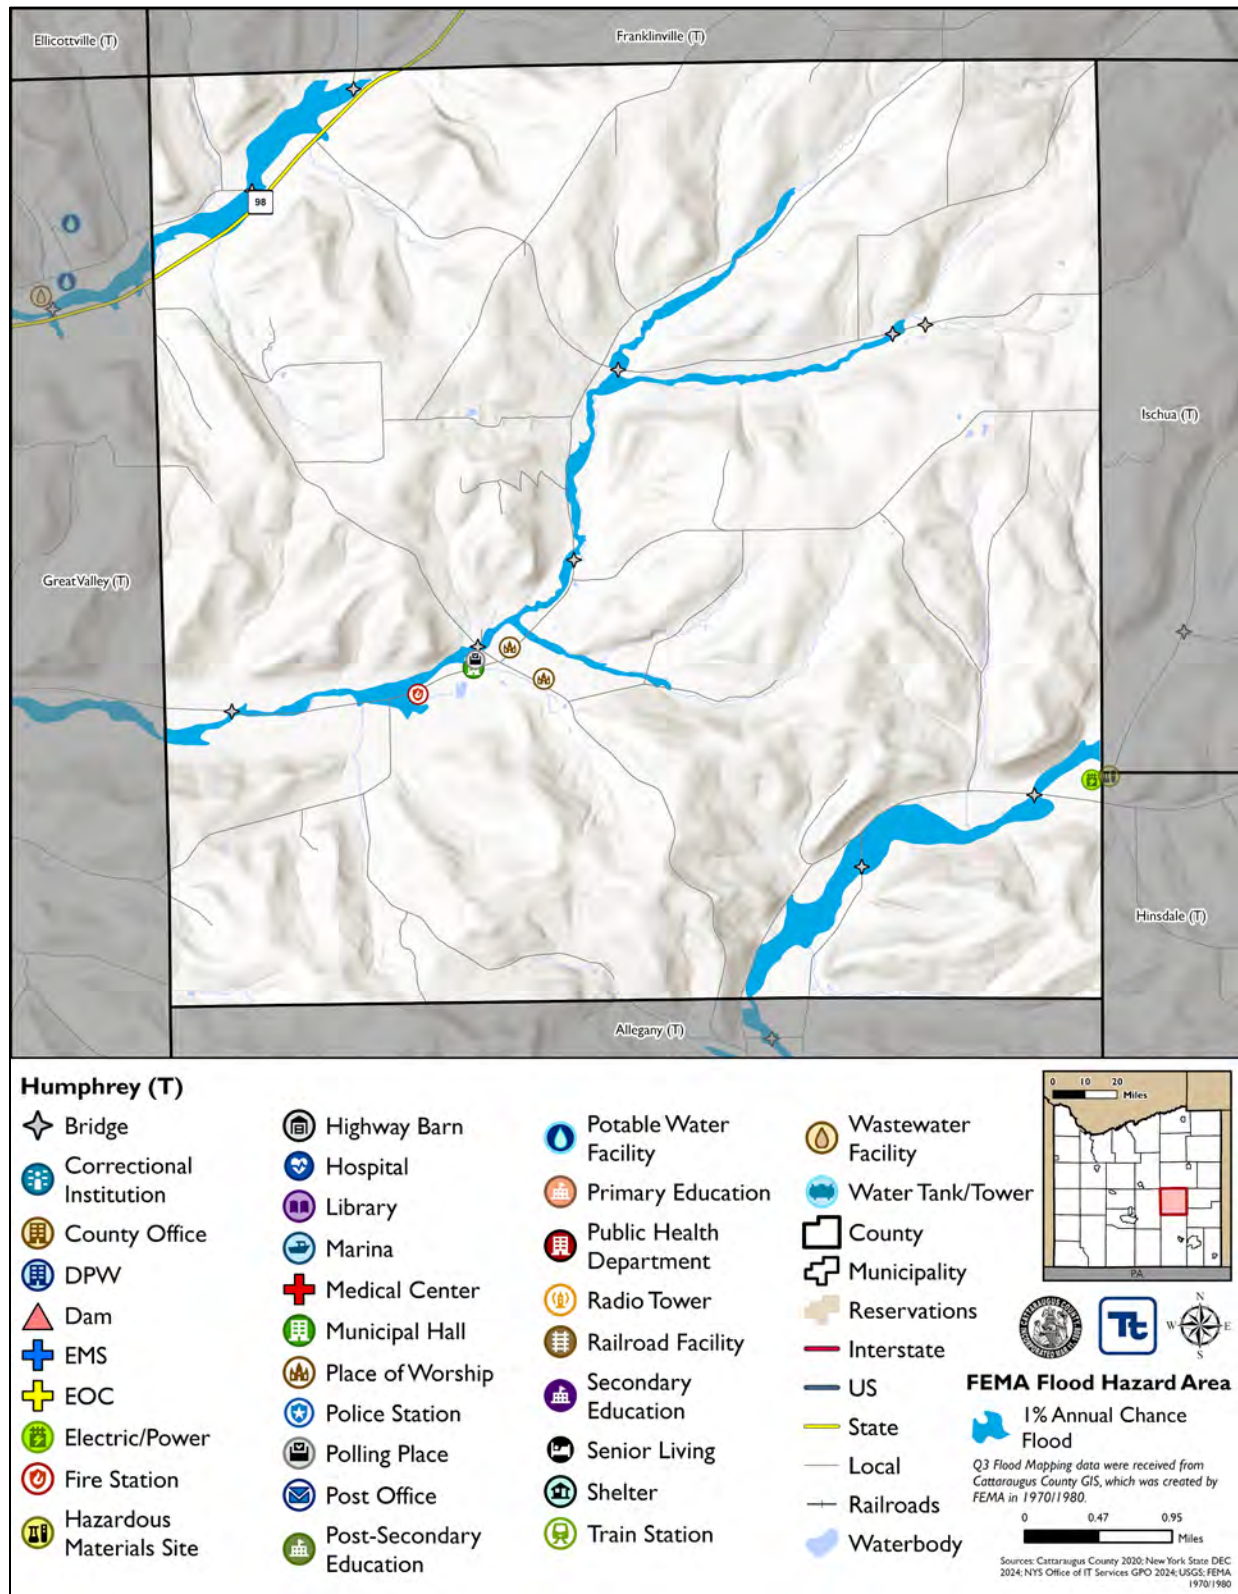

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Humphrey's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

22.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 22-1 through Figure 22-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Humphrey has significant exposure. The maps show the location of potential new development, where available.

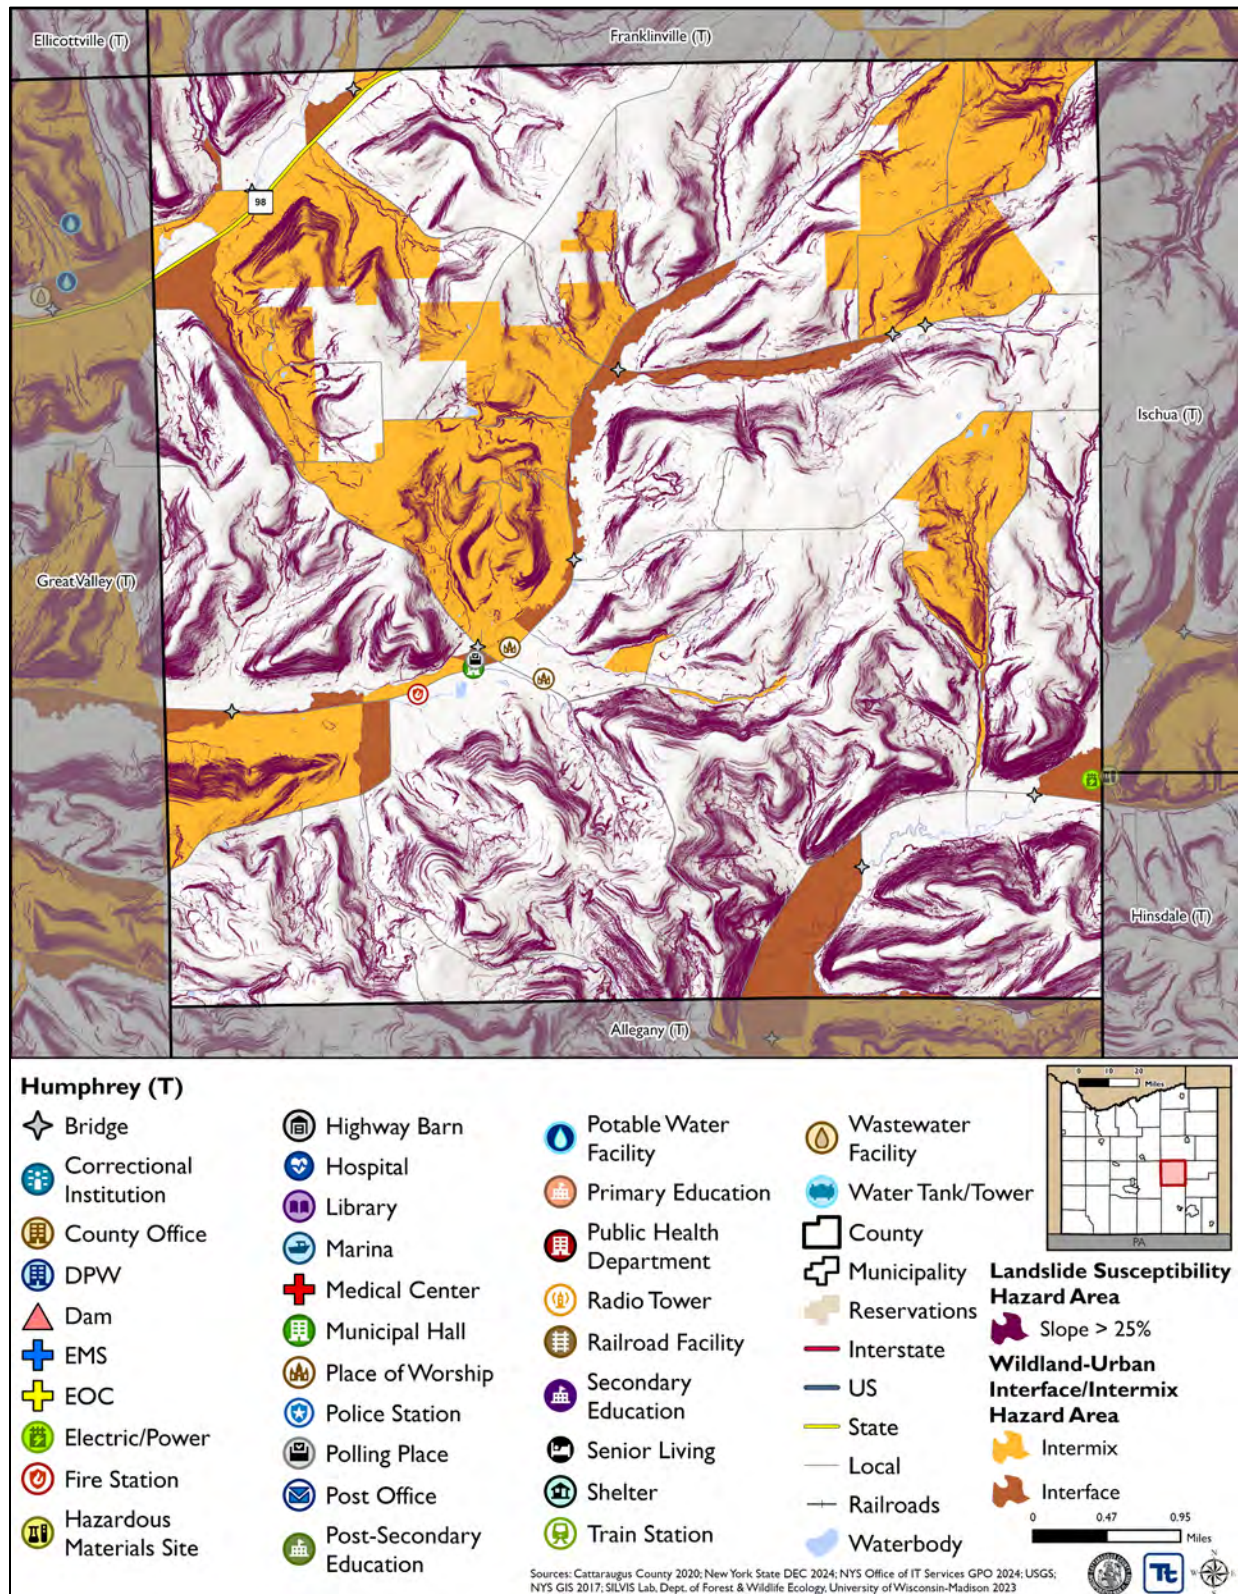

Figure 22-1. Humphrey Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 22-2. Humphrey Landslide and Wildfire Hazard Area Extent and Location Map

22.6.2 Hazard Event History

The history of natural and non-natural hazard events in Humphrey is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 22-14 provides details on loss and damage in Humphrey during hazard events since the last hazard mitigation plan update.

Table 22-14. Hazard Event History in Humphrey

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Humphrey
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damage or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town did not incur any documented damage or losses.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damage or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damage or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damage or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damage or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damage or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damage or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damage or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damage or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damage or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

22.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Humphrey .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Humphrey reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the following:

- The Town decreased its risk to the Dam and Levee Failure hazard from 'Low' to 'No Risk' as there are no dams or levees in the jurisdiction, nor are there any nearby, which would impact the Town.

Table 22-15 shows Humphrey's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 22-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	No Risk
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 22-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 22-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Humphrey 02	Bridge	X	-	2025-HumphreyT-12	-
Humphrey 06	Bridge	X	-	2025-HumphreyT-12	-

Source: Cattaraugus County 2024

22.6.4 Identified Issues

After a review of Humphrey's hazard event history, hazard rankings, hazard location, and current capabilities, Humphrey identified the following vulnerabilities within the community:

- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The bridge on Morgan Hollow Road is narrow, which leads to road damage, bank erosion, flooding, and sitting water. Flooding on the bridge and on Morgan Hollow Road can not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible.
- Critical facilities require backup power to ensure continuity of operations. The Town Garage, Fuel Pumps, and Town Hall, which houses the Town Administration, Town Court, and the Town Clerk, do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts

natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.

- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering.
- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Humphrey 02
 - Humphrey 06
 - Humphrey 11
 - Humphrey 15
 - Humphrey 20
 - Humphrey 21
 - Humphrey 28
 - Humphrey 32
 - Humphrey 39

22.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

22.7.1 Past Mitigation Action Status

Table 22-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

22.7.2 Additional Mitigation Efforts

Humphrey did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 22-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Humphrey-001	Bridge on Morgan Hollow Road	Flood, Severe Storm	Highway Department	<p>Problem: Bridge is too narrow on Morgan Hollow Road which leads to road damage, bank erosion, flooding, and sitting water.</p> <p>Solution: Conduct an engineering study to determine the size of bridge needed for the road. Then the town will replace the bridge on Morgan Hollow Road with culvert with larger carrying capacity than the bridge.</p>	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable
2020-Humphrey-002	Generator for Town Hall	All Hazards	Town, Engineer, OEM	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The Town Hall lacks a permanent power source. The Town Hall location houses the Town Hall, Court, and Clerk.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Town Hall. The town will then install a backup power generator and necessary electrical components.</p>	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Humphrey-003	Generator for Town Garage	All Hazards	Town, Engineer, OEM	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The Town Garage lacks a permanent power source. The Town Garage location houses essential equipment for the town.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Town Garage. The town will then install a backup power generator and necessary electrical components.</p>	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable
2020-Humphrey-004	Generator for fuel pumps	All Hazards	Town, Engineer, OEM	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The fuel pumps lack a permanent power source.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the fuel pumps. The town will then install a backup power generator and necessary electrical components.</p>	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Humphrey-005	Town's salt shed prone to flooding	Flood	Highway Department	<p>Problem: Salt shed/pile at the Town Garage needs a building to protect from weather. There is runoff to the nearby stream and the town would like to move it away from drinking wells.</p> <p>Solution: Conduct an engineering study to determine the best action/location for the town salt shed. Then the town will implement the best action to protect the salt shed and prevent salt from entering the stream.</p>	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable
2020-Humphrey-006	Update Flood Damage Prevention Ordinance	Flood	Town board	<p>Problem: The Town of Humphrey's ordinance is outdated</p> <p>Solution: The town will develop and adopt a flood damage prevention ordinance</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Humphrey-007	Floodplain Administrator to attend training on floodplain management	Flood	Cattaraugus County OES/ Cattaraugus County Building Codes Department	<p>Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.</p> <p>Solution: Obtain/host training and certification for floodplain managers</p>	1. In Progress 2. Lack of training availability.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Humphrey-008	Wildfire outreach	Wildfires	Town board	<p>Problem: Additional public education on wildfire risk is needed</p> <p>Solution: The town will develop an outreach program to educate the public about wildfires and what they can do to protect their structures.</p>	<p>1. No Progress</p> <p>2. Other projects took precedent.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Humphrey-009	Identify temporary housing location(s) for residents in the event of an emergency.	All Hazards	Town Mayor/Town Clerk, county	<p>Problem: The Town of Humphrey currently does not have a temporary housing location in the event of an emergency.</p> <p>Solution: The town work with the county to confirm locations and notify households and businesses through mailing</p>	<p>1. In Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Change to temporary sheltering</p> <p>3. Not applicable</p>
2020-Humphrey-010	Update the Emergency Operations Plan	All Hazards	County, Town	<p>Problem: The town has an outdated emergency operation plan.</p> <p>Solution: The town will update the town's emergency operation plan</p>	<p>1. No Progress</p> <p>2. Other projects took precedent.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Humphrey-011	Update Building Codes	All Hazards	County, Town	<p>Problem: The town has outdated building codes</p> <p>Solution: The town will update the town's building codes.</p>	<p>1. Completed</p> <p>2. Building codes updated and adopted in 2022.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Building codes updated and adopted in 2022.</p>

22.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Humphrey participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Humphrey would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 22-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 22-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 22-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure										
Flood	X	X		X	X		X		X	X
Landslide	X				X					X
Pandemic	X			X			X			X
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X	X								X
Wildfire	X			X			X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 22-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-Humphrey-01	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-Humphrey-02	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-Humphrey-03	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-Humphrey-04	Morgan Hollow Road Bridge	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-Humphrey-05	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-Humphrey-06	Salt and Sand Storage Shed	0	0	1	1	1	0	1	1	1	1	1	1	1	0	10	Medium
2025-Humphrey-07	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-Humphrey-08	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-Humphrey-09	Temporary Sheltering	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-Humphrey-10	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-HumphreyT-11	Landslide Prone Roads Inventory	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-HumphreyT-12	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-HumphreyT-01. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Building Inspector, Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none">• Determine where the damage occurred within the community and if the damaged structures are in an SFHA.• Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration.• Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value.• Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources following disaster events</td><td>Resources may not be available during major widespread events</td></tr><tr><td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td><td>A plan outlining responsibility is still necessary to prevent missing important requirements</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-HumphreyT-02. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-HumphreyT-03. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)

Action 2025-HumphreyT-04. Morgan Hollow Road Bridge

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The bridge on Morgan Hollow Road is narrow, which leads to road damage, bank erosion, flooding, and sitting water. Flooding on the bridge and on Morgan Hollow Road can not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible.										
Description of the Solution:	The Town Engineer will lead an assessment of the bridge and culvert to determine what repairs are necessary or may be feasible. Once a course of action has been identified, the Town will carry out the improvements.										
Estimated Cost:	High										
Potential Funding Sources:	Town Budget, NYS DOT, BRIDGENY, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	Infrastructure will be protected from future hazard damages. Ensures at least a single transportation route remains accessible to the community.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations reach needed service provided by the Town.										
Impact on Future Development:	Future development in the impacted area will be able to access critical facilities and community lifelines.										
Impact on Critical Facilities/Lifelines:	Ensures transportation routes remain open and accessible to the public for daily use and evacuation needs. Provides a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridge.										
Impact on Capabilities:	Increases community resiliency to flooding events in vulnerable areas that would normally be vulnerable to prolonged isolation after high-water events.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. This could lead to further degradation of the bridge.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low

Action	Evaluation										
No Action	Current problem exists										
Remove bridge	Not feasible, costly										
Build new bridge	Not feasible, costly										

Action 2025-HumphreyT-05. Generators at Critical Facilities

Lead Agency:	Engineering		
Supporting Agencies:	Town Board		
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Town Garage, Fuel Pumps, and Town Hall, which houses the Town Administration, Town Court, and the Town Clerk, do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.		
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for the critical facilities and their operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4, 5		
Benefits:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.		
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.		
Impact on Future Development:	This action results in protection of critical facilities that could support future development.		
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.		
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.		
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives	Action		Evaluation
	No Action		-
	Microgrid		Costly and difficult to implement.
	Solar panels and battery backup		Solar power is unlikely to be able to provide battery power for extended power failure events.

Action 2025-HumphreyT-06. Salt and Sand Storage Shed

Lead Agency:	Highway Department		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.		
Description of the Solution:	Construct a shed to house bulk salt and sand storage. The construction of this shed will reduce loss of material to erosion and leaching from rain and snow melt and ensure that there are enough critical materials for roadway treatment during storms.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Town Budget		
Implementation Timeline:	Within 2 years		
Goals Met:	1, 4, 5		
Benefits:	This action will support the continuity of operations for the critical services within the Town, including the Highway Department and first responders. The Highway Department will maintain its capability to provide road treatments in time of need, ensuring roads are accessible for first responders and regular travelers.		
Impact on Socially Vulnerable Populations:	Vulnerable populations will have access to maintained roads, ensuring safe travel,		
Impact on Future Development:	Individuals living within future development in the Town will have access to safe, treated roadways.		
Impact on Critical Facilities/Lifelines:	The construction of this structure will enhance the transportation lifeline by ensuring roads are safe to traverse during severe winter storms. Furthermore, it will create an additional critical facility.		
Impact on Capabilities:	This action will ensure the Highway Department is able to maintain its capabilities.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events would further expose materials stored outside to the elements, degrading not just the materials, but pushing them into the environment, potentially disrupting the ecosystem.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Install underground salt and sand facility		Not feasible
	Share a facility with another municipality		Administratively burdensome

Action 2025-HumphreyT-07. Flood Damage Prevention Ordinance Update

Lead Agency:	Building Inspector		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-HumphreyT-08. Floodplain Management Training

Lead Agency:	Building Inspector		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-HumphreyT-09. Temporary Sheltering

Lead Agency:	Town Supervisor		
Supporting Agencies:	Town Board, Cattaraugus County Office of Emergency Services, Neighboring Jurisdictions, American Red Cross		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire	
Description of the Problem:	Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering. The Town will investigate the use of the school, highway garage, and local churches as potential locations.		
Description of the Solution:	The Town Supervisor will lead efforts to identify a suitable location to temporarily relocate residents or visitors in need of temporary sheltering. The Town will consider options to partner with neighboring jurisdictions for a regional location. The Town will contact the Cattaraugus County Office of Emergency Services for assistance as needed to identify a suitable, approved location.		
Estimated Cost:	Medium		
Potential Funding Sources:	Town Budget, County Budget, Neighboring Jurisdictions, American Red Cross, HSGP		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2, 4, 6		
Benefits:	Providing a safe, climate-controlled location for individuals in need following an emergency can provide a sense of gratitude and normalcy to an otherwise negative event. Removing individuals from at-risk locations and offering a temporary locations for impacted persons to gather, increases the safety of the overall community.		
Impact on Socially Vulnerable Populations:	Socially vulnerable populations are often the most risk during emergencies and disaster events. Offering a safe location for these populations can ensure their health is looked after and they are removed from harm's way.		
Impact on Future Development:	The temporary sheltering facility will be able to support population increases brought in from potential future development.		
Impact on Critical Facilities/Lifelines:	This action would create, or expand on already existing, critical facilities, as sheltering locations are critical facilities.		
Impact on Capabilities:	This action will create a new capability of the Town by offering a resource for its visitors and residents to utilize should they be in need of temporary sheltering.		
Climate Change Considerations:	The changing climate may lead to the Town, its residents, and visitors being exposed to hazards more frequently. Extreme temperatures have occurred more often in recent years which lead to drought; heavier rainfalls during severe storms have increased the occurrence of flooding. A temporary sheltering facility can provide a safe location for impacted individuals.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Utilize County facilities		May require signed agreements; reliant on County opening facilities
	Utilize American Red Cross facilities		Reliant on American Red Cross opening a facility

Action 2025-HumphreyT-10. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Integrate hazard mitigation principles in only hazard appendices</td> <td>The plan will miss integration opportunities in the basic plan and annexes</td> </tr> <tr> <td>Ask County to integrate hazard mitigation into the County CEMP</td> <td>Town CEMP will remain undeveloped</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes	Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped		
Action	Evaluation										
No Action	Current problem exists										
Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-HumphreyT-11. Landslide Prone Roads Inventory

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.										
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, The Engineer will work with the Highway Department to prioritize roadways and identify possible mitigation measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	3 years										
Goals Met:	1, 4, 6										
Benefits:	This action will identify locations with steep grades (above 20 percent) and provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.										
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.										
Impact on Future Development:	The identification of at-risk roads may lead to restrictions for future development.										
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action may improve the Town's regulatory capabilities.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Do not use inventory to inform steep slopes ordinance</td> <td>Would not restrict future development, could increase at risk properties and structures</td> </tr> <tr> <td>Do not use inventory to inform future projects</td> <td>Risk would not be reduced</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Do not use inventory to inform steep slopes ordinance	Would not restrict future development, could increase at risk properties and structures	Do not use inventory to inform future projects	Risk would not be reduced
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Do not use inventory to inform steep slopes ordinance	Would not restrict future development, could increase at risk properties and structures										
Do not use inventory to inform future projects	Risk would not be reduced										

Action 2025-HumphreyT-12. Bridge Evaluations

Lead Agency:	Highway Department								
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT								
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire								
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none"> • Humphrey 02 • Humphrey 06 • Humphrey 11 • Humphrey 15 • Humphrey 20 • Humphrey 21 • Humphrey 28 • Humphrey 32 • Humphrey 39 								
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.								
Estimated Cost:	Medium								
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY								
Implementation Timeline:	Within 5 years								
Goals Met:	1								
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.								
Impact on Socially Vulnerable Populations:	Not applicable								
Impact on Future Development:	Not applicable								
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.								
Impact on Capabilities:	Not applicable								
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.								
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)								
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)								
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove bridges</td> <td>May cause significant traffic problems</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove bridges	May cause significant traffic problems

Remove bridges	May cause significant traffic problems								

	Replace bridges	Cost prohibitive
--	-----------------	------------------

DRAFT

23. TOWN OF ISCHUA

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Ischua with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Ischua, describes who participated in the planning process, assesses Ischua's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

23.1 HAZARD MITIGATION PLANNING TEAM

The Town of Ischua identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 23-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 23-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Jeff Goodyear, Supervisor Address: 4737 Gile Hollow Road, Hinsdale, NY 14743 Phone Number: 716-640-2886 Email: jgoodyear167@gmail.com	Name/Title: Richard Michael, Highway Superintendent Address: 5670 Five Mile Road, Hinsdale, NY 14743 Phone Number: 716-378-1556 Email: ischuahighway@gmail.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: James Cline, Code Enforcement Officer Address: 4737 Gile Hollow Road, Hinsdale, NY 14743 Phone Number: 716-968-5075 Email: town.ischua@gmail.com	

23.2 COMMUNITY PROFILE

The Town of Ischua lies on the eastern border of Cattaraugus County in western New York State on the Ischua/Olean creek/river. The Town of Ischua has a total area of 32.4 square miles. Ischua Creek flows south through the center. The town is bordered to the east by the Town of Cuba in Allegany County and to the south by the Town of Hinsdale. The west border is formed by the Town of Humphrey, and the towns of Franklinville and Lyndon are to the north. Part of the Seneca Indian Reservation is in the Town of Ischua.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 0.7 percent of the

population is 5 years of age or younger, 29.2 percent is 65 years of age or older, 0 percent is non-English speaking, 20.9 percent is below the poverty threshold, and 22 percent is considered disabled.

23.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Ischua performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Ischua to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

23.3.1 Planning and Regulatory Capability and Integration

Table 23-2 summarizes the planning and regulatory tools that are available to Ischua.

Table 23-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 1, 2008: NY State Uniform Fire Prevention Building Code	State and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? Code applies to construction, alteration, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Site Plan Code How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Code How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Post-Disaster Recovery/ Reconstruction Code How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Real Estate Disclosure Requirements How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Growth Management How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Environmental Protection Ordinance(s) How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Flood Damage Prevention Ordinance How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.	Yes	Local Law #1, 1992 – Flood Damage Prevention	Federal, State, County and Local	Code Enforcement Officer / Building Inspector
Wellhead Protection How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Climate Change Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
PLANNING DOCUMENTS				
General/Comprehensive Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Capital Improvement Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Disaster Debris Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Floodplain Management or Watershed Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Open Space Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Urban Water Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Habitat Conservation Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Economic Development Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Community Wildfire Protection Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Community Forest Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Transportation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Agriculture Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Action/ Resilience/Sustainability Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Tourism Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Business/ Downtown Development Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan How has or will this be integrated with the HMP and how does this reduce risk? The CEMP defines the scope of preparedness and emergency management activities necessary in the County. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.	Yes	Comprehensive Emergency Management Plan (CEMP)	County	OES
Continuity of Operations Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Substantial Damage Response Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Threat and Hazard Identification and Risk Assessment How has or will this be integrated with the HMP and how does this reduce risk? The Threat and Hazard Identification and Risk Assessment (THIRA) is a three-step risk assessment process that helps the County understand its risks to natural, technological, and human-caused hazards and what must be done to address those risks.	Yes	Threat & Hazard Identification & Risk Assessment	County	OES
Post-Disaster Recovery Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Public Health Plan	Yes	Public Health Plan	County	Health Department
How has or will this be integrated with the HMP and how does this reduce risk? Planning for public health emergencies can identify tactics and needed resources to prevent the spread of disease or infection before it occurs.				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

23.3.2 Development and Permitting Capability

Table 23-3 summarizes the capabilities of Ischua to oversee and track development.

Table 23-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?		
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	No	-
Describe the level of buildout in your jurisdiction.	N/A	There is limited available area for future development

23.3.3 Administrative and Technical Capability

Table 23-4 summarizes potential staff and personnel resources available to Ischua and their current responsibilities that contribute to hazard mitigation.

Table 23-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	No	-
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

23.3.4 Fiscal Capability

Table 23-5 summarizes financial resources available to Ischua.

Table 23-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	No
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

23.3.5 Education and Outreach Capability

Table 23-6 summarizes the education and outreach resources available to Ischua.

Table 23-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	County
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

23.3.6 Community Classifications

Table 23-7 summarizes classifications for community programs available to Ischua.

Table 23-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

23.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 23-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 23-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

23.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 23-1 is responsible for maintaining this information.

23.4.1 NFIP Statistics

Table 23-9 summarizes the NFIP policy and claim statistics for Ischua.

Table 23-9. Ischua NFIP Summary of Policy and Claim Statistics

# Policies	1
# Claims (Losses)	1
Total Loss Payments	\$41,951.22
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

23.4.2 Flood Vulnerability Summary

Table 23-10 provides a summary of the NFIP program in Ischua.

Table 23-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas within the SFHA
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Unknown

NFIP Topic	Comments
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Unknown
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement / Building Inspector
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	If the improvement is valued at 50 percent or more of the existing structure's value.
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: April 9, 2002 CAV: January 11, 2012
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1992 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	November 4, 1992
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	No

NFIP Topic	Comments
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

23.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 23-11 through Table 23-13.

Table 23-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 23-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 23-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any known or anticipated major development or infrastructure in the next five years.					

23.6 JURISDICTIONAL RISK ASSESSMENT

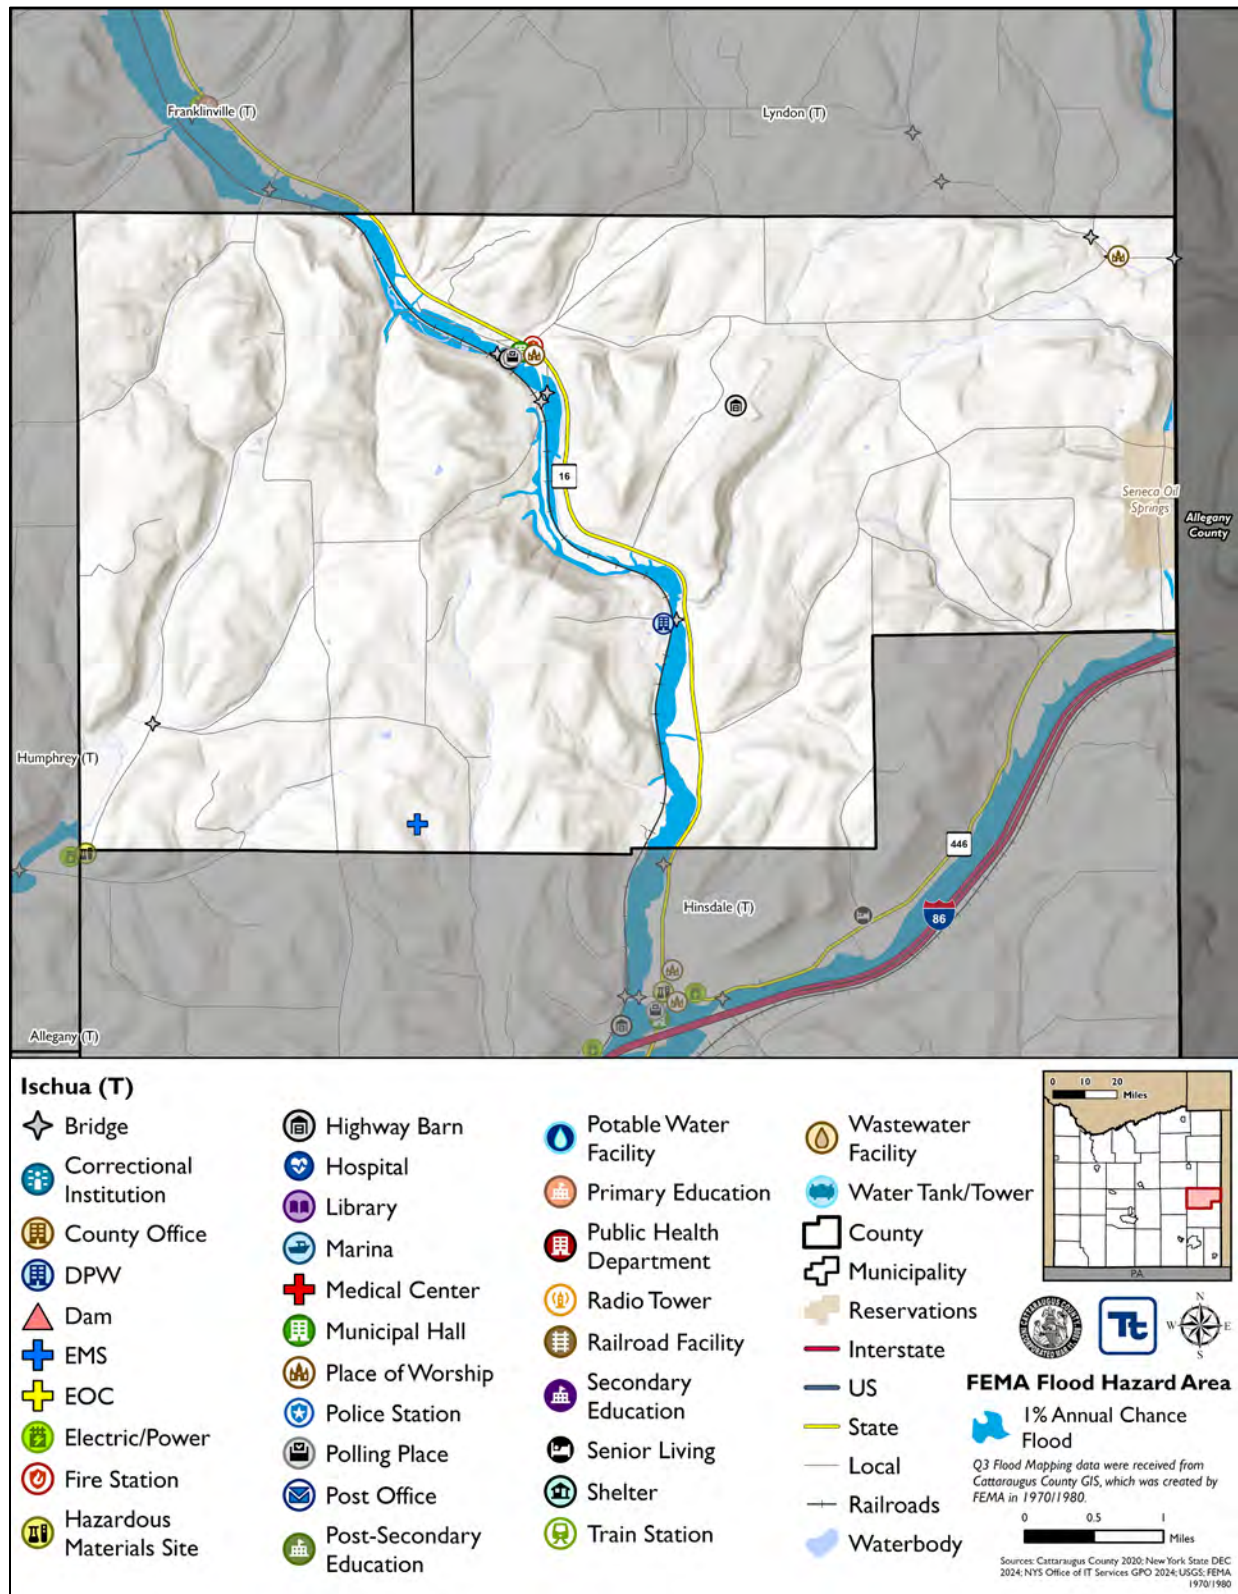

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Ischua's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

23.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 23-1 through Figure 23-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Ischua has significant exposure. The maps show the location of potential new development, where available.

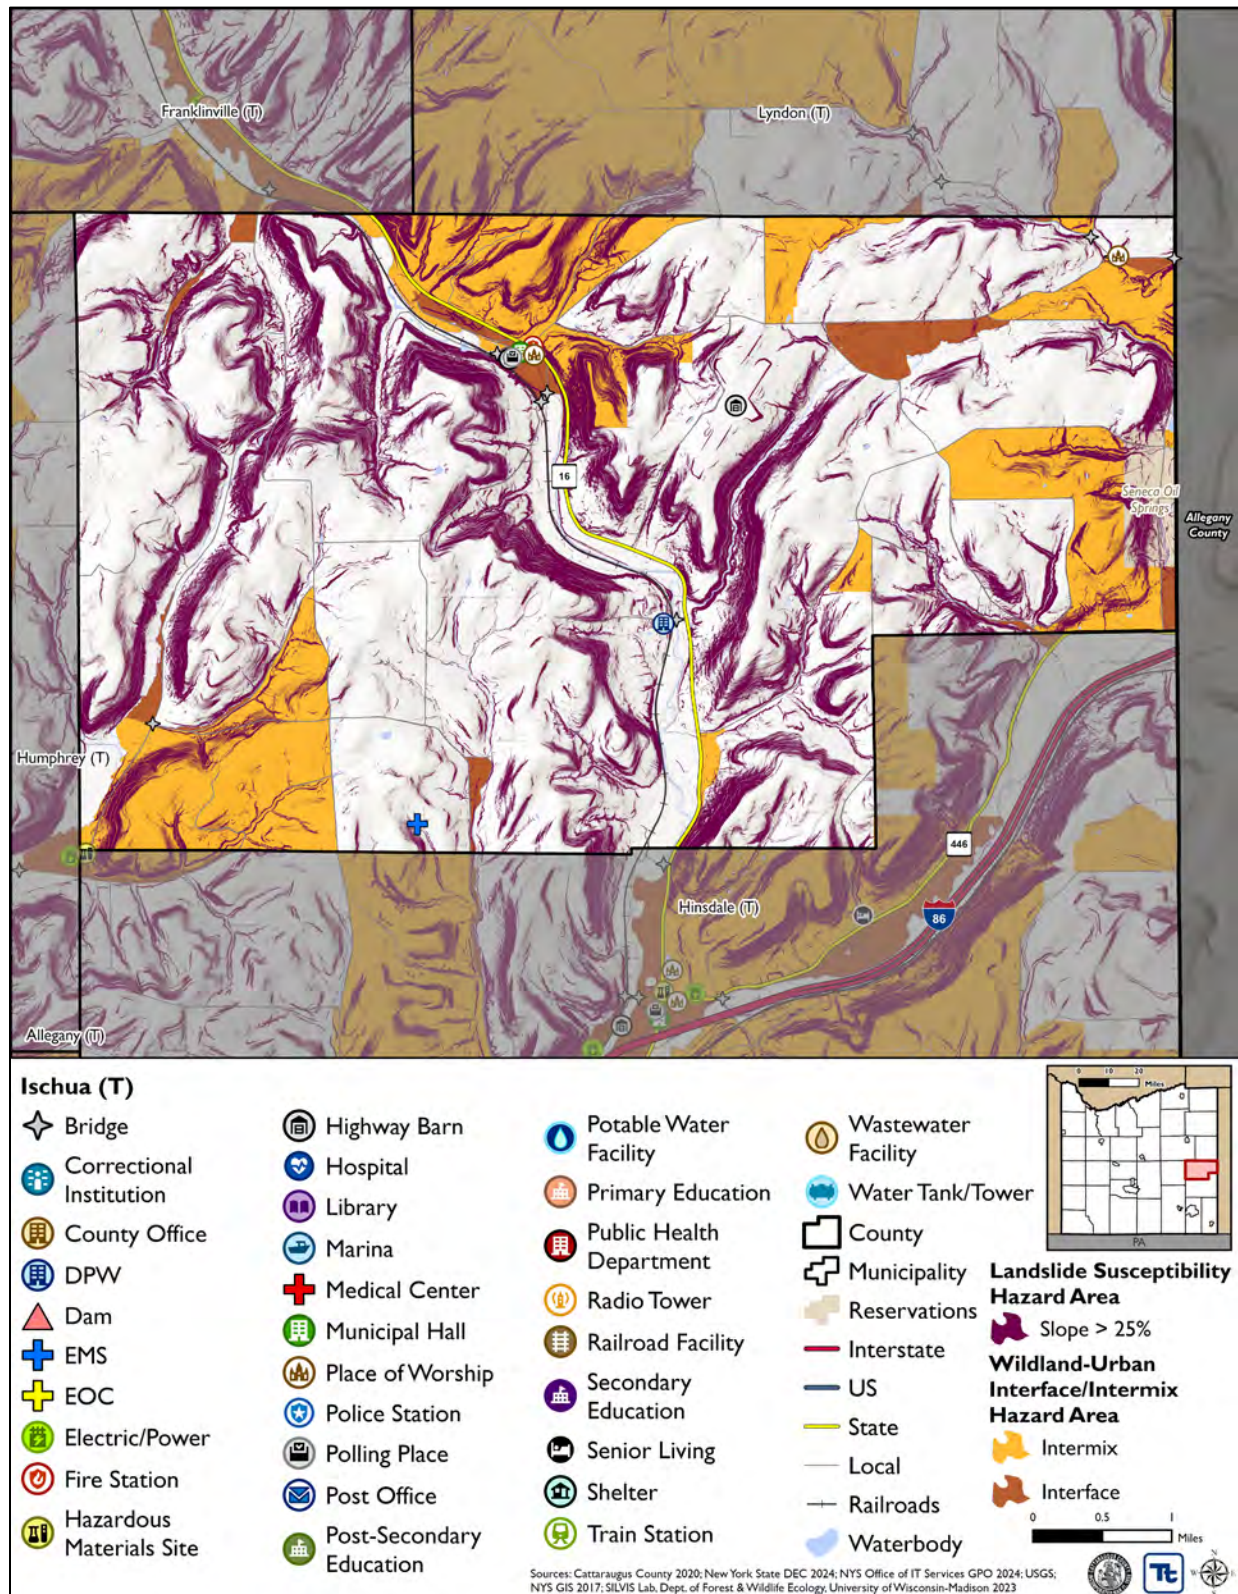

Figure 23-1. Ischua Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 23-2. Ischua Landslide and Wildfire Hazard Area Extent and Location Map

23.6.2 Hazard Event History

The history of natural and non-natural hazard events in Ischua is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 23-14 provides details on loss and damage in Ischua during hazard events since the last hazard mitigation plan update.

Table 23-14. Hazard Event History in Ischua

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Ischua
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damage or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town did not incur any documented damage or losses.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damage or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damage or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damage or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damage or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damage or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damage or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damage or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damage or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damage or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

23.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Ischua .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Ischua reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the following:

- The Town decreased its risk to the Dam and Levee Failure hazard from 'Low' to 'No Risk' as there are no dams or levees in the jurisdiction, nor are there any nearby, which would impact the Town.

Table 23-15 shows Ischua's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 23-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	No Risk
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 23-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 23-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Ischua 20	Bridge	X	-	2025-IschuaT-12	-
Ischua 29	Bridge	X	-	2025-IschuaT-12	-
Ischua Town Barn	Highway Barn	X	-	2025-IschuaT-01	-
Ischua Town Hall	Polling Place	X	-	2025-IschuaT-01	-

Source: Cattaraugus 2024

23.6.4 Identified Issues

After a review of Ischua's hazard event history, hazard rankings, hazard location, and current capabilities, Ischua identified the following vulnerabilities within the community:

- The Ischua Town Barn and Town Hall are located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. The culvert on Baxter Mill Road is undersized or may have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts.
- FIRMs are outdated and may not accurately display flood risk. Inaccurate flood maps can misinform the public of actual flood risk and may prevent interested homeowners from receiving or applying for flood insurance. Correctly displaying the areas at risk to the flood hazard is not only critical to visually show the risk, but to support grant applications for funding to mitigate the flood risk at identified locations within or around the floodplain.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a

variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.

- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Ischua 20
 - Ischua 29

23.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

23.7.1 Past Mitigation Action Status

Table 23-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

23.7.2 Additional Mitigation Efforts

Ischua did not identify any additional mitigation efforts completed since the last HMP.

Table 23-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Ischua-001	Replace undersized culvert in Town of Ischua on Baxter Mill Rd	Flood, Severe Storm	Engineer, Town Highway Department	<p>Problem: Culvert on Baxter Mill Road is undersized and needs to be replaced. Flooding occurs during heavy rain events.</p> <p>Solution: The town will replace and upsize the repetitively damaged/undersized culvert following an engineering study to determine the appropriate size upgrades.</p>	<p>1. In Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Ischua-002	Protect Ischua Town Barn to the 0.2% annual chance flood event	Flood	Engineer, Facility manager	<p>Problem: The Town Barn is in the special flood hazard area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood event.</p> <p>Solution: The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Town Barn to protect it to the 0.2% annual chance flood event. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the town will carry out the option.</p>	<p>1. In Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Ischua-003	Updated FIRMs	Flood	FEMA, Cattaraugus County Soil and Water, Town Administration	Problem: FIRMs are outdated and may not accurately display flood risk. Solution: The town will work with FEMA to update flood hazard mapping for the town	1. In Progress 2. Maps are currently being updated by FEMA with input from the Town and County.	1. Include 2. Not applicable 3. Not applicable
2020-Ischua-004	Update Flood Damage Prevention Ordinance	Flood	Town Board	Problem: The Town of Ischua needs an updated flood damage prevention ordinance Solution: The town will develop and adopt a flood damage prevention ordinance	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Ischua-005	Floodplain Administrator to attend training on floodplain management	Flood	Cattaraugus County Emergency Management; Cattaraugus County Codes Department	Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Solution: The town will work with the county to obtain/host training and certification for floodplain managers.	1. In Progress 2. Lack of training availability	1. Include 2. Not applicable 3. Not applicable
2020-Ischua-006	Wildfire Outreach	Wildfires	Town board	Problem: Additional public education on wildfire risk is needed. Solution: The town will develop an outreach program to educate the public about wildfires and provide information to residents, business owners, and organizations about what they can do to prevent their structures from wildfires	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Ischua-007	Update the Emergency Operations Plan	All Hazards	County, Town OEM	Problem: The town has an outdated emergency operation plan. Solution: The town will update the town's emergency operation plan.	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Ischua-008	Update Building Codes	All Hazards	County, town administration	Problem: The town has outdated building codes. Solution: The administration will update the town's building codes.	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable

23.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Ischua participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Ischua would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 23-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 23-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 23-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure										
Flood	X	X		X	X		X		X	X
Landslide	X				X					X
Pandemic	X			X			X			X
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X									X
Wildfire	X			X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 23-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-IschuaT-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-IschuaT-02	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-IschuaT-03	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-IschuaT-04	Outdated FIRMs	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-IschuaT-05	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-IschuaT-06	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-IschuaT-07	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-IschuaT-08	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-IschuaT-09	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-IschuaT-10	Review and Revise Building Codes	1	1	1	1	1	1	0	0	1	1	1	1	0	0	10	Medium
2025-IschuaT-11	Landslide Prone Roads Inventory	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-IschuaT-12	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-IschuaT-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Ischua Town Barn and Town Hall are located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.										
Description of the Solution:	<p>The Town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the Town will carry out the option.</p>										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Town.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-IschuaT-02. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none">• Determine where the damage occurred within the community and if the damaged structures are in an SFHA.• Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration.• Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value.• Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources following disaster events</td><td>Resources may not be available during major widespread events</td></tr><tr><td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td><td>A plan outlining responsibility is still necessary to prevent missing important requirements</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-IschuaT-03. Undersized Culverts

Lead Agency:	Highway										
Supporting Agencies:	Code Enforcement, Engineer										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. The culvert on Baxter Mill Road is undersized or may have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts.										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts in Town that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove roadway</td> <td>Roadway cannot be removed</td> </tr> <tr> <td>Raingardens</td> <td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.		
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-IschuaT-04. Outdated FIRMs

Lead Agency:	Floodplain Administrator										
Supporting Agencies:	Town Board, Cattaraugus County, NYSDEC, NYSDHSES, FEMA										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	FIRMs are outdated and may not accurately display flood risk. Inaccurate flood maps can misinform the public of actual flood risk and may prevent interested homeowners from receiving or applying for flood insurance. Correctly displaying the areas at risk to the flood hazard is not only critical to visually show the risk, but to support grant applications for funding to mitigate the flood risk at identified locations within or around the floodplain.										
Description of the Solution:	The Town will actively participate in the remapping process. This participation will include providing data and information to support map revisions, identifying areas of flooding concern, providing review of preliminary maps, and adopting updated flood damage prevention local laws when the FIRMs are finalized.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, State Budget, County Budget, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4										
Benefits:	Updating FIRMs will provide a more complete picture of the floodplain and the overall flood hazard in Cattaraugus County. This will inform other sectors of the community, including land use, development, permitting, and codes and standards.										
Impact on Socially Vulnerable Populations:	An analysis of the floodplain will inform future community development and land use and prevent vulnerable populations from residing in areas of heightened flood risk.										
Impact on Future Development:	Updated FIRMs will decide which populations and structures will require flood insurance to be built in areas of flood hazard.										
Impact on Critical Facilities/Lifelines:	Creation of updated floodplain maps will inform efforts to increase the resilience of critical infrastructure that is present in those areas, including transportation routes, water treatment plants, and other utility services. This will also aid in preventing future development of infrastructure in these areas.										
Impact on Capabilities:	An understanding of the floodplain will allow for the development of processes, plans, training and staff placement to address flooding issues in the areas of greatest concern before they occur.										
Climate Change Considerations:	The maps that are developed as a result of this action may not remain current or valid for the length of time that they may have in the past due to changes in floodplains and increases in extreme rainfall events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Town creates its own flood maps</td><td>Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications</td></tr><tr><td>FEMA updates maps without Town input</td><td>Required changes for areas of flooding may not be incorporated</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Town creates its own flood maps	Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications	FEMA updates maps without Town input	Required changes for areas of flooding may not be incorporated
Action	Evaluation										
No Action	Current problem exists										
Town creates its own flood maps	Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications										
FEMA updates maps without Town input	Required changes for areas of flooding may not be incorporated										

Action 2025-IschuaT-05. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-IschuaT-06. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-IschuaT-07. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-IschuaT-08. Wildfire Education and Outreach

Lead Agency:	Town Supervisor		
Supporting Agencies:	Town Board, Cattaraugus County		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire		
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.		
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	1 year		
Goals Met:	1, 2, 3, 4		
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.		
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.		
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Rely on state or federal resources		Resources may be generalized and not specific to the risks in the Town
	Use only a few methods for distribution		Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance

Action 2025-IschuaT-09. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Integrate hazard mitigation principles in only hazard appendices</td> <td>The plan will miss integration opportunities in the basic plan and annexes</td> </tr> <tr> <td>Ask County to integrate hazard mitigation into the County CEMP</td> <td>Town CEMP will remain undeveloped</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Current problem exists	Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes	Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped	
Action	Evaluation										
No Action	Current problem exists										
Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-IschuaT-10. Review and Revise Building Codes

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods or dam and levee failures can cause structures to buckle or come off its foundation due to the immense pressure.										
Description of the Solution:	The Town will review and revise building codes to integrate hazard mitigation principles to create a more resilient community. The Town will also use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document. Updated building codes will meet the minimum requirements set by the State.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	4 years										
Goals Met:	1, 4										
Benefits:	Mitigation considerations being taken when developing or updating building and zoning codes can lessen the risk of damage from a hazard event and increase overall community resiliency.										
Impact on Socially Vulnerable Populations:	Communities that collaborate and coordinate their regulatory efforts are more likely to have identified ways to best work with vulnerable populations to increase their level of preparedness.										
Impact on Future Development:	Updated building and zoning codes ensure that any new development that does take place is built to the safest standards based upon the best available data.										
Impact on Critical Facilities/Lifelines:	Integrating mitigation into building and zoning protects existing infrastructure and guides the safe development of new construction.										
Impact on Capabilities:	A consolidated review process brings together the capabilities of agencies and departments and better identifies what resources are available at any given point in time and where they are needed most.										
Climate Change Considerations:	As the climate changes, regulatory processes will require a more intense focus on maintenance and gathering of the best data to remain current and accurate over time. The Town will use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><tr><th>Action</th><th>Evaluation</th></tr><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Do not reach minimum State standards</td><td>Will be below standards</td></tr><tr><td>Adopt building code without integrating hazard mitigation principles</td><td>Will not increase Town's resiliency</td></tr></table>	Action	Evaluation	No Action	Current problem exists	Do not reach minimum State standards	Will be below standards	Adopt building code without integrating hazard mitigation principles	Will not increase Town's resiliency		
Action	Evaluation										
No Action	Current problem exists										
Do not reach minimum State standards	Will be below standards										
Adopt building code without integrating hazard mitigation principles	Will not increase Town's resiliency										

Action 2025-IschuaT-11. Landslide Prone Roads Inventory

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.										
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, The Engineer will work with the Highway Department to prioritize roadways and identify possible mitigation measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	3 years										
Goals Met:	1, 4, 6										
Benefits:	This action will identify locations with steep grades (above 20 percent) and provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.										
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.										
Impact on Future Development:	The identification of at-risk roads may lead to restrictions for future development.										
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action may improve the Town's regulatory capabilities.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Do not use inventory to inform a steep slope ordinance</td> <td>Would not restrict future development, could increase at risk properties and structures</td> </tr> <tr> <td>Do not use inventory to inform future projects</td> <td>Risk would not be reduced</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Do not use inventory to inform a steep slope ordinance	Would not restrict future development, could increase at risk properties and structures	Do not use inventory to inform future projects	Risk would not be reduced
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Do not use inventory to inform a steep slope ordinance	Would not restrict future development, could increase at risk properties and structures										
Do not use inventory to inform future projects	Risk would not be reduced										

Action 2025-IschuaT-12. Bridge Evaluations

Lead Agency:	Highway Department		
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> • Ischua 20 • Ischua 29 		
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.		
Impact on Socially Vulnerable Populations:	Not applicable		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove bridges		May cause significant traffic problems
	Replace bridges		Cost prohibitive

24. TOWN OF LEON

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Leon with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Leon, describes who participated in the planning process, assesses Leon's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

24.1 HAZARD MITIGATION PLANNING TEAM

The Town of Leon identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 24-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 24-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Fredrick Filock, Supervisor Address: 12195 Leon-New Albion Road, Conewango Valley, New York 14726 Phone Number: (716) 548-5087 Email: frado@netsync.net	Name/Title: Joel Fiebelkorn, Highway Superintendent Address: 12195 Leon-New Albion Road, Conewango Valley, New York 14726 Phone Number: (716) 296-5507 Email: leonhighway@hotmail.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Jeff Holler, Code Enforcement Officer Address: 12195 Leon-New Albion Road, Conewango Valley, New York 14726 Phone Number: (716) 307-3069 Email: eastottoceo@gmail.com	

24.2 COMMUNITY PROFILE

The Town of Leon is located westward center of Cattaraugus County in western New York State. The Town of Leon has a total area of 36.58 square miles. The town is south of the Town of Dayton and north of the Town of Conewango. An estimated 76 percent of the population are members of the Old Order Amish.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 14.2 percent of the population is 5 years of age or younger, 11 percent is 65 years of age or older, 4 percent is non-English speaking, 15.4 percent is below the poverty threshold, and 15.4 percent is considered disabled.

24.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Leon performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Leon to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

24.3.1 Planning and Regulatory Capability and Integration

Table 24-2 summarizes the planning and regulatory tools that are available to Leon.

Table 24-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 1, 2007: Enforcement of New York State Uniform Codes	Local	CEO
How has or will this be integrated with the HMP and how does this reduce risk?				
This Local Law shall provide the basic method for administration and enforcement of the Uniform Codes of New York State and the State Energy Conservation Construction Code in the Town of Leon, NY and shall establish powers, duties and responsibilities in connection therewith, This local law is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, all buildings, structures and premises regardless of use or occupancy, are subject to the provisions of this Local Law.				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Site Plan Code How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Code How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Post-Disaster Recovery/ Reconstruction Code How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Real Estate Disclosure Requirements How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Growth Management How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Environmental Protection Ordinance(s) How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Flood Damage Prevention Ordinance How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.	Yes	Local Law 1, 1987: Flood Damage Prevention	Federal, State, County and Local	CEO
Wellhead Protection How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Transportation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Agriculture Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Action/ Resilience/Sustainability Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Tourism Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Business/ Downtown Development Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan How has or will this be integrated with the HMP and how does this reduce risk? The CEMP defines the scope of preparedness and emergency management activities necessary in the Town. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.	Yes	Emergency Management Plan, 9/23/2013	Local	Town Highway Department
Continuity of Operations Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Substantial Damage Response Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Threat and Hazard Identification and Risk Assessment How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Post-Disaster Recovery Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Public Health Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

24.3.2 Development and Permitting Capability

Table 24-3 summarizes the capabilities of Leon to oversee and track development.

Table 24-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?	No	-
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		
Describe the level of buildout in your jurisdiction.	N/A	

24.3.3 Administrative and Technical Capability

Table 24-4 summarizes potential staff and personnel resources available to Leon and their current responsibilities that contribute to hazard mitigation.

Table 24-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	Yes	Town Supervisor
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	CEO/Highway Department
Mutual aid agreements	Yes	State and Local Municipalities
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	Yes	E&M Engineers
Engineers or professionals trained in building or infrastructure construction practices	Yes	CEO
Planners or engineers with an understanding of natural hazards	Yes	E&M Engineers
Staff with expertise or training in benefit/cost analysis	Yes	Supervisor
Professionals trained in conducting damage assessments	Yes	E&M Engineers
Personnel skilled or trained in GIS and/or Hazus applications	Yes	Cattaraugus County
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

24.3.4 Fiscal Capability

Table 24-5 summarizes financial resources available to Leon.

Table 24-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

24.3.5 Education and Outreach Capability

Table 24-6 summarizes the education and outreach resources available to Leon.

Table 24-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Town Supervisor
Personnel skilled or trained in website development	Yes	Southern Tier West
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	Warning Sirens
Natural disaster/safety programs in place for schools	No	No schools in town
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

24.3.6 Community Classifications

Table 24-7 summarizes classifications for community programs available to Leon.

Table 24-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	10 (no hydrants)	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

24.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 24-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

During the review of the adaptive capacity, the Town indicated the following:

- The Town decreased its adaptive capacity for the Dam and Levee Failure hazard from Moderate to Weak as there are no dams or levees in the Town, therefore there is no history dealing with a failure.
- The Town decreased its adaptive capacity for the Landslide hazard from Moderate to Weak as there is no history of landslides in the Town and would not be enough manpower currently to address this hazard.

Table 24-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Weak
Flood	Moderate
Landslide	Weak
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Utility Failure	Moderate
Wildfire	Moderate

24.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 24-1 is responsible for maintaining this information.

24.4.1 NFIP Statistics

Table 24-9 summarizes the NFIP policy and claim statistics for Leon.

Table 24-9. Leon NFIP Summary of Policy and Claim Statistics

# Policies	0
# Claims (Losses)	0
Total Loss Payments	\$0.00
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

24.4.2 Flood Vulnerability Summary

Table 24-10 provides a summary of the NFIP program in Leon.

Table 24-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Open fields
Do you maintain a list of properties that have been damaged by flooding?	No

NFIP Topic	Comments
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None the Town is aware of
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Code Enforcement Officer
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	No damages declared
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Yes
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement Officer
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County Capability
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	No
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Inspections and permit review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Code Enforcement Officer
What are the barriers to running an effective NFIP program in the community, if any?	None
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: August 23, 2011 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law 1 of 1987
What is the date that your flood damage prevention ordinance was last amended?	1987
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Yes, meets minimal requirements.

NFIP Topic	Comments
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Yes
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

24.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 24-11 through Table 24-13.

Table 24-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	2	0	19	21
Permits within SFHA	0	0	0	0
2020				
Total Permits	3	0	20	23
Permits within SFHA	0	0	0	0
2021				
Total Permits	3	0	19	22
Permits within SFHA	0	0	0	0
2022				
Total Permits	4	0	18	22
Permits within SFHA	0	0	0	0
2023				
Total Permits	7	0	13	20
Permits within SFHA	0	0	0	0
2024				
Total Permits	-	-	-	-
Permits within SFHA	-	-	-	-

SFHA = Special Flood Hazard Area (1% flood event)

Note: '-' indicates records were unavailable.

Table 24-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There has been no recent major development or infrastructure between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 24-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There are no known or anticipated major development or infrastructure in the next five years.					

24.6 JURISDICTIONAL RISK ASSESSMENT

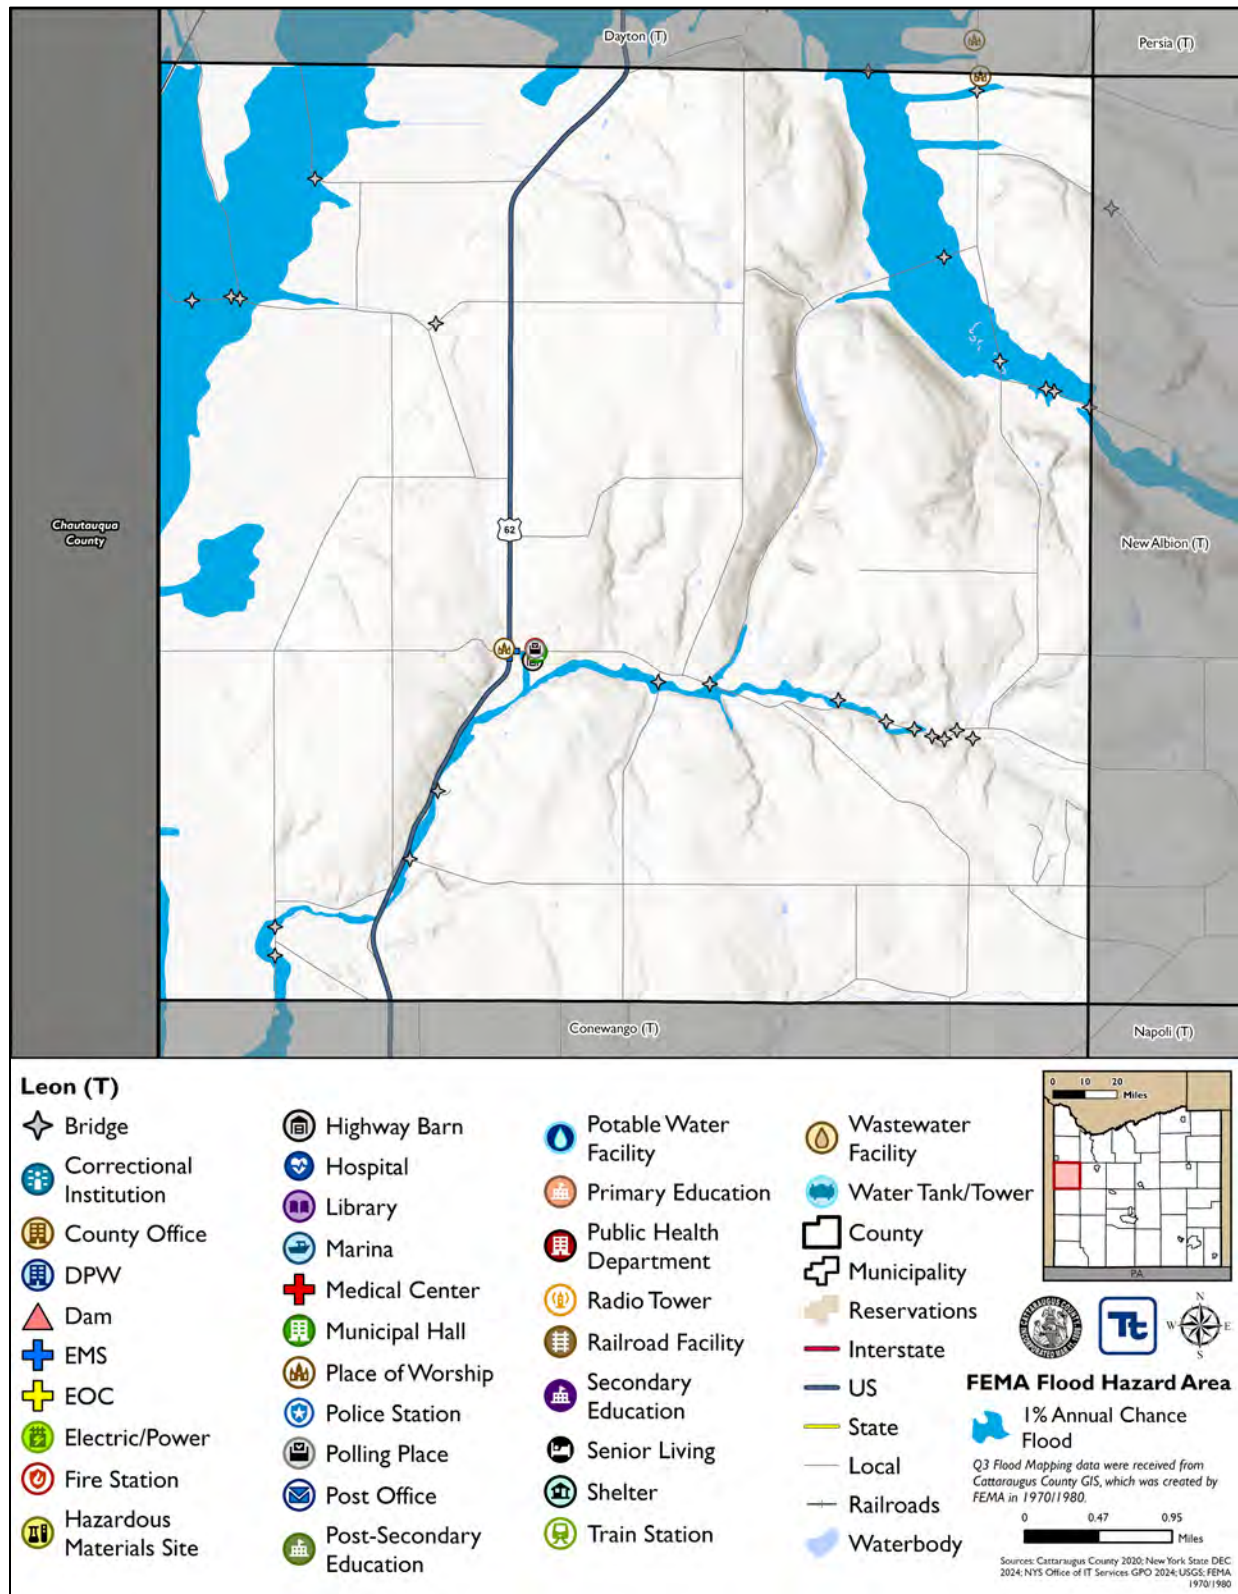

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Leon's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

24.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 24-1 through Figure 24-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Leon has significant exposure. The maps show the location of potential new development, where available.

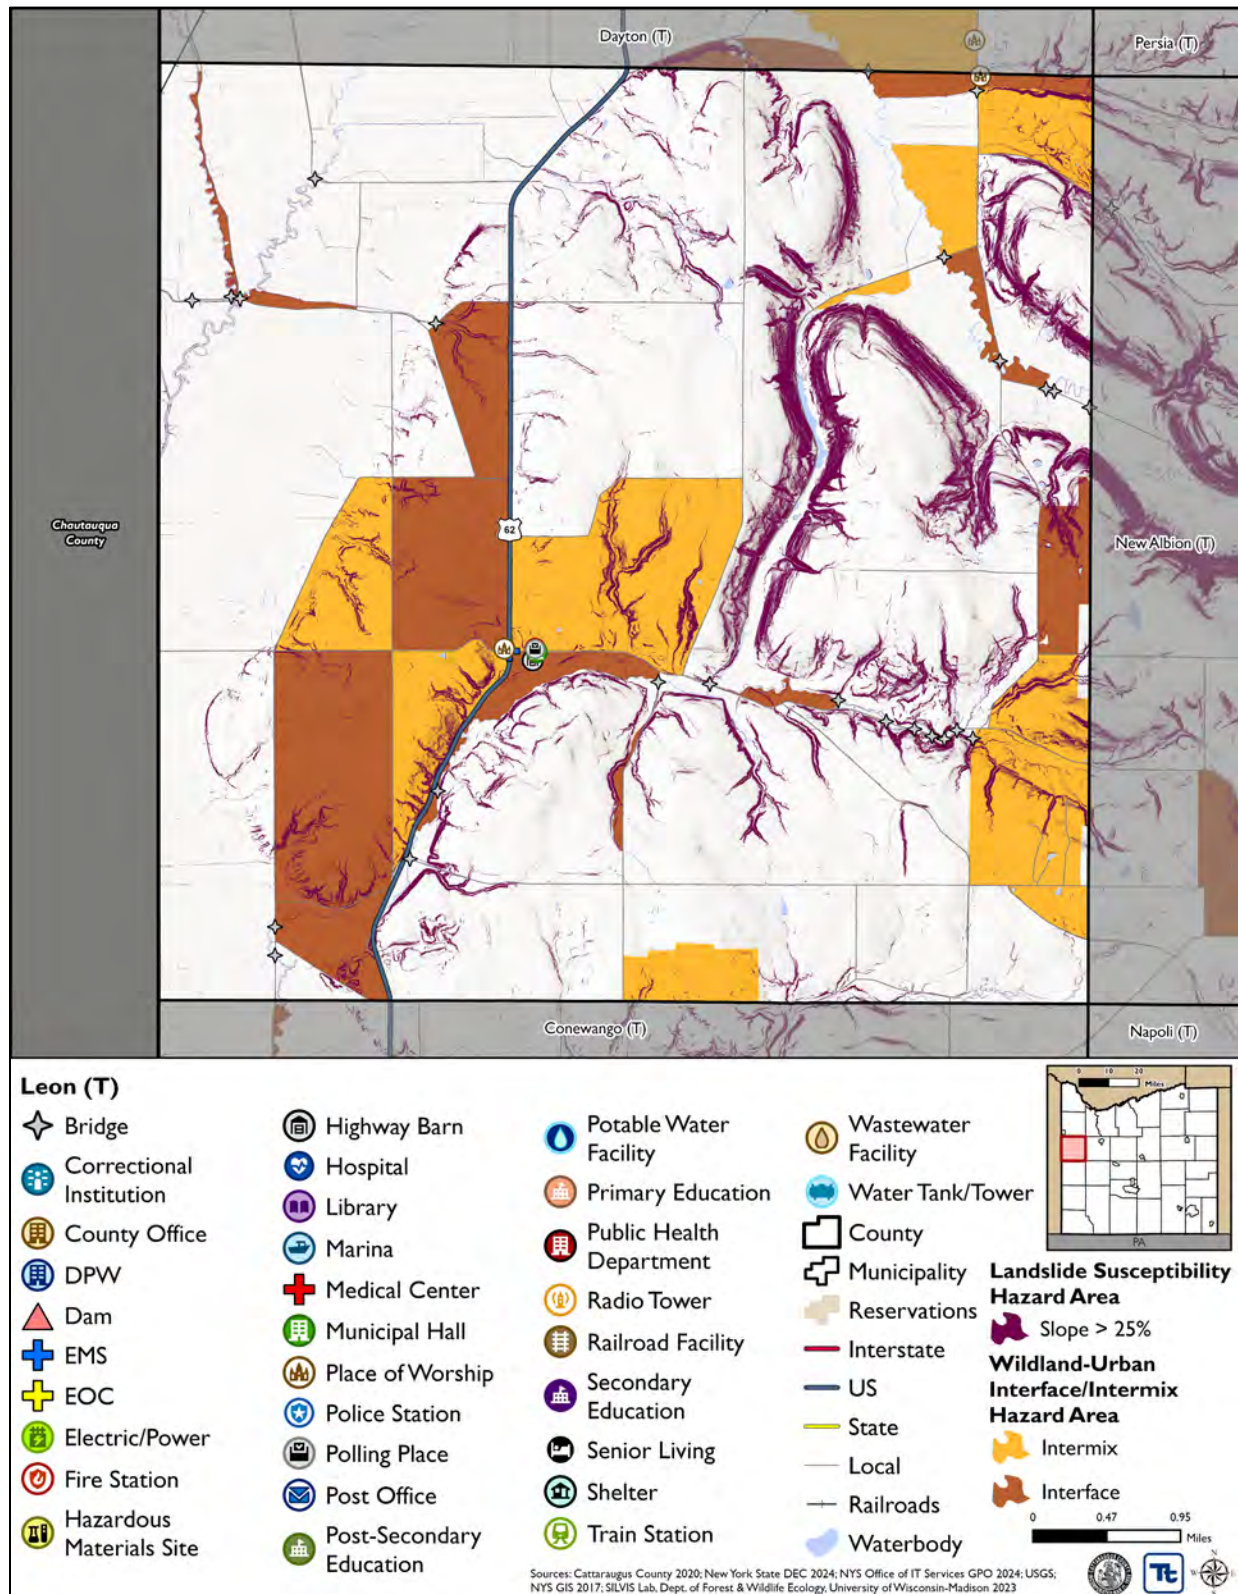

Figure 24-1. Leon Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 24-2. Leon Landslide and Wildfire Hazard Area Extent and Location Map

24.6.2 Hazard Event History

The history of natural and non-natural hazard events in Leon is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 24-14 provides details on loss and damage in Leon during hazard events since the last hazard mitigation plan update.

Table 24-14. Hazard Event History in Leon

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Leon
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town experienced flooding and out flow damage on 42 nd . St. \$17,000.00 cost
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town abided by social distancing and mask mandates.
January 12, 2020	High Wind	N/A	High wind	The Town experienced trees down \$3,500.00 cost
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town experienced bank erosion along Bailey Hill and Town Hill roads. Rip rap and gravel was also installed. \$14,900.00 cost
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town experienced flooding and performed ditch, and road repairs. \$3,000.00 cost
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town experienced flooding; plugged sluice repairs. \$3,620.00 cost
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town experienced trees downed on roads and cemetery. \$5,238.00 cost
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town experienced trees downed which resulted in a 2-day cleanup. \$1,200.00 cost
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town experienced trees downed which resulted in a 1-day cleanup. \$1,200.00 cost
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town experienced electric lines down causing surge damaging lights at Town garage facility. \$2,215.00 cost
March 6, 2022	High Wind	N/A	High wind	The Town did not experience any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Leon
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town experienced flooding shoulder repair. \$1,800.00 cost
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town experienced snow resulting in extra overtime. \$1,200.00 cost
April 13, 2024	Thunderstorm	N/A	Trees downed and flooding.	The Town experienced flooding and downed trees which resulted in 1 day of clean up and \$1,200 cost.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

24.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Leon .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Leon reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the following:

- The Town decreased its hazard ranking for the Landslide hazard from 'High' to 'Medium' as most sloped areas are forested with minimal population.

Table 24-15 shows Leon's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 24-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Low
Flood	Medium
Landslide	Medium
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium

Hazard	Rank
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 24-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 24-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event

24.6.4 Identified Issues

After a review of Leon's hazard event history, hazard rankings, hazard location, and current capabilities, Leon identified the following vulnerabilities within the community:

- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.

- The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. Eroded roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Several roads in the Town would benefit from mitigation measures to prevent future damage from flooding, including:
 - Smith Road
 - Bailey Hill Road
 - Frog Valley Road
- The West Branch of the Conewango Creek has stream bank erosion issues, threatening encroachment onto Frog Valley Road. Stream banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Eldredge Road
 - Bailey Hill Road
 - Townhall Road
 - Hill Road
- Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Leon 01
 - Leon 02
 - Leon 05
 - Leon 08
 - Leon 14
 - Leon 15

- Leon 16

24.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

24.7.1 Past Mitigation Action Status

Table 24-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

24.7.2 Additional Mitigation Efforts

Leon did not identify any additional mitigation efforts completed since the last HMP.

Table 24-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Leon-001	Scott Hollow Road Ditch Improvements	Flood	Town Highway Department	<p>Problem: Erosion issues exist in ditches requiring ditch improvements.</p> <p>Solution: Hiring a contractor to stabilize ditch line next to road to avoid erosion in 2 different areas.</p>	<p>1. Ongoing Capability</p> <p>2. This is a regular capability performed by the Town.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. This is a regular capability performed by the Town.</p>
2020-Leon-002	Training for Code Enforcement Officers, Floodplain Administrator	Flood	County DPW	<p>Problem: Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.</p> <p>Solution: Obtain/host specialist training and certification for floodplain managers.</p>	<p>1. Complete</p> <p>2. FPAs have attended trainings.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. FPAs have attended trainings.</p>
2020-Leon-003	Update the Flood Damage Prevention Ordinance	Flood	Town Board	<p>Problem: The Flood Damage Prevention Ordinance does not include the 2' freeboard requirement mandated by NYS.</p> <p>Solution: The Flood Damage Prevention Ordinance will be updated to include the 2'</p>	<p>1. In Progress</p> <p>2. Not updated due to other Town priorities.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				freeboard requirement mandated by NYS.		
2020-Leon-004	Continuous Public Education	Wildfire	Town Board	Problem: Public needs to be educated on what they can do to protect their structures from wildfires. Solution: Provide information to residents, business owners, and organizations about what they can do to protect their structures from wildfires.	1. Complete 2. Outreach documents created for wildfire hazard, but materials should be created and distributed for all hazards of concern.	1. Include 2. Alter to include outreach for all hazards 3. Not applicable
2020-Leon-005	Stream stabilization on Frog Valley Road	Flood	Town Highway Department	Problem: Erosion of creek bank threatening to encroach onto Frog Valley Road surface. Bank stabilization needed. Solution: Per the results of engineering study, implement specific stabilization of the creek along Frog Valley Road	1. No Progress 2. Finalizing project and applying for FEMA grants.	1. Include 2. Not applicable 3. Not applicable
2020-Leon-006	Update municipal Emergency Operation Plan	All	Town Board, County EMO	Problem: The Town Emergency Operation may be outdated. Solution: Determine if the EOP needs updating and as appropriate, update the plan.	1. Complete 2. Town determined plan is okay as is and does not require an update.	1. Discontinue 2. Not applicable 3. Town determined plan is okay as is and does not require an update.
2020-Leon-007	Update Building Code to current standards	All	Town Board	Problem: Building Code may not contain all current standards. Solution: Update the Building Code to latest standard.	1. Ongoing Capability 2. Codes are updated and revised as needed by the Town.	1. Discontinue 2. Not applicable 3. Action performed already by the Town.

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Leon-008	Backup Generator at Town storage building	All	Town Highway Department	Problem: Town storage building that houses all truck lacks backup generator power. Solution: Determine appropriate backup power generation. Purchase and install ~16 kw generator.	1. Complete 2. Generator was installed.	1. Include 2. Not applicable 3. Not applicable
2020-Leon-009	Backup generator at Town Hall	All	Town Highway Department	Problem: Town Hall building lacks backup generator power Solution: Determine appropriate backup power generation. Purchase and install ~16 kW generator.	1. Completed 2. A generator was installed at the end of 2024.	1. Discontinue 2. Not applicable 3. A generator was installed at the end of 2024.
2020-Leon-010	Replace culverts	Flood	Town Highway Department	Problem: Culverts need size increase or replacement at Eldredge Road, Bailey Hill Road, Townhall Road, Hill Road Solution: Pending the results of engineering study, replace culverts as needed.	1. In Progress 2. Study must begin	1. Include 2. Not applicable 3. Not applicable
2020-Leon-011	Bank stabilization	Flood	Town Highway Department	Problem: Banks need to be stabilized on Town Hill Road, Smith Road, Bailey Hill Road Solution: Pending the results of an engineering study, implement measures to Stabilize banks along selected roads	1. In Progress 2. Study must begin	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. 2020-Leon-012	Install salt and sand shed	Severe snowstorm, Severe Storm	Town Highway Department	<p>Problem: Open air storage of salt and sand leads to loss of materials from erosion and leaching.</p> <p>Solution: Pending results of engineering analysis, construct a new salt/sand shed</p>	<p>1. No Progress</p> <p>2. Financial setbacks have prevented progress on this action.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

24.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Leon participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Leon would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 24-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 24-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 24-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure				X			X			
Flood	X	X		X	X		X		X	
Landslide				X			X			
Pandemic				X			X			
Severe Storm	X	X		X	X		X		X	
Severe Winter Storm	X	X		X	X		X		X	
Utility Failure				X			X			
Wildfire				X			X			

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 24-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-LeonT-01	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-LeonT-02	Comprehensive Outreach Program	1	1	1	1	1	1	0	1	1	1	1	1	0	1	12	High
2025-LeonT-03	Roadway Erosion	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-LeonT-04	Streambank Erosion	1	1	1	1	0	0	1	1	1	1	1	1	0	1	11	High
2025-LeonT-05	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-LeonT-06	Salt and Sand Storage Shed	0	0	1	1	1	0	1	1	1	1	1	1	1	0	10	Medium
2025-LeonT-07	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-LeonT-01. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-LeonT-02. Comprehensive Outreach Program

Lead Agency:	Town Council										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on hazard risks and methods of mitigation measures, including those for dam and levee failure, flood, landslide, pandemic, severe storm, severe winter storm, utility failure, and wildfire. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for each individual hazard of concern.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the current public education and outreach program in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the various hazards which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of potential hazards. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's already existing public education and outreach program and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from hazards and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-LeonT-03. Roadway Erosion

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. Eroded roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Several roads in the Town would benefit from mitigation measures to prevent future damage from flooding, including: <ul style="list-style-type: none"> • Smith Road • Bailey Hill Road • Frog Valley Road 										
Description of the Solution:	The Town Engineer and Highway Department will identify and implement erosion-reducing measures. These measures may include: <ul style="list-style-type: none"> • Elevating the roadway • Improving drainage • Strengthening underlying soils • Realigning roads and structures • Strengthening support structures • Armoring vulnerable embankments 										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along eroded and flood-prone roads.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. This action will mitigate erosion along roadways and reduce likelihood of flooding impacts.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th><th>Evaluation</th></tr> </thead> <tbody> <tr> <td>No Action</td><td>Current problem exists</td></tr> <tr> <td>Remove ditches from roadways</td><td>Would likely increase flood risk</td></tr> <tr> <td>Pave all roads with permeable surfaces</td><td>Cost prohibitive</td></tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove ditches from roadways	Would likely increase flood risk	Pave all roads with permeable surfaces	Cost prohibitive
Action	Evaluation										
No Action	Current problem exists										
Remove ditches from roadways	Would likely increase flood risk										
Pave all roads with permeable surfaces	Cost prohibitive										

Action 2025-LeonT-04. Streambank Erosion

Lead Agency:	Engineering		
Supporting Agencies:	Highway Department		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The West Branch of the Conewango Creek has stream bank erosion issues, threatening encroachment onto Frog Valley Road. Stream banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding.		
Description of the Solution:	The Town Engineer will assess the feasibility and cost-effectiveness of various stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements to prevent future flooding surrounding the West Branch of the Conewango Creek, especially on Frog Valley Road.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, Town Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage to properties.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development surrounding the West Branch of the Conewango Creek will have its risk of flood impacts reduced.		
Impact on Critical Facilities/Lifelines:	Not applicable		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events can lead to an influx of water, resulting in flooding conditions.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Elevate nearby roads		Cost prohibitive
	Acquire all properties which flood		Cost prohibitive

Action 2025-LeonT-05. Undersized Culverts

Lead Agency:	Highway Superintendent										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads: <ul style="list-style-type: none">• Eldredge Road• Bailey Hill Road• Townhall Road• Hill Road										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culvert located at Grove Street Bridge that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Remove roadway</td><td>Roadway cannot be removed</td></tr><tr><td>Raingardens</td><td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-LeonT-06. Salt and Sand Storage Shed

Lead Agency:	Highway Department										
Supporting Agencies:	Town Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.										
Description of the Solution:	Construct a shed to house bulk salt and sand storage. The construction of this shed will reduce loss of material to erosion and leaching from rain and snow melt and ensure that there are enough critical materials for roadway treatment during storms.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Town Budget										
Implementation Timeline:	Within 2 years										
Goals Met:	1, 4, 5										
Benefits:	This action will support the continuity of operations for the critical services within the Town, including the Highway Department and first responders. The Highway Department will maintain its capability to provide road treatments in time of need, ensuring roads are accessible for first responders and regular travelers.										
Impact on Socially Vulnerable Populations:	Vulnerable populations will have access to maintained roads, ensuring safe travel,										
Impact on Future Development:	Individuals living within future development in the Town will have access to safe, treated roadways.										
Impact on Critical Facilities/Lifelines:	The construction of this structure will enhance the transportation lifeline by ensuring roads are safe to traverse during severe winter storms. Furthermore, it will create an additional critical facility.										
Impact on Capabilities:	This action will ensure the Highway Department is able to maintain its capabilities.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events would further expose materials stored outside to the elements, degrading not just the materials, but pushing them into the environment, potentially disrupting the ecosystem.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Install underground salt and sand facility</td><td>Not feasible</td></tr><tr><td>Share a facility with another municipality</td><td>Administratively burdensome</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Install underground salt and sand facility	Not feasible	Share a facility with another municipality	Administratively burdensome		
Action	Evaluation										
No Action	Current problem exists										
Install underground salt and sand facility	Not feasible										
Share a facility with another municipality	Administratively burdensome										

Action 2025-LeonT-07. Bridge Evaluations

Lead Agency:	Highway Department	
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT	
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none">• Leon 01• Leon 02• Leon 05• Leon 08• Leon 14• Leon 15• Leon 16• Leon 18• Leon 20• Leon 21• Leon 25• Leon 29• Leon 31• Leon 35• Leon 36• Leon 37• Leon 40	
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.	
Estimated Cost:	Medium	
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY	
Implementation Timeline:	Within 5 years	
Goals Met:	1	
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.	
Impact on Socially Vulnerable Populations:	Not applicable	
Impact on Future Development:	Not applicable	
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.	
Impact on Capabilities:	Not applicable	
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.	
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)		<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove bridges		May cause significant traffic problems
	Replace bridges		Cost prohibitive

DRAFT

25. TOWN OF LITTLE VALLEY

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Little Valley with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Little Valley, describes who participated in the planning process, assesses Little Valley's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

25.1 HAZARD MITIGATION PLANNING TEAM

The Town of Little Valley identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Clerk represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 25-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 25-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Megan Morgenstern, Clerk Address: 201 Third Street, Little Valley NY, 14755 Phone Number: 716-938-6441 Email: townlv1@yahoo.com	Name/Title: Thomas J. Crouse, Highway Superintendent Address: 201 Third Street, Little Valley NY, 14755 Phone Number: 716-938-6423 Email: townlv1@yahoo.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Jeff Holler, Code Enforcement Officer Address: 201 Third Street, Little Valley NY, 14755 Phone Number: 716-307-3069 Email: eastottoceo@gmail.com	
Additional Contributors	
Name/Title: Peter E. Wrona, Town Supervisor Method of Participation: Provided key information to assist in annex development.	
Name/Title: Susan Koch, Deputy Clerk Method of Participation: Provided key information to assist in annex development.	

25.2 COMMUNITY PROFILE

The Town of Little Valley lies in the central part of Cattaraugus County in western New York State. The Town of Little Valley has a total area of 29.92 square miles. Little Valley Creek, Dublin Creek, and Whig Street Creek all flow through the town. The town is bordered to the north by the Town of Mansfield, to the east is the Town of Great Valley, to the south is the Town of Salamanca and City of Salamanca, and to the west is the Town of Napoli. The Hamlet of Elkdale is located within the Town.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 0.5 percent of the population is 5 years of age or younger, 23.3 percent is 65 years of age or older, 0 percent is non-English speaking, 6 percent is below the poverty threshold, and 41.3 percent is considered disabled.

25.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Little Valley performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Little Valley to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

25.3.1 Planning and Regulatory Capability and Integration

Table 25-2 summarizes the planning and regulatory tools that are available to Little Valley.

Table 25-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Chapter 60 - Building Code Administration and Enforcement	State and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? Code applies to construction, alteration, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.				
Zoning/Land Use Code	Yes	Chapter 140 - Zoning	Local	Town Assessor
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Promotes the general health and welfare of the present and future inhabitants of the Town. The intention of the Town is to assure the proper and sensitive development of land within Little Valley to protect and enhance the quality of life in general. This chapter is intended to allow development in a manner that encourages and provides for well-planned commercial and residential centers, smooth traffic circulation, and efficient delivery of municipal services. This chapter seeks to prevent development that adds to existing geologic hazards, erosion, flooding, or other conditions that create potential dangers to life and safety in the community or detract from the quality of life in the community.				
Subdivision Code	Yes	Chapter 116 – Subdivision of Land	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? Provides for the orderly growth and development of the Town with adequate provision for the housing, transportation, distribution, comfort, convenience, safety, health, and welfare of its population.				
Site Plan Code	Yes	Chapter 140 - Zoning	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? The purpose of site plan approval is to determine compliance with the objectives of this article in zoning districts where inappropriate development may cause a conflict between uses in the same or adjoining zoning district by creating unhealthful and unsafe conditions and thereby adversely affect the public health, safety, and general welfare.				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	Yes	Chapter 140 – Zoning	Local	Codes Division
How has or will this be integrated with the HMP and how does this reduce risk? Identifies environmentally sensitive areas to be preserved from damage by development, or establishment of protection measures. This can include, but is not limited to, wetlands, floodplains, and other sensitive ecosystems and the species that reside within them.				
Flood Damage Prevention Ordinance	Yes	Chapter 72 – Flood Damage Prevention	Federal, State, County and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities:				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; D. Control filling, grading, dredging and other development which may increase erosion or flood damages; E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and F. Qualify and maintain participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Emergency Management Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Climate Change Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
PLANNING DOCUMENTS				
General/Comprehensive Plan	Yes	Comprehensive Plan, 1999	Local	Town Board
How has or will this be integrated with the HMP and how does this reduce risk? The Comprehensive Plan is intended to promote the preservation of the rural and agricultural character of the community, while at the same time promoting orderly development in accordance with the goals and policies that are contained in this document				
Capital Improvement Plan	Yes	Comprehensive Plan, 1999	Local	Town Board
How has or will this be integrated with the HMP and how does this reduce risk? A capital improvement plan helps identify priority areas for development and revitalization that can reduce damages by removing blight and increasing economic resiliency.				
Disaster Debris Management Plan	Yes	Disaster Debris Management Plan	Local	DPW
How has or will this be integrated with the HMP and how does this reduce risk? Minimizing the amount of debris left behind on residential and commercial properties and roadways reduces post-disaster recovery costs and accelerates a return to normalcy following a disaster event.				
Floodplain Management or Watershed Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Open Space Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?

25.3.2 Development and Permitting Capability

Table 25-3 summarizes the capabilities of Little Valley to oversee and track development.

Table 25-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?	Yes	-
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	-	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?	No	-
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	-	-
Describe the level of buildout in your jurisdiction.	N/A	There is limited area in the Town for future development due to the terrain. Town is mostly built out.

25.3.3 Administrative and Technical Capability

Table 25-4 summarizes potential staff and personnel resources available to Little Valley and their current responsibilities that contribute to hazard mitigation.

Table 25-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Code Enforcement Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-
Mitigation Planning Committee	Yes	Town Board
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	DPW and Fire District
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	Yes	County Engineering Department
Engineers or professionals trained in building or infrastructure construction practices	Yes	County Engineering Department
Planners or engineers with an understanding of natural hazards	Yes	County Engineering Department
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Code Enforcement
Personnel skilled or trained in GIS and/or Hazus applications	Yes	Highway Department
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	Yes	Hired and needed
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

25.3.4 Fiscal Capability

Table 25-5 summarizes financial resources available to Little Valley.

Table 25-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	Yes

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	No
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

25.3.5 Education and Outreach Capability

Table 25-6 summarizes the education and outreach resources available to Little Valley.

Table 25-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Town Supervisor
Personnel skilled or trained in website development	Yes	Clerk's Office
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

25.3.6 Community Classifications

Table 25-7 summarizes classifications for community programs available to Little Valley.

Table 25-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	Unknown	Unknown

Program	Participating? (Yes/No)	Classification	Date Classified
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

25.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 25-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 25-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

25.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 25-1 is responsible for maintaining this information.

25.4.1 NFIP Statistics

Table 25-9 summarizes the NFIP policy and claim statistics for Little Valley.

Table 25-9. Little Valley NFIP Summary of Policy and Claim Statistics

# Policies	7
# Claims (Losses)	0
Total Loss Payments	\$0.00
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

25.4.2 Flood Vulnerability Summary

Table 25-10 provides a summary of the NFIP program in Little Valley.

Table 25-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Top Fourth St to The Heights, Liebler Rd Flood events occurred on March 7, 2012 and May 20, 2011 which impacted Fourth Street
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None the Town is aware of
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Through Inspections
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None

NFIP Topic	Comments
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Needs to be updated to reflect localized flooding
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Cattaraugus County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	Yes
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permits and Inspections
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Through Inspections
What are the barriers to running an effective NFIP program in the community, if any?	Lack of staffing and funding
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: Not applicable CAV: October 4, 2011
What is the local law number or municipal code of your flood damage prevention ordinance?	Chapter 72 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	April 13, 1987
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Planning and zoning boards consider flood risks when reviewing applications.
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

25.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 25-11 through Table 25-13.

Table 25-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	3	0	0	3
Permits within SFHA	0	0	0	0
2020				
Total Permits	2	0	0	2
Permits within SFHA	0	0	0	0
2021				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2022				
Total Permits	5	0	0	5
Permits within SFHA	0	0	0	0
2023				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 25-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 25-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any known or anticipated major development or infrastructure in the next five years.					

25.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Little Valley's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

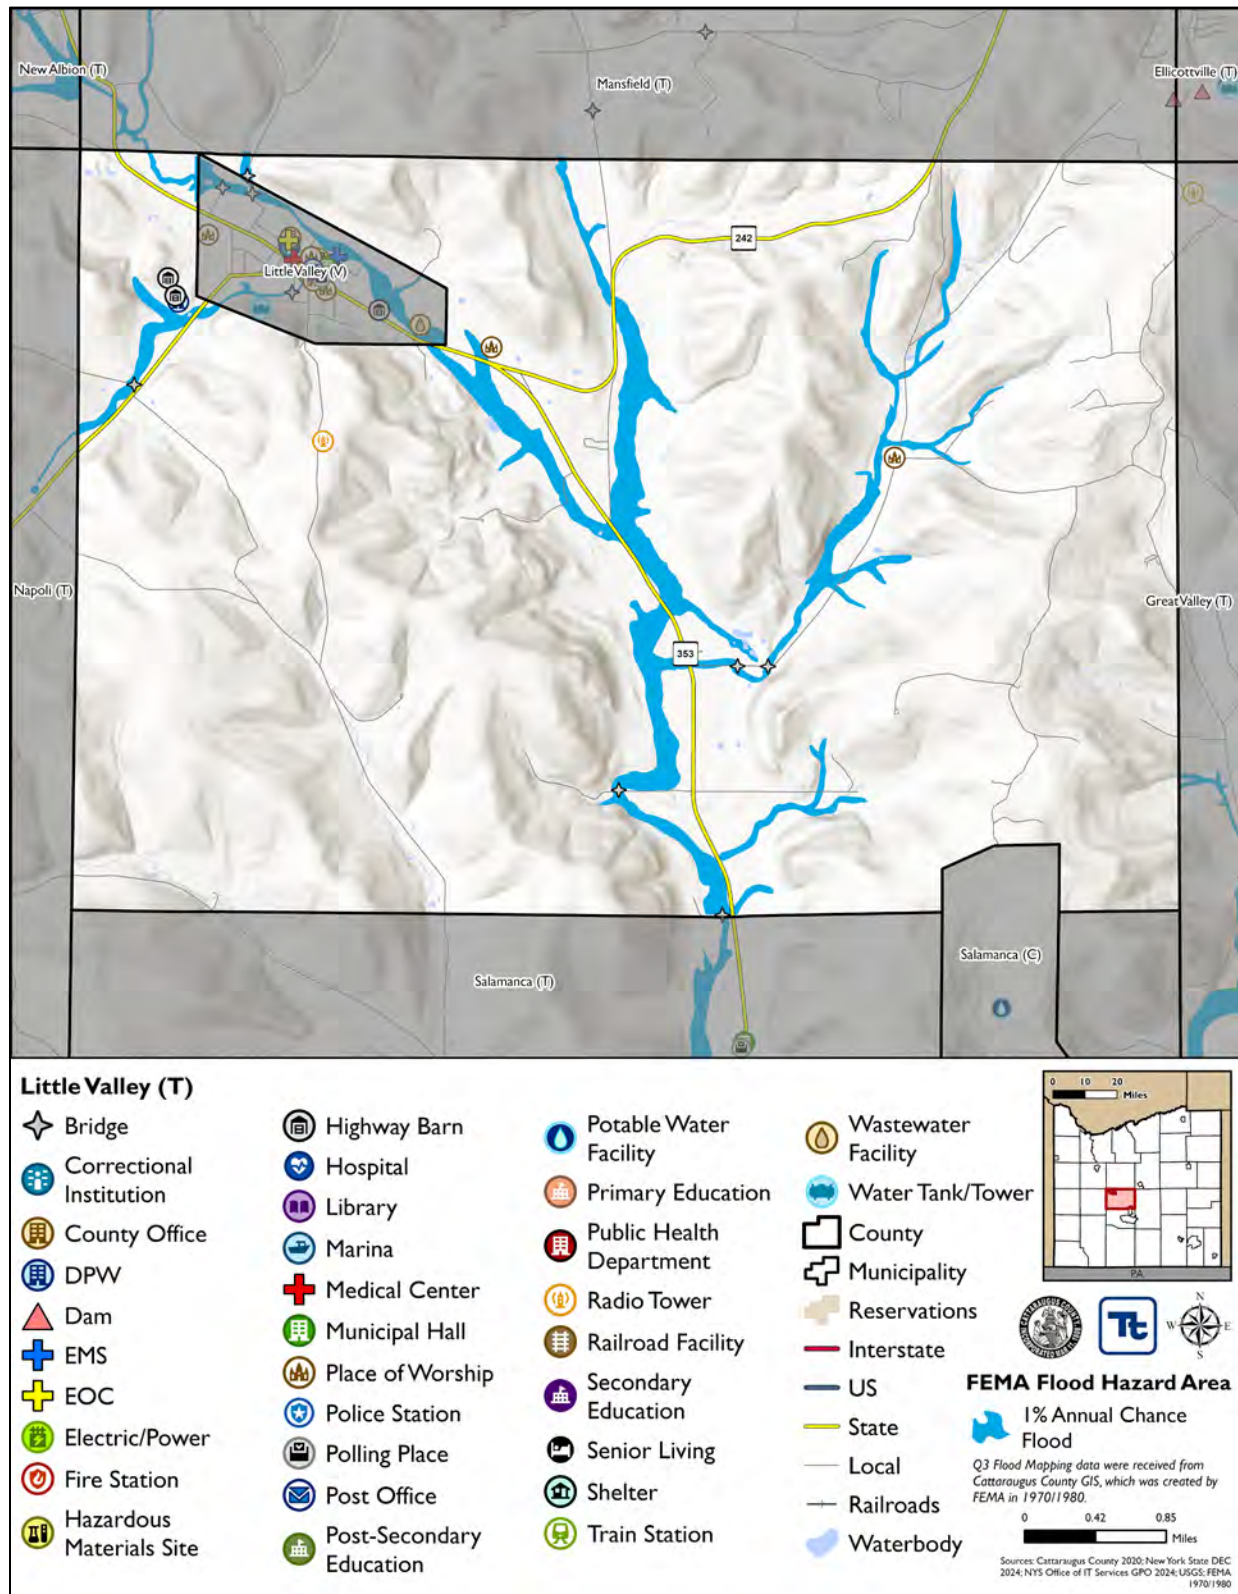

25.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 25-1 through Figure 25-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Little Valley has significant exposure. The maps show the location of potential new development, where available.

DRAFT

Figure 25-1. Little Valley Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 25-2. Little Valley Landslide and Wildfire Hazard Area Extent and Location Map

25.6.2 Hazard Event History

The history of natural and non-natural hazard events in Little Valley is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 25-14 provides details on loss and damage in Little Valley during hazard events since the last hazard mitigation plan update.

Table 25-14. Hazard Event History in Little Valley

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Little Valley
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damages or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town abided by the social distancing, work from home and masking mandates.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damages or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damages or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Little Valley
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

25.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Little Valley .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Little Valley reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the following:

- The Town determined it has no risk to the Dam and Levee Failure hazard as there are no dams located within the jurisdiction or nearby which would impact the jurisdiction. Therefore, the risk was decreased from 'Low' to 'No Risk'.
- The Town increased its risk to the Flood hazard from 'Medium' to 'High' due to localized flooding events and increasing flash flood events.

Table 25-15 shows Little Valley's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 25-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	No Risk
Flood	High
Landslide	Low
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 25-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 25-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)

Source: Cattaraugus County 2024

25.6.4 Identified Issues

After a review of Little Valley's hazard event history, hazard rankings, hazard location, and current capabilities, Little Valley identified the following vulnerabilities within the community:

- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town of Little Valley needs to identify locations for the placement of temporary sheltering and warming and cooling centers.
- The following critical facilities are Town-owned and have repeatedly been damaged by storms and flooding. The facilities are currently housed in the same structure, located at 201 Third Street, which is not within the special flood hazard area but has still experienced flooding. Furthermore, the roof of the structure must be re-evaluated, as it may not have the correct roofing
 - Town Hall
 - Highway Barn

- Court
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded roadways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Third Street
 - Fourth Street
 - Bucktooth Run (West and East Branch)
 - Whig Street
 - Liebler Road
 - Kyler Hill Road
 - Dutch Hill Road
 - Hungry Hollow Road
 - Mutton Hollow Road
- Critical facilities require backup power to ensure continuity of operations. The Fire Hall does not have automatic backup power, which could impact the continuity of operations at the facility in the event of a utility or power failure. This facility also has the potential to be used as a temporary shelter or a warming and/or cooling center. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at the critical facility.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Mutton Hollow Road
 - Whig Street
 - Hungry Hollow Road
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides, nor is there a local law restricting construction on areas with steep slopes.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Little Valley 01

- Little Valley 02
- Little Valley 06
- Little Valley 12
- Little Valley 16
- Salamanca 06

25.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

25.7.1 Past Mitigation Action Status

Table 25-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

25.7.2 Additional Mitigation Efforts

In addition to the mitigation actions completed in Table 25-17, Little Valley identified the following mitigation efforts completed since the last HMP:

- West Branch Road culvert was upsized to reduce flooding.

Since the adoption of the County's first HMP, Little Valley has made significant mitigation progress in the following areas:

- Stormwater management

Table 25-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Town of Little Valley-001	Flood Damage Prevention Ordinance	Flood	FPA	Problem: The Town of Little Valley requires an update to the Flood Damage Prevention Ordinance. Solution: The town will adopt an updated flood damage prevention ordinance to maintain NFIP compliance.	1. No Progress 2. Need to review and update	1. Include 2. Not applicable 3. Not applicable
2020-Town of Little Valley-002	FPA Training	Flood	Administration	Problem: Floodplain administration staff require additional training. Solution: The Town FPA and staff who assist with floodplain administration will attend trainings and workshops offered by FEMA and NYS to develop additional floodplain administration skills.	1. No Progress 2. Limited trainings	1. Include 2. Need to be trained by FEMA to develop additional Floodplain Administration skills 3. Not applicable
2020-Town of Little Valley-003	Wildfire Outreach	Wildfire	Administration	Problem: Additional public education on wildfire risk is needed. Solution: The town will conduct outreach to residents, business owners, and organizations about what they can do to protect their structures from wildfires.	1. No Progress 2. Materials not developed	1. Include 2. Need training by NYS. 3. Not applicable
2020-Town of Little Valley-004	Identification of Permanent Housing Locations	All Hazards	Administration	Problem: The Town of Little Valley needs to identify locations for the placement of permanent housing. Solution: The Town of Little Valley will work with Cattaraugus County	1. No Progress 2. Other projects in Town took priority	1. Include with edits 2. Encampments out on the trail have been reported. Fairgrounds may be a decent temporary shelter for power outages and

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				to identify regional locations for temporary and permanent housing.		heating/cooling stations. Would need MOU. 3. Not applicable
2020-Town of Little Valley-005	Relocate Town Hall, Highway Barn, Court	Flood, Severe Storm	Engineer	<p>Problem: The following critical facilities are municipally owned and have repeatedly been damaged by storms and flooding:</p> <ul style="list-style-type: none">• Town Hall• Highway Barn• Court <p>The facilities are currently housed in the same structure which is not located in the special flood hazard area but has still experienced flooding.</p> <p>Solution: The town will relocate the facilities to a location outside of the reach of flooding. If the facilities need to be separated and reconstructed as three distinct buildings, this course of action will be taken. Once the most cost-effective option is identified, the town will carry out the option.</p>	<p>1. In Progress</p> <p>2. Roof is leaking in the garage; and needs a new roof. Edit action from relocating the facilities to be improvements to the structure. Creek is a protected creek. Engineer study to facility and then implement the best and most cost-effective solution.</p>	<p>1. Include</p> <p>2. Roof is leaking in the garage; and needs a new roof. Edit action from relocating the facilities to be improvements to the structure. Creek is a protected creek. Engineer study to facility and then implement the best and most cost-effective solution. Roof is most likely not the correct kind of roof to handle to snow- was built by the Highway Department (is a steel roof). Court room sometimes leaks.</p> <p>3. Not applicable</p>
2020-Town of Little Valley-006	Storm Sewer Upgrades	Flood, Severe Storm	Engineer, Highway Department	<p>Problem: The town has multiple areas that are repetitively impacted by stormwater flooding. Roadways and areas that experience flooding include:</p> <ul style="list-style-type: none">• Third Street• Fourth Street	<p>1. In Progress</p> <p>2. Financial constraints.</p>	<p>1. Include</p> <p>2. Fourth Street was repaved- the issue was not solved.</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				<ul style="list-style-type: none">• Bucktooth Run (West and East Branch)• Whig Street• Liebler Road• Kyler Hill Road• Dutch Hill Road• Hungry Hollow Road• Mutton Hollow Road <p>Solution: The Engineer will design stormwater improvements for the identified roadways and areas. The Highway Department will carry out construction of the identified stormwater improvements.</p>		
2020-Town of Little Valley-007	Backup Power	Utility Failure	Engineer, OEM, Highway Department	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The Town Hall and Town Garage require permanent backup power. These facilities are currently serviced by a manual generator.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Town Hall and Town Garage. The town will then install a backup power generator and necessary electrical components at each facility. If the facilities are not</p>	<p>1. In Progress 2. Town Hall and Town Garage received generators; Fire Hall needs a generator.</p>	<p>1. Include 2. Fire Hall needs a generator. Could be used as a heating/cooling shelter. 3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				relocated to a location away from flooding, the generators will also be installed above the 500-year flood level on an elevated platform.		
2020-Town of Little Valley-008	Mutton Hollow Road and Whig Street Culvert Upgrades	Flood, Severe Storm	Highway Department	<p>Problem: Mutton Hollow Road and Whig Street culverts are undersized.</p> <p>Solution: The town will replace and upsize the repetitively damaged/undersized culverts on Mutton Hollow Road and Whig Street.</p>	<p>1. No Progress</p> <p>2. Financial constraints.</p>	<p>1. Include</p> <p>2. Add Hungry Hollow Road</p> <p>3. Not applicable</p>

25.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Little Valley participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Little Valley would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 25-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 25-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 25-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure										
Flood	X	X		X	X		X		X	X
Landslide	X	X			X					X
Pandemic				X			X			
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X	X							X	X
Wildfire	X			X			X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 25-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-LittleValleyT-01	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-LittleValleyT-02	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-LittleValleyT-03	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-LittleValleyT-04	Temporary Sheltering	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-LittleValleyT-05	Critical Facility Flood Mitigation	1	1	1	1	1	0	0	1	1	1	1	1	1	0	11	High
2025-LittleValleyT-06	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-LittleValleyT-07	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-LittleValleyT-08	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-LittleValleyT-09	Steep Slope Ordinance	1	1	1	1	1	1	1	0	1	0	1	1	0	0	10	Medium
2025-LittleValleyT-10	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-LittleValleyT-11	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-LittleValleyT-01. Floodplain Management Training

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces increasing flood risks due to more intense precipitation events. Incorporating best practices and the most up-to-date NFIP guidance will better protect the Town, its residents, and their properties from potential damage. However, some of the Town staff are not adequately trained to enforce NFIP regulations and/or floodplain management ordinances. Floodplain management and ordinance enforcement staff are not Certified Floodplain Managers.										
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 3, 4										
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.										
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.										
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.										
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.										
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.										
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Hire outside contractors for floodplain administration</td><td>Costly</td></tr><tr><td>Establish shared service agreements for floodplain administration from neighboring municipalities</td><td>Neighboring municipalities are unlikely to have the staff capacity to take on this role</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Hire outside contractors for floodplain administration	Costly	Establish shared service agreements for floodplain administration from neighboring municipalities	Neighboring municipalities are unlikely to have the staff capacity to take on this role

No Action	Current problem exists										
Hire outside contractors for floodplain administration	Costly										
Establish shared service agreements for floodplain administration from neighboring municipalities	Neighboring municipalities are unlikely to have the staff capacity to take on this role										

Action 2025-LittleValleyT-02. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-LittleValleyT-03. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)

No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-LittleValleyT-04. Temporary Sheltering

Lead Agency:	Town Supervisor		
Supporting Agencies:	Town Board, Cattaraugus County Office of Emergency Services, Neighboring Jurisdictions, American Red Cross		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire	
Description of the Problem:	Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town of Little Valley needs to identify locations for the placement of temporary sheltering and warming/cooling centers.		
Description of the Solution:	The Town Supervisor will lead efforts to identify a suitable location to temporarily relocate residents or visitors in need of temporary sheltering. The Town will consider options to partner with neighboring jurisdictions for a regional location. The Town will contact the Cattaraugus County Office of Emergency Services for assistance as needed to identify a suitable, approved location.		
Estimated Cost:	Medium		
Potential Funding Sources:	Town Budget, County Budget, Neighboring Jurisdictions, American Red Cross, HSGP		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2, 4, 6		
Benefits:	Providing a safe, climate-controlled location for individuals in need following an emergency can provide a sense of gratitude and normalcy to an otherwise negative event. Removing individuals from at-risk locations and offering a temporary locations for impacted persons to gather, increases the safety of the overall community.		
Impact on Socially Vulnerable Populations:	Socially vulnerable populations are often the most risk during emergencies and disaster events. Offering a safe location for these populations can ensure their health is looked after and they are removed from harm's way.		
Impact on Future Development:	The temporary sheltering facility will be able to support population increases brought in from potential future development.		
Impact on Critical Facilities/Lifelines:	This action would create, or expand on already existing, critical facilities, as sheltering locations are critical facilities.		
Impact on Capabilities:	This action will create a new capability of the Town by offering a resource for its visitors and residents to utilize should they be in need of temporary sheltering.		
Climate Change Considerations:	The changing climate may lead to the Town, its residents, and visitors being exposed to hazards more frequently. Extreme temperatures have occurred more often in recent years which lead to drought; heavier rainfalls during severe storms have increased the occurrence of flooding. A temporary sheltering facility can provide a safe location for impacted individuals.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Utilize County facilities		May require signed agreements; reliant on County opening facilities
	Utilize American Red Cross facilities		Reliant on American Red Cross opening a facility

Action 2025-LittleValleyT-05. Critical Facility Flood Mitigation

Lead Agency:	Engineering										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>The following critical facilities are Town-owned and have repeatedly been damaged by storms and flooding. The facilities are currently housed in the same structure, located at 201 Third Street, which is not within the special flood hazard area but has still experienced flooding. Furthermore, the roof of the structure must be re-evaluated, as it may not have the correct roofing:</p> <ul style="list-style-type: none">• Town Hall• Highway Barn• Court										
Description of the Solution:	The Town Engineer will evaluate methods of flood risk to the structure, including flood barriers, elevation of the structure, and relocation of the structure. Once the most cost-effective option is identified, the Town will carry out the option. The Town Engineer will also conduct a load test to the roof of the structure to ensure it meets current building codes; the Town will replace the roof if required.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 5										
Benefits:	The services of the Town Hall, Highway Barn, and Courts will have reduced risk to the severe storm and flood hazards. Reducing the risk to these hazards will ensure continuity of operations of Town capabilities, allowing the Town to continue to serve its constituents.										
Impact on Socially Vulnerable Populations:	Town services will be maintained and available to Town residents and visitors during periods of heavy rain, severe storms, and flooding.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This critical facility will be able to maintain continuity of operations during periods of heavy rain, severe storms, and flooding. Risk to the flood and severe storm hazards will be reduced.										
Impact on Capabilities:	The capabilities of the Town housed at this critical facility, including Town Administration, Town Highway, and Town Courts, will be able to maintain functionality in a safe environment.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events putting the structure at greater risk.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Build levee around facility</td><td>No space for full levee system</td></tr><tr><td>Separate into three new structures away from current locations</td><td>Cost prohibitive</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Build levee around facility	No space for full levee system	Separate into three new structures away from current locations	Cost prohibitive
Action	Evaluation										
No Action	Current problem exists										
Build levee around facility	No space for full levee system										
Separate into three new structures away from current locations	Cost prohibitive										

Action 2025-LittleValleyT-06. Floodprone Roads

Lead Agency:	Highway Department		
Supporting Agencies:	Code Enforcement, Engineering, Village of Little Valley		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	<p>Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none">• Third Street• Fourth Street• Bucktooth Run (West and East Branch)• Whig Street• Liebler Road• Kyler Hill Road• Dutch Hill Road• Hungry Hollow Road• Mutton Hollow Road		
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. The Town of Little Valley will work with the Village of Little Valley to resolve flood issues on Fourth Street. Possible solutions may include:</p> <ul style="list-style-type: none">• Elevation of roadways• Installation or improvement of drainage systems• Regrading of roadway and soils• Resurfacing or reshaping roadways		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
	Action		Evaluation

Alternatives:	No Action	Current problem exists
	Relocate all flood-prone road system	Not feasible
	Raise all flood prone roads	Cost prohibitive

DRAFT

Action 2025-LittleValleyT-07. Generators at Critical Facilities

Lead Agency:	Engineering										
Supporting Agencies:	Town Board, Fire Company										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Fire Hall does not have automatic backup power, which could impact the continuity of operations at the facility in the event of a utility or power failure. This facility also has the potential to be used as a temporary shelter or a warming and/or cooling center. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at the critical facility.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for this critical facility and its operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of a critical facility that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>-</td></tr><tr><td>Microgrid</td><td>Costly and difficult to implement.</td></tr><tr><td>Solar panels and battery backup</td><td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td></tr></tbody></table>		Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement. Action	Evaluation										
No Action	-										
Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-LittleValleyT-08. Undersized Culverts

Lead Agency:	Highway Superintendent										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	<p>Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:</p> <ul style="list-style-type: none"> • Mutton Hollow Road • Whig Street • Hungry Hollow Road 										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove roadway</td> <td>Roadway cannot be removed</td> </tr> <tr> <td>Raingardens</td> <td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.	
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-LittleValleyT-09. Steep Slope Ordinance

Lead Agency:	Code Enforcement		
Supporting Agencies:	Engineering, Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides, nor is there a local law restricting construction on areas with steep slopes.		
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, Code Enforcement will work with Engineering and the Town Board to develop a local law restricting future development in these identified hazard areas.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, Town Budget		
Implementation Timeline:	3 years		
Goals Met:	1, 4, 6		
Benefits:	This action will identify locations with steep grades (above 20 percent) and lead to the adoption of a local law to restrict future development in these hazard areas. Furthermore, the identification of the locations with the steep grades will provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.		
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.		
Impact on Future Development:	Future development will be restricted in locations with identified steep slopes.		
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's regulatory capabilities.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Restrict development on slopes greater than 5 percent grade		May be too restrictive and discourage any future development
	Create inventory but do not develop local law		Would not restrict future development, could increase at risk properties and structures

Action 2025-LittleValleyT-10. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-LittleValleyT-11. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none"> • Little Valley 01 • Little Valley 02 • Little Valley 06 • Little Valley 12 • Little Valley 16 • Salamanca 06 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove bridges</td> <td>May cause significant traffic problems</td> </tr> <tr> <td>Replace bridges</td> <td>Cost prohibitive</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove bridges	May cause significant traffic problems	Replace bridges	Cost prohibitive
Action	Evaluation										
No Action	Current problem exists										
Remove bridges	May cause significant traffic problems										
Replace bridges	Cost prohibitive										

26. VILLAGE OF LITTLE VALLEY

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Village of Little Valley with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Little Valley, describes who participated in the planning process, assesses Little Valley's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

26.1 HAZARD MITIGATION PLANNING TEAM

The Village of Little Valley identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Village departments. The Streets Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 26-1 summarizes Village officials who participated in the development of the annex and in what capacity. Additional documentation of the Village's planning activities through Steering Committee meetings is included in Volume I.

Table 26-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Kory Gross, Streets Superintendent Address: 103 Rock City Street, Little Valley, NY 14755 Phone Number: (716) 969-7765 Email: volvstreetwater@gmail.com	Name/Title: John Helgager, Code Enforcement Officer Address: 103 Rock City Street, Little Valley, NY 14755 Phone Number: (716) 938-9151 Email: jhelgager@villageoflittlevalley.org
National Flood Insurance Program Floodplain Administrator	
Name/Title: John Helgager, Code Enforcement Officer Address: 103 Rock City Street, Little Valley, NY 14755 Phone Number: (716) 938-9151 Email: jhelgager@villageoflittlevalley.org	

26.2 COMMUNITY PROFILE

The Village of Little Valley lies in the central part of Cattaraugus County in western New York State. The Village of Little Valley has a total area of 1 square mile. The Little Valley Creek flows through the village. The village is surrounded by the Town of Little Valley on all sides and is bordered to the north by the Town of Mansfield.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 3.8 percent of the population is 5 years of age or younger, 16.2 percent is 65 years of age or older, 0 percent is non-English speaking, 27.9 percent is below the poverty threshold, and 18.4 percent is considered disabled.

26.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Little Valley performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Little Valley to identify opportunities for integrating mitigation concepts into ongoing Village procedures.

26.3.1 Planning and Regulatory Capability and Integration

Table 26-2 summarizes the planning and regulatory tools that are available to Little Valley.

Table 26-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Chapter 116: Construction Codes, Uniform	State and Local	Building/Zoning Officer
How has or will this be integrated with the HMP and how does this reduce risk? This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this Village. This local law is adopted pursuant to section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, the Energy Code, other state law, or other section of this local law, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this local law.				
Zoning/Land Use Code	Yes	Local Law 1, 2016: Zoning	Local	Building/Zoning Officer
How has or will this be integrated with the HMP and how does this reduce risk? For the purpose of promoting the public, health, safety, comfort and general welfare; conserving and protecting property and property values; securing the most appropriate use of land; lessening or avoiding congestion in the public; streets and highways; and facilitating adequate but economical provision of public improvements, all .in accordance with a comprehensive plan.				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Site Plan Code	Yes	Local Law 1, 2016: Zoning, Article 10	Local	Zoning Board of Appeals
How has or will this be integrated with the HMP and how does this reduce risk? The purpose of site plan approval is to determine compliance with the objectives of this article in zoning districts where inappropriate development may cause a conflict between uses in the same or adjoining zoning district by creating unhealthful and unsafe conditions and thereby adversely affect the public health, safety, and general welfare.				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Local Law #1, 1987 – Flood Damage Prevention	Federal, State, County and Local	Building/Zoning Officer
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Wellhead Protection How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Change Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
PLANNING DOCUMENTS				
General/Comprehensive Plan How has or will this be integrated with the HMP and how does this reduce risk? The purpose of this Comprehensive Plan is to promote and protect the health, safety and general welfare of the people of the Village, while taking into consideration the needs of the wider region of Cattaraugus County. The Comprehensive Plan will provide a policy basis for making decisions about land use within the Village. The Comprehensive Plan is intended to promote the preservation of the rural and agricultural character of the community, while at the same time promoting orderly development in accordance with the goals and policies that are contained in this document.	Yes	Village of Little Valley Comprehensive Plan	Local	Village Board
Capital Improvement Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Disaster Debris Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Floodplain Management or Watershed Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Open Space Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Urban Water Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Habitat Conservation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency

Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

26.3.2 Development and Permitting Capability

Table 26-3 summarizes the capabilities of Little Valley to oversee and track development.

Table 26-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits? <ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Building/Zoning Office
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? <ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	No	-
Describe the level of buildout in your jurisdiction.	N/A	Approximately 75% build-out. A buildable land analysis is noted in Section 4 (County Profile).

26.3.3 Administrative and Technical Capability

Table 26-4 summarizes potential staff and personnel resources available to Little Valley and their current responsibilities that contribute to hazard mitigation.

Table 26-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Code Enforcement Officer charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Code Enforcement Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Village roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Building/Zoning Office enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Cattaraugus County, Town of Little Valley
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

26.3.4 Fiscal Capability

Table 26-5 summarizes financial resources available to Little Valley.

Table 26-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

26.3.5 Education and Outreach Capability

Table 26-6 summarizes the education and outreach resources available to Little Valley.

Table 26-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Public Works Superintendent and Mayor
Personnel skilled or trained in website development	Yes	Southern Tier West
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Village and Planning Board
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

26.3.6 Community Classifications

Table 26-7 summarizes classifications for community programs available to Little Valley.

Table 26-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	Yes	Not Rated	April 23, 2021
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

26.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future

conditions, and changing risk. Table 26-8 summarizes the adaptive capacity for each identified hazard of concern and the Village's capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 26-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

26.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 26-1 is responsible for maintaining this information.

26.4.1 NFIP Statistics

Table 26-9 summarizes the NFIP policy and claim statistics for Little Valley.

Table 26-9. Little Valley NFIP Summary of Policy and Claim Statistics

# Policies	2
# Claims (Losses)	1
Total Loss Payments	\$74.97
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

26.4.2 Flood Vulnerability Summary

Table 26-10 provides a summary of the NFIP program in Little Valley.

Table 26-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	End of Fourth Street; Little Valley Creek runs through the Village and some properties located along the creek have flooding concerns.
Do you maintain a list of properties that have been damaged by flooding?	The Village keeps a map that highlights the areas of flooding and has done that for the past 8 years
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Not that the Village is aware of
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	The Village does not have procedures developed.
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.

NFIP Topic	Comments
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	No Procedures
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: Not applicable CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1987 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	March 31, 1987
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Planning and Zoning consider flood risk. The Village has adopted the current building codes
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

26.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 26-11 through Table 26-13.

Table 26-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	-	-	-	-
Permits within SFHA	-	-	-	-
2020				
Total Permits	-	-	-	-
Permits within SFHA	-	-	-	-
2021				
Total Permits	0	0	0	0

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

2019 and 2020 permits were not available due to record keeping

Table 26-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Village did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 26-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Village did not indicate any known or anticipated major development or infrastructure in the next five years.					

26.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Little Valley's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

26.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Village are shown in Figure 26-1 through Figure 26-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified

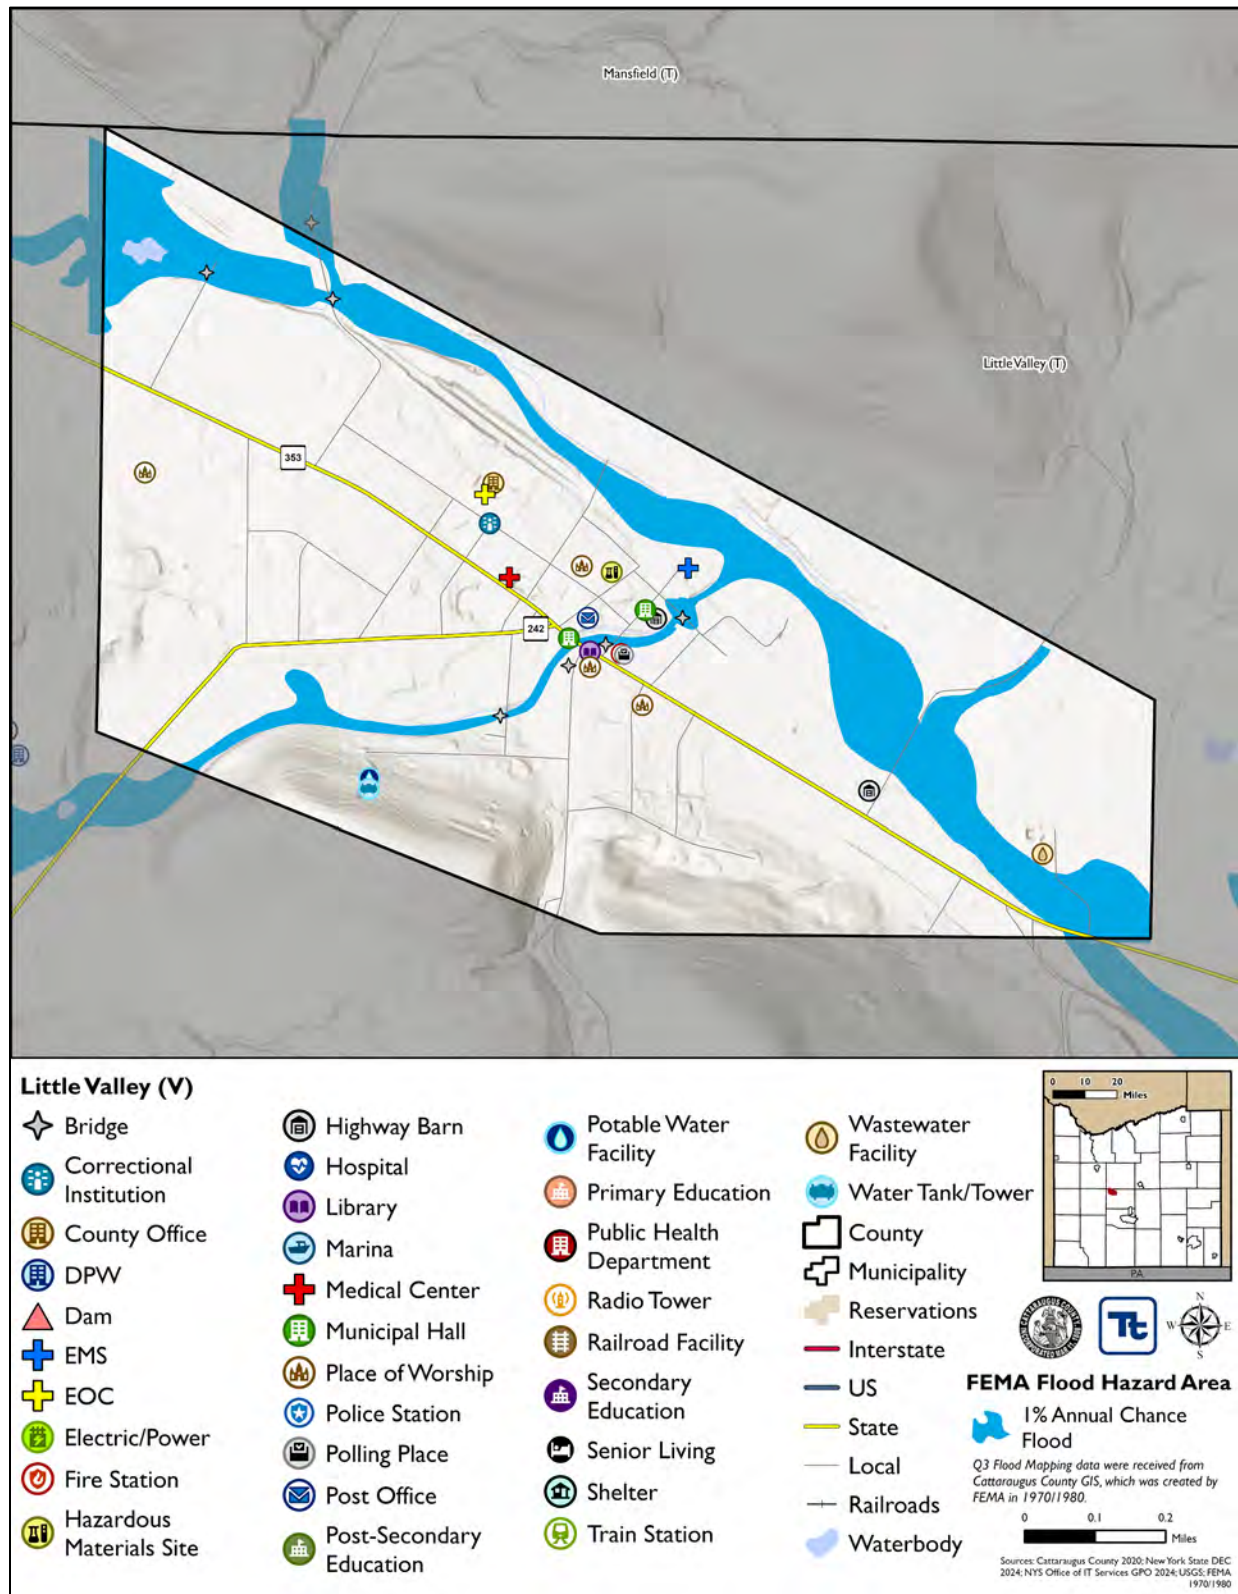

clearly using mapping techniques and technologies and for which Little Valley has significant exposure. The maps show the location of potential new development, where available.

DRAFT

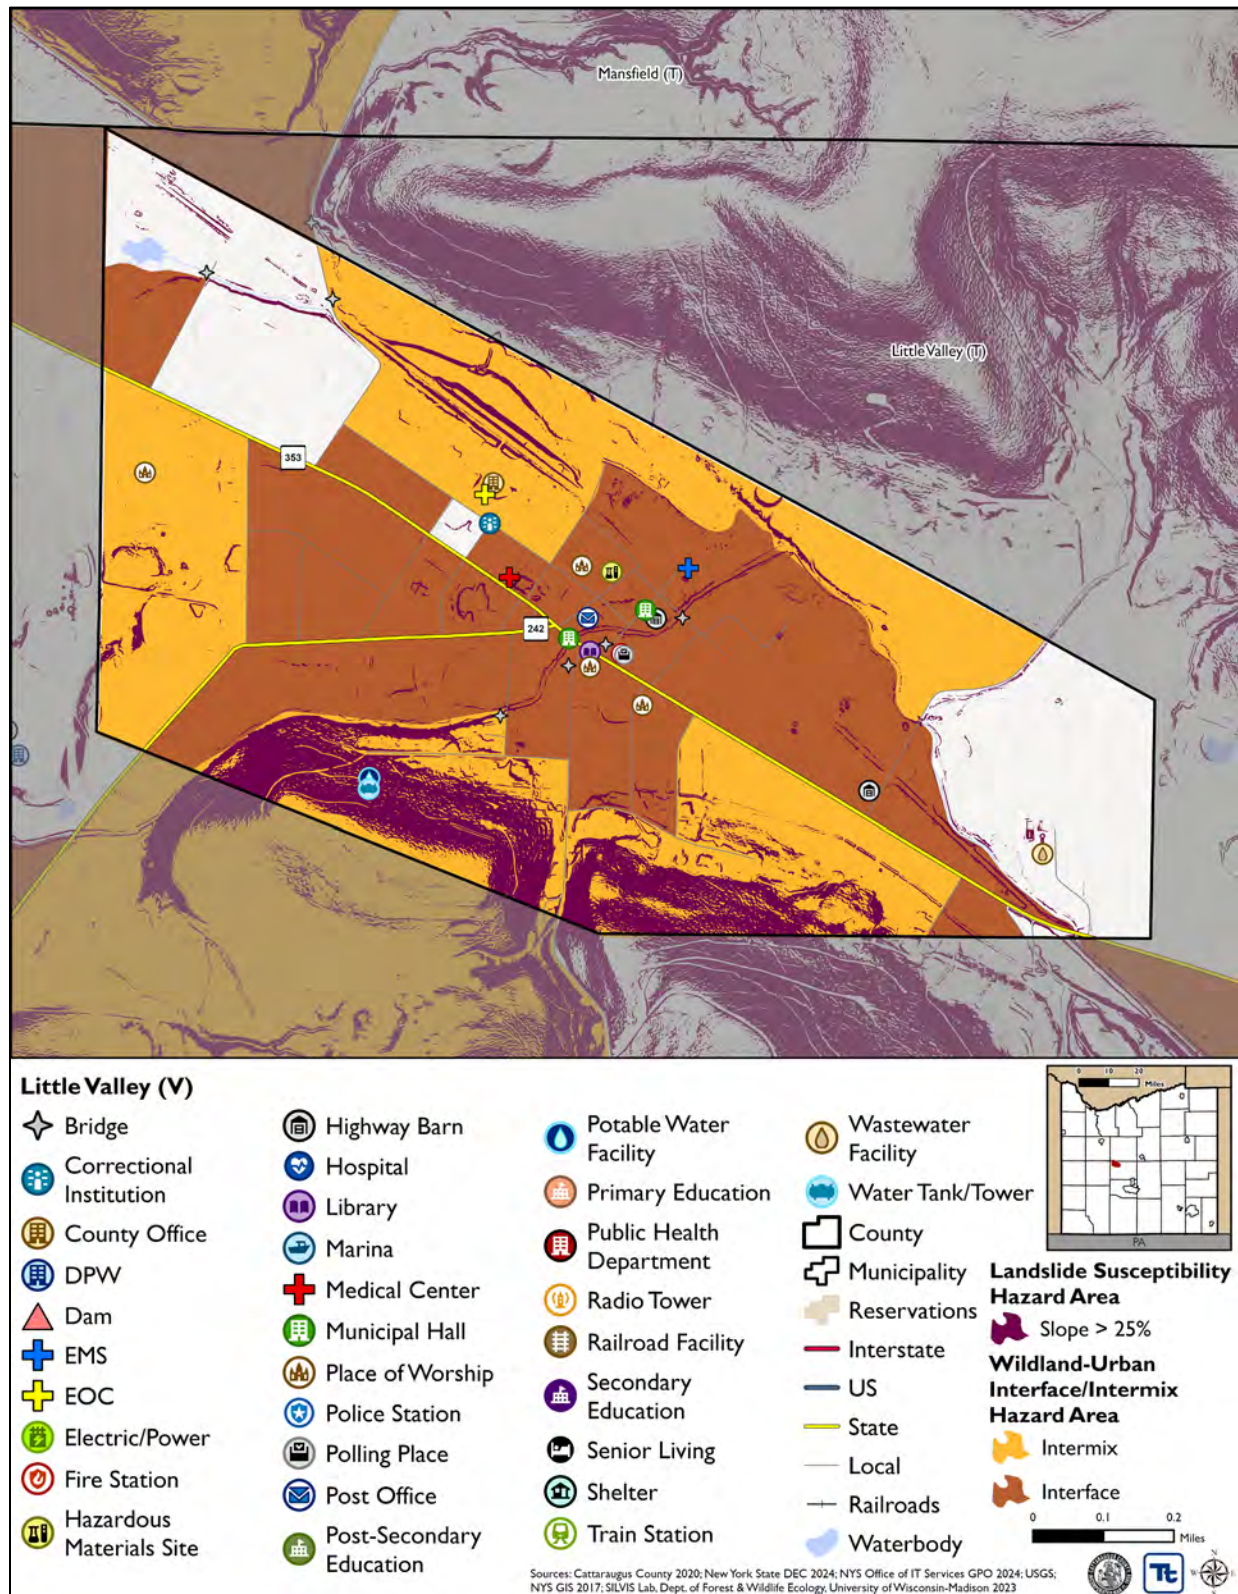

Figure 26-1. Little Valley Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 26-2. Little Valley Landslide and Wildfire Hazard Area Extent and Location Map

26.6.2 Hazard Event History

The history of natural and non-natural hazard events in Little Valley is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 26-14 provides details on loss and damage in Little Valley during hazard events since the last hazard mitigation plan update.

Table 26-14. Hazard Event History in Little Valley

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Little Valley
July 4, 2018	Flood, Heavy Rain	No	Flash flooding, floods, and heavy rains impacts parts of Cattaraugus County including Little Valley.	Occurrences of flash flooding along Little Valley Creek.
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Village did not incur any documented damages or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Village did not incur any documented damages or losses.
January 12, 2020	High Wind	N/A	High wind	The Village did not incur any documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Village did not incur any documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Village did not incur any documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Village did not incur any documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Village did not incur any documented damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Village did not incur any documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Village did not incur any documented damages or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Village did not incur any documented damages or losses.
March 6, 2022	High Wind	N/A	High wind	The Village did not incur any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Little Valley
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Village did not incur any documented damages or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Village did not incur any documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

26.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Little Valley .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Little Valley reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Village indicated the following:

- The Village determined it has no risk to the Dam and Levee Failure hazard as there are no dams located within the jurisdiction or nearby which would impact the jurisdiction. Therefore, the risk was decreased from 'Low' to 'No Risk'.
- The Village elected to change the Flood ranking from 'Medium' to 'High' due to localized flooding and previous events.
- The Village elected to change the Utility Failure from 'Medium' to 'High' due to previous and potential events.

Table 26-15 shows Little Valley's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 26-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	No Risk
Flood	High
Landslide	Medium
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High

Hazard	Rank
Utility Failure	High
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 26-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 26-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Little Valley 11	Bridge	X	-	2025-LittleValleyV-13	-
Little Valley 14	Bridge	X	-	2025-LittleValleyV-13	-
Little Valley 15	Bridge	X	-	2025-LittleValleyV-13	-
Little Valley 19	Bridge	X	-	2025-LittleValleyV-13	-

Source: Cattaraugus County 2024

26.6.4 Identified Issues

After a review of Little Valley's hazard event history, hazard rankings, hazard location, and current capabilities, Little Valley identified the following vulnerabilities within the community:

- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Culverts in the Village are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Fourth Street
 - Winship Avenue
- Critical facilities need to be protected to the 500-year flood level. The Fire Hall is located in floodplain, downhill from Little Valley Creek, and has experienced previous flooding issues when waters flood overtop the creek. The Village Library and a Substation also face flood concerns when Little Valley Creek floods.
- There is no flood gauge or camera located in the Village of Little Valley along the Little Valley Creek to monitor the flood stage of the creek. Little Valley Creek is a primary source of flooding within the Village and should be monitored to assess risk.
- Critical facilities require backup power to ensure continuity of operations. The Village Hall and Little Valley Fire Hall do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. Both facilities have sheltering capabilities. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the

continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.

- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Village which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding, including Route 353, a State-owned road.
- The area surrounding Little Valley Creek is prone to flooding, impacting nearby roads and properties. Little Valley Creek has bank erosion issues, threatening encroachment onto nearby roads. Creek banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Village faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.
- The Municipal Hall and the Third Street Substation are not located in the special flood hazard area but have experienced flooding in the past. Flooding of these critical facilities may disrupt continuity of operations and lead to an inability to provide services.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Village potable water supply is at risk for landslide. Landslide could interrupt the water supply.
- Frequent flooding events have resulted in damages to residential properties, primarily along Fourth Street. In addition to properties, flooding poses risks to persons as it infiltrates residential areas.
- The Village faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.
- The Village does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Village is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Little Valley 11
 - Little Valley 14
 - Little Valley 15

- Little Valley 19

26.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

26.7.1 Past Mitigation Action Status

Table 26-17 indicates progress on the Village's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

26.7.2 Additional Mitigation Efforts

Little Valley did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 26-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Village of Little Valley-001	Little Valley Volunteer Fire Department	Flood	Engineer, Fire Dept	<p>Problem: The Little Valley Volunteer Fire Department is located in the Special Flood Hazard Area. Critical facilities need to be protected to the 500-year flood level.</p> <p>Solution: The village will conduct a feasibility assessment to determine what floodproofing measures are needed at the Volunteer Fire Department to protect it to the 500-year flood level.</p>	1. No Progress 2. Funding constraints	1. Include 2. Not applicable 3. Not applicable
2020-Village of Little Valley-002	Fourth Street Culvert and Drainage System	Flood, Severe Storm	Public Works	<p>Problem: The culvert and drainage system on Fourth Street is undersized, leading to damages and increased flood risk.</p> <p>Solution: Replace and upsize the repetitively damaged/undersized culvert and drainage system in Village of Little Valley on Fourth Street.</p>	1. No Progress 2. Funding constraints	1. Include 2. Not applicable 3. Not applicable
2020-Village of Little Valley-003	Winship Avenue Culvert	Flood, Severe Storm	Public Works	<p>Problem: The culvert on Winship Avenue is undersized, leading to damages and increased flood risk.</p> <p>Solution: Replace and upsize the repetitively damaged/undersized culvert in Village of Little Valley on Winship Avenue.</p>	1. No Progress 2. Funding constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Village of Little Valley-004	Thompson Avenue Culvert	Flood, Severe Storm	Public Works	<p>Problem: The culvert on Thompson Avenue is undersized, leading to damages and increased flood risk.</p> <p>Solution: Replace and upsize the repetitively damaged/undersized culvert in Village of Little Valley on Thompson Ave.</p>	1. Complete 2. Culvert was increased in size.	1. Discontinue 2. Not applicable 3. Projected is completed.
2020-Village of Little Valley-005	Route 353 Flood Study	Flood	Engineer	<p>Problem: Flooding regularly occurs on Route 353.</p> <p>Solution: The village will conduct a flood study to determine the specific causes of flooding and potential mitigation actions. Identified actions that are cost-effective will be implemented.</p>	1. No Progress 2. Road is a State DOT road.	1. Include 2. Not applicable 3. Not applicable
2020-Village of Little Valley-006	Village Hall and Fire Hall Backup Power	Utility Failure	Engineer, OEM, Fire Department	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The Village Hall and Little Valley Fire Hall lack permanent power sources. Both facilities have sheltering capabilities.</p> <p>Solution: The Village Engineer will research what size generator is necessary to supply backup power to the Village Hall (between 50-75kva) and Little Valley Fire Hall (between 50-75kva). The village will then install the backup power generators and necessary electrical components.</p>	1. In Progress 2. They have a small generator but lack the funds for a permanent generator to power everything.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Village of Little Valley-007	Backup Power for Wells	Utility Failure	Engineer	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. Wells in the village require backup power.</p> <p>Solution: The Village Engineer will research what size generator is necessary to supply backup power to each well. The village will then install a backup power generator at each well and necessary electrical components.</p>	1. Ongoing 2. Part of the ongoing drinking water project.	1. Discontinue 2. Not applicable 3. Project is a routine capability of the Village.
2020-Village of Little Valley-008	Little Valley Creek Stream Bank Protections	Flood, Severe Storm	Engineer, Highway Department	<p>Problem: Little Valley Creek requires stream bank protections as banks have become degraded.</p> <p>Solution: The village will secure necessary permits to conduct stream bank restoration and installation of flood walls in areas that are most degraded. The village will then conduct the identified actions.</p>	1. In Progress 2. The Village has been able to work on some banks.	1. Include 2. Not applicable 3. Not applicable
2020-Village of Little Valley-009	Flood Damage Prevention Ordinance	Flood	FPA	<p>Problem: The Village of Little Valley's flood damage prevention ordinance requires update.</p> <p>Solution: The village will adopt an updated flood damage prevention ordinance to maintain NFIP compliance.</p>	1. No Progress 2. Village prioritized other projects.	1. Include 2. Not applicable 3. Not applicable
2020-Village of Little	FPA Training	Flood	Administration	<p>Problem: Floodplain administration staff require additional training.</p>	1. Complete 2. Code Enforcement takes training whenever possible.	1. Discontinue 2. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
Valley-010				Solution: The Village FPA and staff who assist with floodplain administration will attend trainings and workshops offered by FEMA and NYS to develop additional floodplain administration skills.		3. Code Enforcement takes training whenever possible.
2020-Village of Little Valley-011	Wildfire Outreach	Wildfire	Administration	<p>Problem: Additional public education on wildfire risk is needed.</p> <p>Solution: The village will conduct outreach to residents, business owners, and organizations about what they can do to protect their structures from wildfires.</p>	1. In Progress 2. Constraints on material development.	1. Include 2. Not applicable 3. Not applicable
2020-Village of Little Valley-012	Municipal Hall Flood Protection	Flood, Severe Storm	Engineer	<p>Problem: The Municipal Hall is not located in the special flood hazard area but has experienced flooding in the past.</p> <p>Solution: The Village will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Municipal Hall to protect to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the village will carry out the option.</p>	1. In Progress 2. Continuing to search for locations and funding	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Village of Little Valley-013	Third Street Substation Flood Protection	Flood, Severe Storm	Engineer	<p>Problem: The Third Street Substation is not located in the special flood hazard area but has experienced flooding in the past.</p> <p>Solution: The village will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Third Street Substation to protect to the 500-year flood level. Options include:</p>	<p>1. In Progress</p> <p>2. The Village has secured land for new substation. Need funding for construction of new substation.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Village of Little Valley-014	Potable Water Supply Landslide Protections	Landslide, Utility Interruption	Engineer	<p>Problem: The village potable water supply is at risk for landslide. Landslide could interrupt the water supply.</p> <p>Solution: The Village Engineer will conduct an engineering study to determine the extent of the landslide risk and potential mitigation actions. The village will then implement cost effective mitigation actions identified by the study.</p>	<p>1. No Progress</p> <p>2. Funding constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Village of Little Valley-015	Residential Property Flood Mitigation	Flood, Severe Storm	NFIP Floodplain Administrator, supported by homeowners	<p>Problem: Frequent flooding events have resulted in damages to residential properties, mainly in the 4th street area.</p> <p>Solution: Conduct outreach to 10 flood-prone property owners to provide information on mitigation alternatives. After preferred mitigation measures are identified,</p>	<p>1. No Progress</p> <p>2. Lack of funding</p>	<p>1. Include</p> <p>2. Update to include NFIP information.</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating residential homes in the flood prone areas that experience frequent flooding (high risk areas).		

26.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Little Valley participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 "Selecting Appropriate Mitigation Measures for Floodprone Structures" (March 2007)
- FEMA "Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards" (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Little Valley would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Village priorities.

Table 26-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 26-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 26-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure										
Flood	X	X	X		X	X		X	X	X
Landslide		X			X					
Pandemic				X			X			
Severe Storm	X	X	X		X			X	X	X
Severe Winter Storm	X	X	X		X			X	X	X
Utility Failure	X	X								X
Wildfire		X		X	X		X			

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 26-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-LittleValleyV-01	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-LittleValleyV-02	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-LittleValleyV-03	Flood Gauge Feasibility	1	1	1	1	0	0	1	1	1	1	1	1	0	1	11	High
2025-LittleValleyV-04	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-LittleValleyV-05	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-LittleValleyV-06	Little Valley Creek Erosion	1	1	1	1	0	0	1	1	1	1	1	1	0	1	11	High
2025-LittleValleyV-07	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-LittleValleyV-08	Critical Facility Flood Mitigation	1	1	1	1	1	0	0	1	1	1	1	1	1	0	11	High
2025-LittleValleyV-09	Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-LittleValleyV-10	Residential Property Flood Mitigation	1	1	1	1	1	0	1	1	1	0	1	1	0	1	11	High
2025-LittleValleyV-11	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-LittleValleyV-12	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-LittleValleyV-13	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-LittleValleyV-01. Undersized Culverts

Lead Agency:	Highway Superintendent										
Supporting Agencies:	Building/Zoning Office, Engineering, Town of Little Valley										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Village are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads: <ul style="list-style-type: none">• Fourth Street• Winship Avenue										
Description of the Solution:	The Village Engineer will complete an engineering survey of the culverts that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Village Highway Department will complete the necessary upsizing for the culverts. The Village of Little Valley will work with the Town of Little Valley to resolve flood issues on Fourth Street.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Village Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Remove roadway</td><td>Roadway cannot be removed</td></tr><tr><td>Raingardens</td><td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-LittleValleyV-02. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Village Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities need to be protected to the 500-year flood level. The Fire Hall is located in floodplain, downhill from Little Valley Creek, and has experienced previous flooding issues when waters flood overtop the creek. The Village Library and a Substation also face flood concerns when Little Valley Creek floods.										
Description of the Solution:	<p>The Village will notify the critical facility owners and managers of the facility's location in the flood hazard area. The Village will encourage each facility conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the facility owner or manager will carry out the option.</p>										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Village Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Village.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.		
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-LittleValleyV-03. Flood Gauge Feasibility

Lead Agency:	Building/Zoning Office										
Supporting Agencies:	Village Board, Cattaraugus County, NYS DEC, USGS										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	There is no flood gauge or camera located in the Village of Little Valley along the Little Valley Creek to monitor the flood stage of the creek. Little Valley Creek is a primary source of flooding within the Village and should be monitored to assess risk. Heavy rains from severe storms and ice jams from severe winter storms have the potential to cause Little Valley Creek to flood.										
Description of the Solution:	The Village will work with Cattaraugus County, NYS DEC, and USGS to identify potential locations to install flood gauges and cameras along the Little Valley Creek. The flood gauges and cameras will assist in the monitoring of the water levels of the Little Valley Creek and inform the Village, and those monitoring, of flood risks.										
Estimated Cost:	Medium										
Potential Funding Sources:	Village Budget, USGS, NYS DEC										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 3, 4										
Benefits:	The flood gauges and cameras will assist in the monitoring of the water levels of the Little Valley Creek and inform the Village, and those monitoring, of flood risks. With this information, the Village can adequately notice residents, businesses, and property owners along Little Valley Creek of potential flood impacts.										
Impact on Socially Vulnerable Populations:	Populations near the Little Valley Creek would have enhanced resiliency to the flood risk. Residents, businesses, and property owners along Little Valley Creek would receive better notices of potential flood occurrences.										
Impact on Future Development:	Any future development near the Little Valley Creek would have enhanced resiliency to the flood risk.										
Impact on Critical Facilities/Lifelines:	Critical facilities located near the Little Valley Creek, including the Library, Fire Hall, and Substations, would have enhanced resiliency to the flood risk.										
Impact on Capabilities:	This action would create a new capability for the Village and strengthen its ability to mitigate flood risk.										
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk. Monitoring flood levels can permit Village officials to issue notices to residents, businesses, and property owners along Little Valley Creek.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Install flood gauge without any approvals	May result in fines										

Action 2025-LittleValleyV-04. Generators at Critical Facilities

Lead Agency:	Engineering		
Supporting Agencies:	Village Board, Fire Company		
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Village Hall and Little Valley Fire Hall do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. Both facilities have sheltering capabilities. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.		
Description of the Solution:	The Village Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Village will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for this critical facility and its operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Village Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4, 5		
Benefits:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.		
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.		
Impact on Future Development:	This action results in protection of a critical facility that could support future development.		
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.		
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.		
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives	Action	Evaluation	
	No Action	Problem persists	
	Microgrid	Costly and difficult to implement.	
	Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.	

Action 2025-LittleValleyV-05. Floodprone Roads

Lead Agency:	Highway Department		
Supporting Agencies:	Building/Zoning Office, Engineering, Town of Little Valley, Town of Salamanca, NYS DOT		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Village which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding, including Route 353, a State-owned road.		
Description of the Solution:	<p>The Village will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. The Village of Little Valley will work with the Town of Little Valley to resolve flood issues on Fourth Street; will work with the Town of Salamanca to address flooding concerns on shared roads; and will work with NYS DOT to address flooding issues on Route 353. Possible solutions may include:</p> <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Village Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Village's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all flood-prone road system		Not feasible
	Raise all flood prone roads		Cost prohibitive

Action 2025-LittleValleyV-06. Little Valley Creek Erosion

Lead Agency:	Engineering		
Supporting Agencies:	Building/Zoning Office		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The area surrounding Little Valley Creek is prone to flooding, impacting nearby roads and properties. Little Valley Creek has bank erosion issues, threatening encroachment onto nearby roads. Creek banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.		
Description of the Solution:	The Village Engineer will assess the feasibility and cost-effectiveness of various stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements to prevent future flooding surrounding Little Valley Creek.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, Village Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage to properties.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development surrounding Little Valley Creek will have its risk of flood impacts reduced.		
Impact on Critical Facilities/Lifelines:	Critical facilities and community lifelines near Little Valley Creek, including the Fire Hall, Library, and Substations, would have a reduced risk to the flood hazard.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events can lead to an influx of water, resulting in flooding conditions.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input checked="" type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Elevate nearby roads		Cost prohibitive
	Acquire all properties which flood		Cost prohibitive

Action 2025-LittleValleyV-07. Wildfire Education and Outreach

Lead Agency:	Village Clerk										
Supporting Agencies:	Village Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire										
Description of the Problem:	The Village faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Village events, the Village newsletters, social media, the Village website, and having the materials on display for the public at Village libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Village by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Village.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Village's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Village</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Village	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Village										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-LittleValleyV-08. Critical Facility Flood Mitigation

Lead Agency:	Engineering		
Supporting Agencies:	Village Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The Municipal Hall and the Third Street Substation are not located in the special flood hazard area but have experienced flooding in the past. Flooding of these critical facilities may disrupt continuity of operations and lead to an inability to provide services.		
Description of the Solution:	The Village Engineer will evaluate methods of flood risk to the structure, including flood barriers, elevation of the structure, and relocation of the structure. Once the most cost-effective option is identified, the Village will carry out the option.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Village Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 5		
Benefits:	The services of the Municipal Hall and the Third Street Substation will have reduced risk to the severe storm and flood hazards. Reducing the risk to these hazards will ensure continuity of operations of Village capabilities, allowing the Village to continue to serve its constituents.		
Impact on Socially Vulnerable Populations:	Village services will be maintained and available to Village residents and visitors during periods of heavy rain, severe storms, and flooding.		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	This critical facility will be able to maintain continuity of operations during periods of heavy rain, severe storms, and flooding. Risk to the flood and severe storm hazards will be reduced.		
Impact on Capabilities:	The capabilities of the Village housed at these critical facilities will be able to maintain functionality in a safe environment.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events putting the structure at greater risk.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Build levee around facilities		No space for full levee system
	Force river to meander in opposite direction		Not feasible, may shift risk to other areas of the Village

Action 2025-LittleValleyV-09. Landslide Mitigation

Lead Agency:	Highway Department		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire		
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Village potable water supply is at risk for landslide. Landslide could interrupt the water supply.		
Description of the Solution:	The Village Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk. Possible mitigation measures include: <ul style="list-style-type: none"> • Construction of retaining walls, soil nailing, ground anchor walls • Install horizontal drains to reduce soil saturation • Cut banks along water ways to prevent oversaturated soils from falling • Install netting 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Village Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the water systems lifeline, which will lead to the assurance of potable water for residents, visitors, and businesses in the Village.		
Impact on Socially Vulnerable Populations:	This action will ensure services are able to be provided to residents, visitors, and businesses in the Village.		
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the water systems lifelines.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate potable water source		Not feasible
	Close potable water source and purchase water from private source		Not feasible, cost prohibitive

Action 2025-LittleValleyV-10. Residential Property Flood Mitigation

Lead Agency:	Building/Zoning Office										
Supporting Agencies:	Village Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties, primarily along Fourth Street. In addition to properties, flooding poses risks to persons as it infiltrates residential areas.										
Description of the Solution:	The Village will conduct outreach to the impacted properties and will provide information on mitigation alternatives. After preferred mitigation measures are identified, the Village will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating of the affected properties that experience frequent flooding. The parameters for this initiative would be funding, benefits versus cost, and willing participation of property owners.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA FMA, FMA SWIFT, Village Budget, County Budget, Property Owners										
Implementation Timeline:	3 years										
Goals Met:	1										
Benefits:	This action would foster comprehensive floodplain management by removing at risk properties from the flood hazard area or elevating properties to reduce the flood risk.										
Impact on Socially Vulnerable Populations:	Collecting data regarding homeowners that reside within flood prone areas provides an opportunity to introduce location-specific opportunities for assistance. Socially vulnerable populations may be able to have houses elevated or acquired when it would otherwise be unaffordable.										
Impact on Future Development:	Increased outreach to homeowners within a flood prone area will limit construction in areas that are prone to hazard events. Homes may be acquired, which will remove those structures from the floodplain and prevent future development on those sites.										
Impact on Critical Facilities/Lifelines:	Removing structures from the floodplain decreases the demand on utilities and emergency services including health and medical, law enforcement, and search and rescue.										
Impact on Capabilities:	Outreach which promotes the removal of risk from the immediate floodplain via acquisition of properties will free up resources for search and rescue and other emergency operations as needed. This action will enhance the Village's current NFIP capabilities.										
Climate Change Considerations:	Climate change is likely to increase the frequency and severity of severe rainfall, flash flooding, riverine flooding, and coastal flooding from sea level rise and storm surge events. Removing structures from the floodplain will reduce the response and recovery costs as a result of these events and decrease the loss of human life as a result of these events. Elevating structures will reduce the recovery costs.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input checked="" type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Action 2025-LittleValleyV-11. Pandemic Education and Outreach

Lead Agency:	Village Clerk										
Supporting Agencies:	Village Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Village faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Village does not currently have hazard mitigation information and outreach on the Village website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Village events, the Village newsletters, social media, the Village website, and having the materials on display for the public at Village libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Village by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Village.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Village's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.

Action 2025-LittleValleyV-12. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Building/Zoning Office, Village Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> • Determine where the damage occurred within the community and if the damaged structures are in an SFHA. • Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. • Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. • Require permits for floodplain development. <p>The Village does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Village will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Village Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Village.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Village officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-LittleValleyV-13. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none">• Little Valley 11• Little Valley 14• Little Valley 15• Little Valley 19										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

27. TOWN OF LYNDON

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Lyndon with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Lyndon, describes who participated in the planning process, assesses Lyndon's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

27.1 HAZARD MITIGATION PLANNING TEAM

The Town of Lyndon identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 27-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 27-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: George Schneider Jr., Highway Superintendent Address: 852 Lyndon Center Road, Cuba, NY 14727 Phone Number: (716) 676-9928 Email: lyndonhighway@yahoo.com	Name/Title: Emily Robinson, Clerk Address: 852 Lyndon Center Road, Cuba, NY 14727 Phone Number: (716) 676-9928 Email: townclerk14737@yahoo.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Bobbi Elderkin, Code Enforcement Officer Address: 852 Lyndon Center Road, Cuba, NY 14727 Phone Number: (716) 623-9296 Email: lyndoncode@yahoo.com	

27.2 COMMUNITY PROFILE

The Town of Lyndon lies on the eastern border of Cattaraugus County in western New York State. The Town of Lyndon has a total area of 33.27 square miles. Gates Creek is a stream that flows out the west town line and Oil Creek is a stream by the east town line. The town is bordered to the north by the Town of Farmersville, the east border is formed by New Hudson in Allegany County, west by the Town of Franklinville, and south by Town of Ischua.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 3.8 percent of the

population is 5 years of age or younger, 22.8 percent is 65 years of age or older, 0 percent is non-English speaking, 17.4 percent is below the poverty threshold, and 18.1 percent is considered disabled.

27.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Lyndon performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Lyndon to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

27.3.1 Planning and Regulatory Capability and Integration

Table 27-2 summarizes the planning and regulatory tools that are available to Lyndon.

Table 27-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 1, 2024: NYS Uniform Fire Prevention and Building Code	State and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? This local law provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this Town of Lyndon. This local law is adopted pursuant to section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, the Energy Code other state law, or other section of this local law. all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this local law.				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Site Plan Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Local Law 1, 1992: Flood Damage Prevention	Federal, State, County and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Change Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
PLANNING DOCUMENTS				
General/Comprehensive Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Capital Improvement Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Disaster Debris Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Floodplain Management or Watershed Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Open Space Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

Economic Development Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Community Wildfire Protection Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Community Forest Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Transportation Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Agriculture Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Climate Action/ Resilience/Sustainability Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Tourism Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Business/ Downtown Development Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan	Yes	Cattaraugus County Comprehensive Emergency Management Plan	County	Cattaraugus County Office of Emergency Services
How has or will this be integrated with the HMP and how does this reduce risk? Identifies available resources, resource gaps, vulnerable areas and populations, and communication methods for response to emergencies. This provides a foundation for the development of hazard mitigation goals, objectives, and actions to ensure any gaps and needs are addressed and all capabilities are being effectively utilized.				
Continuity of Operations Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Substantial Damage Response Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Threat and Hazard Identification and Risk Assessment	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Post-Disaster Recovery Plan	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?

Public Health Plan	Yes	PHEP	County	County Health Department
How has or will this be integrated with the HMP and how does this reduce risk? Planning for public health emergencies can identify tactics and needed resources to prevent the spread of disease or infection before it occurs.				

Other	No	-	-	-
--------------	----	---	---	---

How has or will this be integrated with the HMP and how does this reduce risk?

27.3.2 Development and Permitting Capability

Table 27-3 summarizes the capabilities of Lyndon to oversee and track development.

Table 27-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement Officer
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?		
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	No	-
Describe the level of buildout in your jurisdiction.	N/A	20%

27.3.3 Administrative and Technical Capability

Table 27-4 summarizes potential staff and personnel resources available to Lyndon and their current responsibilities that contribute to hazard mitigation.

Table 27-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	Town Board
Zoning Board of Adjustment	No	-
Planning Department	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Lyndon's Highway Department is the single-largest and most vital segment of the town government. The Highway Superintendent and two full-time employees are responsible for all the town road building, maintenance, and equipment upkeep. Duties include, among other, building, mowing, ditching and grading roads, plowing snow, sanding, repairing equipment, barn maintenance, purchasing, and records.
Construction/Building/Code Enforcement Department	Yes	The CEO is responsible for verifying and enforcing local and state safety and construction standards.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	State, County, Highway, Fire
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

27.3.4 Fiscal Capability

Table 27-5 summarizes financial resources available to Lyndon.

Table 27-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	No
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

27.3.5 Education and Outreach Capability

Table 27-6 summarizes the education and outreach resources available to Lyndon.

Table 27-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-

Outreach Resources	Available? (Yes/No)	Comment
Warning systems for hazard events	Yes	State and County
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

27.3.6 Community Classifications

Table 27-7 summarizes classifications for community programs available to Lyndon.

Table 27-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	Unknown	Unknown
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	Yes	Not Rated	February 8, 2010
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

27.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 27-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 27-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

27.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 27-1 is responsible for maintaining this information.

27.4.1 NFIP Statistics

Table 27-9 summarizes the NFIP policy and claim statistics for Lyndon.

Table 27-9. Lyndon NFIP Summary of Policy and Claim Statistics

# Policies	0
# Claims (Losses)	0
Total Loss Payments	\$0.00
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

27.4.2 Flood Vulnerability Summary

Table 27-10 provides a summary of the NFIP program in Lyndon.

Table 27-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	

NFIP Topic	Comments
Describe areas prone to flooding in your jurisdiction.	Areas by waterbodies
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	FEMA requirements
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: May 12, 2009 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law 1, 1992: Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	1992

NFIP Topic	Comments
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Permit Review
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

27.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 27-11 through Table 27-13.

Table 27-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 27-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
------------------------------	---------------------	-------------------------	---	---------------------	-------------------------------------

The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.

* Only location-specific hazard zones or vulnerabilities identified.

Table 27-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
------------------------------	---------------------	-------------------------	---	---------------------	-------------------------------------

The Town did not indicate any known or anticipated major development or infrastructure in the next five years.

27.6 JURISDICTIONAL RISK ASSESSMENT

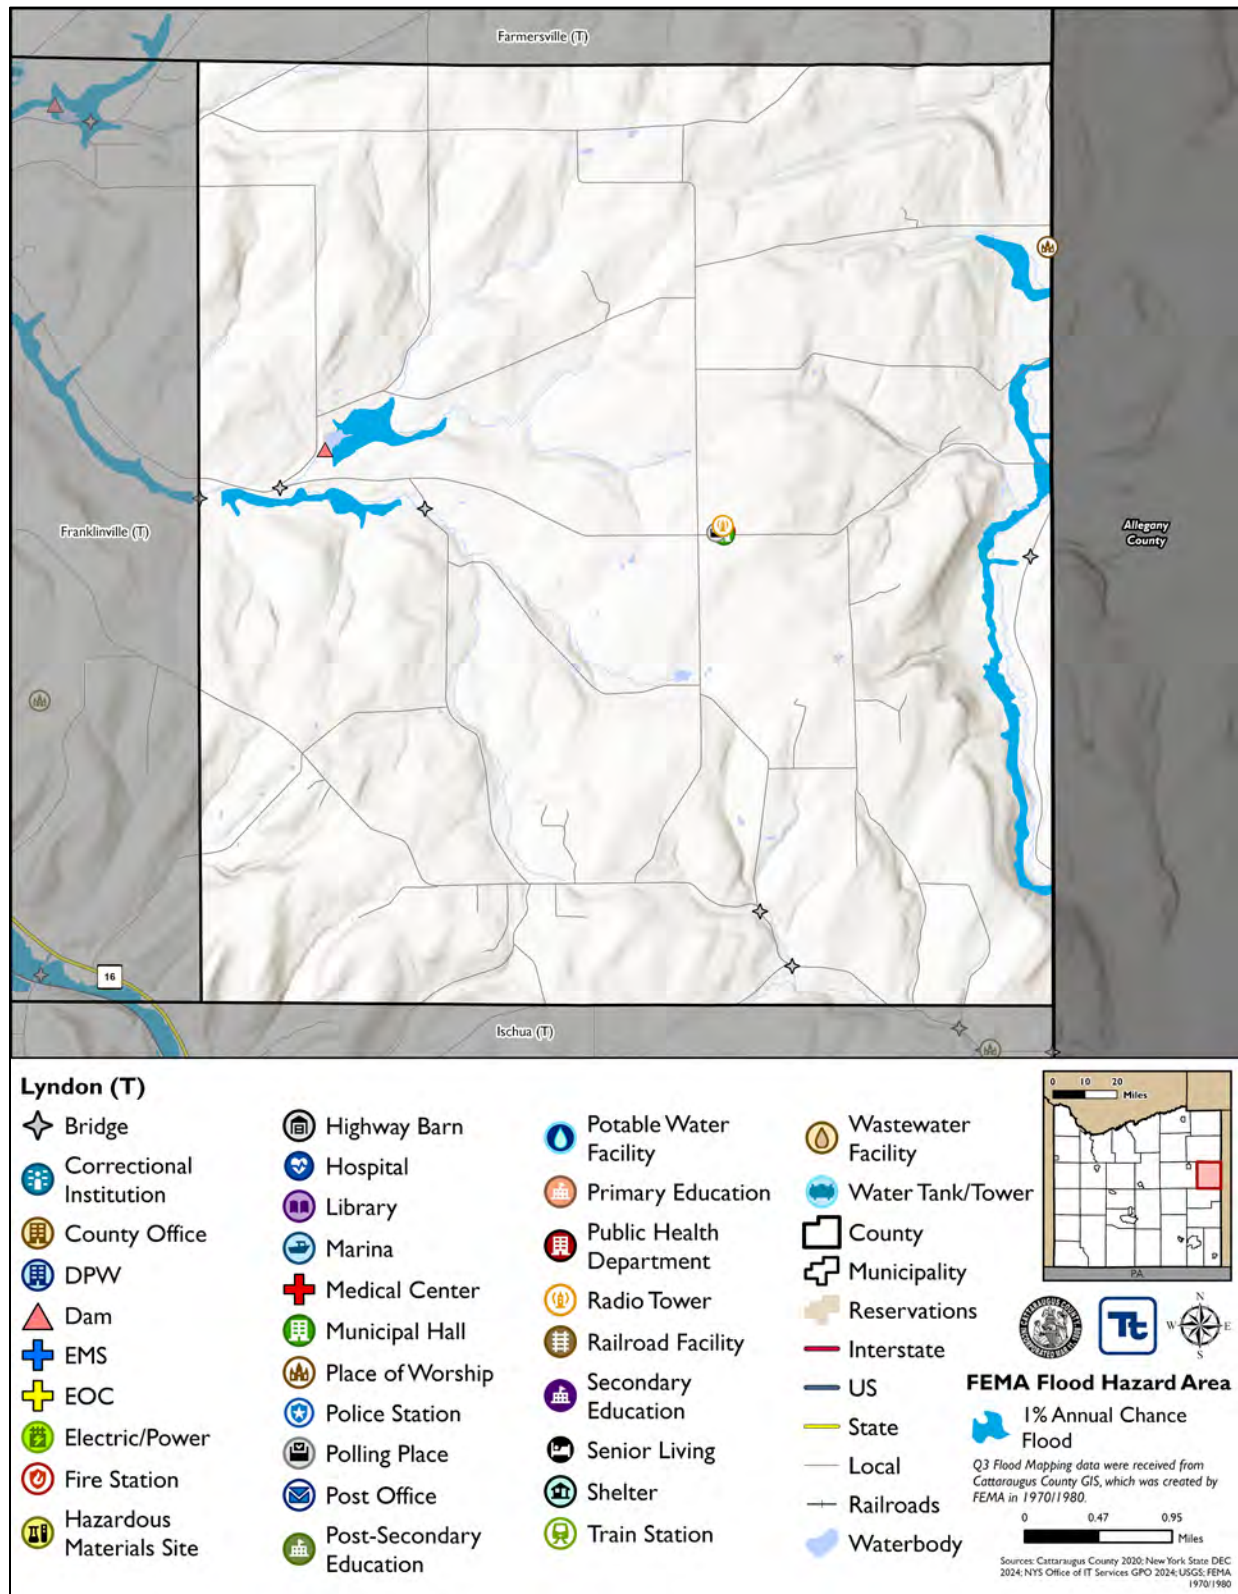

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Lyndon's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

27.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 27-1 through Figure 27-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Lyndon has significant exposure. The maps show the location of potential new development, where available.

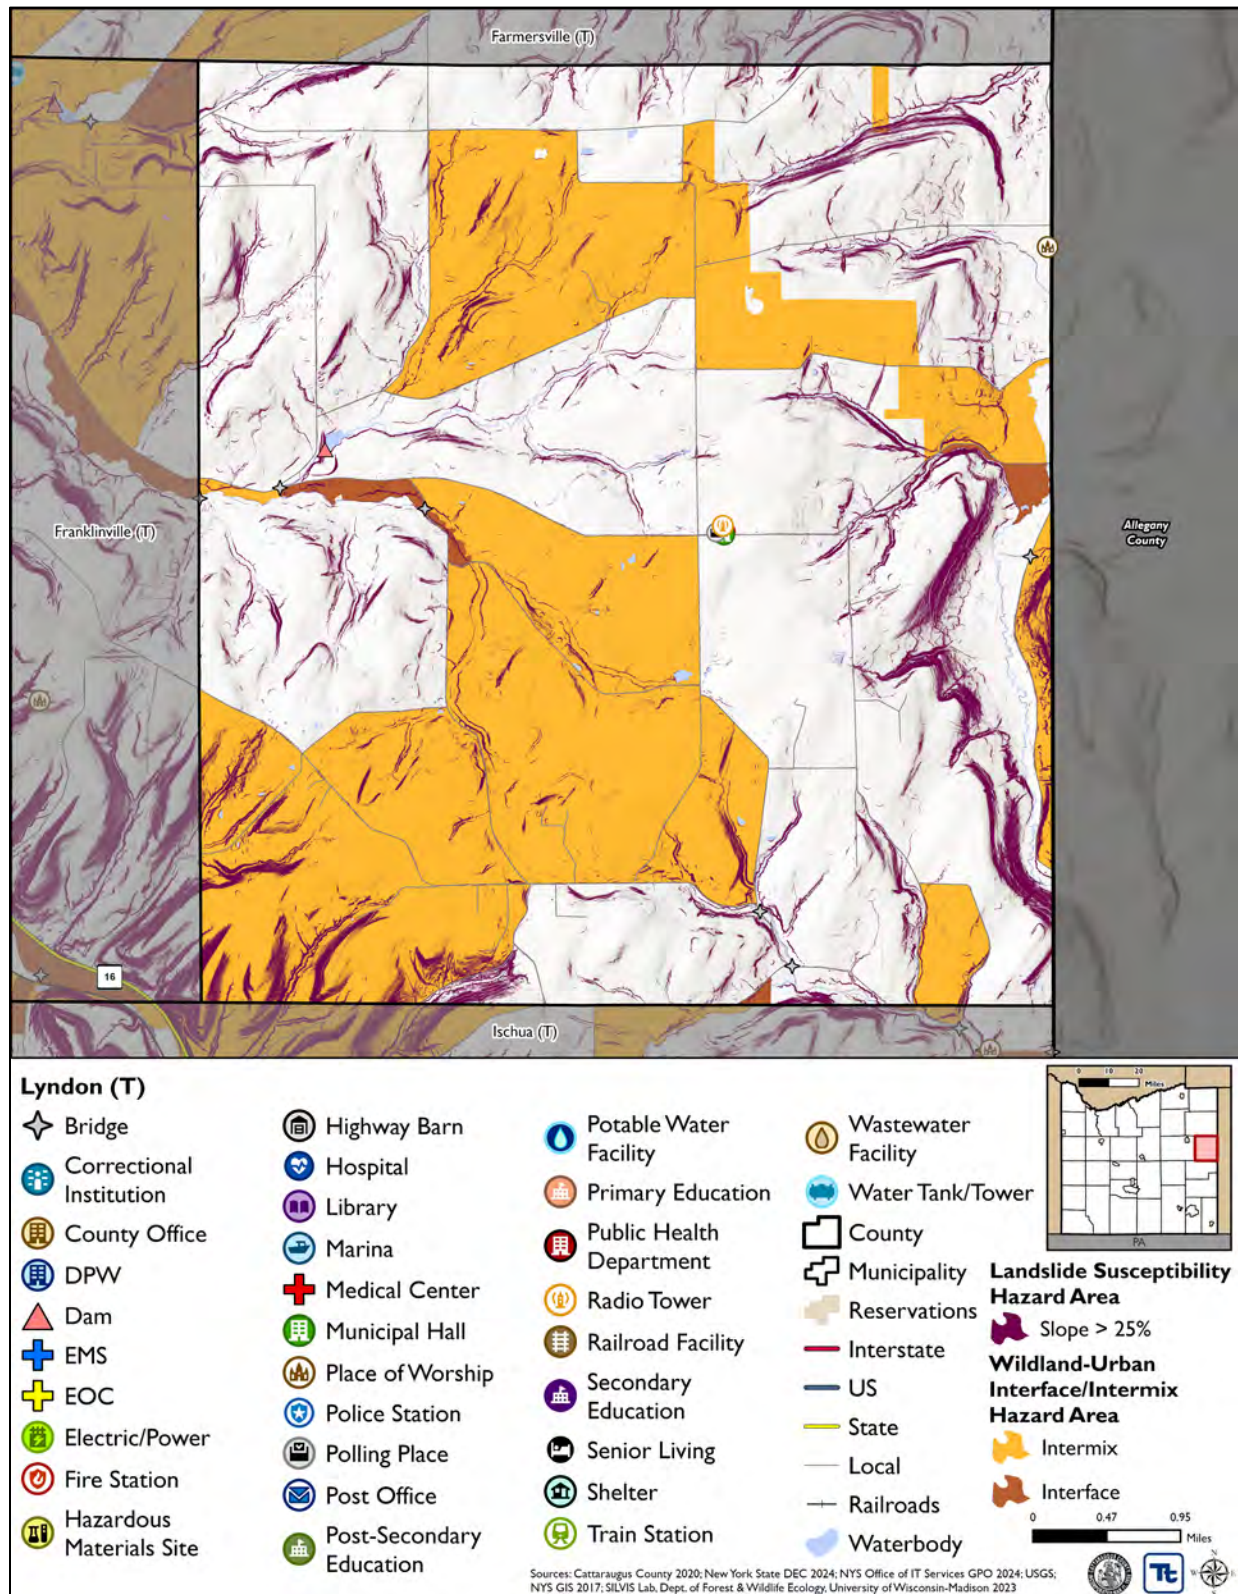

Figure 27-1. Lyndon Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 27-2. Lyndon Landslide and Wildfire Hazard Area Extent and Location Map

27.6.2 Hazard Event History

The history of natural and non-natural hazard events in Lyndon is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 27-14 provides details on loss and damage in Lyndon during hazard events since the last hazard mitigation plan update.

Table 27-14. Hazard Event History in Lyndon

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Lyndon
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damage or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town did not incur any documented damage or losses.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damage or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damage or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damage or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damage or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damage or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damage or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damage or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damage or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damage or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damage or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

27.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Lyndon .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Lyndon reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town agreed with the preliminary rankings.

Table 27-15 shows Lyndon's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 27-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 27-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 27-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
There are no critical facilities located in the flood hazard areas.					

Source: Cattaraugus County 2024

In addition to critical facilities that are exposed to flooding, the following high hazard dams are located in Lyndon:

- Ischua Creek Watershed Dam #5 Rehab

27.6.4 Identified Issues

After a review of Lyndon's hazard event history, hazard rankings, hazard location, and current capabilities, Lyndon identified the following vulnerabilities within the community:

- Ischua Creek Watershed Dam #5 is a Class I High Hazard Dam that is located on the Gates Creek. The dam is owned by the County of Cattaraugus. Failure of the dam could result in inundation of residential properties, woodland areas, agricultural and rural lands, and transportation routes including Lyndon Center Road and Livingston Road. Although the dam was last inspected in 2022, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Livingston Road
 - Porter Road
 - Town Line Road
- FIRMs are outdated and may not accurately display flood risk. Inaccurate flood maps can misinform the public of actual flood risk and may prevent interested homeowners from receiving or applying for flood insurance. Correctly displaying the areas at risk to the flood hazard is not only critical to visually show the risk, but to support grant applications for funding to mitigate the flood risk at identified locations within or around the floodplain.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.

- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering.
- The existing well which provides the water supply for the Town Shop and Town Offices is of poor quality. The water from the well is used for consumption and waste. A disruption in the water supply, and a decrease in its quality, can result in the need to turn off the water supply, interrupting the utility and the overall operations and these facilities.
- Debris, including sediment accumulation, fallen tree branches and limbs, and rubbish, accumulate in waterbodies when heavy rains from severe storms or heavy snowmelt from severe winter storms cause the items to collect and get taken downstream. Debris jams occur in the streams across Town, causing flooding on several roadways. Dead trees and debris need to be removed from the creek. There may be restrictions in place by the Army Corps and NYS DEC for the protection of the waterway.
- There is approximately 20 miles of dirt roads which erode during heavy rain events. Heavy rains deposit the eroded soils into nearby waterways and stormwater infrastructure, which contributes to debris jams and results in additional flooding issues. The eroded soils are also deposited on neighboring properties.
- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- There are internet access issues in the Town which negatively influences emergency communication. A lack of ability to communicate can impact an individual's ability to understand or learn how to reduce their risk to hazards and mitigate those risks. A lack of internet connectivity can also impact first responders, as they must be able to communicate during events or incidents associated with all hazards of concern.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.

27.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

27.7.1 Past Mitigation Action Status

Table 27-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part

of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

27.7.2 Additional Mitigation Efforts

Lyndon did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 27-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Lyndon-001	Install culvert on Livingston Road	Flood, Severe Storm	Highway Department	Problem: Flooding along Livingston Road. During extreme rain events, washouts on road occur. Solution: Install culvert along road to mitigate flooding.	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-002	Rock line ditches along Porter Road and Town Line Road	Flood, Severe Storm	Town, Cattaraugus County, DPW	Problem: Reoccurring flooding along Porter Road and Town Line Road Solution: Install rock line ditches to reduce flooding	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-003	Update town FIRMs	Flood	Cattaraugus County Soil and Water	Problem: Outdated town FIRMs Solution: Update flood hazard mapping in the town	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-004	Update Flood Damage Prevention Ordinance	Flood	Town board	Problem: The Town of Lyndon has an outdated Flood Damage Prevention Ordinance Solution: The town will develop an updated flood damage prevention ordinance	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-005	Floodplain Administrator to attend training on floodplain management	Flood	Cattaraugus County Emergency Management/ Cattaraugus County	Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.	1. In Progress 2. Lack of training availability.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
			Codes Department	Solution: Obtain/host training and certification for floodplain managers		
2020-Lyndon-006	Provide information to residents, business owners, and organizations about what they can do to prevent their structures from wildfires.	Wildfires	Town board	Problem: Additional public education on wildfire risk is needed Solution: The town will develop an outreach program to educate the public about wildfires and what they can do to protect their structures.	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-007	Identify temporary housing location(s) for residents in the event of an emergency.	All Hazards	Town Supervisor/ Town Clerk	Problem: The Town of Lyndon currently does not have a temporary housing location in the event of an emergency. Solution: The town will confirm locations and notify households and businesses through mailing.	1. In Progress 2. Financial constraints	1. Include 2. Change to temporary sheltering 3. Not applicable
2020-Lyndon-008	Update water supply wells at highway shop and Town offices	Utility Failure	DPW, Town	Problem: Poor water supply (well water for drinking and bathrooms) at Shop, Town offices, which is an emergency building/shelter Solution: Clean old well out or drill a new well for the Shop and Town offices.	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-009	Clean streams and ditches	Flood, Severe storm	DPW, Highway Department	Problem: Debris in streams and ditches throughout the town causing flooding.	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	throughout the town			Solution: Develop a stream maintenance program to clear out debris in streams and ditches regularly to prevent flooding		
2020-Lyndon-010	Pave 20 miles of dirt roads throughout the town	Flood, Severe Storm	Highway Department	Problem: 20 miles of dirt roads erode during heavy rain events. Solution: Pave dirt roads that are prone to flooding/eroding.	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-011	Update the Emergency Operations Plan.	All Hazards	County, Town	Problem: Outdated Emergency Operations Plan Solution: Update town's Emergency Operation Plan to include current hazards.	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-Lyndon-012	Update Building Code	All Hazards	County, Town	Problem: Building codes are outdated. Solution: Update building codes so buildings are built to withstand hazards they face.	1. Completed 2. Building codes updated and adopted in 2024.	1. Discontinue 2. Not applicable 3. Building codes updated and adopted in 2024.
2020-Lyndon-013	Update cell service	Utility Failure	Town	Problem: Slow or no cell service or internet service for emergencies. Solution: The town will work with telecommunications companies to install towers.	1. In Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

27.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Lyndon participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Lyndon would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 27-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 27-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 27-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X									X
Flood	X	X	X	X	X		X	X	X	X
Landslide	X				X					X
Pandemic	X			X			X			X
Severe Storm	X	X	X		X			X	X	X
Severe Winter Storm	X									X
Utility Failure	X	X							X	X
Wildfire	X			X			X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 27-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-Lyndon-01	Ischua Creek Watershed Dam #5 Rehab	1	1	1	1	0	0	1	1	1	0	1	1	1	1	11	High
2025-Lyndon-02	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-Lyndon-03	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-Lyndon-04	Outdated FIRMs	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-Lyndon-05	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-Lyndon-06	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-Lyndon-07	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-Lyndon-08	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-Lyndon-09	Water Supply at Town Facilities	1	1	1	1	1	0	1	1	1	0	1	1	1	0	11	High
2025-Lyndon-10	Debris Removal	1	1	1	1	0	0	1	1	1	1	1	1	0	1	11	High
2025-Lyndon-11	Dirt Road Removal	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-Lyndon-12	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-Lyndon-13	Internet Accessibility	1	1	1	1	0	0	0	1	1	1	0	1	1	0	9	Medium
2025-Lyndon-14	Landslide Prone Roads Inventory	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-LyndonT-01. Ischua Creek Watershed Dam #5 Rehab

Lead Agency:	County of Cattaraugus										
Supporting Agencies:	County Engineer, County OES, NYDEC, Municipal Engineer										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Ischua Creek Watershed Dam #5 is a Class I High Hazard Dam that is located on the Gates Creek. The dam is owned by the County of Cattaraugus. Failure of the dam could result in inundation of residential properties, woodland areas, agricultural and rural lands, and transportation routes including Lyndon Center Road and Livingston Road. Although the dam was last inspected in 2022, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.										
Description of the Solution:	The Municipal Engineer will work with the County of Cattaraugus to complete an engineering study of Ischua Creek Watershed Dam #5. The Town will also request information and input from its Highway department and the County regarding impacted roadways. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Town and the County of Cattaraugus will pursue funding support, permit approval from NYSDEC, and implement the cost-effective measures.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, HHPD										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3, 4, 6, 7										
Benefits:	This action will improve the safety and security of those who live within the dam inundation areas of the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness within the Special Flood Hazard Area and inundation areas where significant risk to socially vulnerable populations exists.										
Impact on Future Development:	Future development located in or near the dam inundation area will be further protected from a dam failure event.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event due to projected increases in precipitation. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Decommission Dam</td><td>High cost, flood risk for nearby infrastructure increased, loss an environmental, flood control, and stormwater management resource.</td></tr><tr><td>Elevate nearby structures</td><td>Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Decommission Dam	High cost, flood risk for nearby infrastructure increased, loss an environmental, flood control, and stormwater management resource.	Elevate nearby structures	Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions
Action	Evaluation										
No Action	Current problem exists										
Decommission Dam	High cost, flood risk for nearby infrastructure increased, loss an environmental, flood control, and stormwater management resource.										
Elevate nearby structures	Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions										

Action 2025-LyndonT-02. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The municipality is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-LyndonT-03. Floodprone Roads

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Engineering, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	<p>Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none"> • Livingston Road • Porter Road • Town Line Road 										
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Relocate all flood-prone road system</td> <td>Not feasible</td> </tr> <tr> <td>Raise all flood prone roads</td> <td>Cost prohibitive</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Relocate all flood-prone road system	Not feasible	Raise all flood prone roads	Cost prohibitive		
Action	Evaluation										
No Action	Current problem exists										
Relocate all flood-prone road system	Not feasible										
Raise all flood prone roads	Cost prohibitive										

Action 2025-LyndonT-04. Outdated FIRMs

Lead Agency:	Floodplain Administrator										
Supporting Agencies:	Town Board, Cattaraugus County, NYSDEC, NYSDHSES, FEMA										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	FIRMs are outdated and may not accurately display flood risk. Inaccurate flood maps can misinform the public of actual flood risk and may prevent interested homeowners from receiving or applying for flood insurance. Correctly displaying the areas at risk to the flood hazard is not only critical to visually show the risk, but to support grant applications for funding to mitigate the flood risk at identified locations within or around the floodplain.										
Description of the Solution:	The Town will actively participate in the remapping process. This participation will include providing data and information to support map revisions, identifying areas of flooding concern, providing review of preliminary maps, and adopting updated flood damage prevention local laws when the FIRMs are finalized.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, State Budget, County Budget, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4										
Benefits:	Updating FIRMs will provide a more complete picture of the floodplain and the overall flood hazard in Cattaraugus County. This will inform other sectors of the community, including land use, development, permitting, and codes and standards.										
Impact on Socially Vulnerable Populations:	An analysis of the floodplain will inform future community development and land use and prevent vulnerable populations from residing in areas of heightened flood risk.										
Impact on Future Development:	Updated FIRMs will decide which populations and structures will require flood insurance to be built in areas of flood hazard.										
Impact on Critical Facilities/Lifelines:	Creation of updated floodplain maps will inform efforts to increase the resilience of critical infrastructure that is present in those areas, including transportation routes, water treatment plants, and other utility services. This will also aid in preventing future development of infrastructure in these areas.										
Impact on Capabilities:	An understanding of the floodplain will allow for the development of processes, plans, training and staff placement to address flooding issues in the areas of greatest concern before they occur.										
Climate Change Considerations:	The maps that are developed as a result of this action may not remain current or valid for the length of time that they may have in the past due to changes in floodplains and increases in extreme rainfall events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Town creates its own flood maps</td> <td>Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications</td> </tr> <tr> <td>FEMA updates maps without Town input</td> <td>Required changes for areas of flooding may not be incorporated</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Town creates its own flood maps	Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications	FEMA updates maps without Town input	Required changes for areas of flooding may not be incorporated
Action	Evaluation										
No Action	Current problem exists										
Town creates its own flood maps	Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications										
FEMA updates maps without Town input	Required changes for areas of flooding may not be incorporated										

Action 2025-LyndonT-05. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-LyndonT-06. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-LyndonT-07. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><tr><th>Action</th><th>Evaluation</th></tr><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources</td><td>Resources may be generalized and not specific to the risks in the Town</td></tr><tr><td>Use only a few methods for distribution</td><td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td></tr></table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-LyndonT-08. Pandemic Education and Outreach

Lead Agency:	Town Supervisor		
Supporting Agencies:	Town Board, Cattaraugus County		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.		
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	1 year		
Goals Met:	1, 2, 3, 4		
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.		
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.		
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	
	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance	

Action 2025-LyndonT-09. Water Supply at Town Facilities

Lead Agency:	Town Board		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The existing well which provides the water supply for the Town Shop and Town Offices is of poor quality. The water from the well is used for consumption and waste. A disruption in the water supply, and a decrease in its quality, can result in the need to turn off the water supply, interrupting the utility and the overall operations and these facilities.		
Description of the Solution:	The Town Board and its Engineer will evaluate whether it is most cost-effective to clean out the current well or to drill a new well to ensure clean, potable water for the Town facilities. Once determined, the most cost-effective measure will be implemented.		
Estimated Cost:	Medium		
Potential Funding Sources:	Town Budget, FEMA HMA		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 5		
Benefits:	This action will ensure the water quality for the water supply in the Town Shop and Town Offices is clean and potable for consumption.		
Impact on Socially Vulnerable Populations:	Persons will have clean, potable water and not incur any delays or closures of utility services.		
Impact on Future Development:	For development connected to the well will have clean, potable water.		
Impact on Critical Facilities/Lifelines:	The water systems lifeline will remain in tact and not be disrupted.		
Impact on Capabilities:	The availability of clean, potable water in Town facilities will be ensured.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events which may cause erosion of the existing well if it is not cleaned out, further degrading the water quality.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Only update water infrastructure		Water and wastewater infrastructure are both outdated and need updated
	Increase chlorine in water to prevent bacteria growth		Not feasible, still have outdated infrastructure

Action 2025-LyndonT-10. Debris Removal

Lead Agency:	Highway Department		
Supporting Agencies:	Town Board, NYS DEC, USACE		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Debris, including sediment accumulation, fallen tree branches and limbs, and rubbish, accumulate in waterbodies when heavy rains from severe storms or heavy snowmelt from severe winter storms cause the items to collect and get taken downstream. Debris jams occur in the streams across Town, causing flooding on several roadways. Dead trees and debris need to be removed from the creek. There may be restrictions in place by the Army Corps and NYS DEC for the protection of the waterway.		
Description of the Solution:	The Highway Department will assess the feasibility and cost-effectiveness of a debris maintenance/removal program to prevent future flooding surrounding the streams in Town. The Town will work with USACE and NYS DEC to obtain any necessary permitting for debris removal.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, Town Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage to properties. The natural ecosystem is cleaned and can return to a thriving habitat.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development along or near Clear Creek will have its risk of flood impacts reduced.		
Impact on Critical Facilities/Lifelines:	Not applicable		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action removed debris from waterways, reducing the risk of back-flooding from debris pile-ups.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input checked="" type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Elevate nearby roads		Cost prohibitive
	Acquire all properties which flood		Cost prohibitive

Action 2025-LyndonT-11. Dirt Road Removal

Lead Agency:	Highway Department		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	There is approximately 20 miles of dirt roads which erode during heavy rain events. Heavy rains deposit the eroded soils into nearby waterways and stormwater infrastructure, which contributes to debris jams and results in additional flooding issues. The eroded soils are also deposited on neighboring properties.		
Description of the Solution:	The Highway Department will identify dirt roads which need to be paved. The Highway Department will work with Town Engineering to identify best practices and measures to reduce any potential flooding impacts as a result of paving any identified roads.		
Estimated Cost:	High		
Potential Funding Sources:	Town Budget, FEMA HMA		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will protect roads in the Town which would otherwise be exposed to erosion. Paving the dirt roads in Town will reduce the occurrence of erosion and ensure roads in Town are traversable during all weather conditions.		
Impact on Socially Vulnerable Populations:	Transportation routes will remain open during heavy rains and prevent washouts, permitting populations to continue to traverse roadways.		
Impact on Future Development:	Future development near the roads will have fewer impacts from soil erosion.		
Impact on Critical Facilities/Lifelines:	This action will protect the transportation lifeline by keeping roadways open during hazardous events.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action will work to reduce the occurrence of erosion on roadways.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Relocate road to other location	Roadway will still need to cross streams and low-lying areas.	
	Abandon road	Roadway needs to be maintained for access	

Action 2025-LyndonT-12. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Integrate hazard mitigation principles in only hazard appendices</td> <td>The plan will miss integration opportunities in the basic plan and annexes</td> </tr> <tr> <td>Ask County to integrate hazard mitigation into the County CEMP</td> <td>Town CEMP will remain undeveloped</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Current problem exists	Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes	Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped	
Action	Evaluation										
No Action	Current problem exists										
Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-LyndonT-13. Internet Accessibility

Lead Agency:	Town Board										
Supporting Agencies:	Cable and Internet Providers										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	There are internet access issues in the Town which negatively influences emergency communication. A lack of ability to communicate can impact an individual's ability to understand or learn how to reduce their risk to hazards and mitigate those risks. A lack of internet connectivity can also impact first responders, as they must be able to communicate during events or incidents associated with all hazards of concern.										
Description of the Solution:	The Town will work with cable and internet providers to identify locations which are still experiencing problems with connectivity. Cable and internet providers will improve lines to ensure connectivity and reduce the risk of utility failure.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, Cable and Internet Providers										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	Residents, business owners, first responders, and workers within the Town will have better access to internet. Access to internet is beneficial in learning how to prepare and mitigate risk associated with natural and manmade hazards. Furthermore, internet connectivity can result in the better facilitation of education and outreach.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may not have the financial means to purchase an internet service with high speeds to ensure connectivity with current capabilities. This action will assist in providing these populations with adequate internet.										
Impact on Future Development:	Connectivity will be available for individuals living in future developed areas.										
Impact on Critical Facilities/Lifelines:	Critical facilities may benefit from this action because it allows them to have increased communication and connections to other critical facilities and emergency responders.										
Impact on Capabilities:	This action will increase the Town's ability to effectively conduct outreach via the internet.										
Climate Change Considerations:	Climate change is leading to an increase in severity and frequency in severe weather.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Town buys signal extender for all properties</td> <td>Cost prohibitive</td> </tr> <tr> <td>Switch providers</td> <td>May be restrictive due to availability</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Town buys signal extender for all properties	Cost prohibitive	Switch providers	May be restrictive due to availability

No Action	Current problem exists										
Town buys signal extender for all properties	Cost prohibitive										
Switch providers	May be restrictive due to availability										

Action 2025-LyndonT-14. Landslide Prone Roads Inventory

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.										
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, The Engineer will work with the Highway Department to prioritize roadways and identify possible mitigation measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	3 years										
Goals Met:	1, 4, 6										
Benefits:	This action will identify locations with steep grades (above 20 percent) and provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.										
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.										
Impact on Future Development:	The identification of at-risk roads may lead to restrictions for future development.										
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action may improve the Town's regulatory capabilities.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Do not use inventory to inform steep slopes ordinance</td> <td>Would not restrict future development, could increase at risk properties and structures</td> </tr> <tr> <td>Do not use inventory to inform future projects</td> <td>Risk would not be reduced</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Do not use inventory to inform steep slopes ordinance	Would not restrict future development, could increase at risk properties and structures	Do not use inventory to inform future projects	Risk would not be reduced
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Do not use inventory to inform steep slopes ordinance	Would not restrict future development, could increase at risk properties and structures										
Do not use inventory to inform future projects	Risk would not be reduced										

28. TOWN OF MACHIAS

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Machias with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Machias, describes who participated in the planning process, assesses Machias' risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

28.1 HAZARD MITIGATION PLANNING TEAM

The Town of Machias identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 28-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 28-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Tim Byroads, Highway Superintendent Address: 3483 Roszyk Hill Road, PO Box 87, Machias NY 14101 Phone Number: (716) 353-8851 Email: machiashwy2015@yahoo.com	Name/Title: Scott Ludka, Code Enforcement Officer Address: 3483 Roszyk Hill Road, PO Box 87, Machias NY 14101 Phone Number: (716) 244-0740 Email: machiasny@outlook.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Scott Ludka, Code Enforcement Officer Address: 3483 Roszyk Hill Road, PO Box 87, Machias NY 14101 Phone Number: (716) 244-0740 Email: machiasny@outlook.com	

28.2 COMMUNITY PROFILE

The Town of Machias lies in the northeast part of Cattaraugus County in western New York State. The Town of Machias has a total area of 41.08 square miles. Lime Lake Outlet is a stream flowing out the north end of Lime Lake to Cattaraugus Creek. Frog Pond and Sucker Pond are two small bodies of water within the town. The town is bordered to the north by the Town of Yorkshire, to the northeast is the Town of Freedom, to the west is the Town of Ashford, to the southwest is the Town of Ellicottville, the east border is the Town of Farmersville and south is the Town of Franklinville. There are three hamlets located within the town: Bakerstand, Bird, and Machias Junction.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction

quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 3.3 percent of the population is 5 years of age or younger, 24.5 percent is 65 years of age or older, 0 percent is non-English speaking, 17 percent is below the poverty threshold, and 15.1 percent is considered disabled.

28.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Machias performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Machias to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

28.3.1 Planning and Regulatory Capability and Integration

Table 28-2 summarizes the planning and regulatory tools that are available to Machias.

Table 28-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 2, 2007: NYS Uniform Fire Prevention and Building Code	State and Local	CEO
How has or will this be integrated with the HMP and how does this reduce risk?				
This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) in this Town. This chapter is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter.				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Site Plan Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Local Law 1, 1992: Flood Damage Prevention	Federal, State, County and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Emergency Management Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Climate Change Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	Yes	Municipal Separate Storm Sewer System (MS4), 2015-2	Local	Water Operator
How has or will this be integrated with the HMP and how does this reduce risk?				
The general purpose of this Law is the following: to provide for efficient, economic, environmentally safe, and legal operation of the Town's publicly owned treatment works.				
PLANNING DOCUMENTS				
General/Comprehensive Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Capital Improvement Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Disaster Debris Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Floodplain Management or Watershed Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Open Space Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Urban Water Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Habitat Conservation Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Economic Development Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Community Wildfire Protection Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Community Forest Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Transportation Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Agriculture Plan	Yes	Agricultural and Farmland Protection Plan	County	EDPT
How has or will this be integrated with the HMP and how does this reduce risk? The plan includes recommendations to address critical structural and industry-wide concerns that impact the long-term viability of agriculture in Cattaraugus County; for improving conditions specific to health and well-being of local agricultural enterprises through training, business planning, network development, mentoring, finance, research and development support, and similar services; and to offer programs and processes that address the land use issues facing both towns and farmers.				
Climate Action/ Resilience/Sustainability Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Tourism Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Business/ Downtown Development Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan	Yes	Comprehensive Emergency Management Plan, 8/15/2006	Local and County	OEM
How has or will this be integrated with the HMP and how does this reduce risk? The CEMP defines the scope of preparedness and emergency management activities necessary in the Town. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.				
Continuity of Operations Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Substantial Damage Response Plan	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?

Threat and Hazard Identification and Risk Assessment	Yes	Threat & Hazard Identification & Risk Assessment (THIRA)	County	OES
---	-----	--	--------	-----

How has or will this be integrated with the HMP and how does this reduce risk?

The Threat and Hazard Identification and Risk Assessment (THIRA) is a three-step risk assessment process that helps the County understand its risks to natural, technological, and human-caused hazards and what must be done to address those risks.

Post-Disaster Recovery Plan	No	-	-	-
------------------------------------	----	---	---	---

How has or will this be integrated with the HMP and how does this reduce risk?

Public Health Plan	Yes	Health Department Strategic Plan 2022–2025	County	Health Department
---------------------------	-----	--	--------	-------------------

How has or will this be integrated with the HMP and how does this reduce risk?

The Cattaraugus County Health Department's (CCHD) Strategic Planning Process began in April 2022 using the resources of the New York State Department of Health NYS Public Health Corp Fellows. As a part of this process, the fellows reviewed the 2018–2021 strategic plan for past successes and failures and discussed what was needed for future success. Both an external assessment, in which county demographic data, economic factors, health outcomes, and community health assessment findings that have the potential to affect the agency and strategies were examined, and an internal assessment of a Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis was completed.

Other: Community Needs Assessment and Community Health Improvement Plan	Yes	Community Needs Assessment and Community Health Improvement Plan	County	Health Department
--	-----	--	--------	-------------------

How has or will this be integrated with the HMP and how does this reduce risk?

The 2022–2024 OGH/BRMC Community Service Plan (CSP) and the CCHD's Community Health Assessment and Community Health Improvement Plan (CHA-CHIP) were conducted to identify significant health needs as outlined by the New York State Department of Health's 2022–2024 Prevention Agenda, where applicable. It also provides critical information OGH/BRMC, the CCHD, and others in a position to make a positive impact on the health of the region's residents. The CSP/CHA-CHIP enables the health department, hospital, and other community partners to strategically establish priorities, develop interventions, and direct resources to improve the health of residents living in the service area.

The CSP/CHA-CHIP includes a detailed examination of priority areas identified in the NYS Prevention Agenda: (1) prevent chronic diseases; (2) promote a healthy and safe environment; (3) promote healthy women, infants and children; (4) promote well-being and prevent mental health and substance use disorders; and (5) prevent communicable diseases. The Prevention Agenda is a six-year effort to make New York the healthiest state. Developed in collaboration with 140 organizations, the plan identifies New York's most urgent health concerns, and suggests ways local health departments, hospitals, and partners from health, business, education, and community organizations can work together to solve them.

28.3.2 Development and Permitting Capability

Table 28-3 summarizes the capabilities of Machias to oversee and track development.

Table 28-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?	Yes	Code Enforcement
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 		
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory?	No	-
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		
Describe the level of buildout in your jurisdiction.	N/A	20%

28.3.3 Administrative and Technical Capability

Table 28-4 summarizes potential staff and personnel resources available to Machias and their current responsibilities that contribute to hazard mitigation.

Table 28-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	State mutual Aid
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

28.3.4 Fiscal Capability

Table 28-5 summarizes financial resources available to Machias.

Table 28-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

28.3.5 Education and Outreach Capability

Table 28-6 summarizes the education and outreach resources available to Machias.

Table 28-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	County Administrator, Reverse 911, IPAWS
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

28.3.6 Community Classifications

Table 28-7 summarizes classifications for community programs available to Machias.

Table 28-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable
 — = Unavailable

28.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 28-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 28-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

28.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 28-1 is responsible for maintaining this information.

28.4.1 NFIP Statistics

Table 28-9 summarizes the NFIP policy and claim statistics for Machias.

Table 28-9. Machias NFIP Summary of Policy and Claim Statistics

# Policies	1
# Claims (Losses)	0
Total Loss Payments	\$0
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

28.4.2 Flood Vulnerability Summary

Table 28-10 provides a summary of the NFIP program in Machias.

Table 28-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas within the SFHA and occasional flooding in the valleys
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None that the Town is aware of
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Unknown
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Flood maps are dated and do not capture localized flooding.
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS

NFIP Topic	Comments
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	Additional staffing
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	None
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	NYS building code
What are the barriers to running an effective NFIP program in the community, if any?	Funding and Staffing
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: June 23, 1992 CAV: June 16, 1999
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law 1, 1992: Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	August 13, 1992
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	No
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

28.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 28-11 through Table 28-13.

Table 28-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2020				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	3	0	0	3
Permits within SFHA	0	0	0	0
2023				
Total Permits	5	0	0	5
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 28-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There has been no recent major development or infrastructure between 2019 to present.					
* Only location-specific hazard zones or vulnerabilities identified.					

Table 28-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There are no known or anticipated major development or infrastructure in the next five years.					

28.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Machias' risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

28.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 28-1 through Figure 28-2. These maps are based on the best available data at the time of the preparation

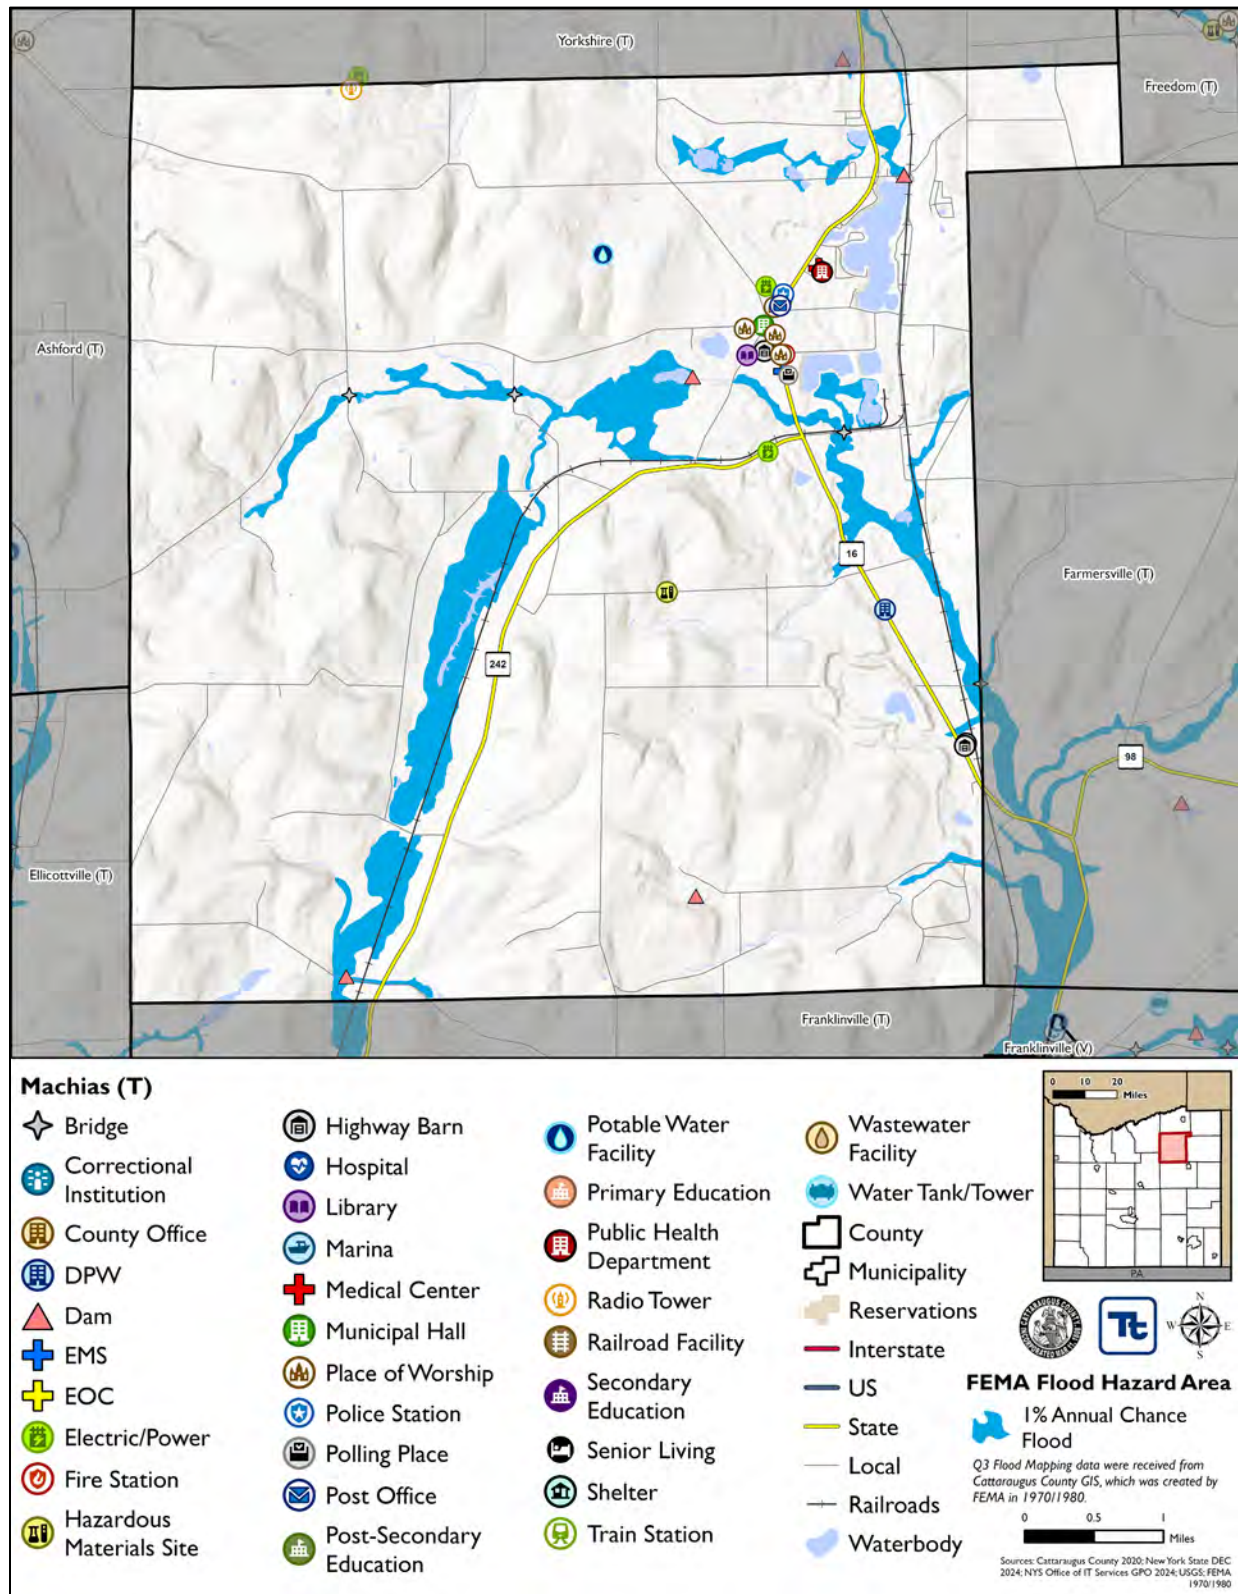

of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Machias has significant exposure. The maps show the location of potential new development, where available.

DRAFT

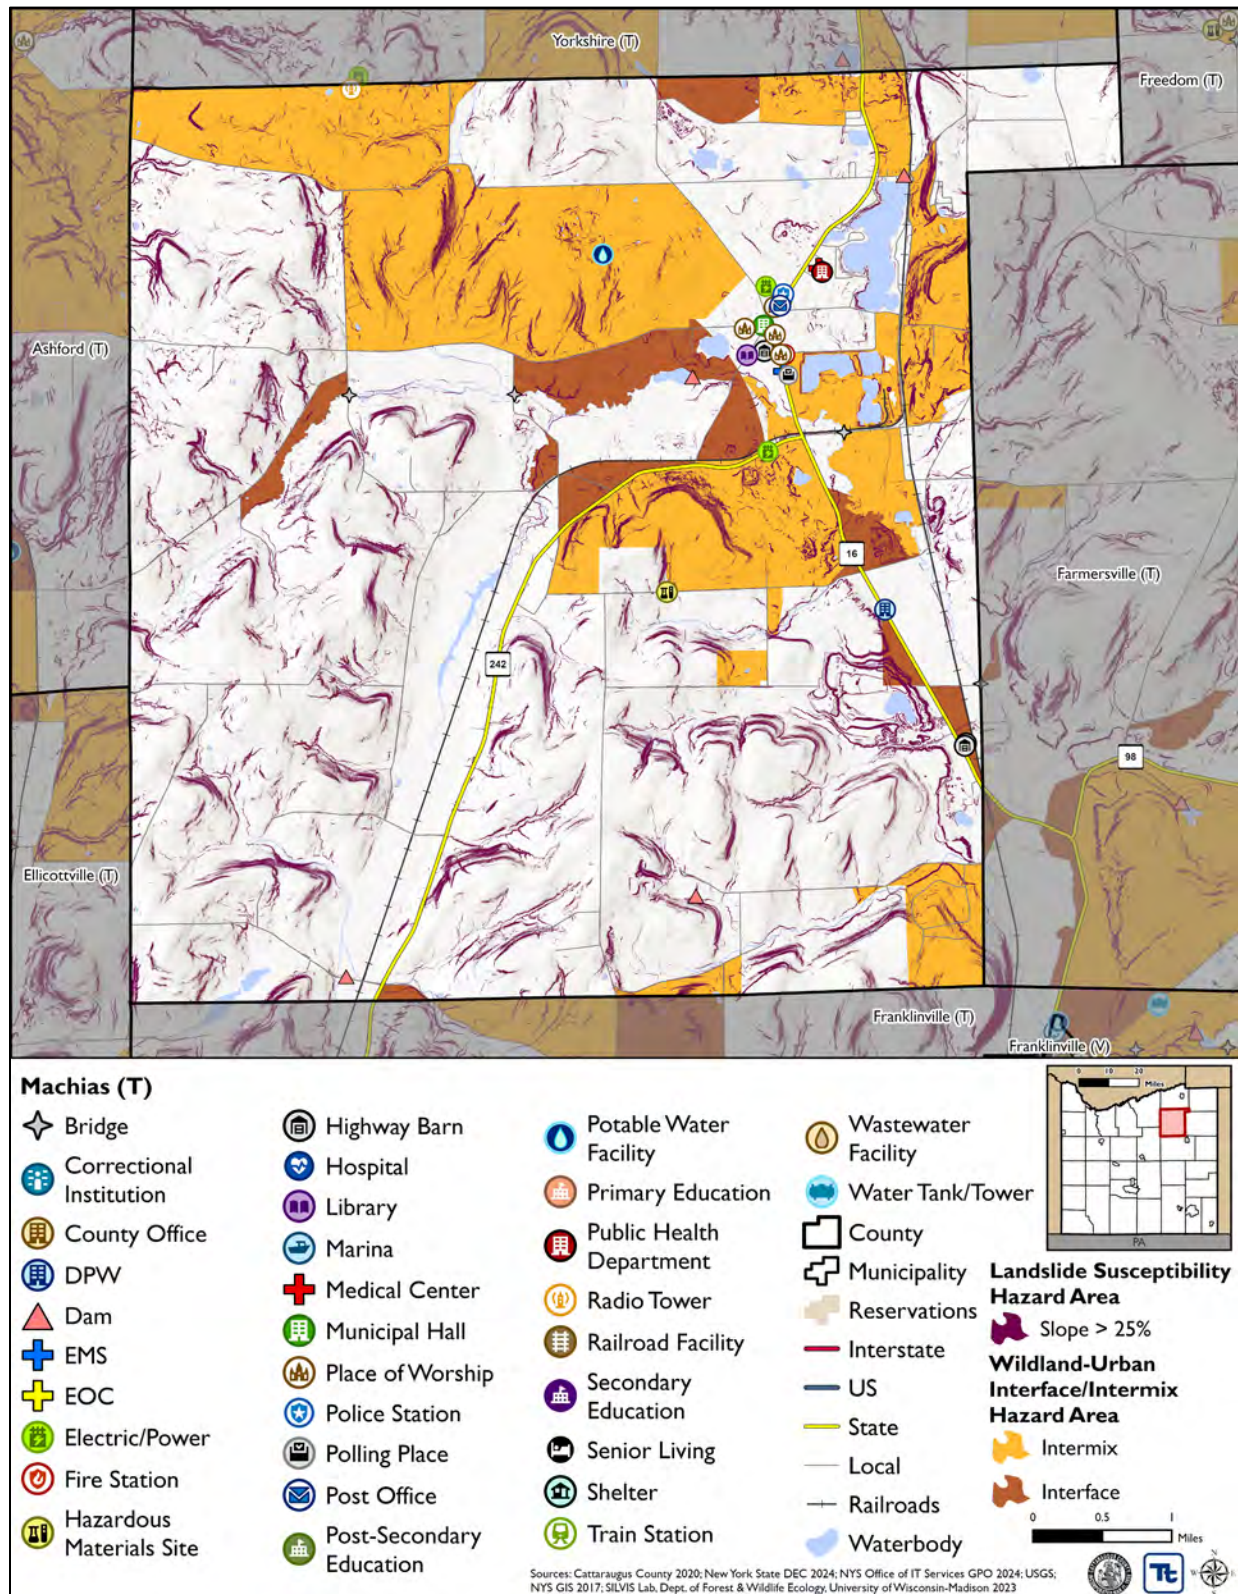

Figure 28-1. Machias Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 28-2. Machias Landslide and Wildfire Hazard Area Extent and Location Map

28.6.2 Hazard Event History

The history of natural and non-natural hazard events in Machias is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 28-14 provides details on loss and damage in Machias during hazard events since the last hazard mitigation plan update.

Table 28-14. Hazard Event History in Machias

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Machias
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town did not incur any documented damages or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town abided by social distancing, masking mandates and work from home orders.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town experienced flooded houses and a washed-out culvert.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damages or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not incur any documented damages or losses.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any documented damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Machias
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not incur any documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

28.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Machias .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Machias reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the rankings were appropriate.

Table 28-15 shows Machias' final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 28-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 28-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 28-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Bentley Wildlife Marsh Dam	Dam	X	-	-	Town completed action to conduct outreach to facility owner.
Ischua Creek Watershed Dam #1	Dam	X	-	-	Town completed action to conduct outreach to facility owner.
Lime Lake Outlet Dam	Dam	X	-	-	Town completed action to conduct outreach to facility owner.
Machias 23	Bridge	X	-	2025-MachiasT-12	-
Machias 28	Bridge	X	-	2025-MachiasT-12	-

Source: Cattaraugus County 2024

In addition to critical facilities that are exposed to flooding, the following high hazard dams are located in Machias:

- Ischua Creek Watershed Dam #1

28.6.4 Identified Issues

After a review of Machias' hazard event history, hazard rankings, hazard location, and current capabilities, Machias identified the following vulnerabilities within the community:

- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Critical facilities require backup power to ensure continuity of operations. T6 Machias Volunteer Fire Department does not have automatic backup power, which could impact the continuity of operations at the facility in the event of a utility or power failure. High winds severe weather and severe winter weather are known to cause utility failures, which would impact the continuity of operations at the critical facility. The Volunteer Fire Department is a designated emergency shelter location.
- A culvert on Bear Creek Road is undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter storms. The culvert is located at the Bear Creek Bridge, which if it were to collapse due to deterioration from the culvert, up to 100 people in a campground and residence area could be isolated.
- 365 Lakeview Boulevard, which is located at the lowest point of elevation on the boulevard, has flooded from severe storms. The Town worked with NYS DEC to install a bigger pipe to Lime Lake, but the pipe still backs up with water.

- Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods or dam and levee failures can cause structures to buckle or come off its foundation due to the immense pressure.
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Landslides may be able to be mitigated by cutting banks to prevent erosion. The Town has many steep sloped areas throughout its jurisdiction and should determine local vulnerabilities to landslides threatening primary roadways and properties.
- Ischua Creek Watershed Dam #1 is a Class I High Hazard Dam that is located on the Ischua Creek. The dam is owned by the County of Cattaraugus. Failure of the dam could result in inundation of residential properties, woodland areas, agricultural and rural lands, and transportation routes including Maple Avenue. Although the dam was last inspected in 2022, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Machias 23
 - Machias 28

28.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

28.7.1 Past Mitigation Action Status

Table 28-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

28.7.2 Additional Mitigation Efforts

Machias did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 28-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Machias-001	Protect Bentley Wildlife Marsh Dam to the 0.2% annual chance flood event	Flood	Engineer, facility operator	<p>Problem: the Bentley Wildlife Marsh Dam is in the special flood hazard area and is vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level</p> <p>Solution: the town will work with the county and discuss options for protecting the dam to the 0.2% annual chance flood event.</p>	<p>1. Completed</p> <p>2. Town reached out to dam owner and provided information on how to protect the facility.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Town reached out to dam owner and provided information on how to protect the facility.</p>
2020-Machias-002	Work with the county to protect Ischua Creek Watershed Dam #1 to the 0.2% annual chance flood event	Flood	FPA	<p>Problem: the Ischua Creek Watershed Dam #1 is in the special flood hazard area and is vulnerable to flooding.</p> <p>Solution: the town will work with the county and discuss options for protecting the dam to the 0.2% annual chance flood event.</p>	<p>1. Completed</p> <p>2. Town reached out to dam owner and provided information on how to protect the facility.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Town reached out to dam owner and provided information on how to protect the facility.</p>
2020-Machias-003	Protect Lime Lake Outlet Dam to the 0.2% annual chance flood event	Flood	Engineer, facility operator	<p>Problem: The Lime Lake Outlet Dam is in the special flood hazard area and is vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level</p> <p>Solution: the town will work with the county and discuss options for protecting the dam to the 0.2% annual chance flood event.</p>	<p>1. Completed</p> <p>2. Town reached out to dam owner and provided information on how to protect the facility.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Town reached out to dam owner and provided information on how to protect the facility.</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Machias-004	Develop a new Flood Damage Prevention Ordinance	Flood	Town board	<p>Problem: The Town of Machias lacks an updated flood damage prevention ordinance</p> <p>Solution: The town will develop and adopt a flood damage prevention ordinance</p>	1. No Progress 2. Town prioritized completion of other actions	1. Include 2. Not applicable 3. Not applicable
2020-Machias-005	Floodplain Administrator to attend training on floodplain management	Flood	County OES, County Building Codes	<p>Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.</p> <p>Solution: Obtain/host training and certification for floodplain managers</p>	1. No Progress 2. Lack of funding to support action	1. Include 2. Not applicable 3. Not applicable
2020-Machias-006	Provide information to residents, business owners, and organizations about what they can do to prevent their structures from wildfires.	Wildfires	Town board	<p>Problem: Additional public education on wildfire risk is needed</p> <p>Solution: the town will develop an outreach program to educate the public about wildfires and what they can do to protect their structures.</p>	1. No Progress 2. Lack of funding to support action	1. Include 2. Expand action to include public outreach to all hazards 3. Not applicable
2020-Machias-007	Generator for Machias Volunteer Fire Department	All Hazards	Machias VFD	<p>Problem: T6 Machias volunteer fire department is a designated emergency shelter location without back up power</p> <p>Solution: Purchase and install a 100-kW generator for the volunteer fire department so they can provide adequate backup</p>	1. No Progress 2. Lack of funding to support action	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				power to 300 people for short term/long term in the event of an emergency during a storm.		
2020-Machias-008	Bridge Replacement on Bear Creek Rd	Flood, Severe Storm	Town Highway Dept.	Problem: Culvert to potentially collapse trapping up to 100 people in a campground/residence area. Solution: Replace bridge on Bear Creek Road	1. No Progress 2. Lack of funding to support action	1. Include 2. Not applicable 3. Not applicable
2020-Machias-009	Protect home on 365 Lakeview Blvd from flooding	Flood, Severe Storm	Town	Problem: Home at the lowest spot of Lakeview Blvd has flooded from storms. The town worked with DEC to install a bigger pipe to the lake, but it still backs up water. Solution: Conduct a study to determine the best mitigation action to prevent flooding of the home.	1. No Progress 2. Lack of funding to support action	1. Include 2. Not applicable 3. Not applicable
2020-Machias-010	Update the Emergency Operations Plan	All Hazards	County, Town	Problem: outdated emergency operation plan Solution: Solution: Update the town's emergency operation plan	1. No Progress 2. Town utilizes County plan.	1. Discontinue 2. Not applicable 3. Town utilizes County plan.
2020-Machias-011	Update Building Codes	All Hazards	County, Town	Problem: Outdated building codes Solution: Update the town's building codes	1. In Progress 2. Town currently working on reviewing and revising building codes	1. Include 2. Not applicable 3. Not applicable

28.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Machias participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Machias would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 28-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 28-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 28-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X	X		X	X		X		X	
Flood	X	X		X	X		X		X	X
Landslide	X	X		X	X		X			
Pandemic				X			X			
Severe Storm	X	X		X	X		X		X	X
Severe Winter Storm	X	X		X	X		X		X	X
Utility Failure		X		X			X		X	X
Wildfire	X	X		X	X		X			

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 28-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-MachiasT-01	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-MachiasT-02	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-MachiasT-03	Comprehensive Outreach Program	1	1	1	1	1	1	0	1	1	1	1	1	0	1	12	High
2025-MachiasT-04	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-MachiasT-05	Bear Creek Bridge	1	1	1	1	1	0	0	1	0	1	1	1	1	1	11	High
2025-MachiasT-06	Lakeview Boulevard	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-MachiasT-07	Review and Revise Building Codes	1	1	1	1	1	1	0	0	1	1	1	1	0	0	10	Medium
2025-MachiasT-08	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-MachiasT-09	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-MachiasT-10	Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-MachiasT-11	Ischua Creek Watershed Dam #1 Rehab	1	1	1	1	0	0	1	1	1	0	1	1	1	1	11	High
2025-MachiasT-12	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-MachiasT-01. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-MachiasT-02. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-MachiasT-03. Comprehensive Outreach Program

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Council, Cattaraugus County										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on hazard risks and methods of mitigation measures, including those for dam and levee failure, flood, landslide, pandemic, severe storm, severe winter storm, utility failure, and wildfire. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for each individual hazard of concern.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the current public education and outreach program in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the various hazards which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of potential hazards. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's already existing public education and outreach program and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from hazards and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-MachiasT-04. Generators at Critical Facilities

Lead Agency:	Engineering										
Supporting Agencies:	Town Council, T6 Machias Volunteer Fire Department										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. T6 Machias Volunteer Fire Department does not have automatic backup power, which could impact the continuity of operations at the facility in the event of a utility or power failure. High winds severe weather and severe winter weather are known to cause utility failures, which would impact the continuity of operations at the critical facility. The Volunteer Fire Department is a designated emergency shelter location.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for this critical facility and its operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of a critical facility that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>-</td></tr><tr><td>Microgrid</td><td>Costly and difficult to implement.</td></tr><tr><td>Solar panels and battery backup</td><td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td></tr></tbody></table>	Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement. Action	Evaluation										
No Action	-										
Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-MachiasT-05. Bear Creek Bridge

Lead Agency:	Engineering		
Supporting Agencies:	Highway Department		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	A culvert on Bear Creek Road is undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter storms. The culvert is located at the Bear Creek Bridge, which if it were to collapse due to deterioration from the culvert, up to 100 people in a campground and residence area could be isolated.		
Description of the Solution:	The Town Engineer will lead an assessment of the bridge and culvert to determine what repairs are necessary or may be feasible. Once a course of action has been identified, the Town will carry out the improvements.		
Estimated Cost:	High		
Potential Funding Sources:	Town Budget, NYS DOT, BRIDGENY, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	Infrastructure will be protected from future hazard damages. Ensures at least a single transportation route remains accessible to the community.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations reach needed service provided by the Town.		
Impact on Future Development:	Future development in the impacted area will be able to access critical facilities and community lifelines.		
Impact on Critical Facilities/Lifelines:	Ensures transportation routes remain open and accessible to the public for daily use and evacuation needs. Provides a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridge.		
Impact on Capabilities:	Increases community resiliency to flooding events in vulnerable areas that would normally be vulnerable to prolonged isolation after high-water events.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove bridge		Not feasible, costly
	Build new bridge		Not feasible, costly

Action 2025-MachiasT-06. Lakeview Boulevard

Lead Agency:	Engineering		
Supporting Agencies:	Highway Department		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	365 Lakeview Boulevard, which is located at the lowest point of elevation on the boulevard, has flooded from severe storms. The Town worked with NYS DEC to install a bigger pipe to Lime Lake, but the pipe still backs up with water.		
Description of the Solution:	<p>The Town will develop specific mitigation solutions for Lakeview Boulevard after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none"> Elevation of roadways Installation or improvement of drainage systems Regrading of roadway and soils Resurfacing or reshaping roadways <p>The Town will also inquire with the property owner of 365 Lakeview Boulevard if they would be interested in the elevation or acquisition of their property.</p>		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all flood-prone road system		Not feasible
	Raise all flood prone roads		Cost prohibitive

Action 2025-MachiasT-07. Review and Revise Building Codes

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Council										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods or dam and levee failures can cause structures to buckle or come off its foundation due to the immense pressure.										
Description of the Solution:	The Town will review and revise building codes to integrate hazard mitigation principles to create a more resilient community. The Town will also use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document. Updated building codes will meet the minimum requirements set by the State.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	4 years										
Goals Met:	1, 4										
Benefits:	Mitigation considerations being taken when developing or updating building and zoning codes can lessen the risk of damage from a hazard event and increase overall community resiliency.										
Impact on Socially Vulnerable Populations:	Communities that collaborate and coordinate their regulatory efforts are more likely to have identified ways to best work with vulnerable populations to increase their level of preparedness.										
Impact on Future Development:	Updated building and zoning codes ensure that any new development that does take place is built to the safest standards based upon the best available data.										
Impact on Critical Facilities/Lifelines:	Integrating mitigation into building and zoning protects existing infrastructure and guides the safe development of new construction.										
Impact on Capabilities:	A consolidated review process brings together the capabilities of agencies and departments and better identifies what resources are available at any given point in time and where they are needed most.										
Climate Change Considerations:	As the climate changes, regulatory processes will require a more intense focus on maintenance and gathering of the best data to remain current and accurate over time. The Town will use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Do not reach minimum State standards</td> <td>Will be below standards</td> </tr> <tr> <td>Adopt building code without integrating hazard mitigation principles</td> <td>Will not increase Town's resiliency</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Do not reach minimum State standards	Will be below standards	Adopt building code without integrating hazard mitigation principles	Will not increase Town's resiliency		
Action	Evaluation										
No Action	Current problem exists										
Do not reach minimum State standards	Will be below standards										
Adopt building code without integrating hazard mitigation principles	Will not increase Town's resiliency										

Action 2025-MachiasT-08. Floodprone Roads

Lead Agency:	Engineering		
Supporting Agencies:	Code Enforcement, Highway Department		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding.		
Description of the Solution:	The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include: <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all flood-prone road system		Not feasible
	Raise all flood prone roads		Cost prohibitive

Action 2025-MachiasT-09. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources following disaster events</td> <td>Resources may not be available during major widespread events</td> </tr> <tr> <td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td> <td>A plan outlining responsibility is still necessary to prevent missing important requirements</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-MachiasT-10. Landslide Mitigation

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Landslides may be able to be mitigated by cutting banks to prevent erosion. The Town has many steep sloped areas throughout its jurisdiction and should determine local vulnerabilities to landslides threatening primary roadways and properties.										
Description of the Solution:	<p>The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk within primary roads throughout the Town. Possible mitigation measures include:</p> <ul style="list-style-type: none">• Construction of retaining walls, soil nailing, ground anchor walls• Install horizontal drains to reduce soil saturation• Cut banks along water ways to prevent oversaturated soils from falling• Install netting										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide along Town roads. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Action	Evaluation										
No Action	Current problem exists										
Reconstruct roadways outside of hazard area	Not feasible										
Close roads and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-MachiasT-11. Ischua Creek Watershed Dam #1 Rehab

Lead Agency:	County of Cattaraugus										
Supporting Agencies:	County Engineer, County OES, NYDEC, Municipal Engineer										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Ischua Creek Watershed Dam #1 is a Class I High Hazard Dam that is located on the Ischua Creek. The dam is owned by the County of Cattaraugus. Failure of the dam could result in inundation of residential properties, woodland areas, agricultural and rural lands, and transportation routes including Maple Avenue. Although the dam was last inspected in 2022, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.										
Description of the Solution:	The Municipal Engineer will work with the County of Cattaraugus to complete an engineering study of Ischua Creek Watershed Dam #1. The Town will also request information and input from its Highway department and the County regarding impacted roadways. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Town and the County of Cattaraugus will pursue funding support, permit approval from NYSDEC, and implement the cost-effective measures.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, HHPD										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3, 4, 6, 7										
Benefits:	This action will improve the safety and security of those who live within the dam inundation areas of the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness within the Special Flood Hazard Area and inundation areas where significant risk to socially vulnerable populations exists.										
Impact on Future Development:	Future development located in or near the dam inundation area will be further protected from a dam failure event.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event due to projected increases in precipitation. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Elevate nearby structures	High cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions
Action	Evaluation										
No Action	Current problem exists										
Decommission Dam	High cost, flood risk for nearby infrastructure, loss an environmental, flood control, and stormwater management resource.										
Elevate nearby structures	High cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions										

Action 2025-MachiasT-12. Bridge Evaluations

Lead Agency:	Highway Department		
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> • Machias 23 • Machias 28 		
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.		
Impact on Socially Vulnerable Populations:	Not applicable		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Remove bridges	May cause significant traffic problems	
	Replace bridges	Cost prohibitive	

29. TOWN OF MANSFIELD

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Mansfield with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Mansfield, describes who participated in the planning process, assesses Mansfield's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

29.1 HAZARD MITIGATION PLANNING TEAM

The Town of Mansfield identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 29-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 29-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Carl Calarco, Supervisor Address: 7691 Toad Hollow Road, Little Valley, NY 14755 Phone Number: (716) 244-8313 Email: ccalarco@nussclarke.com	Name/Title: Jeffrey Williams, Highway Superintendent Address: 7691 Toad Hollow Road, Little Valley, NY 14755 Phone Number: (716) 801-2454 Email: highwaywrc@gmail.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Jeffrey Holler, Code Enforcement Address: 7691 Toad Hollow Road, Little Valley, NY 14755 Phone Number: (716) 307-3069 Email: eastottoceo@gmail.com	

29.2 COMMUNITY PROFILE

The Town of Mansfield lies in the northcentral part of Cattaraugus County in western New York State. The town has a total area of 39.7 square miles. It is bordered on by the Town of Otto to the northwest, the Town of East Otto to the northeast, the Town of Ellicottville to the east, the Town and Village of Little Valley to the south, and the Town of New Albion to the west. There are three hamlets within the Town of Mansfield: Eddyville, Maples, and Orlando. Little Valley, Mansfield, Elk, Dublin, and Goodell are all creeks that flow through the town.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 4.2 percent of the

population is 5 years of age or younger, 15.1 percent is 65 years of age or older, 0 percent is non-English speaking, 4.3 percent is below the poverty threshold, and 9.5 percent is considered disabled.

29.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Mansfield performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Mansfield to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

29.3.1 Planning and Regulatory Capability and Integration

Table 29-2 summarizes the planning and regulatory tools that are available to Mansfield.

Table 29-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	2012	State and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk?				
Zoning/Land Use Code	Yes	Zoning Law, 2006	Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk?				
For the purposes of promoting the public health, safety, and welfare; conserving and protecting property and property values; securing the most appropriate use of land; lessening or avoiding congestion in the public streets and highways; securing safety from fire, flood, panic, and other dangers; providing adequate light and air; preventing the overcrowding of land and avoiding undue concentration of people; facilitating the practice of forestry; facilitating the adequate but economical provision of public improvements; and minimizing flood losses in areas subject to periodic inundation the Town Board of the Town of Mansfield finds it necessary and advisable to regulate the location, size, and use of				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
buildings and other structures and the use of land for trade, industry, residencies, recreation, or other purposes and for such purposes divides the unincorporated area of the Town into districts or zones.				
Subdivision Code	Yes	Subdivision Regulations, 1992	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? Empowers local authoritative body to approve plats showing lots, blocks or sites, with or without streets or highways, to approve the development of entirely or partially undeveloped plats already filed and to approve preliminary plats within jurisdictional boundaries. This ensures that all approved plats for land development fall within local rules and regulations for environmental preservation, building code standards and wildfire protection ordinances.				
Site Plan Code	Yes	Zoning Law, 2006; Article XIV, Section 14.4: Site Plan Review	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? The purpose of site plan approval is to determine compliance with the objectives of this article in zoning districts where inappropriate development may cause a conflict between uses in the same or adjoining zoning district by creating unhealthful and unsafe conditions and thereby adversely affect the public health, safety, and general welfare.				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Zoning Law, 2006; Article XI: Provisions for Flood Hazard Reduction	Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters.				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Emergency Management Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Climate Change Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
PLANNING DOCUMENTS				
General/Comprehensive Plan	Yes	Town of Mansfield Comprehensive Plan, 2021	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? This Comprehensive Plan will serve as a guide and framework for future development in the Town of Mansfield for the next decade. The overarching purpose of the Plan is to provide a rational basis for public policies and decision-making and to encourage orderly development and land use change that are in accordance with the stated goals and objectives, which have been developed as part of this planning process.				
Capital Improvement Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?

RESPONSE/RECOVERY PLANNING

Comprehensive Emergency Management Plan How has or will this be integrated with the HMP and how does this reduce risk? The CEMP defines the scope of preparedness and emergency management activities necessary in the County. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.	Yes	Comprehensive Emergency Management Plan (CEMP)	County	OES
--	-----	--	--------	-----

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Continuity of Operations Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Substantial Damage Response Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Threat and Hazard Identification and Risk Assessment	Yes	Threat & Hazard Identification & Risk Assessment (THIRA)	County	OES
How has or will this be integrated with the HMP and how does this reduce risk? The Threat and Hazard Identification and Risk Assessment (THIRA) is a three-step risk assessment process that helps the County understand its risks to natural, technological, and human-caused hazards and what must be done to address those risks.				
Post-Disaster Recovery Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Public Health Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

29.3.2 Development and Permitting Capability

Table 29-3 summarizes the capabilities of Mansfield to oversee and track development.

Table 29-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?	Yes	Code Enforcement
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 		
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?	Yes	2021 Comprehensive Plan
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		
Describe the level of buildout in your jurisdiction.	N/A	According to the 2021 Comprehensive Plan, 25.3 percent of all land in the Town is Vacant and may be eligible for future development.

29.3.3 Administrative and Technical Capability

Table 29-4 summarizes potential staff and personnel resources available to Mansfield and their current responsibilities that contribute to hazard mitigation.

Table 29-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	Yes	Town Supervisor
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Highway with County
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

29.3.4 Fiscal Capability

Table 29-5 summarizes financial resources available to Mansfield.

Table 29-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	No
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	No
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

29.3.5 Education and Outreach Capability

Table 29-6 summarizes the education and outreach resources available to Mansfield.

Table 29-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

29.3.6 Community Classifications

Table 29-7 summarizes classifications for community programs available to Mansfield.

Table 29-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	4	7/15/2019
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

29.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future

conditions, and changing risk. Table 29-8 summarizes the adaptive capacity for each identified hazard of concern and the Town's capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 29-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

29.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 29-1 is responsible for maintaining this information.

29.4.1 NFIP Statistics

Table 29-9 summarizes the NFIP policy and claim statistics for Mansfield.

Table 29-9. Mansfield NFIP Summary of Policy and Claim Statistics

# Policies	1
# Claims (Losses)	1
Total Loss Payments	\$261.69
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

29.4.2 Flood Vulnerability Summary

Table 29-10 provides a summary of the NFIP program in Mansfield.

Table 29-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Hollister Hill Road, Barse Road, California Hill Road, Christ Hart Road, Erdman Road (between address 7895 and 7939), East Roadman Hill Road, Hencoop Hollow Road, Jersey Hollow Road, Skinner Hollow Road, Tough Row Hill Road (between address 7779 and 7693 and from 7632 to the intersection of Hinman Hollow Road), Watson Road, and Hinman Hollow Road (near address 7040)
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Unknown
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS

NFIP Topic	Comments
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	If added development is assessed at over 50 percent of the structure's current assessment.
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: January 26, 2007 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Zoning Law, 2006; Article XI: Provisions for Flood Hazard Reduction
What is the date that your flood damage prevention ordinance was last amended?	September 18, 2006
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Yes, site plan review. Planning Board considers efforts to reduce flood risk.
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

29.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 29-11 through Table 29-13.

Table 29-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 29-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There has been no recent major development or infrastructure between 2019 to present.					
* Only location-specific hazard zones or vulnerabilities identified.					

Table 29-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There are no known or anticipated major development or infrastructure in the next five years.					

29.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Mansfield's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

29.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 29-1 through Figure 29-2. These maps are based on the best available data at the time of the preparation

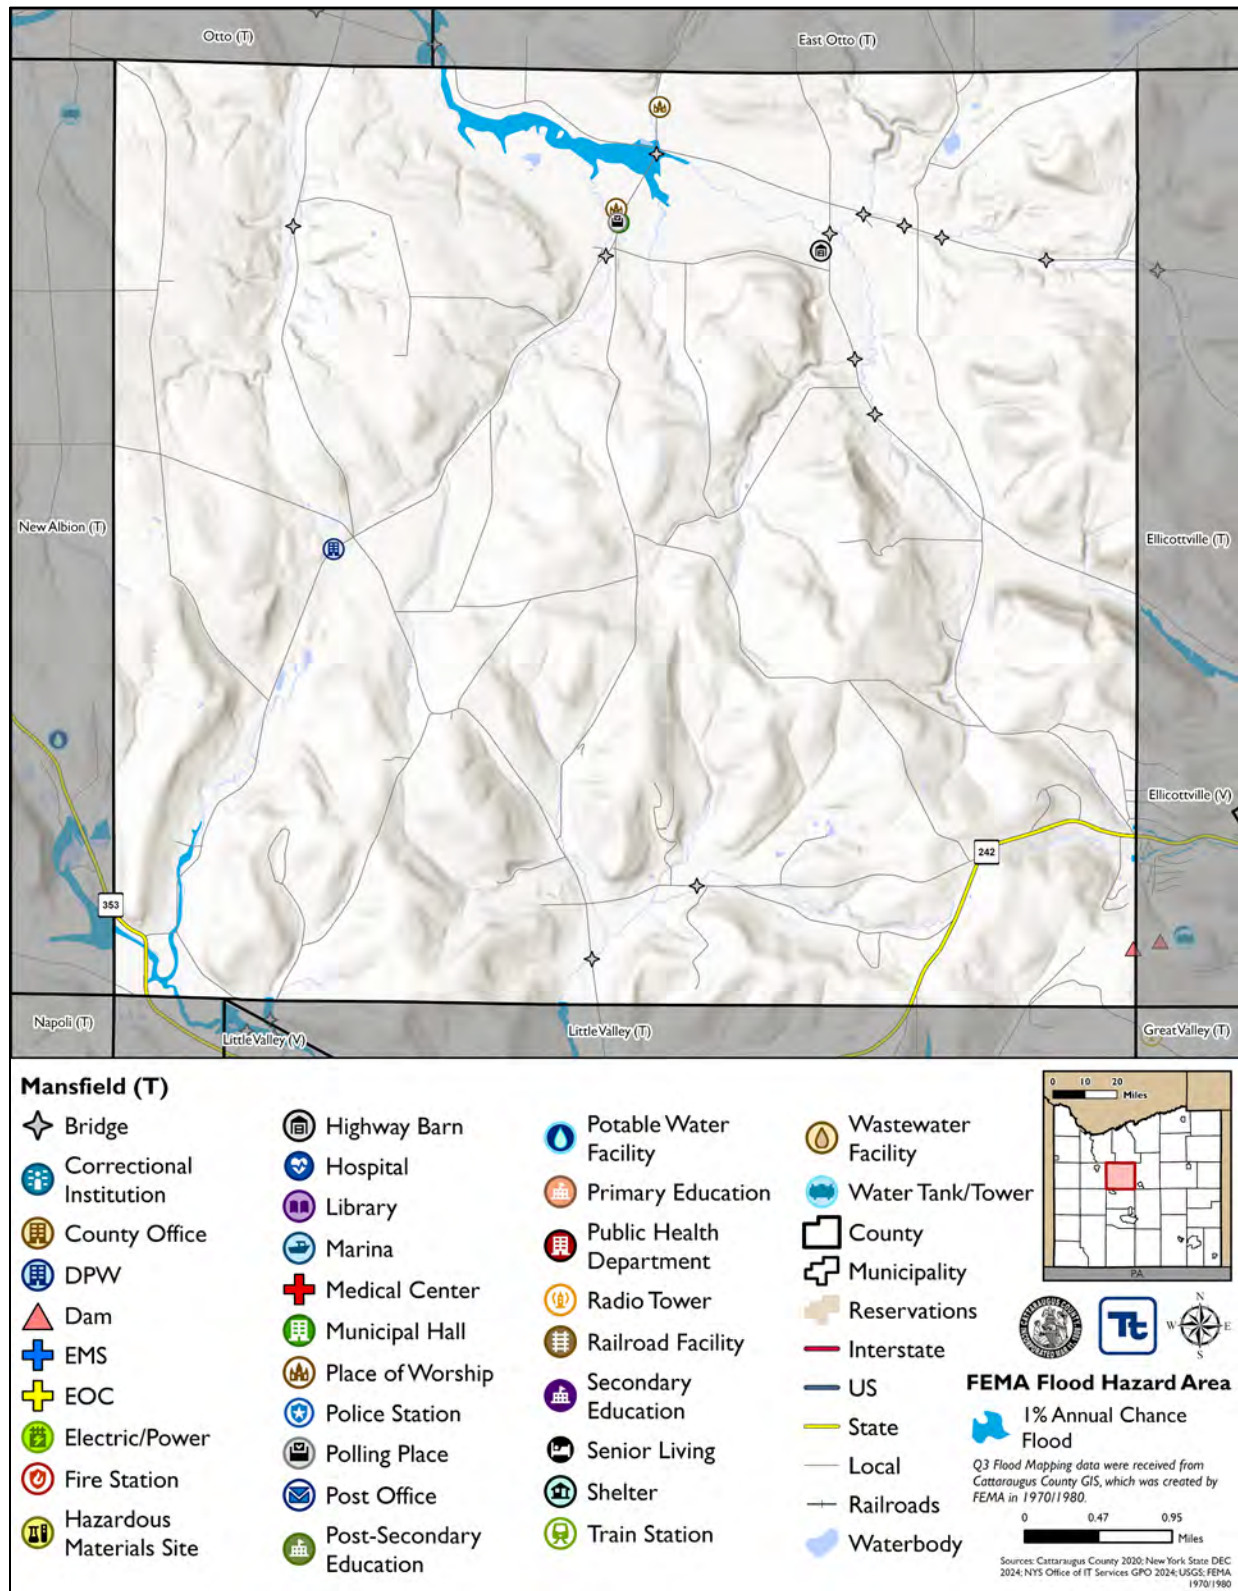

of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Mansfield has significant exposure. The maps show the location of potential new development, where available.

DRAFT

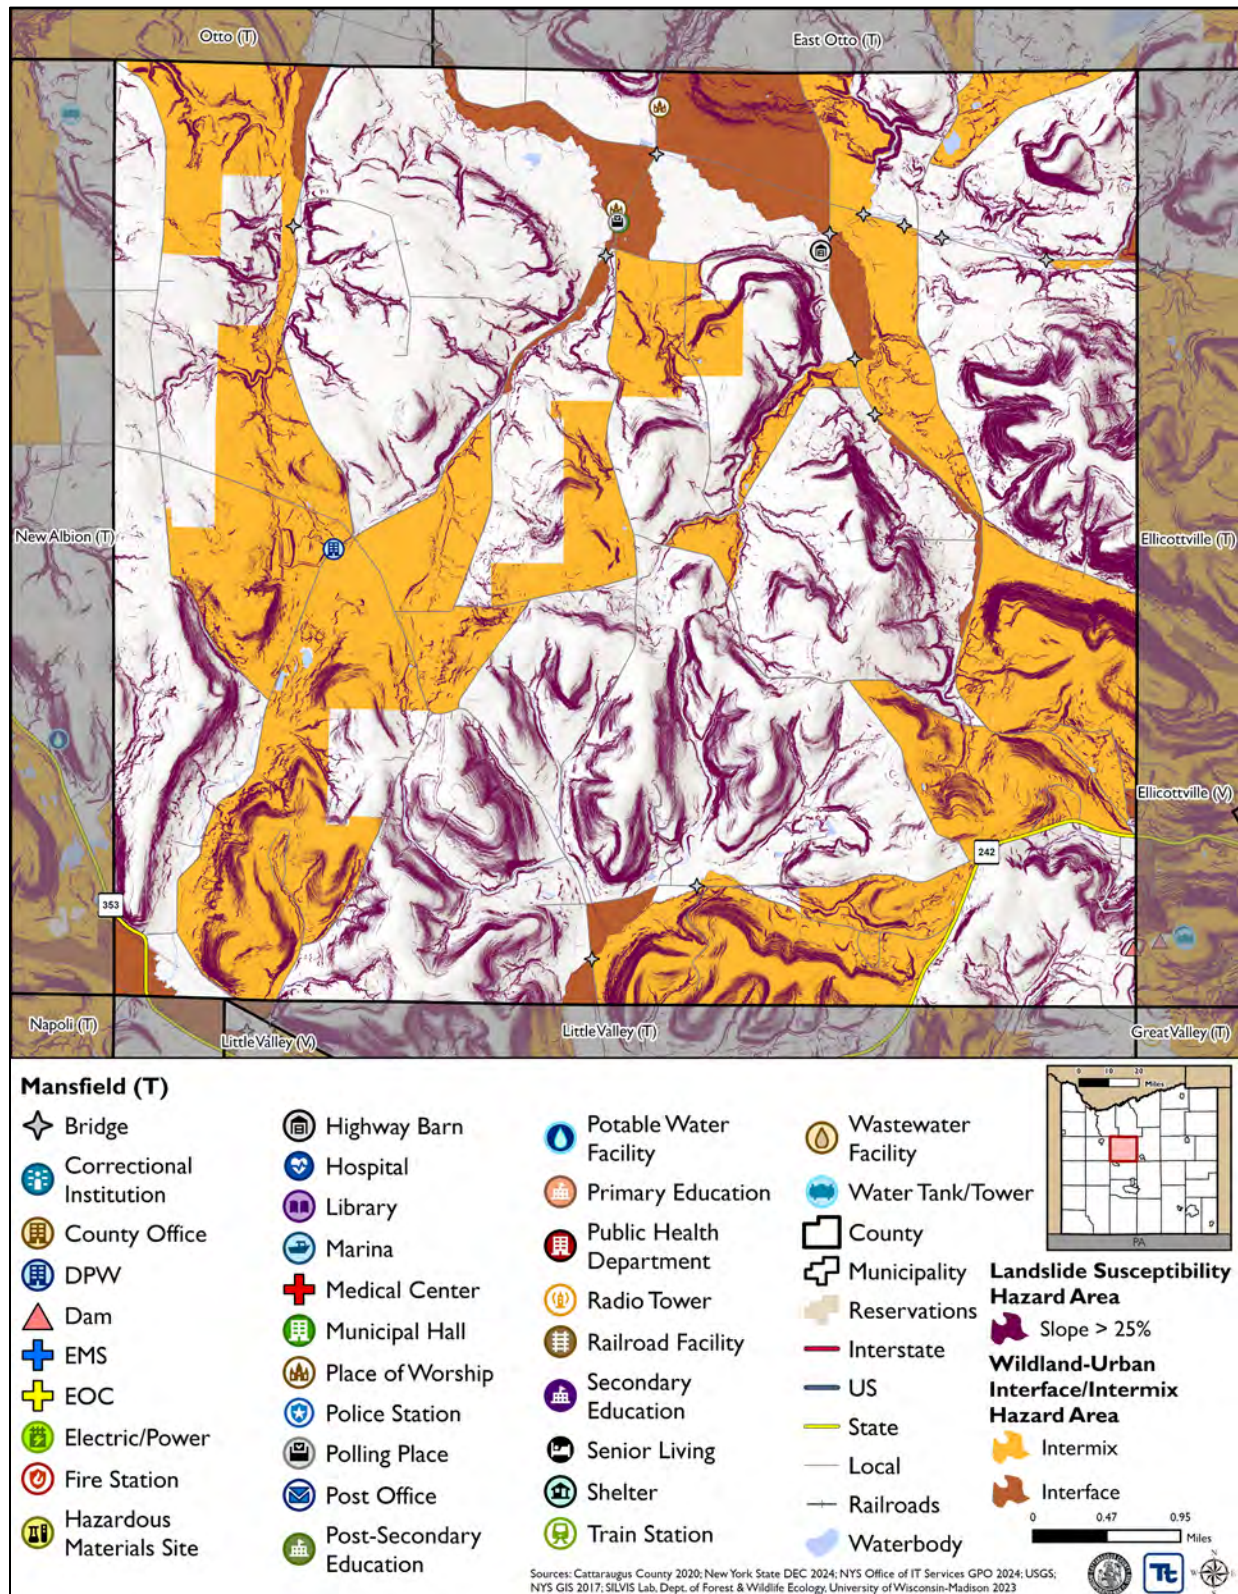

Figure 29-1. Mansfield Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 29-2. Mansfield Landslide and Wildfire Hazard Area Extent and Location Map

29.6.2 Hazard Event History

The history of natural and non-natural hazard events in Mansfield is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 29-14 provides details on loss and damage in Mansfield during hazard events since the last hazard mitigation plan update.

Table 29-14. Hazard Event History in Mansfield

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Mansfield
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	Trees and wires were reported down
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	PPE distribution, masking mandates, social distancing enforced
January 12, 2020	High Wind	N/A	High wind	No damages or losses
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	Trees and wires were reported down
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	Trees and wires were reported down
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	No damages or losses
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	No damages or losses
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	Trees and wires were reported down
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	Trees and wires were reported down
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	Trees and wires were reported down
March 6, 2022	High Wind	N/A	High wind	No damages or losses
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	Trees and wires were reported down
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	Highway response to clear roads

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

29.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Mansfield.

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Mansfield reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the following:

- The Dam and Levee Failure hazard should be re-ranked to 'High' from 'Medium' due to the high-hazard potential dam located in the Town.
- The Flood hazard should be re-ranked to 'High' from 'Medium' due to the persistent flooding which occurs in Town, both inside and outside of the FEMA defined flood hazard areas.

Table 29-15 shows Mansfield's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 29-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	High
Flood	High
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 29-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 29-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Mansfield 35	Bridge	X	-	2025-MansfieldT-11	-

Source: Cattaraugus County 2024

In addition to critical facilities that are exposed to flooding, the following high hazard dams are located in Mansfield:

- Holimont Upper Reservoir Dam

29.6.4 Identified Issues

After a review of Mansfield's hazard event history, hazard rankings, hazard location, and current capabilities, Mansfield identified the following vulnerabilities within the community:

- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Hollister Hill Road
 - Barse Road
 - California Hill Road
 - Christ Hart Road
 - Erdman Road (between address 7895 and 7939)
 - East Roadman Hill Road
 - Hencoop Hollow Road
 - Jersey Hollow Road
 - Skinner Hollow Road
 - Tough Row Hill Road (between address 7779 and 7693 and from 7632 to the intersection of Hinman Hollow Road)
 - Watson Road
 - Hinman Hollow Road (near address 7040)
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Cross Road
 - Crumb Hill Road
 - Erdman Hill Road
 - Hart Road
 - Hencoop Hollow Road
 - Hinman Hollow Road
 - Kent Road
 - Plato Road
 - Plum Creek Road
 - Sodem Road

- Tough Row Hill Road
- Watson Road
- Wilson Road
- Windsor Road
- Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. Riprap has shown to be a durable solution to prevent erosion in areas susceptible to wear and tear from flooding. Several roads in the Town would benefit from the placement of riprap in ditches to prevent future damage from flooding, including:
 - County Route 14
 - Crumb Hill Road
 - Eddy Road
 - Kahler Road
 - Kidney Road
 - Krager Road
 - Sodem Road
 - Wilson Road
 - Windsor Road
- Critical facilities require backup power to ensure continuity of operations. The Mansfield Volunteer Fire Company located in the Town do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town of Mansfield needs to identify locations for the placement of temporary housing and sheltering.
- The Town faces increasing flood risks due to more intense precipitation events. Incorporating best practices and the most up-to-date NFIP guidance will better protect the Town, its residents, and their properties from potential damage. However, some of the Town staff are not adequately trained to enforce NFIP regulations and/or floodplain management ordinances. Floodplain management and ordinance enforcement staff are not Certified Floodplain Managers.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Eddy Road in the Town is prone to landslides. Landslides may be able to be mitigated by cutting banks to prevent erosion.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.

- Holimont Upper Reservoir Dam is a Class I High Hazard Dam that is located on the Spruce Lake. The dam is owned by the Holimont, Inc. Failure of the dam could result in inundation of residential properties, woodland areas, agricultural and rural lands, and transportation routes including Multon Hollow Road. Although the dam was last inspected in 2023, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Mansfield 35

29.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

29.7.1 Past Mitigation Action Status

Table 29-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

29.7.2 Additional Mitigation Efforts

Mansfield did not identify any additional mitigation efforts completed since the last HMP.

Table 29-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Mansfield-001	Erdman Hill Road Culverts	Flood, Severe Storm	Engineer	<p>Problem: Erdman Hill Road has undersized culverts which are repeatedly damaged.</p> <p>Solution: Replace repetitively damaged/undersized culvert in Town of Mansfield on Erdman Hill Road.</p>	<p>1. No Progress</p> <p>2. Town unable to complete due to other priority projects.</p>	<p>1. Include</p> <p>2. Include in action with other roads which may need culvert improvements</p> <p>3. Not applicable</p>
2020-Mansfield-002	Mansfield Fire Company Backup Power	Utility Failure	Engineer, Fire Company	<p>Problem: Critical facilities require backup power to ensure continuity of operations. The Mansfield Volunteer Fire Company does not have automatic backup power.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Mansfield Fire Company. The town will then install a backup power generator and necessary electrical components.</p>	<p>1. No Progress</p> <p>2. Town unable to complete due to other priority projects.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Mansfield-003	Wildfire Outreach	Wildfire	Administration	<p>Problem: Additional public education on wildfire risk is needed.</p> <p>Solution: The town will conduct outreach to residents, business owners, and organizations about what they can do to protect their structures from wildfires.</p>	<p>1. No Progress</p> <p>2. Town unable to complete due to other priority projects.</p>	<p>1. Include</p> <p>2. Expand to include education for all hazards</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Mansfield-004	Identification of Temporary and Permanent Housing Locations	All Hazards	Administration	<p>Problem: The Town of Mansfield needs to identify locations for the placement of temporary housing and permanent housing.</p> <p>Solution: The Town of Mansfield will work with Cattaraugus County to identify regional locations for temporary and permanent housing.</p>	1. No Progress 2. Town unable to complete due to other priority projects.	1. Include 2. Not applicable 3. Not applicable
2020-Mansfield-005	FPA Training	Flood	Administration	<p>Problem: Floodplain administration staff require additional training.</p> <p>Solution: The Town FPA and staff who assist with floodplain administration will attend trainings and workshops offered by FEMA and NYS to develop additional floodplain administration skills.</p>	1. No Progress 2. Town unable to complete due to other priority projects.	1. Include 2. Not applicable 3. Not applicable
2020-Mansfield-006	Eddy Road	Landslide	Highway Department	<p>Problem: Eddy Road is prone to landslide and requires banks to be cut back.</p> <p>Solution: The town will cut banks back to reduce the chance of landslide.</p>	1. No Progress 2. Town unable to complete due to other priority projects.	1. Include 2. Not applicable 3. Not applicable

29.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Mansfield participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Mansfield would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 29-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 29-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 29-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X	X		X			X		X	X
Flood	X	X		X	X		X			X
Landslide	X			X	X		X			X
Pandemic				X			X			
Severe Storm	X	X		X	X		X		X	X
Severe Winter Storm	X	X		X	X		X		X	X
Utility Failure	X	X		X			X		X	X
Wildfire	X			X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 29-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-MansfieldT-01	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-MansfieldT-02	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-MansfieldT-03	Roadway Erosion	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-MansfieldT-04	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-MansfieldT-05	Comprehensive Outreach Program	1	1	1	1	1	1	0	1	1	1	1	1	0	1	12	High
2025-MansfieldT-06	Temporary Housing and Sheltering	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-MansfieldT-07	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-MansfieldT-08	Eddy Road Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-MansfieldT-09	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High
2025-MansfieldT-10	Holimont Upper Reservoir Dam Rehab	1	1	1	1	0	0	1	1	1	0	1	1	1	1	11	High
2025-MansfieldT-11	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-MansfieldT-01. Floodprone Roads

Lead Agency:	Highway Department	
Supporting Agencies:	Code Enforcement, Engineering	
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	<p>Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none">• Hollister Hill Road• Barse Road• California Hill Road• Christ Hart Road• Erdman Road (between address 7895 and 7939)• East Roadman Hill Road• Hencoop Hollow Road• Jersey Hollow Road• Skinner Hollow Road• Tough Row Hill Road (between address 7779 and 7693 and from 7632 to the intersection of Hinman Hollow Road)• Watson Road• Hinman Hollow Road (near address 7040)	
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none">• Elevation of roadways• Installation or improvement of drainage systems• Regrading of roadway and soils• Resurfacing or reshaping roadways	
Estimated Cost:	TBD after mitigation technique is chosen	
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS	
Implementation Timeline:	Within 5 years	
Goals Met:	1	
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.	
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.	
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.	
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.	
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.	
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.	
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	

CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)		<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all flood-prone road system		Not feasible
	Raise all flood prone roads		Cost prohibitive

DRAFT

Action 2025-MansfieldT-02. Undersized Culverts

Lead Agency:	Highway Superintendent	
Supporting Agencies:	Code Enforcement, Engineering	
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire
Description of the Problem:	<p>Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:</p> <ul style="list-style-type: none">• Cross Road• Crumb Hill Road• Erdman Hill Road• Hart Road• Hencoop Hollow Road• Hinman Hollow Road• Kent Road• Plato Road• Plum Creek Road• Sodem Road• Tough Row Hill Road• Watson Road• Wilson Road• Windsor Road	
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts located on Stateline Run Road and Little Bone Run Road that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.	
Estimated Cost:	TBD after study is complete	
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget	
Implementation Timeline:	Within 5 years	
Goals Met:	1, 4	
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.	
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.	
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.	
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.	
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.	
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.	
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Remove roadway	Roadway cannot be removed	
	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.	

DRAFT

Action 2025-MansfieldT-03. Roadway Erosion

Lead Agency:	Highway Department		
Supporting Agencies:	Code Enforcement, Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	<p>Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. Riprap has shown to be a durable solution to prevent erosion in areas susceptible to wear and tear from flooding. Several roads in the Town would benefit from the placement of riprap in ditches to prevent future damage from flooding, including:</p> <ul style="list-style-type: none">• County Route 14• Crumb Hill Road• Eddy Road• Kahler Road• Kidney Road• Krager Road• Sodem Road• Wilson Road• Windsor Road		
Description of the Solution:	The Town Engineer and Highway Department will assess the amount of riprap needed for each ditch along the identified roadways. Once identified, the riprap will be purchased by the Town and installed by the Highway Department.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along eroded and flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. This action will mitigate erosion along roadways and reduce likelihood of flooding impacts.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove ditches from roadways		Would likely increase flood risk
	Pave all roads with permeable surfaces		Cost prohibitive

Action 2025-MansfieldT-04. Generators at Critical Facilities

Lead Agency:	Engineering										
Supporting Agencies:	Town Board, Mansfield Volunteer Fire Company										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Mansfield Volunteer Fire Company located in the Town do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facilities. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for this critical facility and its operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of a critical facility that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>-</td></tr><tr><td>Microgrid</td><td>Costly and difficult to implement.</td></tr><tr><td>Solar panels and battery backup</td><td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td></tr></tbody></table>	Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement. Action	Evaluation										
No Action	-										
Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-MansfieldT-05. Comprehensive Outreach Program

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on hazard risks and methods of mitigation measures, including those for dam and levee failure, flood, landslide, pandemic, severe storm, severe winter storm, utility failure, and wildfire. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for each individual hazard of concern.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the current public education and outreach program in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the various hazards which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of potential hazards. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's already existing public education and outreach program and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from hazards and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources</td><td>Resources may be generalized and not specific to the risks in the Town</td></tr><tr><td>Use only a few methods for distribution</td><td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-MansfieldT-06. Temporary Housing and Sheltering

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County Office of Emergency Services, Neighboring Jurisdictions, American Red Cross										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town of Mansfield needs to identify locations for the placement of temporary housing and sheltering.										
Description of the Solution:	The Town Supervisor will lead efforts to identify a suitable location to temporarily relocate residents or visitors in need of temporary housing or sheltering. The Town will consider options to partner with neighboring jurisdictions for a regional location. The Town will contact the Cattaraugus County Office of Emergency Services for assistance as needed to identify a suitable, approved location.										
Estimated Cost:	Medium										
Potential Funding Sources:	Town Budget, County Budget, Neighboring Jurisdictions, American Red Cross, HSGP										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4, 6										
Benefits:	Providing a safe, climate-controlled location for individuals in need following an emergency can provide a sense of gratitude and normalcy to an otherwise negative event. Removing individuals from at-risk locations and offering a temporary locations for impacted persons to gather, increases the safety of the overall community.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations are often the most risk during emergencies and disaster events. Offering a safe location for these populations can ensure their health is looked after and they are removed from harm's way.										
Impact on Future Development:	The temporary housing or sheltering facility will be able to support population increases brought in from potential future development.										
Impact on Critical Facilities/Lifelines:	This action would create, or expand on already existing, critical facilities, as sheltering locations are critical facilities.										
Impact on Capabilities:	This action will create a new capability of the Town by offering a resource for its visitors and residents to utilize should they be in need of temporary housing or sheltering.										
Climate Change Considerations:	The changing climate may lead to the Town, its residents, and visitors being exposed to hazards more frequently. Extreme temperatures have occurred more often in recent years which lead to drought; heavier rainfalls during severe storms have increased the occurrence of flooding. A temporary housing and sheltering facility can provide a safe location for impacted individuals.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Utilize County facilities</td><td>May require signed agreements; reliant on County opening facilities</td></tr><tr><td>Utilize American Red Cross facilities</td><td>Reliant on American Red Cross opening a facility</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Utilize County facilities	May require signed agreements; reliant on County opening facilities	Utilize American Red Cross facilities	Reliant on American Red Cross opening a facility
Action	Evaluation										
No Action	Current problem exists										
Utilize County facilities	May require signed agreements; reliant on County opening facilities										
Utilize American Red Cross facilities	Reliant on American Red Cross opening a facility										

Action 2025-MansfieldT-07. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The Town faces increasing flood risks due to more intense precipitation events. Incorporating best practices and the most up-to-date NFIP guidance will better protect the Town, its residents, and their properties from potential damage. However, some of the Town staff are not adequately trained to enforce NFIP regulations and/or floodplain management ordinances. Floodplain management and ordinance enforcement staff are not Certified Floodplain Managers.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-MansfieldT-08. Eddy Road Landslide Mitigation

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Eddy Road in the Town is prone to landslides. Landslides may be able to be mitigated by cutting banks to prevent erosion.										
Description of the Solution:	The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk along Stream Valley Road. Possible mitigation measures include: <ul style="list-style-type: none">• Construction of retaining walls, soil nailing, ground anchor walls• Install horizontal drains to reduce soil saturation• Cut banks along water ways to prevent oversaturated soils from falling• Install netting										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide along Stream Valley Road. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Reconstruct roadway outside of hazard area</td><td>Not feasible</td></tr><tr><td>Close road and reroute traffic around hazard area</td><td>Not feasible, would cause confusion amongst travelers</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Reconstruct roadway outside of hazard area	Not feasible	Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers
Action	Evaluation										
No Action	Current problem exists										
Reconstruct roadway outside of hazard area	Not feasible										
Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-MansfieldT-09. Substantial Damage Management Plan

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources following disaster events</td> <td>Resources may not be available during major widespread events</td> </tr> <tr> <td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td> <td>A plan outlining responsibility is still necessary to prevent missing important requirements</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-MansfieldT-10. Holimont Upper Reservoir Dam Rehab

Lead Agency:	Holimont, Inc.										
Supporting Agencies:	County Engineer, County OES, NYDEC, Municipal Engineer										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Holimont Upper Reservoir Dam is a Class I High Hazard Dam that is located on the Spruce Lake. The dam is owned by the Holimont, Inc. Failure of the dam could result in inundation of residential properties, woodland areas, agricultural and rural lands, and transportation routes including Multon Hollow Road. Although the dam was last inspected in 2023, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.										
Description of the Solution:	The Municipal Engineer will work with the Holimont, Inc. to complete an engineering study of Holimont Upper Reservoir Dam. The Town will also request information and input from its Highway department and the County regarding impacted roadways. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Town and the Holimont, Inc. will pursue funding support, permit approval from NYSDEC, and implement the cost-effective measures.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, HHPD										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3, 4, 6, 7										
Benefits:	This action will improve the safety and security of those who live within the dam inundation areas of the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness within the Special Flood Hazard Area and inundation areas where significant risk to socially vulnerable populations exists.										
Impact on Future Development:	Future development located in or near the dam inundation area will be further protected from a dam failure event.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event due to projected increases in precipitation. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Decommission Dam</td><td>High cost, flood risk for nearby infrastructure increased, loss an environmental resource.</td></tr><tr><td>Elevate nearby structures</td><td>Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Decommission Dam	High cost, flood risk for nearby infrastructure increased, loss an environmental resource.	Elevate nearby structures	Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions
Action	Evaluation										
No Action	Current problem exists										
Decommission Dam	High cost, flood risk for nearby infrastructure increased, loss an environmental resource.										
Elevate nearby structures	Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions										

Action 2025-MansfieldT-11. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> Dayton 03 Dayton 08 Dayton 21 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove bridges</td> <td>May cause significant traffic problems</td> </tr> <tr> <td>Replace bridges</td> <td>Cost prohibitive</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove bridges	May cause significant traffic problems	Replace bridges	Cost prohibitive

Remove bridges	May cause significant traffic problems										
Replace bridges	Cost prohibitive										

30. TOWN OF NAPOLI

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Napoli with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Napoli, describes who participated in the planning process, assesses Napoli's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

30.1 HAZARD MITIGATION PLANNING TEAM

The Town of Napoli identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 30-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 30-1. Hazard Mitigation Planning Team

Additional Contributors	
Name/Title: Dale Blood, Former Highway Superintendent Method of Participation: Provided key information to assist in annex development.	

30.2 COMMUNITY PROFILE

The Town of Napoli is in the west of the center of Cattaraugus County and was formed in 1823 from part of the Town of Little Valley. The town is 36 square miles, and is bounded on the north by New Albion, on the east by Little Valley, on the south by Coldspring and the west by Conewango.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction

quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 10.8 percent of the population is 5 years of age or younger, 20.6 percent is 65 years of age or older, 0 percent is non-English speaking, 4.3 percent is below the poverty threshold, and 9.5 percent is considered disabled.

30.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Napoli performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Napoli to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

30.3.1 Planning and Regulatory Capability and Integration

Table 30-2 summarizes the planning and regulatory tools that are available to Napoli.

Table 30-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Zoning/Land Use Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Site Plan Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Flood Damage Prevention Ordinance	Yes	Local Law 1, 1999: Flood Damage Prevention	Federal, State, County and Local	Building Inspector
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Emergency Management Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Climate Change Ordinance	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Other	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
PLANNING DOCUMENTS				
General/Comprehensive Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Capital Improvement Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Disaster Debris Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Floodplain Management or Watershed Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Open Space Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Urban Water Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Habitat Conservation Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Economic Development Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Community Wildfire Protection Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Community Forest Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Transportation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Agriculture Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Action/ Resilience/Sustainability Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Tourism Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Business/ Downtown Development Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Continuity of Operations Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Substantial Damage Response Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Threat and Hazard Identification and Risk Assessment How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Post-Disaster Recovery Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Public Health Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Other	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?

30.3.2 Development and Permitting Capability

Table 30-3 summarizes the capabilities of Napoli to oversee and track development.

Table 30-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits? <ul style="list-style-type: none">If you issue development permits, what department is responsible?If you do not issue development permits, what is your process for tracking new development?	Yes	Building Inspector
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? <ul style="list-style-type: none">If you have a buildable land inventory, please describe	No	-
Describe the level of buildout in your jurisdiction.	N/A	There is land available for future development

30.3.3 Administrative and Technical Capability

Table 30-4 summarizes potential staff and personnel resources available to Napoli and their current responsibilities that contribute to hazard mitigation.

Table 30-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	No	-
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Construction/Building/Code Enforcement Department	Yes	Building Inspector works with permits and administers the NFIP.
Emergency Management/Public Safety Department	Yes	Town Supervisor
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	No	-
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

30.3.4 Fiscal Capability

Table 30-5 summarizes financial resources available to Napoli.

Table 30-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	No
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

30.3.5 Education and Outreach Capability

Table 30-6 summarizes the education and outreach resources available to Napoli.

Table 30-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

30.3.6 Community Classifications

Table 30-7 summarizes classifications for community programs available to Napoli.

Table 30-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

30.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 30-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 30-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

30.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 30-1 is responsible for maintaining this information.

30.4.1 NFIP Statistics

Table 30-9 summarizes the NFIP policy and claim statistics for Napoli.

Table 30-9. Napoli NFIP Summary of Policy and Claim Statistics

# Policies	1
# Claims (Losses)	2
Total Loss Payments	\$43,719.84
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

30.4.2 Flood Vulnerability Summary

Table 30-10 provides a summary of the NFIP program in Napoli.

Table 30-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas within the SFHA
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Unknown
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Physical inspections
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction?	None

NFIP Topic	Comments
If there are mitigation properties, how were the projects funded?	
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Building Inspector
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Building permit application or inspection
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: June 1, 1992 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law 1, 1999: Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	January 18, 1999
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	No
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

30.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 30-11 through Table 30-13.

Table 30-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2022				
Total Permits	2	0	0	2
Permits within SFHA	0	0	0	0
2023				
Total Permits	5	0	1	6
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 30-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 30-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any known or anticipated major development or infrastructure in the next five years.					

30.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Napoli's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

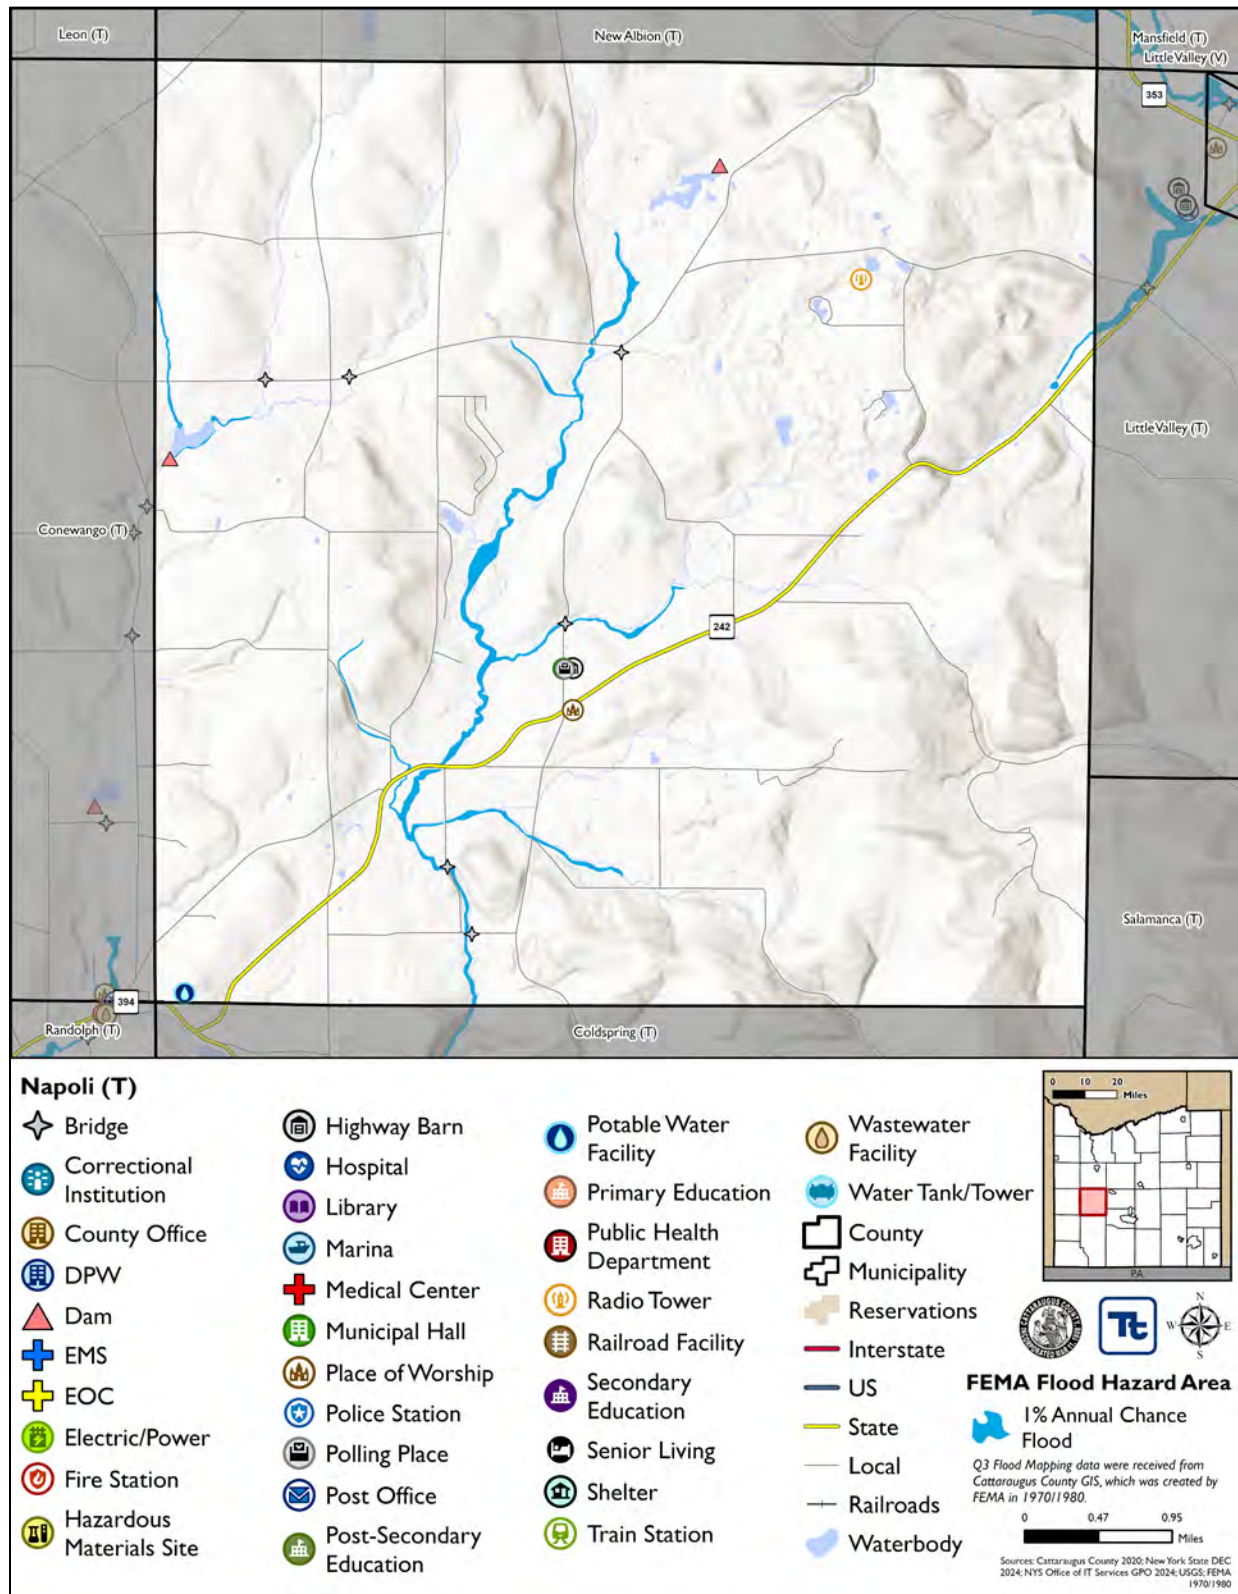

30.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 30-1 through Figure 30-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Napoli has significant exposure. The maps show the location of potential new development, where available.

DRAFT

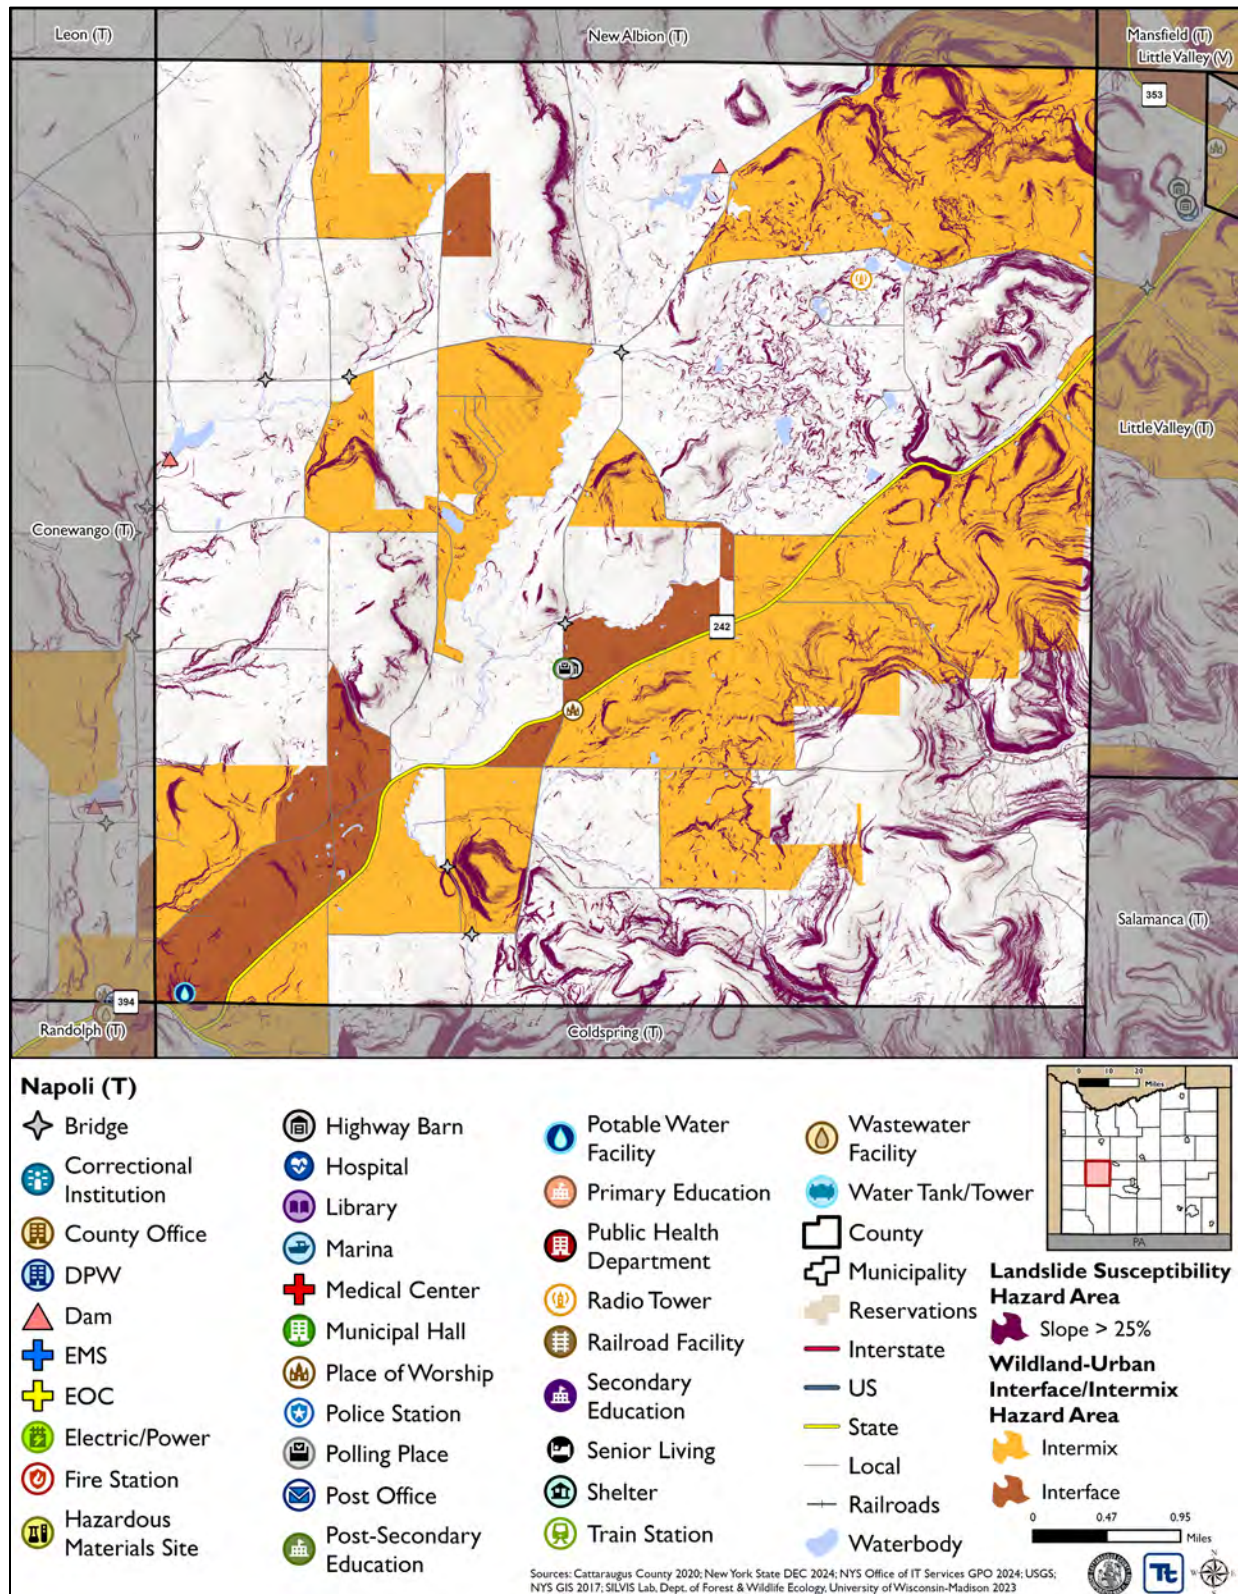

Figure 30-1. Napoli Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 30-2. Napoli Landslide and Wildfire Hazard Area Extent and Location Map

30.6.2 Hazard Event History

The history of natural and non-natural hazard events in Napoli is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 30-14 provides details on loss and damage in Napoli during hazard events since the last hazard mitigation plan update.

Table 30-14. Hazard Event History in Napoli

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Napoli
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town experienced downed lines.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town adhered to the COVID-19 guidelines, with individuals working from home or practicing social distancing.
January 12, 2020	High Wind	N/A	High wind	The Town did not incur any damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not incur any damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	Multiple trees and wires downed.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not incur any damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town experienced downed lines.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	Multiple trees and wires downed.
March 6, 2022	High Wind	N/A	High wind	The Town did not incur any damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any damages or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town experienced additional labor due to severe winter storms.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

30.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Napoli .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Napoli reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town agreed with the preliminary rankings.

Table 30-15 shows Napoli's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 30-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 30-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 30-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Napoli 09	Bridge	X	-	2025-NapoliT-14	-
Napoli 23	Bridge	X	-	2025-NapoliT-14	-

Source: Cattaraugus County 2024

In addition to critical facilities that are exposed to flooding, the following high hazard dam is located in Napoli:

- Conewango Creek Site 16 Dam

30.6.4 Identified Issues

After a review of Napoli's hazard event history, hazard rankings, hazard location, and current capabilities, Napoli identified the following vulnerabilities within the community:

- Conewango Creek Site 16 Dam is a Class I High Hazard Dam that is located on the Elm Creek. The dam is owned by the County of Cattaraugus. Failure of the dam could result in inundation of a residential property, woodland areas, agricultural and rural lands, and transportation routes including Elm Creek Road. Although the dam was last inspected in 2022, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.
- In addition to having one high-hazard potential dam, the Town has several low hazard dams within its jurisdiction. These structures have the potential to impact the people, property, infrastructure, and environment nearby.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. The culvert on Martin Road is undersized or may have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters.
- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- Critical facilities require backup power to ensure continuity of operations. The Highway Department Facility does not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water

levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.

- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering.
- Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods or dam and levee failures can cause structures to buckle or come off its foundation due to the immense pressure.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.
- FIRMs are outdated and may not accurately display flood risk. Inaccurate flood maps can misinform the public of actual flood risk and may prevent interested homeowners from receiving or applying for flood insurance. Correctly displaying the areas at risk to the flood hazard is not only critical to visually show the risk, but to support grant applications for funding to mitigate the flood risk at identified locations within or around the floodplain.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Napoli 09
 - Napoli 23

30.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

30.7.1 Past Mitigation Action Status

Table 30-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

30.7.2 Additional Mitigation Efforts

Napoli did not identify any additional mitigation efforts completed since the last HMP.

Table 30-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Napoli-001	Implement/Encourage training for Code Enforcement Officers.	Flood	County DPW	<p>Problem: Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.</p> <p>Solution: Obtain/host specialist training and certification for floodplain managers.</p>	<p>1. No Progress</p> <p>2. Limited training opportunities</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Napoli-002	Update the Flood Damage Prevention Ordinance to include freeboard	Flood	Town Board	<p>Problem: The Flood Damage Prevention Ordinance does not include the 2' freeboard requirement mandated by NYS.</p> <p>Solution: The Flood Damage Prevention Ordinance will be updated to include the 2' freeboard requirement mandated by NYS.</p>	<p>1. No Progress</p> <p>2. Town prioritized other projects</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Napoli-003	Continuous Public Education	Wildfire	County Planning, Town Board	<p>Problem: Public needs to be educated on what they can do to protect their structures from wildfires.</p> <p>Solution: Provide information to residents, business owners, and organizations about what they can</p>	<p>1. No Progress</p> <p>2. Funding for material development and distribution</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				do to protect their structures from wildfires. This will be done via pamphlets and website resources and include such information as: the dissemination of American Red Cross evacuation centers, supplies to have on hand, listing of emergency telephone numbers.		
2020-Napoli-004	Stream stabilization on Narrows Road	Flood	Town	<p>Problem: Banks eroding along creek along Narrows Road. Causes hazard to travelers.</p> <p>Solution: After completing feasibility study, stabilize banks using appropriate methods.</p>	<p>1. Complete</p> <p>2. Cattaraugus County Soil and Water resolved issue.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Cattaraugus County Soil and Water resolved issue.</p>
2020-Napoli-005	Update municipal Emergency Operation Plan	All	Town Board, County OES	<p>Problem: The town's Emergency Operations Plan may be out of date</p> <p>Solution: Determine relevance of current EOP and update as needed.</p>	<p>1. No Progress</p> <p>2. Town prioritized other projects</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Napoli-006	Update Building Code to current standards	All	Town Board	<p>Problem: Building Code may not be up to date to current standards. Substandard construction could occur.</p> <p>Solution: Ensure Building Code is up to date. Ensure standard quality construction will be built.</p>	<p>1. No Progress</p> <p>2. Town prioritized other projects</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Napoli-007	Install backup generator at Town Highway Department	Utility Failure	Engineer, Highway Department	Problem: The Highway Department lacks backup power to keep this critical facility open during an emergency or when power fails.	<p>1. No Progress</p> <p>2. Funding obstacles</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: After engineering study, Install backup generator at Waverly Street pumps, minimum 75 kw.		
2020-Napoli-008	Identify locations for permanent and temporary housing	All	Town Board	<p>Problem: The town has not identified locations for temporary or permanent housing in the event of a disaster.</p> <p>Solution: Town staff will analyze properties and other attributes to identify likely potential sites for temporary and permanent housing. Confer with County Emergency Management.</p>	1. No Progress 2. Funding obstacles. Conversations have been made; however, other projects have taken precedent.	1. Include 2. Change to temporary sheltering and warming/cooling centers. 3. Not applicable
2020-Napoli-009	Work with FEMA to update floodplain maps	Flood	Town Code Enforcement and Town Board	<p>Problem: Town staff note that FEMA floodplain maps may be out of date.</p> <p>Solution: The Town should reach out to FEMA and request an updated set of floodplain maps for the town.</p>	1. In Progress 2. FEMA has been working to update maps. Town will review and adopt once completed.	1. Include 2. Not applicable 3. Not applicable

30.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Napoli participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Napoli would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 30-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 30-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 30-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					X
Flood	X	X		X	X		X		X	X
Landslide	X				X					X
Pandemic	X			X			X			X
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X	X							X	X
Wildfire	X			X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities.

Table 30-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-NapoliT-01	Conewango Creek Site 16 Dam Rehab	1	1	1	1	0	0	1	1	1	0	1	1	1	1	11	High
2025-NapoliT-02	Dam Owner Partnership	1	1	1	1	1	1	0	1	1	0	1	1	1	0	11	High
2025-NapoliT-03	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-NapoliT-04	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-NapoliT-05	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-NapoliT-06	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-NapoliT-07	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-NapoliT-08	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-NapoliT-09	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-NapoliT-10	Temporary Sheltering	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-NapoliT-11	Review and Revise Building Codes	1	1	1	1	1	1	0	0	1	1	1	1	0	0	10	Medium
2025-NapoliT-12	Landslide Prone Roads Inventory	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-NapoliT-13	Outdated FIRMs	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-NapoliT-14	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-NapoliT-01. Conewango Creek Site 16 Dam Rehab

Lead Agency:	County of Cattaraugus										
Supporting Agencies:	County Engineer, County OES, NYDEC, Municipal Engineer										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Conewango Creek Site 16 Dam is a Class I High Hazard Dam that is located on the Elm Creek. The dam is owned by the County of Cattaraugus. Failure of the dam could result in inundation of a residential property, woodland areas, agricultural and rural lands, and transportation routes including Elm Creek Road. Although the dam was last inspected in 2022, the risk of dam failure warrants an engineering evaluation to determine if retrofits of the dam would result in safer conditions.										
Description of the Solution:	The Municipal Engineer will work with the County of Cattaraugus to complete an engineering study of Conewango Creek Site 16 Dam. The Town will also request information and input from its Highway department and the County regarding impacted roadways. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Town and the County of Cattaraugus will pursue funding support, permit approval from NYSDEC, and implement the cost-effective measures.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA BRIC, HHPD										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3, 4, 6, 7										
Benefits:	This action will improve the safety and security of those who live within the dam inundation areas of the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness within the Special Flood Hazard Area and inundation areas where significant risk to socially vulnerable populations exists.										
Impact on Future Development:	Future development located in or near the dam inundation area will be further protected from a dam failure event.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event due to projected increases in precipitation. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Decommission Dam</td><td>High cost, flood risk for nearby infrastructure increased, loss an environmental, flood control, and stormwater management resource.</td></tr><tr><td>Elevate nearby structures</td><td>Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Decommission Dam	High cost, flood risk for nearby infrastructure increased, loss an environmental, flood control, and stormwater management resource.	Elevate nearby structures	Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions
Action	Evaluation										
No Action	Current problem exists										
Decommission Dam	High cost, flood risk for nearby infrastructure increased, loss an environmental, flood control, and stormwater management resource.										
Elevate nearby structures	Very high cost and likely not feasible for commercial properties. Will not reduce potential for dam failure due to poor dam conditions										

Action 2025-NapoliT-02. Dam Owner Partnership

Lead Agency:	Town Board		
Supporting Agencies:	NYS DEC, Dam Owners		
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The Town has dams within its jurisdiction. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.		
Description of the Solution:	The Town will work with the owners of the dams to ensure inspections and safety procedures are up to date. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Dam Owner will pursue funding support, permit approval from NYS DEC, and implement the cost-effective measures.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2, 3		
Benefits:	This action will improve the safety and security of those who live near the dams and increase the resilience of responding agencies.		
Impact on Socially Vulnerable Populations:	The action will result in better preparedness for those living near areas where the dams are located.		
Impact on Future Development:	Future development near the dams will be more secure as safety procedures and inspections are regularly performed on the dams.		
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.		
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.		
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event. This action will increase the capabilities to respond to these events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Town will be unaware of any safety concerns for the dam or its condition
	Utilize information from NYS DEC		Owners may not be required to submit a safety plan to the State
	Utilize information from the National Inventory of Dams		Not all dams are listed on the inventory

Action 2025-NapoliT-03. Floodplain Management Training

Lead Agency:	Building Inspector		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-NapoliT-04. Flood Damage Prevention Ordinance Update

Lead Agency:	Building Inspector		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-NapoliT-05. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-NapoliT-06. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-NapoliT-07. Undersized Culverts

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. The culvert on Martin Road is undersized or may have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters.										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts in Town that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove roadway</td> <td>Roadway cannot be removed</td> </tr> <tr> <td>Raingardens</td> <td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.		
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-NapoliT-08. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reducing the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Integrate hazard mitigation principles in only hazard appendices</td> <td>The plan will miss integration opportunities in the basic plan and annexes</td> </tr> <tr> <td>Ask County to integrate hazard mitigation into the County CEMP</td> <td>Town CEMP will remain undeveloped</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Current problem exists	Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes	Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped	
Action	Evaluation										
No Action	Current problem exists										
Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-NapoliT-09. Generators at Critical Facilities

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department, Town Board										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Highway Department Facility does not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at the critical facility. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for the critical facilities and their operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of critical facilities that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>-</td></tr><tr><td>Microgrid</td><td>Costly and difficult to implement.</td></tr><tr><td>Solar panels and battery backup</td><td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td></tr></tbody></table>	Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement.	Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.		
Action	Evaluation										
No Action	-										
Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-NapoliT-10. Temporary Sheltering

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County Office of Emergency Services, Neighboring Jurisdictions, American Red Cross										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering. The Town will investigate the use of the school, highway garage, and local churches as potential locations.										
Description of the Solution:	The Town Supervisor will lead efforts to identify a suitable location to temporarily relocate residents or visitors in need of temporary sheltering. The Town will consider options to partner with neighboring jurisdictions for a regional location. The Town will contact the Cattaraugus County Office of Emergency Services for assistance as needed to identify a suitable, approved location.										
Estimated Cost:	Medium										
Potential Funding Sources:	Town Budget, County Budget, Neighboring Jurisdictions, American Red Cross, HSGP										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4, 6										
Benefits:	Providing a safe, climate-controlled location for individuals in need following an emergency can provide a sense of gratitude and normalcy to an otherwise negative event. Removing individuals from at-risk locations and offering temporary locations for impacted persons to gather, increases the safety of the overall community.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations are often the most risk during emergencies and disaster events. Offering a safe location for these populations can ensure their health is looked after and they are removed from harm's way.										
Impact on Future Development:	The temporary sheltering facility will be able to support population increases brought in from potential future development.										
Impact on Critical Facilities/Lifelines:	This action would create, or expand on already existing, critical facilities, as sheltering locations are critical facilities.										
Impact on Capabilities:	This action will create a new capability of the Town by offering a resource for its visitors and residents to utilize should they be in need of temporary sheltering.										
Climate Change Considerations:	The changing climate may lead to the Town, its residents, and visitors being exposed to hazards more frequently. Extreme temperatures have occurred more often in recent years which lead to drought; heavier rainfalls during severe storms have increased the occurrence of flooding. A temporary sheltering facility can provide a safe location for impacted individuals.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)

Utilize American Red Cross facilities	Reliant on American Red Cross opening a facility										

Action 2025-NapoliT-11. Review and Revise Building Codes

Lead Agency:	Building Inspector										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods or dam and levee failures can cause structures to buckle or come off its foundation due to the immense pressure.										
Description of the Solution:	The Town will review and revise building codes to integrate hazard mitigation principles to create a more resilient community. The Town will also use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document. Updated building codes will meet the minimum requirements set by the State.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	4 years										
Goals Met:	1, 4										
Benefits:	Mitigation considerations being taken when developing or updating building and zoning codes can lessen the risk of damage from a hazard event and increase overall community resiliency.										
Impact on Socially Vulnerable Populations:	Communities that collaborate and coordinate their regulatory efforts are more likely to have identified ways to best work with vulnerable populations to increase their level of preparedness.										
Impact on Future Development:	Updated building and zoning codes ensure that any new development that does take place is built to the safest standards based upon the best available data.										
Impact on Critical Facilities/Lifelines:	Integrating mitigation into building and zoning protects existing infrastructure and guides the safe development of new construction.										
Impact on Capabilities:	A consolidated review process brings together the capabilities of agencies and departments and better identifies what resources are available at any given point in time and where they are needed most.										
Climate Change Considerations:	As the climate changes, regulatory processes will require a more intense focus on maintenance and gathering of the best data to remain current and accurate over time. The Town will use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Do not reach minimum State standards</td><td>Will be below standards</td></tr><tr><td>Adopt building code without integrating hazard mitigation principles</td><td>Will not increase Town's resiliency</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Do not reach minimum State standards	Will be below standards	Adopt building code without integrating hazard mitigation principles	Will not increase Town's resiliency		
Action	Evaluation										
No Action	Current problem exists										
Do not reach minimum State standards	Will be below standards										
Adopt building code without integrating hazard mitigation principles	Will not increase Town's resiliency										

Action 2025-NapoliT-12. Landslide Prone Roads Inventory

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides.										
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, The Engineer will work with the Highway Department to prioritize roadways and identify possible mitigation measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	3 years										
Goals Met:	1, 4, 6										
Benefits:	This action will identify locations with steep grades (above 20 percent) and provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.										
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.										
Impact on Future Development:	The identification of at-risk roads may lead to restrictions for future development.										
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action may improve the Town's regulatory capabilities.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Do not use inventory to inform a steep slope ordinance</td> <td>Would not restrict future development, could increase at risk properties and structures</td> </tr> <tr> <td>Do not use inventory to inform future projects</td> <td>Risk would not be reduced</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Do not use inventory to inform a steep slope ordinance	Would not restrict future development, could increase at risk properties and structures	Do not use inventory to inform future projects	Risk would not be reduced
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Do not use inventory to inform a steep slope ordinance	Would not restrict future development, could increase at risk properties and structures										
Do not use inventory to inform future projects	Risk would not be reduced										

Action 2025-NapoliT-13. Outdated FIRMs

Lead Agency:	Floodplain Administrator										
Supporting Agencies:	Town Board, Cattaraugus County, NYSDEC, NYSDHSES, FEMA										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	FIRMs are outdated and may not accurately display flood risk. Inaccurate flood maps can misinform the public of actual flood risk and may prevent interested homeowners from receiving or applying for flood insurance. Correctly displaying the areas at risk to the flood hazard is not only critical to visually show the risk, but to support grant applications for funding to mitigate the flood risk at identified locations within or around the floodplain.										
Description of the Solution:	The Town will actively participate in the remapping process. This participation will include providing data and information to support map revisions, identifying areas of flooding concern, providing review of preliminary maps, and adopting updated flood damage prevention local laws when the FIRMs are finalized.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, State Budget, County Budget, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4										
Benefits:	Updating FIRMs will provide a more complete picture of the floodplain and the overall flood hazard in Cattaraugus County. This will inform other sectors of the community, including land use, development, permitting, and codes and standards.										
Impact on Socially Vulnerable Populations:	An analysis of the floodplain will inform future community development and land use and prevent vulnerable populations from residing in areas of heightened flood risk.										
Impact on Future Development:	Updated FIRMs will decide which populations and structures will require flood insurance to be built in areas of flood hazard.										
Impact on Critical Facilities/Lifelines:	Creation of updated floodplain maps will inform efforts to increase the resilience of critical infrastructure that is present in those areas, including transportation routes, water treatment plants, and other utility services. This will also aid in preventing future development of infrastructure in these areas.										
Impact on Capabilities:	An understanding of the floodplain will allow for the development of processes, plans, training and staff placement to address flooding issues in the areas of greatest concern before they occur.										
Climate Change Considerations:	The maps that are developed as a result of this action may not remain current or valid for the length of time that they may have in the past due to changes in floodplains and increases in extreme rainfall events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Town creates its own flood maps</td><td>Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications</td></tr><tr><td>FEMA updates maps without Town input</td><td>Required changes for areas of flooding may not be incorporated</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Town creates its own flood maps	Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications	FEMA updates maps without Town input	Required changes for areas of flooding may not be incorporated

No Action	Current problem exists										
Town creates its own flood maps	Time consuming, cost prohibitive, may not be recognized as official documentation in grant applications										
FEMA updates maps without Town input	Required changes for areas of flooding may not be incorporated										

Action 2025-NapoliT-14. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> • Napoli 09 • Napoli 23 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.

31. TOWN OF NEW ALBION

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of New Albion with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of New Albion, describes who participated in the planning process, assesses New Albion's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

31.1 HAZARD MITIGATION PLANNING TEAM

The Town of New Albion identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Town Supervisor represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 31-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 31-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Patrick Murphy, Supervisor Address: 7151 Route 353, PO Box 265, Cattaraugus, NY 14719 Phone Number: (716) 257-5677 Email: patrick.murphy2@sysco.com	Name/Title: George Borrowdale, Highway Superintendent Address: 7151 Route 353, PO Box 265, Cattaraugus, NY 14719 Phone Number: (716) 307-7829 Email: newalbionhighway@gmail.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Frank Watson, Code Enforcement Address: 7151 Route 353, PO Box 265, Cattaraugus, NY 14719 Phone Number: (716) 410-0349 Email: newalbionclerk@hotmail.com	
Additional Contributors	
Name/Title: Sherry Rupp, Town Clerk Method of Participation: Provided key input in the planning process by completing worksheets.	

31.2 COMMUNITY PROFILE

The Town of New Albion has a total land area of 36.32 square miles and is located just northwest of the center of Cattaraugus County and is surrounded by (clockwise): the Town of Persia, Town of Otto, Town of Mansfield, Town of Little Valley, Town of Napoli, Town of Conewango, Town of Leon and Town of Dayton. Conewango Creek, a tributary of the Allegheny River, and the south branch of the Cattaraugus Creek, part of the St. Lawrence River watershed flow through the town.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 6.3 percent of the population is 5 years of age or younger, 15.7 percent is 65 years of age or older, 3 percent is non-English speaking, 10.6 percent is below the poverty threshold, and 8.7 percent is considered disabled.

31.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

New Albion performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for New Albion to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

31.3.1 Planning and Regulatory Capability and Integration

Table 31-2 summarizes the planning and regulatory tools that are available to New Albion.

Table 31-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 1, 2024: Uniform Fire Prevention and Building Code	State and Local	Code Enforcement

How has or will this be integrated with the HMP and how does this reduce risk?

This local law provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this Town. This local law is adopted pursuant to section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, the Energy Code other state law, or other section of this local law, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this local law

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Zoning/Land Use Code	Yes	Zoning Law, 2002	State and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? The purpose of this article is to ensure that any new development, substantial redevelopment, or change in use in the Town of New Albion is in harmony with the character of the town. Another purpose is to minimize conflicts between future development and neighboring existing uses and natural features of the site; this will minimize any potential adverse effects to the health, safety, and general welfare of the residents of the Town of New Albion.				
Subdivision Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Site Plan Code	Yes	Zoning Law, 2002; Article 10: Site Plan Review	Local and County	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk?				
Stormwater Management Code	Yes	Zoning Law, 2002; Article 9, Section 9.15: Stormwater Management and Erosion Control	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? The intent and purpose of this section is to protect, maintain and enhance both the immediate and the long-term health, safety and welfare of the residents of the Town of New Albion. In order to achieve these goals, this section has the following objectives: (1) to prevent increases in the magnitude and frequency of stormwater runoff, so as to prevent an increase in flood flows and in the hazards and costs associated with flooding; (2) to maintain the integrity of stream geometry so as to sustain the hydrologic functions of streams; and (3) to control erosion and sedimentation so as to prevent its deposition in streams and other receiving bodies.				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	Yes	Zoning Law, 2002; Article 9, Section 9.19: Hillside Development Standards	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? These regulations are intended to further implement and define the goals and objectives of the Comprehensive Plan, to minimize the adverse effects of excessive grading, and to promote the health, safety and welfare of residents of the Town of New Albion, while allowing for the reasonable development of land, as expressed through the following purposes: (1) promote the safety of the design of developments				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
--	---------------------------------------	--	---	---

- (2) minimize soil instability, erosion and downstream siltation
 (3) provide for safe vehicular and pedestrian circulation
 (4) preserve the scenic and rural character of the Town of New Albion
 (5) limit the extent of grading and encourage sensitive development in the hillside areas through flexible design

Flood Damage Prevention Ordinance	Yes	Local Law #1, 1987 – Flood Damage Prevention	Federal, State, County and Local	Code Enforcement
--	-----	--	----------------------------------	------------------

How has or will this be integrated with the HMP and how does this reduce risk?

Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas.

- A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities.
 B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.
 C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters.
 D. Control filling, grading, dredging and other development which may increase erosion or flood damages.
 E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands.
 F. Qualify for and maintain participation in the National Flood Insurance Program.

31.3.2 Development and Permitting Capability

Table 31-3 summarizes the capabilities of New Albion to oversee and track development.

Table 31-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory?	No	-
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		

	Yes/No	Comment
Describe the level of buildout in your jurisdiction.	N/A	There is land available which may be developed in the future.

31.3.3 Administrative and Technical Capability

Table 31-4 summarizes potential staff and personnel resources available to New Albion and their current responsibilities that contribute to hazard mitigation.

Table 31-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	Non-regulatory
Zoning Board of Adjustment	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	No	-
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	Code Enforcement Officer
Planners or engineers with an understanding of natural hazards	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	Yes	Code Enforcement Officer
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

31.3.4 Fiscal Capability

Table 31-5 summarizes financial resources available to New Albion.

Table 31-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

31.3.5 Education and Outreach Capability

Table 31-6 summarizes the education and outreach resources available to New Albion.

Table 31-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

31.3.6 Community Classifications

Table 31-7 summarizes classifications for community programs available to New Albion.

Table 31-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

31.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 31-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.

- Weak: Capacity does not exist or could use substantial improvement

Table 31-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

31.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 31-1 is responsible for maintaining this information.

31.4.1 NFIP Statistics

Table 31-9 summarizes the NFIP policy and claim statistics for New Albion.

Table 31-9. New Albion NFIP Summary of Policy and Claim Statistics

# Policies	2
# Claims (Losses)	3
Total Loss Payments	\$13,989.24
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

31.4.2 Flood Vulnerability Summary

Table 31-10 provides a summary of the NFIP program in New Albion.

Table 31-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Skinner Hollow, Maple Hill, Mosher Hollow
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	The Town is unaware of any
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Code enforcement regulations and insurance standard adjustments
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	Four additional properties on Lovers Land Road through FEMA
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	No, due to flood maps needing updating
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	Yes
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	Yes, general training and assistance
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	GIS, Permits, Inspections and Engineering Capabilities
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Building permit application or code enforcement regulations
What are the barriers to running an effective NFIP program in the community, if any?	Lack of funding and training
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No

NFIP Topic	Comments
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: March 15, 2013 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1987 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	June 15, 1987
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Code enforcement
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

31.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 31-11 through Table 31-13.

Table 31-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	2	0	11	29
Permits within SFHA	0	0	0	0
2020				
Total Permits	1	0	9	20
Permits within SFHA	0	0	0	0
2021				
Total Permits	2	0	8	23
Permits within SFHA	0	0	0	0
2022				
Total Permits	2	0	14	33
Permits within SFHA	0	0	0	0
2023				
Total Permits	4	0	10	28
Permits within SFHA	0	0	0	0
2024				

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
Total Permits	5	0	0	5
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 31-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 31-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any known or anticipated major development or infrastructure in the next five years.					

31.6 JURISDICTIONAL RISK ASSESSMENT

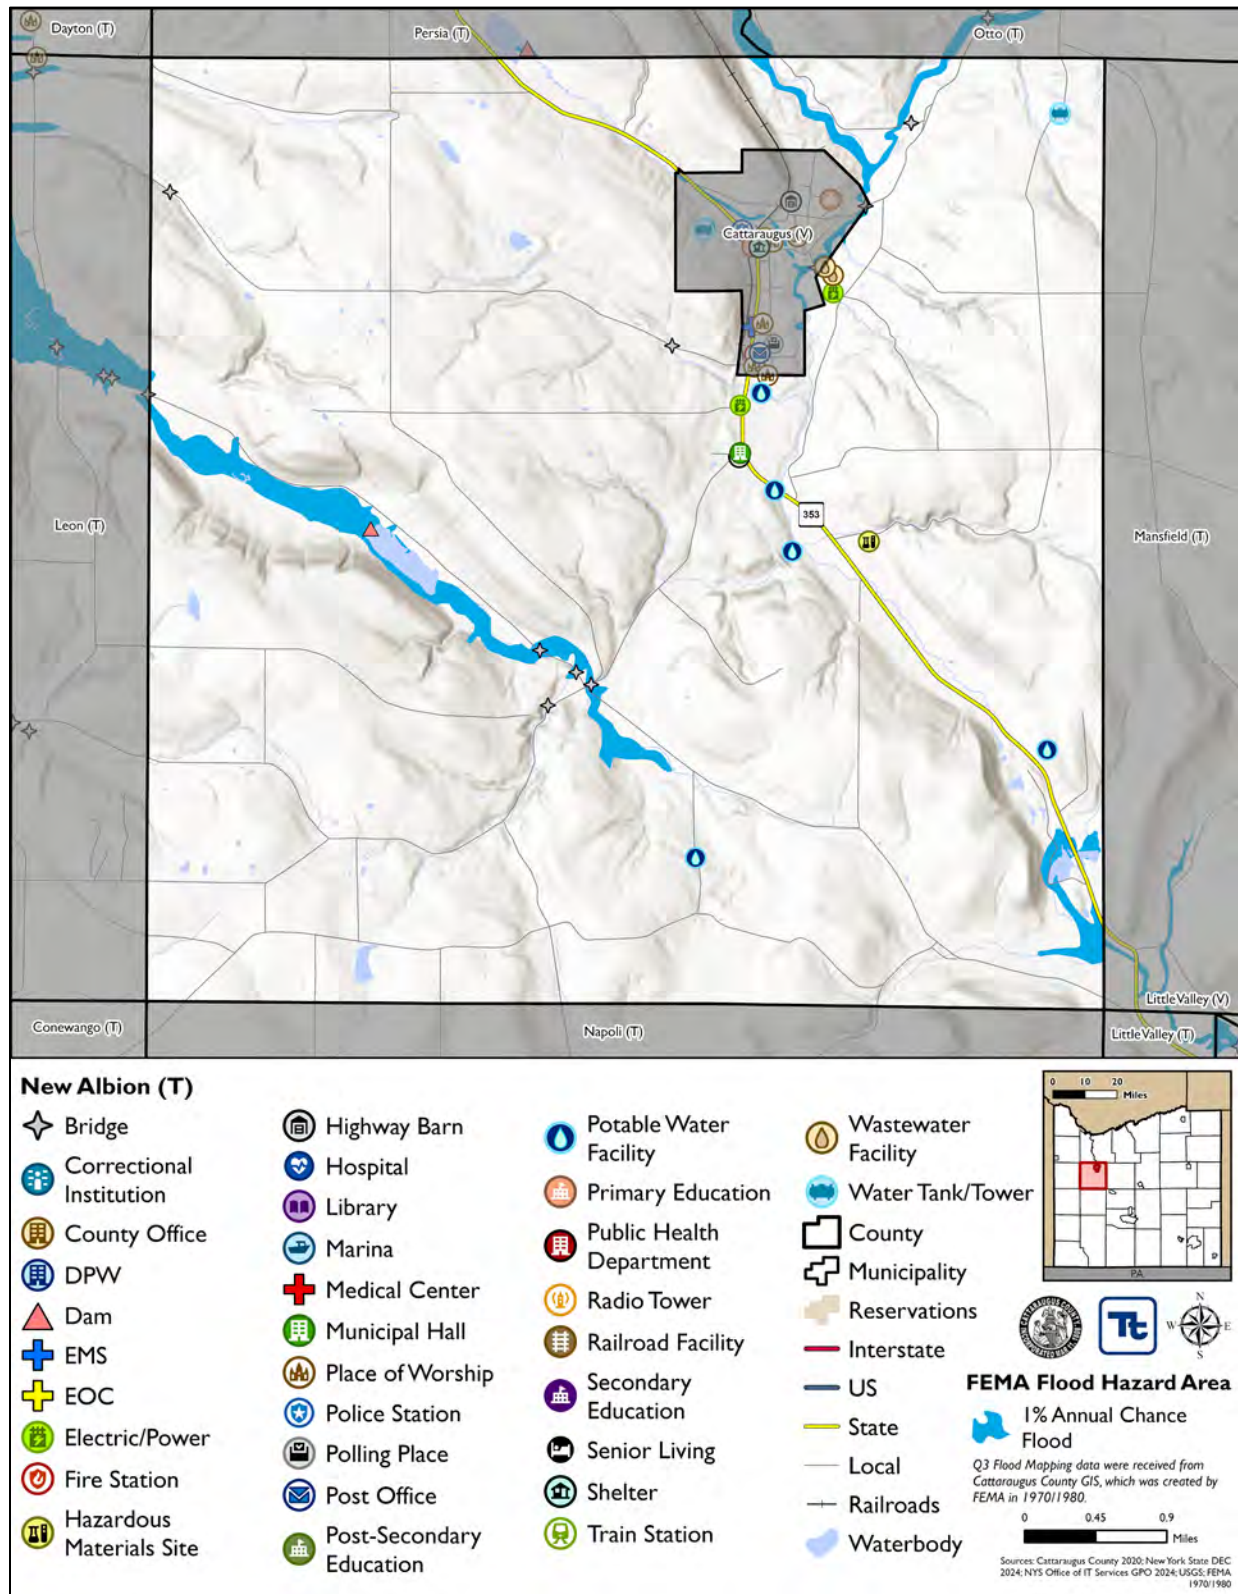

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of New Albion's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

31.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 31-1 through Figure 31-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which New Albion has significant exposure. The maps show the location of potential new development, where available.

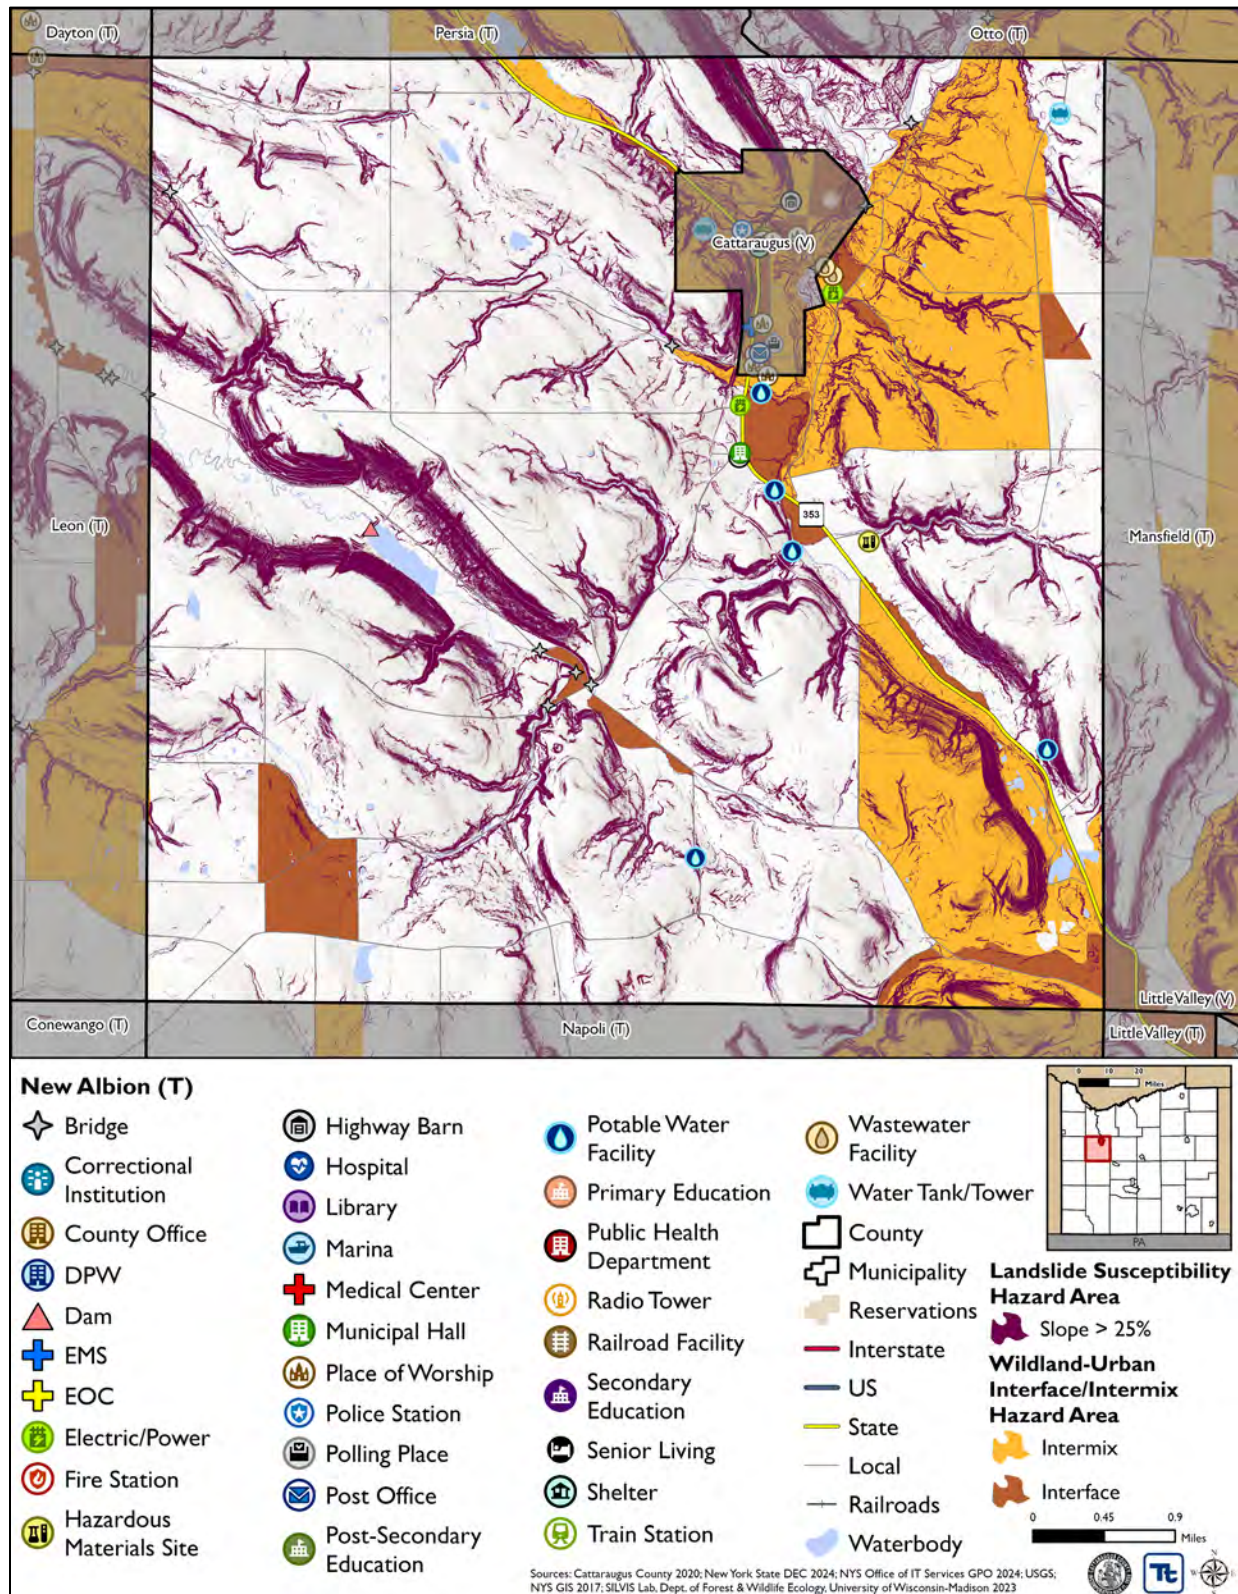

Figure 31-1. New Albion Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 31-2. New Albion Landslide and Wildfire Hazard Area Extent and Location Map

31.6.2 Hazard Event History

The history of natural and non-natural hazard events in New Albion is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 31-14 provides details on loss and damage in New Albion during hazard events since the last hazard mitigation plan update.

Table 31-14. Hazard Event History in New Albion

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in New Albion
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town incurred no documented damages or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town abided by social distancing, masking mandates and work from home orders.
January 12, 2020	High Wind	N/A	High wind	The Town incurred no documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town incurred no documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town incurred no documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town incurred no documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town incurred no documented damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town incurred no documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town incurred no documented damages or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town incurred no documented damages or losses.
March 6, 2022	High Wind	N/A	High wind	The Town incurred no documented damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town incurred no documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in New Albion
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town incurred no documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

31.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for New Albion .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. New Albion reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the preliminary ranking was accurate.

Table 31-15 shows New Albion's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 31-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 31-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 31-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Conewango Creek Site 13 Dam	Dam	X	-	2025-NewAlbionT-10	-
New Albion 04	Bridge	X	-	2025-NewAlbionT-12	-
New Albion 05	Bridge	X	-	2025-NewAlbionT-12	-
New Albion 25	Bridge	X	-	2025-NewAlbionT-12	-

Source: Cattaraugus County 2024

31.6.4 Identified Issues

After a review of New Albion's hazard event history, hazard rankings, hazard location, and current capabilities, New Albion identified the following vulnerabilities within the community:

- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on Skinner Hollow Road and Gowen Gulf Road.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Lovers Lane in the Town is prone to landslides, in particular properties located within Tax Map #44.002-3-22. Landslides may be able to be mitigated by cutting banks to prevent erosion.
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. Several roads may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Skinner Hollow Road
 - Maple Hill Road
 - Mosher Hollow Road
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.

- Critical facilities need to be protected to the 500-year flood level. There are three facilities located in the Town identified to be in the flood hazard area:
 - Niagara Mohawk Power Corp
 - Village of Cattaraugus Potable Water
- Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. Riprap has shown to be a durable solution to prevent erosion in areas susceptible to wear and tear from flooding. Several roads in the Town would benefit from the placement of riprap in ditches to prevent future damage from flooding.
- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- The Town has dams within its jurisdiction. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - New Albion 04
 - New Albion 05
 - New Albion 25

31.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

31.7.1 Past Mitigation Action Status

Table 31-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

31.7.2 Additional Mitigation Efforts

In addition to the mitigation actions completed in Table 31-17, New Albion identified the following mitigation efforts completed since the last HMP:

- The Town has acquired four properties to reduce risk to the flood hazard.
- Town Barn has acquired an emergency generator for continuity of operations.

Since the adoption of the County's first HMP, New Albion has made significant mitigation progress in the following areas:

- Flood mitigation
- Continuity of operations

DRAFT

Table 31-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-New Albion-001	Implement/Encourage training for Code Enforcement Officers.	Flood	County DPW	<p>Problem: Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.</p> <p>Solution: Obtain/host specialist training and certification for floodplain managers.</p>	<p>1. No progress 2. County would need to bring in DEC to facilitate trainings</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-New Albion-002	Update the Flood Damage Prevention Ordinance to include freeboard	Flood	Town Board	<p>Problem: The Flood Damage Prevention Ordinance does not include the 2' freeboard requirement mandated by NYS.</p> <p>Solution: The Flood Damage Prevention Ordinance will be updated to include the 2' freeboard requirement mandated by NYS.</p>	<p>1. No progress 2. Other projects were a priority for the Town.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-New Albion-003	Continuous Public Education	Wildfire	County Planning	<p>Problem: Public needs to be educated on what they can do to protect their structures from wildfires.</p>	<p>1. No Progress 2. Wildfire risks not high; landslide is more of a priority.</p>	<p>1. Include 2. Change outreach to landslide hazard 3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: Provide information to residents, business owners, and organizations about what they can do to protect their structures from wildfires.		
2020-New Albion-004	Protect Conewango Creek Site 13 Dam to the 500-year flood level	Dam Failure, Flood	Floodplain Administrator, Town Highway Department, County OES	Problem: This important facility is located within the SFHA. If the dam broke could cause flooding and casualties. Solution: The FPA will contact the facility manager and discuss options for protecting the facility to the 500-year flood level.	1. Complete 2. Facility owner is aware, and on track to mitigate issues.	1. Discontinue 2. Not applicable 3. Facility owner is aware, and on track to mitigate issues.
2020-New Albion-005	Protect Niagara Mohawk Power Corp to the 500-year flood level	Flood	Floodplain Administrator	Problem: Niagara Mohawk Power Corp is in the Special Flood Hazard Area. Solution: The FPA will contact the facility manager and discuss options for protecting the facility to the 500-year flood level.	1. No Progress 2. Town has not reached out to the entity.	1. Include 2. Change outreach to landslide hazard 3. Not applicable
2020-New Albion-006	Protect Village of Cattaraugus Potable Water to the 500-year flood level	Flood	Floodplain Administrator	Problem: Village of Cattaraugus Potable Water is in the Special Flood Hazard Area. Solution: The FPA will contact the facility manager and discuss options for protecting the facility to the 500-year flood level.	1. No Progress 2. Town has not reached out to the entity.	1. Include 2. Change outreach to landslide hazard 3. Not applicable
2020-New	Update municipal Emergency Operation Plan	All	Town Board, County OES	Problem: EOP may not be responsive to current hazard needs.	1. No Progress 2. Other Town priorities took precedent.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
Albion-007				Solution: Ensure EOP is relevant to hazard needs by updating.		
2020-New Albion-008	Update Building Code to current standards	All	Town Board	Problem: Building Code may not include all current standards. Solution: Ensure Building Code is up to date	1. Complete 2. Updated in 2024	1. Discontinue 2. Not applicable 3. Updated in 2024
2020-New Albion-009	Stream Stabilization and clean debris from waterways N Gowin Gulf Rd., Maple Hill Road, White Hollow Road, Skinner Hollow Road	Flood	Town Board	Problem: May 2014 flood damage to culvert and stream placement of rip rap to stabilize road shoulder. Solution: Stabilize these streams via preferred method to ensure safe travel over these important roads.	1. In Progress 2. Waite Hollow Road culvert upgraded.	1. Include 2. Remove Waite Hollow Road 3. Not applicable
2020-New Albion-010	Residential Acquisitions (3)	Landslide	Town Board	Problem: The Town of New Albion is known for its unstable soil conditions that contribute to slow-moving landslides. The location of the project area is just north of the intersection of Tannery Street, Pepperdine Road with County Road 76 – Lovers Lane. A significant slide has developed, putting at least three (3) residences at risk (Tax map nos. 35.004-3-12, 35.004-3-14, and 35.004-3-10). All three (3) of these homes have been damaged by the landslide to various degrees.	1. Completed 2. Properties acquired and turned to green space.	1. Discontinue 2. Not applicable 3. Properties acquired and turned to green space.

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: Acquire the three (3) residences, demolish the existing structures and turn into green space.		
2020-New Albion-011	Residential Acquisition (1)	Landslide	Town Board	<p>Problem: The Town of New Albion is known for its unstable soil conditions that contribute to slow-moving landslides. The location of the project area is just north of the intersection of Tannery Street, Pepperdine Road with County Road 76 – Lovers Lane. A significant slide has developed, putting a residence at risk (Tax map no.44.002-3-20.5). These home and surrounding outbuildings have been damaged by the landslide to various degrees.</p> <p>Solution: Acquire the parcel, demolish the existing structures and turn into green space.</p>	<p>1. Completed 2. Properties acquired and turned to green space.</p>	<p>1. Discontinue 2. Not applicable 3. Properties acquired and turned to green space.</p>

31.7.3 Proposed Hazard Mitigation Actions for the HMP Update

New Albion participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that New Albion would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 31-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 31-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 31-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA					CRS				
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					X
Flood	X	X		X	X		X		X	X
Landslide	X	X			X					X
Pandemic	X			X			X			X
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X								X	X
Wildfire	X	X		X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 31-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-NewAlbionT-01	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-NewAlbionT-02	Lovers Lane Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-NewAlbionT-03	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-NewAlbionT-04	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-NewAlbionT-05	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-NewAlbionT-06	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-NewAlbionT-07	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-NewAlbionT-08	Roadway Erosion	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-NewAlbionT-09	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-NewAlbionT-10	Dam Owner Partnership	1	1	1	1	1	1	0	1	1	0	1	1	1	0	11	High
2025-NewAlbionT-11	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-NewAlbionT-12	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-NewAlbionT-01. Undersized Culverts

Lead Agency:	Highway Superintendent		
Supporting Agencies:	Code Enforcement, Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on Skinner Hollow Road and Gowen Gulf Road.		
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.		
Estimated Cost:	TBD after study is complete		
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.		
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove roadway		Roadway cannot be removed
	Raingardens		Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.

Action 2025-NewAlbionT-02. Lovers Lane Landslide Mitigation

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Lovers Lane in the Town is prone to landslides, in particular properties located within Tax Map #44.002-3-22. Landslides may be able to be mitigated by cutting banks to prevent erosion.										
Description of the Solution:	<p>The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk along Lovers Lane. Possible mitigation measures include:</p> <ul style="list-style-type: none">• Construction of retaining walls, soil nailing, ground anchor walls• Install horizontal drains to reduce soil saturation• Cut banks along water ways to prevent oversaturated soils from falling• Install netting										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses. This action will also protect properties.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide along Lovers Lane. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-NewAlbionT-03. Floodprone Roads

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including: <ul style="list-style-type: none"> • Skinner Hollow Road • Maple Hill Road • Mosher Hollow Road 										
Description of the Solution:	The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include: <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th><th>Evaluation</th></tr> </thead> <tbody> <tr> <td>No Action</td><td>Current problem exists</td></tr> <tr> <td>Relocate all flood-prone road system</td><td>Not feasible</td></tr> <tr> <td>Raise all flood prone roads</td><td>Cost prohibitive</td></tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Relocate all flood-prone road system	Not feasible	Raise all flood prone roads	Cost prohibitive

No Action	Current problem exists										
Relocate all flood-prone road system	Not feasible										
Raise all flood prone roads	Cost prohibitive										

Action 2025-NewAlbionT-04. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-NewAlbionT-05. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-NewAlbionT-06. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-NewAlbionT-07. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Critical facilities need to be protected to the 500-year flood level. There are three facilities located in the Town identified to be in the flood hazard area: <ul style="list-style-type: none"> Niagara Mohawk Power Corp Village of Cattaraugus Potable Water 										
Description of the Solution:	The Town will notify the critical facility owners and managers of the facility's location in the flood hazard area. The Town will encourage each facility conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include: <ul style="list-style-type: none"> Elevation of facility Floodproofing of facility Mobile flood barriers Once the most cost-effective option is identified, the facility owner or manager will carry out the option.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Town.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th><th>Evaluation</th></tr> </thead> <tbody> <tr> <td>No Action</td><td>Current problem exists</td></tr> <tr> <td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr> <tr> <td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.		
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-NewAlbionT-08. Roadway Erosion

Lead Agency:	Highway Department										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. Eroded roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Several roads in the Town would benefit from mitigation measures to prevent future damage from flooding.										
Description of the Solution:	The Town Engineer and Highway Department will identify and implement erosion-reducing measures. These measures may include: <ul style="list-style-type: none">• Elevating the roadway• Improving drainage• Strengthening underlying soils• Realigning roads and structures• Strengthening support structures• Armoring vulnerable embankments										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along eroded and flood-prone roads.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. This action will mitigate erosion along roadways and reduce likelihood of flooding impacts.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Remove ditches from roadways</td><td>Would likely increase flood risk</td></tr><tr><td>Pave all roads with permeable surfaces</td><td>Cost prohibitive</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Remove ditches from roadways	Would likely increase flood risk	Pave all roads with permeable surfaces	Cost prohibitive		
Action	Evaluation										
No Action	Current problem exists										
Remove ditches from roadways	Would likely increase flood risk										
Pave all roads with permeable surfaces	Cost prohibitive										

Action 2025-NewAlbionT-09. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Integrate hazard mitigation principles in only hazard appendices</td> <td>The plan will miss integration opportunities in the basic plan and annexes</td> </tr> <tr> <td>Ask County to integrate hazard mitigation into the County CEMP</td> <td>Town CEMP will remain undeveloped</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Current problem exists	Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes	Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped	
Action	Evaluation										
No Action	Current problem exists										
Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-NewAlbionT-10. Dam Owner Partnership

Lead Agency:	Town Board										
Supporting Agencies:	NYS DEC, Dam Owners										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Town has dams within its jurisdiction. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.										
Description of the Solution:	The Town will work with the owners of the dams to ensure inspections and safety procedures are up to date, and will encourage owners of dams which are in the floodplain to seek flood mitigation measures. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Dam Owner will pursue funding support, permit approval from NYS DEC, and implement the cost-effective measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3										
Benefits:	This action will improve the safety and security of those who live near the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness within for those living near areas where the dams are located.										
Impact on Future Development:	Future development near the dams will be more secure as safety procedures and inspections are regularly performed on the dams.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Utilize information from NYS DEC</td> <td>Owners may not be required to submit a safety plan to the State</td> </tr> <tr> <td>Utilize information from the National Inventory of Dams</td> <td>Not all dams are listed on the inventory</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State	Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory

No Action	Town will be unaware of any safety concerns for the dam or its condition										
Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State										
Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory										

Action 2025-NewAlbionT-11. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Board, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.

Action 2025-NewAlbionT-12. Pandemic Education and Outreach

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> • New Albion 04 • New Albion 05 • New Albion 25 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

32. CITY OF OLEAN

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the City of Olean with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Olean, describes who participated in the planning process, assesses Olean's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

32.1 HAZARD MITIGATION PLANNING TEAM

The City of Olean identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many City departments. The Director of Public Works represented the community on the Cattaraugus County HMP Steering Committee supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 32-1 summarizes City officials who participated in the development of the annex and in what capacity. Additional documentation of the City's planning activities through Steering Committee meetings is included in Volume I.

32.2 COMMUNITY PROFILE

The City of Olean is located within the Town of Olean and is located in the southeastern part of Cattaraugus County in western New York State. The City of Olean is the largest city in the county and serves as its financial business, transportation, and entertainment hub. The City of Olean has a total area of 6.17 square miles. The city is located where Olean Creek flows into the Allegheny River.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 6.1 percent of the population is 5 years of age or younger, 17.7 percent is 65 years of age or older, 0.4 percent is non-English speaking, 23.4 percent is below the poverty threshold, and 18.2 percent is considered disabled.

32.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Olean performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Olean to identify opportunities for integrating mitigation concepts into ongoing City procedures.

32.3.1 Planning and Regulatory Capability and Integration

Table 32-2 summarizes the planning and regulatory tools that are available to Olean.

Table 32-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Chapter 6: Buildings, Building Regulations, and Fire Prevention	State and Local	Code Enforcement
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>This article provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the City of Olean, New York. Except as otherwise provided in the Uniform Code, the Energy Code, other state law, or other section of this article, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this article.</p>				
Zoning/Land Use Code	Yes	Chapter 28: Zoning	Local	Code Enforcement
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>The zoning regulations and districts herein set forth and as identified upon the Zoning Map of the City of Olean are made for the purpose of promoting public health, safety, and general welfare and prescribing the most desirable use for which the land in each district may be adapted and those uses to be subjected to special regulations, while conserving the value of land throughout the city. The height, bulk and location of buildings and other structures, the area of yards, courts, setbacks and other open spaces, the density of population and intensity of use of buildings and land, the use, conservation and development of unique water front areas, and the use of structures and land for residential, industrial, commercial, institutional or other purposes, are hereby restricted and regulated as hereinafter provided.</p> <p>Such regulations have been designed to preserve open space; lessen congestion in the streets; secure safety from fire, flood, and other dangers; provide adequate light, air, and convenience of access; and facilitate the adequate provision of transportation, water, sewage, schools, parks and other public services. They have been made with reasonable regard, among other things, to the character of each district and its suitability for particular uses as well as the value of buildings, land, and uses to promote the most appropriate use of land throughout the city.</p>				
Subdivision Code	Yes	Chapter 22: Subdivision Regulations	Local	Planning Board
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>The subdivision of land shall conform with these regulations as well as with appropriate laws, rules and regulations established by all governing bodies having or claiming jurisdiction over various phases of the proposed development. It is declared to be the policy of the common council to consider land subdivision to be part of a process that provides for the orderly, efficient and economical development of the city in a manner that is reasonable and in the best interest of the community.</p>				
Site Plan Code	Yes	Chapter 28: Zoning, Article 9 Section 9.1 Site Plan Review and Approval	Local and County	Planning Board
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p> <p>The intent of site plan approval is to authorize the city's planning board to review and approve site plans for uses otherwise permitted by this law in order to determine full compliance with the intent of the standards of this law. The objective is to evaluate site plans in order to minimize conflicts between the site layout and design of proposed uses and existing uses and natural site conditions and thereby minimize any adverse effects affecting the health, safety, and overall welfare of the community.</p>				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	Yes	Chapter 28: Zoning, Article 10 Section 10.8; Chapter 8: Environmental Controls	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? Chapter 28: Zoning, Article 10 Section 10.8: The City of Olean includes areas of steep slopes which are herein defined as slopes equal to or greater than 10%. Development in areas of steep slopes shall conform to specifications developed by the director of public works of the city. The provisions and requirements of this law shall not be a substitute for the applicable provisions and requirements of the State Environmental Quality Review Act of New York State. Chapter 8: Pursuant to Environmental Conservation Law § 24-050, the city shall fully undertake and exercise its regulatory authority with regard to activities subject to regulation under the act in freshwater wetlands, as shown on the freshwater wetlands map, as such map may from time to time be amended, filed by the department of environmental conservation pursuant to the Freshwater Wetlands Act [Environmental Conservation Law § 24-0101 et seq.], and in all area adjacent to any such freshwater wetland up to 100 feet from the boundary of such wetland. Such regulatory authority shall be undertaken and exercised in accordance with all of the procedures, concepts, and definitions set forth in the Freshwater Wetlands Act and Environmental Conservation Law art. 71, tit. 23 [§ 71-2301 et seq.] relating to the enforcement of the Freshwater Wetlands Act, as such act may from time to time be amended.				
Flood Damage Prevention Ordinance	Yes	Chapter 9: Flood Damage Prevention	Federal, State, County and Local	Fire Chief
How has or will this be integrated with the HMP and how does this reduce risk? It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: (1) Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; (2) Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; (3) Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; (4) Control filling, grading, dredging, and other development which may increase erosion or flood damages; (5) Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and (6) Qualify and maintain for participation in the National Flood Insurance Program.				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Emergency Management Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Climate Change Ordinance How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Other How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
PLANNING DOCUMENTS				
General/Comprehensive Plan How has or will this be integrated with the HMP and how does this reduce risk? This Plan identifies projects to improve quality of life for residents, value-of-location for businesses, and municipal efficiency for the City of Olean. The planning process was community-driven and focused on the New York State identified Smart Growth Principles which target a mix of land uses, a range of housing opportunities and choices, creating a strong sense of place, well planned public spaces, availability of public transit, and walkable neighborhoods, amongst others.	Yes	City of Olean Comprehensive Development Plan, 2025	Local	Planning Board
Capital Improvement Plan How has or will this be integrated with the HMP and how does this reduce risk? City entities will submit desired capital projects to City Finance with project titles, descriptions, and anticipated costs. The submitted projects may include those with relevance to hazard mitigation, including stormwater management or making facilities more sustainable.	Yes	Capital Improvement Plan	Local	Finance
Disaster Debris Management Plan How has or will this be integrated with the HMP and how does this reduce risk? The Disaster Debris Management Plan establishes procedures and guidelines for managing disaster debris in a coordinated, environmentally responsible, and cost-effective manner.	Yes	Cattaraugus County CEMP, Appendix 5	County	Cattaraugus County
Floodplain Management or Watershed Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Stormwater Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Open Space Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Urban Water Management Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Habitat Conservation Plan How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Economic Development Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Community Wildfire Protection Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk? Although the City does not currently have a Community Wildfire Protection Plan, one is in development.				
Community Forest Management Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Transportation Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?

RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan	Yes	Comprehensive Emergency Management Plan, 2025	Local	Fire Chief
How has or will this be integrated with the HMP and how does this reduce risk? The Comprehensive Emergency Management Plan defines the scope of preparedness and emergency management activities necessary. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.				
Continuity of Operations Plan	Yes	Comprehensive Emergency Management Plan, 2025	Local	Fire Chief
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
The Continuity of Operations Plan (COOP) is a policy and guidance document that ensures that essential functions for an agency or organization are continued in the event of an emergency. The COOP addresses emergencies from an all-hazards approach, including natural, manmade, or technological disasters.				
Substantial Damage Response Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Threat and Hazard Identification and Risk Assessment	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Public Health Plan	Yes	Health Department Strategic Plan 2022–2025	County	Health Department
How has or will this be integrated with the HMP and how does this reduce risk? The Cattaraugus County Health Department's (CCHD) Strategic Planning Process began in April 2022 using the resources of the New York State Department of Health NYS Public Health Corp Fellows. As a part of this process, the fellows reviewed the 2018–2021 strategic plan for past successes and failures and discussed what was needed for future success. Both an external assessment, in which county demographic data, economic factors, health outcomes, and community health assessment findings that have the potential to affect the agency and strategies were examined, and an internal assessment of a Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis was completed.				
Other: Community Needs Assessment and Community Health Improvement Plan	Yes	Community Needs Assessment and Community Health Improvement Plan	County	Health Department
How has or will this be integrated with the HMP and how does this reduce risk? The 2022–2024 OGH/BRMC Community Service Plan (CSP) and the CCHD's Community Health Assessment and Community Health Improvement Plan (CHA-CHIP) were conducted to identify significant health needs as outlined by the New York State Department of Health's 2022–2024 Prevention Agenda, where applicable. It also provides critical information OGH/BRMC, the CCHD, and others in a position to make a positive impact on the health of the region's residents. The CSP/CHA-CHIP enables the health department, hospital, and other community partners to strategically establish priorities, develop interventions, and direct resources to improve the health of residents living in the service area. The CSP/CHA-CHIP includes a detailed examination of priority areas identified in the NYS Prevention Agenda: (1) prevent chronic diseases; (2) promote a healthy and safe environment; (3) promote healthy women, infants and children; (4) promote well-being and prevent mental health and substance use disorders; and (5) prevent communicable diseases. The Prevention Agenda is a six-year effort to make New York the healthiest state. Developed in collaboration with 140 organizations, the plan identifies New York's most urgent health concerns, and suggests ways local health departments, hospitals, and partners from health, business, education, and community organizations can work together to solve them.				

32.3.2 Development and Permitting Capability

Table 32-3 summarizes the capabilities of Olean to oversee and track development.

Table 32-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits? <ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	DPW and Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? <ul style="list-style-type: none"> If you have a buildable land inventory, please describe 	Yes	Within the Comprehensive Development Plan
Describe the level of buildout in your jurisdiction.	N/A	According to the Comprehensive Development Plan, approximately 18 percent of the land in the City is categorized as vacant. This percentage of land may be available for future development.

32.3.3 Administrative and Technical Capability

Table 32-4 summarizes potential staff and personnel resources available to Olean and their current responsibilities that contribute to hazard mitigation.

Table 32-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the City relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed City comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the City; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the City subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the City.
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Code Enforcement Officer charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
		end shall have all the powers of the Code Enforcement Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Public Works	Yes	The City of Olean Department of Public Works is the largest and most diverse branch of city government consisting of 10 divisions that provide a wide range of essential services to the residents and businesses. Some of its responsibilities include operation and maintenance of city airport, maintenance of city streets and parking lots, maintenance of water distribution lines, treatment and distribution of water, water and sewer billings, water meter readings, wastewater collection and treatment, maintenance of stormwater and wastewater lines, oversight of capital improvements, maintenance of City vehicles and equipment, maintenance of parks, fields, and playground equipment, tree maintenance, traffic signal maintenance, maintenance of city buildings and facilities.
Construction/Building/Code Enforcement Department	Yes	The City of Olean's Building/Code Enforcement Department became incorporated into the Fire Department on January 1, 1994, under the new Charter, and is now known as the Department of Fire, Buildings and Emergency Services. The Department of Buildings is responsible for the administration and enforcement of all local codes, state codes and zoning laws of the city. The division is under direct control of the Fire Chief and supervised by the Deputy Fire Chief of Fire Prevention.
Emergency Management/Public Safety Department	Yes	<p>The purpose of the City of Olean Police Department is to uphold the law fairly and firmly; to prevent crime and reduce the fear of crime; to pursue and bring to justice those who break the law; to keep the peace in partnership with the community; to protect, help and reassure the people; and to be seen to do all this with integrity, common sense and sound judgment.</p> <p>The City of Olean Department of Fire, Building and Emergency Services is located in the Southeastern part of Cattaraugus County in Western New York. The City of Olean encompasses 6.2 square miles of urban/suburban area with industrial areas and a commercial center. The City of Olean has a nighttime population of approximately 14,000 which increases during the day due to commuters for work, retail, and recreation. The City of Olean Fire</p>

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
		Department is an all career (paid) fire department that operates out of two fire stations.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	City of Olean Department of Public Works Streets, Parks, Trees, Water, and Wastewater divisions.
Mutual aid agreements	Yes	Police and Fire
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	Yes	DPW and Community Development
Engineers or professionals trained in building or infrastructure construction practices	Yes	DPW
Planners or engineers with an understanding of natural hazards	Yes	DPW
Staff with expertise or training in benefit/cost analysis	Yes	DPW and Auditor
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	Yes	The Youth Bureau & Recreation Department will work cooperatively in the community to serve the citizens with quality programs and activities, promoting self-esteem, good sportsmanship and citizenship, physical well-being, and safety while complementing the family unit.
Environmental scientists familiar with natural hazards	Yes	Sewer and Water
Surveyors	No	-
Emergency manager	Yes	Responsibilities fall on Fire Chief
Grant writers	Yes	DPW and Community Development
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

32.3.4 Fiscal Capability

Table 32-5 summarizes financial resources available to Olean.

Table 32-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

32.3.5 Education and Outreach Capability

Table 32-6 summarizes the education and outreach resources available to Olean.

Table 32-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Fire Department
Personnel skilled or trained in website development	Yes	IT Department
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	X (Formerly Twitter) and Facebook
Citizen boards or commissions that address issues related to hazard mitigation	Yes	City of Olean Emergency Preparedness Response Team
Warning systems for hazard events	Yes	NY Alert
Natural disaster/safety programs in place for schools	Yes	Fire and Severe Storm programs
Organizations that conduct outreach to socially vulnerable populations and underserved populations	Yes	The Youth Bureau & Recreation Department will work cooperatively in the community to serve the citizens with quality programs and activities, promoting self-esteem, good sportsmanship and citizenship, physical well-being, and safety while complementing the family unit.
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	Yes	Press Releases

32.3.6 Community Classifications

Table 32-7 summarizes classifications for community programs available to Olean.

Table 32-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	3	2024
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

32.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 32-8 summarizes the adaptive capacity for each identified hazard of concern and the City’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 32-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Weak
Pandemic	Moderate
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Moderate
Wildfire	Moderate

32.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 32-1 is responsible for maintaining this information.

32.4.1 NFIP Statistics

Table 32-9 summarizes the NFIP policy and claim statistics for Olean.

Table 32-9. Olean NFIP Summary of Policy and Claim Statistics

# Policies	57
# Claims (Losses)	29
Total Loss Payments	\$214,595.10
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

32.4.2 Flood Vulnerability Summary

Table 32-10 provides a summary of the NFIP program in Olean.

Table 32-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Neighborhoods south of the Allegheny River, which are not protected by levees. West Olean near the Two-Mile Creek.
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None

NFIP Topic	Comments
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Per 2020 existing building code
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Fire Chief / Code Enforcement Department
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, the County has a GIS department capable of analyzing future flooding conditions.
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Per 2020 existing building code
What are the barriers to running an effective NFIP program in the community, if any?	Funding, training and staffing
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: June 4, 2013 CAV: April 6, 2022
What is the local law number or municipal code of your flood damage prevention ordinance?	Chapter 9: Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	November 12, 1971
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Yes, SEQR, Site Plan Review and Engineering review

NFIP Topic	Comments
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

32.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 32-11 through Table 32-13.

Table 32-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2020				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0
2021				
Total Permits	0	0	1	1
Permits within SFHA	0	0	0	0
2022				
Total Permits	0	0	1	1
Permits within SFHA	0	0	0	0
2023				
Total Permits	0	0	4	4
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 32-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
------------------------------	---------------------	-------------------------	---	---------------------	-------------------------------------

The City did not indicate any recent major development or infrastructure occurred between 2019 to present.

* Only location-specific hazard zones or vulnerabilities identified.

Table 32-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The City did not indicate any known or anticipated major development or infrastructure in the next five years.					

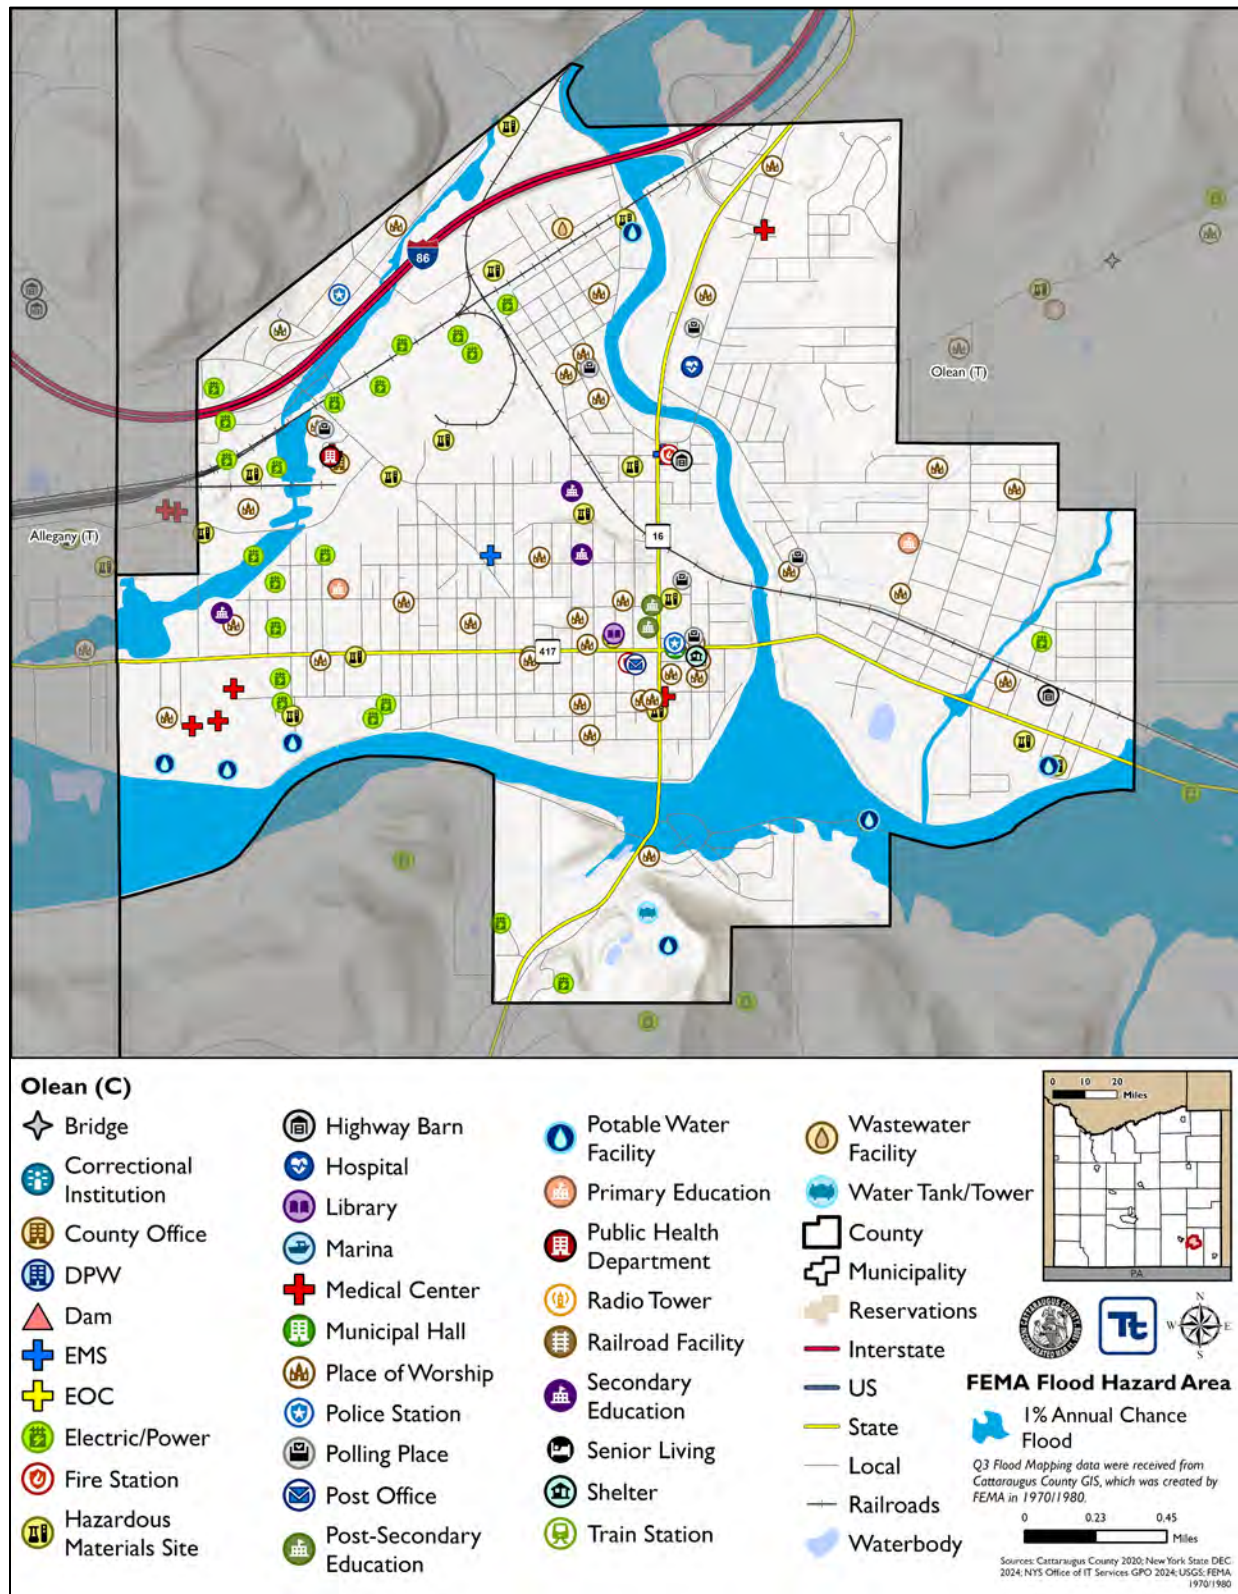

32.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Olean's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

32.6.1 Hazard Area

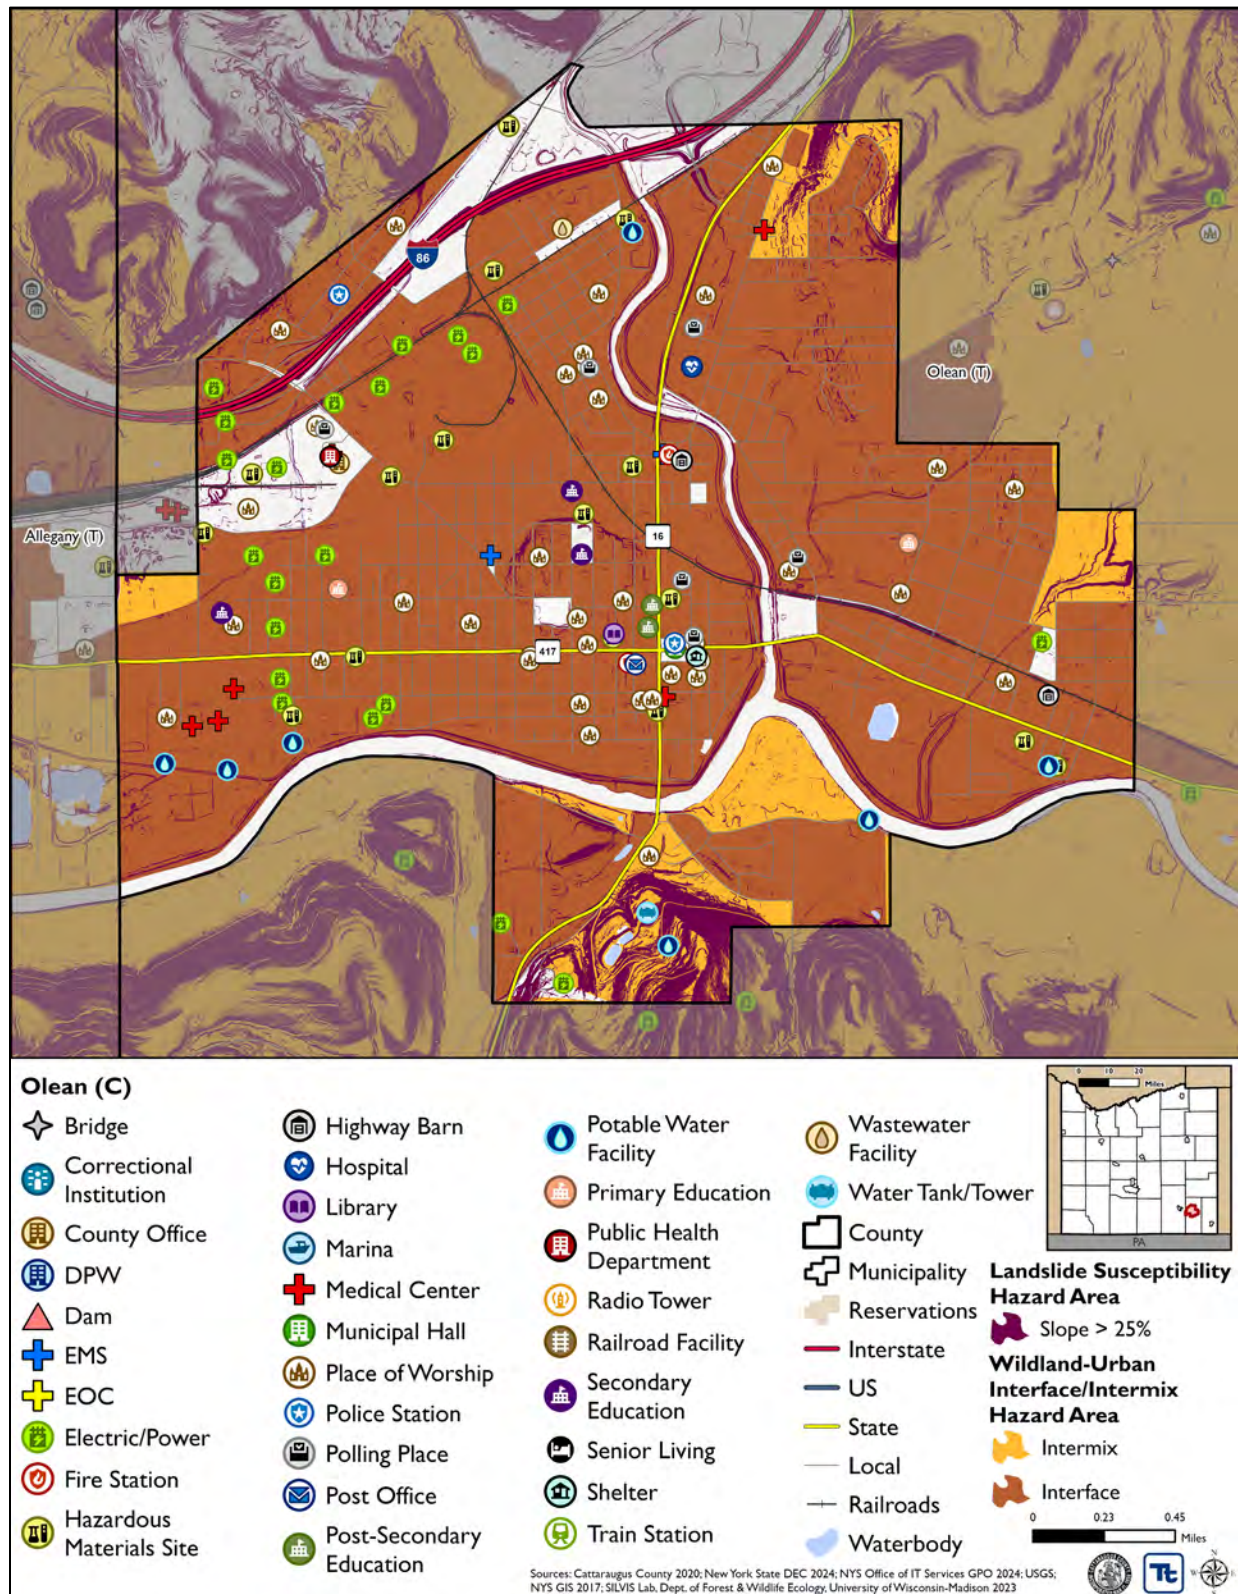

Hazard area maps provided below illustrate the probable hazard areas impacted within the City are shown in Figure 32-1 through Figure 32-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Olean has significant exposure. The maps show the location of potential new development, where available.

Figure 32-1. Olean Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 32-2. Olean Landslide and Wildfire Hazard Area Extent and Location Map

32.6.2 Hazard Event History

The history of natural and non-natural hazard events in Olean is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 32-14 provides details on loss and damage in Olean during hazard events since the last hazard mitigation plan update.

Table 32-14. Hazard Event History in Olean

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Olean
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The City did not experience any documented damages or losses.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The City adhered to the COVID-19 guidelines, with individuals working from home or practicing social distancing.
January 12, 2020	High Wind	N/A	High wind	The City did not experience any documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The City did not experience any documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The City did not experience any documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The City did not experience any documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	Damages to private property.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The City did not experience any documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	Several reports were received of trees down.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The City did not experience any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Olean
March 6, 2022	High Wind	N/A	High wind	The City did not experience any documented damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The City did not experience any documented damages or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The City did not experience any documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

32.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Olean .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Olean reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the City noted the following:

- The ranking for the Landslide hazard should be decreased from 'High' to 'Low' due to the limited structures at risk.

Table 32-15 shows Olean's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 32-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	Low
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High

Hazard	Rank
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 32-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 32-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
City Of Olean-Well Site	Potable Water Facility	X	-	2025-OleanC-01	-
City Olean - M13 Well House	Hazardous Materials Site	X	-	2025-OleanC-01	-
National Grid	Electric/Power	X	-	2025-OleanC-01	-

Source: Cattaraugus County 2024

32.6.4 Identified Issues

After a review of Olean's hazard event history, hazard rankings, hazard location, and current capabilities, Olean identified the following vulnerabilities within the community:

- The National Grid facility, M13 Well House, and City of Olean Well Site are located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.
- The City does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The City is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded roadways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in the City south of the Allegany River which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding.
- Across the City, there are significant flooding and waterflow issues which impact the roadways and utilities, disrupting both traffic and utilities. The flooding occurs typically following heavy rain events associated with severe storms.
- Levees in the City are outdated, which increases the City's risk of levee failure. Significant rainfalls, temperature fluctuations, and flooding events may put stress on the integrity of the levees.

- South of the Allegany River in City limits is isolated from the rest of the community and not protected by levees. City water tanks are also across the river in south Olean. Levees would assist in the reduction of risk from the flood hazard by preventing waters from reaching the area.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities.
- The City faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The City does not currently have hazard mitigation information and outreach on the City website.
- The City faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The City does not currently have hazard mitigation information and outreach on the City website.
- Critical facilities require backup power to ensure continuity of operations. The City Streets Garage (701 Barry Street), John Ash Community Center (112 N Barry Street), and Olean Recreation Center (551 E State Street) do not have back-up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Culverts on Front Street at Johnson Brook are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter storms. The culvert is at risk of failing and at risk of overtopping in the event of flood waters. Front St is a busy street and one of the two routes from east Olean to West Olean. Front Street is likely to be an evacuation route if east Olean were to be evacuated due to flooding or another hazard.
- The area surrounding Two Mile Creek, from Edgewood Avenue to Homer Street, is prone to flooding, impacting nearby roads and properties. Two Mile Creek has bank erosion issues, threatening encroachment onto nearby roads. Banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.
- The area surrounding Kings Brook, from Brook Street to Seneca Avenue, is prone to flooding, impacting nearby roads and properties. Kings Brook has bank erosion issues, threatening encroachment onto nearby roads. Banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.
- Properties in the City have been subject to flooding impacts. On East Riverside Drive 10-20 properties have experienced damages during substantial periods of heavy rain, as well as 10-20 properties on the north

end of York Street and additional 10-20 properties have been impacted on West River Road; other properties may be impacted by flooding as well.

- Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods.
- South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant, Pines and Eden Heights, as well as high dollar properties are potentially exposed to wildfires and landslides. Protecting these properties and infrastructure from wildfires and landslides is crucial to ensuring continuity of operations and services for their consumers. Exposure to these hazards can cause damage or destruction.
- The storage facility for road salt is located at the City Garage site where preparation for plowing and salting operations take place prior to and during severe winter storms. The salt barn structure was built in 1910 and the overall condition of the building is poor. The building is not repairable and should be replaced.
- The City's wireless Wide Area Network (WAN), which provides phone communication and internet connectivity to all City facilities, is housed on top of a private building and does not have backup power on site. Loss of power at the private building results in losses of phone and internet communication in City facilities. Critical facilities require backup power to ensure continuity of operations. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- Heavy rains contributes to instances of flooding and flash flooding within the City, which can result in the entrapment of individuals in high or swift-moving floodwaters. The City of Olean Fire Department is underequipped to handle a medium-to-large-scale flooding incident with entrapment or people in the water.
- The waterline on Washington Street is outdated and undersized and needs to be replaced. Existing lines often break due to extreme cold events, resulting in constant leaks and the need to replace lines. The disruption of utility services puts strain on the water system and its users.
- The City has levees within its jurisdiction, and nearby dams which may impact the City. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.
- Water and wastewater facilities in the City are vulnerable to the utility failure hazard, as the majority of the existing infrastructure have various single point of failure vulnerabilities, meaning that if a part of a system were to stop working, the entire system would fail.
- There is only one bridge existing in the City which provides access to the Southern portion of the City; this bridge is located on South Union Street. If an evacuation is required, this single route may be detrimental in the movement of persons and goods from the City.
- The City does not have a Community Wildfire Protection Plan. A Community Wildfire Protection Plan assists in addressing issues such as wildfire response, hazard mitigation, community preparedness, and structure protection.

32.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

32.7.1 Past Mitigation Action Status

Table 32-17 indicates progress on the City's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

32.7.2 Additional Mitigation Efforts

Olean did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 32-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-City of Olean-001	Hydraulic study of under drains city-wide	Flood	City Board	<p>Problem: There is flooding and waterflow issues within the city</p> <p>Solution: Encourage FEMA to conduct hydrologic and hydraulic analysis to study existing flooding and waterflow concerns in the city. Then the city will install appropriate drainage infrastructure</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-002	Work with National Grid Facility owner to protect the facility to the 0.2% annual chance flood event	Flood	FPA	<p>Problem: The National Grid facility is in the special flood area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.</p> <p>Solution: The city will contact facility manager at National Grid to discuss options to protect the facility to the 0.2% annual chance flood event</p>	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-003	Protect City of Olean- M13 Well House to the 0.2% annual chance flood event	Flood	Engineer, Facility Manager	<p>Problem: City of Olean- M13 Well House is in the special flood area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.</p> <p>Solution: The city will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the M13 Well House to protect it to the 0.2% annual chance flood level. Options include:</p> <ul style="list-style-type: none">•Elevation of facility•Floodproofing of facility•Mobile flood barriers	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Once the most cost-effective option is identified, the city will carry out the option.		
2020-City of Olean-004	Protect City of Olean- Well Site to the 0.2% annual chance flood event	Flood	Engineer, Facility Manager	<p>Problem: The City of Olean- Well Site is in the special flood area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.</p> <p>Solution: The city will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Well Site to protect it to the 0.2% annual chance flood level. Options include:</p> <ul style="list-style-type: none">•Elevation of facility•Floodproofing of facility•Mobile flood barriers <p>Once the most cost-effective option is identified, the city will carry out the option.</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-005	Water distribution system improvements	Utility Failure	City of Olean	<p>Problem: Waterline on Washington St is outdated and undersized and needs to be replaced. Existing lines often break due to extreme cold events, resulting in constant leaks and the need to replace lines.</p> <p>Solution: The city will work with the county to replace the waterline with a 4000' waterline on Washington St.</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-006	Levees in the city need to be improved	Flood, Severe Storm	NYSDEC	<p>Problem: Levees in the city are outdated.</p> <p>Solution: Conduct an engineering study to determine what needs updated and then the city will conduct the levee improvements.</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-City of Olean-007	Conduct a feasibility study to identify best actions to prevent flooding south of Allegany River	Flood, Severe Storm	Engineer	<p>Problem: South of Allegany River in city limits is isolated from the rest of the community and not protected by levees. City water tanks are also across the river in south Olean.</p> <p>Solution: Conduct a feasibility study south of Allegany River to see if levees would be beneficial.</p>	<p>1. No Progress 2. Financial constraints</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-City of Olean-008	Update Flood Damage Prevention Ordinance	Flood	City board	<p>Problem: City of Olean lacks an updated flood damage prevention ordinance</p> <p>Solution: The city will update the flood damage prevention ordinance</p>	<p>1. No Progress 2. Other projects took precedent.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-City of Olean-009	Floodplain Administrator to attend training on floodplain management	Flood	Cattaraugus County Emergency Management /Cattaraugus County Codes Department	<p>Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.</p> <p>Solution: Obtain/host training and certification for floodplain managers</p>	<p>1. No Progress 2. Other projects took precedent.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-City of Olean-010	Provide information to residents, business owners, and organizations about what they can do to prevent their structures from wildfires.	Wildfires	City board	<p>Problem: Additional public education on wildfire risk is needed</p> <p>Solution: the city will develop an outreach program to educate the public about wildfires and what they can do to protect their structures.</p>	<p>1. No Progress 2. Other projects took precedent.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-City of Olean-011	Generators for City Streets Garage, John Ash Community Center, and Olean Recreation Center	All Hazards	City, DPW	<p>Problem: Lack of backup power for City Streets Garage on 701 Barry St, John Ash Community Center on 112 N Barry St, and Olean Recreation Center at 551 E State St.</p> <p>Solution: Purchase and install generators for City Streets Garage, John Ash Community Center, and Olean Recreation Center.</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-012	Culverts on Front St at Johnson Brook	Flood, Severe Storm	City, DPW	<p>Problem: Built in the 1930's, this culvert is undermined, deteriorating, and undersized. The culvert is at risk of failing and at risk of overtopping in the event of flood waters. Front St is a busy street and one of the two routes from east Olean to West Olean. Front Street is likely to be an evacuation route if east Olean were to be evacuated due to flooding or another hazard.</p> <p>Solution: Remove existing culvert and replace with a new culvert roughly 1.5 times the culvert opening size. The new culvert would be a box culvert and while the new culvert is installed, Johnson Brook would undergo erosion control along the banks immediately adjacent to the culvert opening.</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-013	Identify projects to prevent further erosion occurring at Two Mile Creek-Edgewood Ave to Homer Street and	Flood, Severe Storm	Public Works, City	<p>Problem: Erosion occurring at Two Mile Creek-Edgewood Ave to Homer Street (property damage) and erosion occurring at Kings Brook-Brook St to Seneca Ave threatening properties</p> <p>Solution: Conduct feasibility study to determine best action to prevent further erosion at Two Mile</p>	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Kings Brook- Brook St to Seneca Ave			Creek and Kings Brook and implement identified actions.		
2020-City of Olean-014	Potential acquisition/elevation projects for E Riverside Dr, York Street, and W River Rd	Flood, Severe Storm	City of Olean	Problem: E Riverside Dr 10-20 homes, York Street, north end 10-20 residential, W River Rd, north of street 10-20 homes prone to flooding Solution: Conduct an engineering study to determine best action (elevation, buyout) to protect homes from flooding. Then the city will implement best action	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-015	Update the Emergency Operations Plan.	All Hazards	County, city	Problem: The city has an outdated Emergency Operations Plan Solution: The city will update the city's Emergency Operation Plan to include current hazards identified in the Hazard Mitigation Plan.	1. Completed 2. Plan was updated in 2025	1. Discontinue 2. Not applicable 3. Plan was updated in 2025
2020-City of Olean-016	Update Building Code	All Hazards	County, city	Problem: Building codes in the city are outdated Solution: The city will update building codes so buildings are built to withstand hazards they face.	1. No Progress 2. Other projects took precedent.	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-017	Assess the site-specific vegetation conditions and determine necessary mitigation measures to protect critical facilities from wildfire	Wildfire	City, Fire Dept, Facility owners	Problem: South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant, Pines and Eden Heights, as well as high dollar properties are potentially exposed to wildfires Solution: Assess the site-specific vegetation conditions and determine necessary mitigation measures to protect South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant,	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Pines and Eden Heights, as well as high dollar properties from wildfires.		
2020-City of Olean-018	Assess the site-specific slope conditions and determine necessary mitigation measures to protect the facilities from landslide	Landslide	City, facility owners	<p>Problem: South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant, Pines and Eden Heights, as well as high dollar properties are potentially exposed to landslides</p> <p>Solution: Assess the site-specific slope conditions and determine necessary mitigation measures to protect South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant, Pines and Eden Heights, as well as high dollar properties from landslides</p>	<p>1. No Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-City of Olean-019	Purchase a Wildfire and Flood Rescue Pickup Truck	Wildfire, Flood	Fire Department	<p>Problem: No heavy-duty pickup truck with Wildfire Capability during that season while being utilized as a Support vehicle the rest of the year. The city has a vehicle that is at the end of its service life and is essential to these types of operations.</p> <p>Solution: Purchase a ¾ or 1-ton crew cab pickup truck. The truck will have a skid unit that will be installed during wildfire season and rescue cap with rollout ray rescue operations the rest of the season. The vehicle would respond to incidents and also have towing capability to deliver trailers, boats ,and personnel to the scene of an incident</p>	<p>1. Completed</p> <p>2. Vehicle was purchased.</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Vehicle was purchased</p>
2020-City of Olean-020	City Garage Salt Barn	Severe storm, Severe winter storm	City DPW	Problem: The storage facility for road salt is located at the City Garage site where preparation for plowing and salting operations take place. The salt barn structure was built in 1910 and the	<p>1. No Progress</p> <p>2. Financial constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				overall condition of the building is poor. The building is not repairable and should be replaced. Solution: Conduct an engineering study to design a new and efficient salt barn. The city will then demolish existing salt barn and replace with hybrid-canvas salt storage building on same site.		
2020-City of Olean-021	Wireless WAN Tower	Severe winter storm, Severe storm, Utility failure	City DPW	Problem: the city's wireless wide area network which provides phone communication and internet connectivity to all our facilities expect the Olean Municipal building is housed on top of a private building and does not have backup power on site. Loss of power of the private building results in losses of phone and internet communication in the buildings and requires 24-hour staffing of water and wastewater departments when communications go down. Solution: Decommission existing wireless communication equipment, relocate to city property at the water reservoir site in South Olean with new communication equipment and backup power either through generator or solar backup.	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-City of Olean-022	City of Olean Fire Department Flood Preparedness	Flood, Severe storm	Fire Department	Problem: The City of Olean Fire Department is underequipped to handle medium to large scale flooding incident with entrapment or people in the water. Costs with training, equipment, and maintaining technical skills is an issue. Solution: Increase members trained and equipped to mitigate and respond to this issue by having a	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable

				third to half of all members trained at the Swiftwater/Flood Rescue Technician level as well as equipping them with the appropriate level of PPE.		

32.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Olean participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Olean would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in City priorities.

Table 32-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 32-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 32-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					
Flood	X	X	X	X	X	X	X	X	X	X
Landslide	X				X					
Pandemic				X			X			
Severe Storm	X	X	X		X			X	X	X
Severe Winter Storm	X	X	X		X			X	X	X
Utility Failure	X	X			X				X	X
Wildfire	X			X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 32-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-OleanC-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-OleanC-02	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High

2025-OleanC-25	Community Wildfire Protection Plan Development	1	1	1	1	1	1	1	1	1	0	1	1	1	0	12	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-OleanC-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Common Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The National Grid facility, M13 Well House, and City of Olean Well Site are located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.										
Description of the Solution:	<p>The City will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. The city will contact the facility manager at National Grid to make them aware of possible floodproofing measures. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the City and/or facility manager will carry out the option.</p>										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, City Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the City.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-OleanC-02. Substantial Damage Management Plan

Lead Agency:	Public Works										
Supporting Agencies:	Code Enforcement, Common Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The City does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The City is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The City will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	City Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the City.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for City officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources following disaster events</td> <td>Resources may not be available during major widespread events</td> </tr> <tr> <td>Establish MOUs with outside agencies to conduct Substantial Damage Determinations</td> <td>A plan outlining responsibility is still necessary to prevent missing important requirements</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources following disaster events	Resources may not be available during major widespread events	Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

Action 2025-OleanC-03. Floodprone Roads

Lead Agency:	Public Works		
Supporting Agencies:	Code Enforcement, Engineering, NYS DOT		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded roadways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in City south of the Allegany River which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding.		
Description of the Solution:	The City will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include: <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, City Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the City's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all flood-prone road system		Not feasible
	Raise all flood prone roads		Cost prohibitive

Action 2025-OleanC-04. City-Wide Hydraulic Drainage Study

Lead Agency:	Common Council		
Supporting Agencies:	Engineering, FEMA, Public Works, County Public Works		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Across the City, there are significant flooding and waterflow issues which impact the roadways and utilities, disrupting both traffic and utilities. The flooding occurs typically following heavy rain events associated with severe storms.		
Description of the Solution:	Encourage FEMA to conduct hydrologic and hydraulic analysis to study existing flooding and waterflow concerns in the City. The City Public Works will then install appropriate drainage infrastructure on its roads and will work with County Public Works to ensure drainage infrastructure is installed on roads under their jurisdiction.		
Estimated Cost:	TBD on identified solutions from study		
Potential Funding Sources:	FEMA HMA, City Budget, County Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	This action will identify measures to protect infrastructure in the water systems lifeline and reduce the risk of flooding within the City. Furthermore, the transportation lifeline will be supported as appropriate drainage can reduce the risk to flood road ways and keep roads clear for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties may be impacted by flooding associated with undersized drainage systems.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the water systems lifeline and reduce the risk of flooding within the City. Furthermore, the transportation lifeline will be supported as appropriate drainage can reduce the risk to flood road ways and keep roads clear for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the City's reliability in terms of water drainage and transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Ensuring that floodwaters are efficiently and effectively removed from areas in the City reduces the risk of flooding.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Raise all flood prone roads		Cost prohibitive
	Replace the entire drainage system		Cost prohibitive

Action 2025-OleanC-05. Levee Improvements

Lead Agency:	Engineering		
Supporting Agencies:	NYS DEC		
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	Levees in the City are outdated, which increases the City's risk of levee failure. Significant rainfalls, temperature fluctuations, and flooding events may put stress on the integrity of the levees.		
Description of the Solution:	Work with NYS DEC to conduct an engineering study to determine weaknesses in the levees. The City will continue to work with NYS DEC to complete the identified necessary levee improvements.		
Estimated Cost:	TBD by engineering study		
Potential Funding Sources:	FEMA HMA, City Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	This action will result in the identification of a flood mitigation measure to reduce the flood risk to the structures near the City's levee systems.		
Impact on Socially Vulnerable Populations:	This action will protect the vulnerable populations residing downstream from the City's levee systems by identifying and implementing the identified flood mitigation measure(s).		
Impact on Future Development:	This action will provide protection from the flood hazard to future development located downstream from the City's levee systems.		
Impact on Critical Facilities/Lifelines:	This action will strengthen the integrity of the City's levee systems.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. These changes are likely to increase flood risks. This action seeks to reduce the risk of flood.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove levee system		Populations become unprotected from the flood hazard
	Tear down the levee system and build a new one		Cost prohibitive

Action 2025-OleanC-06. Levee Feasibility Study

Lead Agency:	Engineering		
Supporting Agencies:	NYS DEC		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	South of the Allegany River in City limits is isolated from the rest of the community and not protected by levees. City water tanks are also across the river in south Olean. Levees would assist in the reduction of risk from the flood hazard by preventing waters from reaching the area.		
Description of the Solution:	Conduct a feasibility study with NYS DEC of the areas South of the Allegany River to see if levees would be effective in reducing the area's flood risk.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, City Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	This action will result in the identification of whether a new levee system is required to reduce the flood risk to the structures and residents residing south of the Allegany River.		
Impact on Socially Vulnerable Populations:	This action will protect the vulnerable populations residing south of the Allegany River by identifying whether a new levee system should be constructed.		
Impact on Future Development:	This action will provide protection from the flood hazard to future development located downstream from the levee system, should it be constructed.		
Impact on Critical Facilities/Lifelines:	This action will identify whether the City will expand its levee systems.		
Impact on Capabilities:	This action may expand the City's flood risk reduction capabilities.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. These changes are likely to increase flood risks. This action seeks to reduce the risk of flood.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High <input checked="" type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Conduct study but do not implement findings	Would not reduce flood risk	
	Conduct feasibility study without NYS DEC input	Study may be inconclusive due to lack of data input	

Action 2025-OleanC-07. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Common Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The City will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the City will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	City Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-OleanC-08. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Common Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the City will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	City Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-OleanC-09. Wildfire Education and Outreach

Lead Agency:	Common Council		
Supporting Agencies:	Cattaraugus County		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire		
Description of the Problem:	The City faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The City does not currently have hazard mitigation information and outreach on the City website.		
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include City events, the City newsletters, social media, the City website, and having the materials on display for the public at City libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.		
Estimated Cost:	Low		
Potential Funding Sources:	City Budget		
Implementation Timeline:	1 year		
Goals Met:	1, 2, 3, 4		
Benefits:	This action will improve the public education and outreach capabilities in the City by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the City.		
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the City.		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.		
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the City's needs.		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Rely on state or federal resources		Resources may be generalized and not specific to the risks in the City
	Use only a few methods for distribution		Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance

Action 2025-OleanC-10. Pandemic Education and Outreach

Lead Agency:	Common Council										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The City faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The City does not currently have hazard mitigation information and outreach on the City website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include City events, the City newsletters, social media, the City website, and having the materials on display for the public at City libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	City Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the City by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the City.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the City.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the City's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the City</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the City	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the City										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-OleanC-11. Generators at Critical Facilities

Lead Agency:	Engineering		
Supporting Agencies:	Common Council		
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The City Streets Garage (701 Barry Street), John Ash Community Center (112 N Barry Street), and Olean Recreation Center (551 E State Street) do not have back-up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.		
Description of the Solution:	The City Engineer will conduct a study to determine the required generator capacity to support the critical facility. The City will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for the critical facilities and their operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, City Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4, 5		
Benefits:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.		
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.		
Impact on Future Development:	This action results in protection of critical facilities that could support future development.		
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.		
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.		
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives	Action		Evaluation
	No Action		-
	Microgrid		Costly and difficult to implement.
	Solar panels and battery backup		Solar power is unlikely to be able to provide battery power for extended power failure events.

Action 2025-OleanC-12. Undersized Culverts

Lead Agency:	Public Works		
Supporting Agencies:	Code Enforcement, Engineer		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Culverts on Front Street at Johnson Brook are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters. The culvert is at risk of failing and at risk of overtopping in the event of flood waters. Front St is a busy street and one of the two routes from east Olean to West Olean. Front Street is likely to be an evacuation route if east Olean were to be evacuated due to flooding or another hazard.		
Description of the Solution:	The City Engineer will complete an engineering survey of the culverts in City that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The City Public Works will complete the necessary upsizing for the culverts.		
Estimated Cost:	TBD after study is complete		
Potential Funding Sources:	FEMA HMA, CHIPS, City Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.		
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Remove roadway	Roadway cannot be removed	
	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.	

Action 2025-OleanC-13. Two Mile Creek Erosion

Lead Agency:	Engineering		
Supporting Agencies:	Code Enforcement		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The area surrounding Two Mile Creek, from Edgewood Avenue to Homer Street, is prone to flooding, impacting nearby roads and properties. Two Mile Creek has bank erosion issues, threatening encroachment onto nearby roads. Banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.		
Description of the Solution:	The City Engineer will assess the feasibility and cost-effectiveness of various stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements to prevent future flooding surrounding Two Mile Creek.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, City Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage to properties.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development surrounding Two Mile Creek will have its risk of flood impacts reduced.		
Impact on Critical Facilities/Lifelines:	Critical facilities and community lifelines near Two Mile Creek would have a reduced risk to the flood hazard.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events can lead to an influx of water, resulting in flooding conditions.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input checked="" type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Elevate nearby roads		Cost prohibitive
	Acquire all properties which flood		Cost prohibitive

Action 2025-OleanC-14. Kings Brook Erosion

Lead Agency:	Engineering		
Supporting Agencies:	Code Enforcement		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The area surrounding Kings Brook, from Brook Street to Seneca Avenue, is prone to flooding, impacting nearby roads and properties. Kings Brook has bank erosion issues, threatening encroachment onto nearby roads. Banks become eroded due to heavy rains from severe storms, degradation from flood waters and compacted snow and ice from severe winter storms. Stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements, should be considered to prevent flooding. Additional flood mitigation measures may also be considered.		
Description of the Solution:	The City Engineer will assess the feasibility and cost-effectiveness of various stabilization measures, such as including gabions, riprap, drainpipes and/or related improvements to prevent future flooding surrounding Kings Brook.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, City Budget, NYS DEC		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 2		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage to properties.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development surrounding Kings Brook will have its risk of flood impacts reduced.		
Impact on Critical Facilities/Lifelines:	Critical facilities and community lifelines near Kings Brook would have a reduced risk to the flood hazard.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events can lead to an influx of water, resulting in flooding conditions.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input checked="" type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Elevate nearby roads		Cost prohibitive
	Acquire all properties which flood		Cost prohibitive

Action 2025-OleanC-15. Property Flood Mitigation

Lead Agency:	Code Enforcement										
Supporting Agencies:	Common Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Properties in the City have been subject to flooding impacts. On East Riverside Drive 10-20 properties have experienced damages during substantial periods of heavy rain, as well as 10-20 properties on the north end of York Street and additional 10-20 properties have been impacted on West River Road; other properties may be impacted by flooding as well.										
Description of the Solution:	The City will conduct outreach to the impacted properties and will provide information on mitigation alternatives. After preferred mitigation measures are identified, the City will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating of the affected properties that experience frequent flooding. The parameters for this initiative would be funding, benefits versus cost, and willing participation of property owners.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA FMA, FMA SWIFT, City Budget, County Budget, Property Owners										
Implementation Timeline:	3 years										
Goals Met:	1										
Benefits:	This action would foster comprehensive floodplain management by removing at risk properties from the flood hazard area or elevating properties to reduce the flood risk.										
Impact on Socially Vulnerable Populations:	Collecting data regarding homeowners that reside within flood prone areas provides an opportunity to introduce location-specific opportunities for assistance. Socially vulnerable populations may be able to have houses elevated or acquired when it would otherwise be unaffordable.										
Impact on Future Development:	Increased outreach to homeowners within a flood prone area will limit construction in areas that are prone to hazard events. Homes may be acquired, which will remove those structures from the floodplain and prevent future development on those sites.										
Impact on Critical Facilities/Lifelines:	Removing structures from the floodplain decreases the demand on utilities and emergency services including health and medical, law enforcement, and search and rescue.										
Impact on Capabilities:	Outreach which promotes the removal of risk from the immediate floodplain via acquisition of properties will free up resources for search and rescue and other emergency operations as needed. This action will enhance the City's current NFIP capabilities.										
Climate Change Considerations:	Climate change is likely to increase the frequency and severity of severe rainfall, flash flooding, riverine flooding, and coastal flooding from sea level rise and storm surge events. Removing structures from the floodplain will reduce the response and recovery costs as a result of these events and decrease the loss of human life as a result of these events. Elevating structures will reduce the recovery costs.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input checked="" type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Levee around floodplain	Costly, not enough room.										
Deployable flood barriers	Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.										

Action 2025-OleanC-16. Review and Revise Building Codes

Lead Agency:	Code Enforcement										
Supporting Agencies:	Common Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Outdated building codes put new construction at risk during hazard events, as high winds can cause damage to structures, snow loads can impact roofs, and older construction materials may lead a structure to be more susceptible to landslide, severe storm, severe winter storm, and wildfire damages. Swift flowing waters from floods or dam and levee failures can cause structures to buckle or come off its foundation due to the immense pressure.										
Description of the Solution:	The City will review and revise building codes to integrate hazard mitigation principles to create a more resilient community. The City will also use available tools and resources from FEMA and other sources to integrate climate adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document. Updated building codes will meet the minimum requirements set by the State.										
Estimated Cost:	Low										
Potential Funding Sources:	City Budget										
Implementation Timeline:	4 years										
Goals Met:	1, 4										
Benefits:	Mitigation considerations being taken when developing or updating building and zoning codes can lessen the risk of damage from a hazard event and increase overall community resiliency.										
Impact on Socially Vulnerable Populations:	Communities that collaborate and coordinate their regulatory efforts are more likely to have identified ways to best work with vulnerable populations to increase their level of preparedness.										
Impact on Future Development:	Updated building and zoning codes ensure that any new development that does take place is built to the safest standards based upon the best available data.										
Impact on Critical Facilities/Lifelines:	Integrating mitigation into building and zoning protects existing infrastructure and guides the safe development of new construction.										
Impact on Capabilities:	A consolidated review process brings together the capabilities of agencies and departments and better identifies what resources are available at any given point in time and where they are needed most.										
Climate Change Considerations:	As the climate changes, regulatory processes will require a more intense focus on maintenance and gathering of the best data to remain current and accurate over time. The City the adaptation planning such as FEMA's "Climate Adaptation Planning: Guidance for Emergency Managers" document.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Adopt building code without integrating hazard mitigation principles	Will not increase City's resiliency										

Action 2025-OleanC-17. Critical Facility Wildfire and Landslide Mitigation Measures

Lead Agency:	Facility Owners		
Supporting Agencies:	Fire Department, Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire		
Description of the Problem:	South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant, Pines and Eden Heights, as well as high dollar properties are potentially exposed to wildfires and landslides. Protecting these properties and infrastructure from wildfires and landslides is crucial to ensuring continuity of operations and services for their consumers. Exposure to these hazards can cause damage or destruction.		
Description of the Solution:	Assess the site-specific vegetation and slope conditions and determine necessary mitigation measures to protect South Olean water tanks, Stardust Water Tank, Sewage Treatment Plant, Pines and Eden Heights, as well as high dollar properties from wildfires and landslides.		
Estimated Cost:	TBD depending on identified mitigation measures		
Potential Funding Sources:	FEMA HMA, City Budget, Facility Budgets		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 5		
Benefits:	This action will reduce the risk of the wildfire and landslide hazards to critical facilities, ensuring continuity of operations. The continued operation of these facilities is crucial to the facilities' service area.		
Impact on Socially Vulnerable Populations:	Populations living near and working at or near the critical facilities would have enhanced protections from the wildfire and landslide hazards. Services from these critical facilities would remain intact to consumers.		
Impact on Future Development:	Future development near the existing critical facilities would have enhanced protections from the wildfire and landslide hazards.		
Impact on Critical Facilities/Lifelines:	The identified critical facilities, as well as other facilities nearby, would have enhanced protections from the wildfire and landslide hazards. This action will assist in ensuring continuity of operations.		
Impact on Capabilities:	Not applicable		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. Wildfires may be exacerbated by increased extreme heat and drought occurrences; landslide risk may be heightened due to the anticipated increase in frequency of heavy rainfall events which may cause slope instability.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Relocate facilities	Cost prohibitive, not feasible	
	Bring all property locations to 0-percent grade	Cost prohibitive, not feasible	

Action 2025-OleanC-18. City Garage Salt Barn

Lead Agency:	Public Works		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The storage facility for road salt is located at the City Garage site where preparation for plowing and salting operations take place prior to and during severe winter storms. The salt barn structure was built in 1910 and the overall condition of the building is poor. The building is not repairable and should be replaced.		
Description of the Solution:	The City will demolish existing salt barn. The City Engineer will work with Public Works to scope and replace the salt barn with a structurally sound and weather-proof structure to protect the City salt supply for winter storm response on same site.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, City Budget		
Implementation Timeline:	Within 2-3 years		
Goals Met:	1, 4, 5		
Benefits:	This action will support the continuity of operations for the critical services within the City, including the Public Works Department and first responders. The Public Works Department will maintain its capability to provide road treatments in time of need, ensuring roads are accessible for first responders and regular travelers.		
Impact on Socially Vulnerable Populations:	Vulnerable populations will have access to maintained roads, ensuring safe travel,		
Impact on Future Development:	Individuals living within future development in the City will have access to safe, treated roadways.		
Impact on Critical Facilities/Lifelines:	The construction of this structure will enhance the transportation lifeline by ensuring roads are safe to traverse during severe winter storms. Furthermore, it will create an additional critical facility.		
Impact on Capabilities:	This action will ensure the Public Works Department is able to maintain its capabilities.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events would further expose materials stored outside to the elements, degrading not just the materials, but pushing them into the environment, potentially disrupting the ecosystem.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Build salt barn in a new location		No problem with current location
	Make improvements not demolish		Building is beyond repair

Action 2025-OleanC-19. Wireless WAN Tower

Lead Agency:	Engineering		
Supporting Agencies:	Common Council		
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The City's wireless Wide Area Network (WAN), which provides phone communication and internet connectivity to all City facilities, is housed on top of a private building and does not have backup power on site. Loss of power at the private building results in losses of phone and internet communication in City facilities. Critical facilities require backup power to ensure continuity of operations. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.		
Description of the Solution:	The City will decommission the existing wireless communication equipment and relocate to a City property at the Water Reservoir Site in South Olean. New communication equipment will be installed at this site. The City Engineer will conduct a study to determine the required generator capacity to support the property at the Water Reservoir Site. The City will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for the critical facilities and their operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, City Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4, 5		
Benefits:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.		
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.		
Impact on Future Development:	This action results in protection of critical facilities that could support future development.		
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.		
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.		
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives	Action	Evaluation	
	No Action	-	
	Microgrid	Costly and difficult to implement.	

	Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.
--	---------------------------------	--

DRAFT

Action 2025-OleanC-20. City of Olean Fire Department Flood Preparedness

Lead Agency:	Fire Department										
Supporting Agencies:	Common Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Heavy rains contributes to instances of flooding and flash flooding within the City, which can result in the entrapment of individuals in high or swift-moving floodwaters. The City of Olean Fire Department is underequipped to handle a medium-to-large-scale flooding incident with entrapment or people in the water.										
Description of the Solution:	Increase the number of fire department members which are trained and equipped to mitigate and respond to flooding events by offering the Swiftwater/Flood Rescue Technician course. Purchase the appropriate PPE to respond to flood and flash flooding events.										
Estimated Cost:	Medium										
Potential Funding Sources:	City Budget, Fire Department Budget, Assistance to Firefighter's Grant, HSGP										
Implementation Timeline:	Within 4 years										
Goals Met:	1										
Benefits:	This action will support the safety of the City by providing new training and equipment for the City's Fire Department to effectively respond to flooding incidents and remove individuals from harm's way.										
Impact on Socially Vulnerable Populations:	The City population will be supported by the new capability of the Fire Department as a result of this action. Individuals who may find themselves in comprising locations during flooding and flash flooding events will have increased likelihood to be safely removed from the predicament.										
Impact on Future Development:	Persons in future development will be supported by the new capability from this action.										
Impact on Critical Facilities/Lifelines:	This action will strengthen the City's safety and security lifeline by increasing the Fire Department's capabilities.										
Impact on Capabilities:	This action will create a new capability for the City by ensuring the City's emergency response personnel have the necessary training and equipment to conduct Swiftwater rescue operations.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action will ensure the City's emergency response personnel have the necessary training and equipment to conduct Swiftwater rescue operations.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)										
Priority	<input type="checkbox"/> High <input checked="" type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Train staff but do not purchase necessary equipment and/or PPE</td><td>Response capability would be halfway fulfilled</td></tr><tr><td>Purchase necessary equipment and/or PPE but do not train staff</td><td>Response capability would be halfway fulfilled</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Train staff but do not purchase necessary equipment and/or PPE	Response capability would be halfway fulfilled	Purchase necessary equipment and/or PPE but do not train staff	Response capability would be halfway fulfilled
Action	Evaluation										
No Action	Current problem exists										
Train staff but do not purchase necessary equipment and/or PPE	Response capability would be halfway fulfilled										
Purchase necessary equipment and/or PPE but do not train staff	Response capability would be halfway fulfilled										

Action 2025-OleanC-21. Water Distribution System Improvements

Lead Agency:	Public Works		
Supporting Agencies:	Cattaraugus County Public Works		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The water line on Washington Street is outdated and undersized and needs to be replaced. Existing lines often break due to extreme cold events, resulting in constant leaks and the need to replace lines. The disruption of utility services puts strain on the water system and its users.		
Description of the Solution:	The City will work with the County to replace the waterline with a 4000' water line on Washington Street.		
Estimated Cost:	Medium		
Potential Funding Sources:	City Budget, County Budget, FEMA HMA		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4		
Benefits:	This action will ensure the continued, uninterrupted services provided to City residents and businesses.		
Impact on Socially Vulnerable Populations:	Populations which are serviced by this water line will have continued utility services.		
Impact on Future Development:	Future development in the vicinity of Washington Street will be supported by the infrastructure.		
Impact on Critical Facilities/Lifelines:	This action will support the continuity of operations for the water systems lifeline.		
Impact on Capabilities:	This action will ensure utilities in the City are adequate to support the community.		
Climate Change Considerations:	Climate change is likely to result in fluctuating temperatures. Shifts from warmer to colder temperatures can shock infrastructure and cause pipes to expand and contract rapidly, causing deterioration to occur quicker than anticipated.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Replace the water line with same size piping	May still result in disruption to service	
	Do not add insulation to installed pipes	Continued deterioration may occur after pipe insulation due to cold temperature exposure	

Action 2025-OleanC-22. Dam and Levee Owner Partnership

Lead Agency:	Common Council										
Supporting Agencies:	NYS DEC, Dam Owners, Levee Owners										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The City has levees within its jurisdiction, and nearby dams which may impact the City. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.										
Description of the Solution:	The City will work with the owners of the dams and levees to ensure inspections and safety procedures are up to date. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Dam and/or Levee Owner will pursue funding support, permit approval from NYS DEC, and implement the cost-effective measures.										
Estimated Cost:	Low										
Potential Funding Sources:	City Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3										
Benefits:	This action will improve the safety and security of those who live near the dams and/or levees and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness for those living near areas where the dams and/or levees are located.										
Impact on Future Development:	Future development near the dams and/or levees will be more secure as safety procedures and inspections are regularly performed on the dams.										
Impact on Critical Facilities/Lifelines:	Dams and levees are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dams and/or levees, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam and/or levee failure event. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>City will be unaware of any safety concerns for the dam and/or levee or its condition</td> </tr> <tr> <td>Utilize information from NYS DEC</td> <td>Owners may not be required to submit a safety plan to the State</td> </tr> <tr> <td>Utilize information from National Inventories</td> <td>Not all dams and levees are listed on the inventory</td> </tr> </tbody> </table>			Action	Evaluation	No Action	City will be unaware of any safety concerns for the dam and/or levee or its condition	Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State	Utilize information from National Inventories	Not all dams and levees are listed on the inventory
Action	Evaluation										
No Action	City will be unaware of any safety concerns for the dam and/or levee or its condition										
Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State										
Utilize information from National Inventories	Not all dams and levees are listed on the inventory										

Action 2025-OleanC-23. Water and Wastewater Infrastructure Redundancies

Lead Agency:	Facility Managers		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	Water and wastewater facilities in the City are vulnerable to the utility failure hazard, as the majority of the existing infrastructure have various single point of failure vulnerabilities, meaning that if a part of a system were to stop working, the entire system would fail.		
Description of the Solution:	The City Engineer will work with facility managers at each identified water and wastewater facility to identify their facility's single point(s) of failure. Once identified, the facility managers will consult with the City engineer, or a contracted engineer, to implement a back-up or redundancy option which would allow the facility to continue operations should the single point fail.		
Estimated Cost:	TBD depending on identified measures		
Potential Funding Sources:	FEMA HMA, City Budget, Facility Budgets		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 5		
Benefits:	This action will assist in ensuring continuity of operations at critical water and wastewater infrastructure across the City.		
Impact on Socially Vulnerable Populations:	Populations which rely on the services from the critical facilities would have enhanced protections from losing those services.		
Impact on Future Development:	Future development which receive services from the critical facilities will have enhanced protections from losing those services.		
Impact on Critical Facilities/Lifelines:	The identified critical facilities, as well as other facilities nearby, would have enhanced protections from the utility failure hazard. This action will assist in ensuring continuity of operations.		
Impact on Capabilities:	Redundancies at critical facilities can ensure power is not lost and the services provided to the community are continuous.		
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. Several hazards of concern, including severe storm, severe winter storm, wildfire, landslide, flood, and dam and levee failure can contribute to utility failures.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Problem persists
	Construct new facilities		Cost prohibitive, not necessary
	Identify back-up facilities to provide services if operations go down		Providers may not be able to extend services or have bandwidth for additional consumers

Action 2025-OleanC-24. Bridge Construction Feasibility

Lead Agency:	Engineering										
Supporting Agencies:	Public Works, NYS DOT, NYS DEC										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	There is only one bridge existing in the City which provides access to the Southern portion of the City; this bridge is located on South Union Street. If an evacuation is required, or if the bridge becomes damaged from flooding conditions or from impacts as a result of severe storms, this single route may be unable to assist in the movement of persons and goods from or into the City.										
Description of the Solution:	The City Engineer, in partnership with NYS DOT, NYS DEC, and Cattaraugus County Public Works, will evaluate the need and feasibility of constructing a secondary bridge over the Allegany River.										
Estimated Cost:	High										
Potential Funding Sources:	NYS DOT, City Budget										
Implementation Timeline:	5+ years										
Goals Met:	1										
Benefits:	This action will create a secondary transportation route to the southern portion of the City, ensuring accessibility to traditional vehicle operators and emergency services.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations reach necessary services provided by the City.										
Impact on Future Development:	Future development in the impacted area will be able to access critical facilities and community lifelines.										
Impact on Critical Facilities/Lifelines:	Ensures transportation routes remain open and accessible to the public for daily use and evacuation needs. Provides an additional point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridge.										
Impact on Capabilities:	Increases community resiliency to flooding events in vulnerable areas that would normally be vulnerable to prolonged isolation after high-water events.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. The South Union Street Bridge may become eroded due to flood waters from the Allegany River; a secondary bridge would ensure a route is maintained out of the City to the South.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Problem persists</td></tr><tr><td>Bridge construction outside of jurisdiction</td><td>Problem may still persist</td></tr><tr><td>Build pedestrian bridge</td><td>Evacuation or movement of goods via foot not feasible</td></tr></tbody></table>			Action	Evaluation	No Action	Problem persists	Bridge construction outside of jurisdiction	Problem may still persist	Build pedestrian bridge	Evacuation or movement of goods via foot not feasible
Action	Evaluation										
No Action	Problem persists										
Bridge construction outside of jurisdiction	Problem may still persist										
Build pedestrian bridge	Evacuation or movement of goods via foot not feasible										

Action 2025-OleanC-25. Community Wildfire Protection Plan Development

Lead Agency:	City Fire Department										
Supporting Agencies:	City Administration										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The City does not have a Community Wildfire Protection Plan. A Community Wildfire Protection Plan assists in addressing issues such as wildfire response, hazard mitigation, community preparedness, and structure protection.										
Description of the Solution:	The City will update the Community Wildfire Protection Plan collaboratively with government representatives, in consultation with federal agencies and other interested parties.										
Estimated Cost:	Low										
Potential Funding Sources:	City Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4, 6										
Benefits:	This action will create a capability to address issues such as wildfire response, hazard mitigation, community preparedness, and structure protection.										
Impact on Socially Vulnerable Populations:	This action will provide socially vulnerable populations an opportunity to be involved in the planning process, as a key element in community fire planning should be the meaningful discussion it promotes among community members regarding their priorities for local fire protection and forest management.										
Impact on Future Development:	This action may identify areas in which future development should be restricted due to vulnerability to the wildfire hazard.										
Impact on Critical Facilities/Lifelines:	This action will identify critical facilities and community lifelines located within the wildland-urban interface and are vulnerable to the wildfire hazard.										
Impact on Capabilities:	This action will create a new planning capability.										
Climate Change Considerations:	Higher temperatures are expected to increase the amount of moisture that evaporates from land and water. These changes have the potential to lead to more frequent and severe droughts, which, in turn, increases the likelihood of wildfires.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Problem persists</td> </tr> <tr> <td>Create without collaborative input</td> <td>Plan will not meet minimum HFRA requirements</td> </tr> <tr> <td>Abandon Community Wildfire Protection Plan</td> <td>Reduction in wildfire capabilities</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Problem persists	Create without collaborative input	Plan will not meet minimum HFRA requirements	Abandon Community Wildfire Protection Plan	Reduction in wildfire capabilities		
Action	Evaluation										
No Action	Problem persists										
Create without collaborative input	Plan will not meet minimum HFRA requirements										
Abandon Community Wildfire Protection Plan	Reduction in wildfire capabilities										

33. TOWN OF OLEAN

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Olean with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Olean, describes who participated in the planning process, assesses Olean's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

33.1 HAZARD MITIGATION PLANNING TEAM

The Town of Olean identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and Core Planning Group and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 33-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 33-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Patrick Zink, Highway Superintendent Address: 1948 Godfrey Hollow Rd, Olean, NY 14760 Phone Number: (716) 372-1060 Email: townofoleanhighway@gmail.com	Name/Title: Annette M Parker, Supervisor Address: 2634 RT 16 North, Olean, NY 14760 Phone Number: (716) 373-0582 Email: oleanownersupervisor@gmail.com

33.2 COMMUNITY PROFILE

The Town of Olean lies on the southeast border of Cattaraugus County in western New York State. The Town of Olean has a total area of 29.7 square miles. The Allegheny River flows west through the town. The town is bordered to the north by the Town of Hinsdale, to the west is the Town of Allegany, and to the east is the Town of Portville. According to the U.S. Census, the 2020 population for Olean was 1,881.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 2.9 percent of the population is 5 years of age or younger, 26.1 percent is 65 years of age or older, zero percent is non-English speaking, 13.9 percent is below the poverty threshold, and 17.1 percent is considered disabled.

33.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Olean performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Olean to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

33.3.1 Planning and Regulatory Capability and Integration

Table 33-2 summarizes the planning and regulatory tools that are available to Olean.

Table 33-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 3, 2023: NYS Uniform Fire and Building Code	State and Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk? Code applies to construction, alteration, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.				
Zoning/Land Use Code	Yes	Zoning Law, 2000	Local	Code Enforcement
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
<p>For the purposes of promoting the public health, safety, and welfare; conserving and protecting property and property values; securing the most appropriate use of land; lessening or avoiding congestion in the public streets and highways; securing safety from fire, flood, panic, and other dangers; providing adequate light and air; preventing the overcrowding of land and avoiding undue concentration of people; facilitating the practice of forestry; facilitating the adequate but economical provision of public improvements; and minimizing flood losses in areas subject to periodic inundation the Town Board of the Town of Mansfield finds it necessary and advisable to regulate the location, size, and use of buildings and other structures and the use of land for trade, industry, residencies, recreation, or other purposes and for such purposes divides the unincorporated area of the Town into districts or zones.</p>				
Subdivision Code	Yes	Zoning Law, 2000	Local	Code Enforcement
<p>How has or will this be integrated with the HMP and how does this reduce risk? Empowers local authoritative body to approve plats showing lots, blocks or sites, with or without streets or highways, to approve the development of entirely or partially undeveloped plats already filed and to approve preliminary plats within jurisdictional boundaries. This ensures that all approved plats for land development fall within local rules and regulations for environmental preservation, building code standards and wildfire protection ordinances.</p>				
Site Plan Code	Yes	Zoning Law, 2000; Article 10: Site Plan Review	Local	Planning Board
<p>How has or will this be integrated with the HMP and how does this reduce risk? The purpose of this article if to ensure that any new development or substantial redevelopment in the Town of Olean is in harmony with the character of the Town and that such development meets the guidelines establish ed in the Town's Comprehensive Master Plan and Rural Development Policies. An additional purpose is to minimize conflicts between future development and neighboring existing uses and natural features of the site; this will minimize any potential adverse effects to the health, safety, and general welfare of the residents of the Town of Olean.</p>				
Stormwater Management Code	Yes	Zoning Law, 2000; Article 9, Section 9.13 Stormwater Management and Erosion Control	Local	Code Enforcement
<p>How has or will this be integrated with the HMP and how does this reduce risk? The intent and purpose of this section is to protect, maintain, and enhance both the immediate and long-term health, safety, and welfare of the residents of the Town of Olean. In order to achieve these goals, this sections has the following objectives:</p> <ol style="list-style-type: none"> (1) To prevent increases in the magnitude and frequency of stormwater runoff, so as to prevent an increase in flood flows and in the hazards and costs associated with flooding, (2) To maintain the integrity of stream geometry so as to sustain the hydrologic functions of streams, and (3) To control erosion and sedimentation so as to prevent its deposition in streams and other receiving bodies. 				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p>				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
<p>How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.</p>				
Growth Management	No	-	-	-
<p>How has or will this be integrated with the HMP and how does this reduce risk?</p>				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Environmental Protection Ordinance(s)	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?

Flood Damage Prevention Ordinance	Yes	Local Law 1, 2000: Flood Damage Prevention	Local	Town Supervisor
How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.

33.3.2 Development and Permitting Capability

Table 33-3 summarizes the capabilities of Olean to oversee and track development.

Table 33-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?	Yes	Code Enforcement
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 		
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain

	Yes/No	Comment
Do you have a buildable land inventory?	No	-
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		
Describe the level of buildout in your jurisdiction.	N/A	50% buildable

33.3.3 Administrative and Technical Capability

Table 33-4 summarizes potential staff and personnel resources available to Olean and their current responsibilities that contribute to hazard mitigation.

Table 33-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested by Section 267 of NYS Town Law, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Code Enforcement Officer charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Code Enforcement Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Economic Development Commission/Committee	Yes	Town Board
Public Works/Highway Department	Yes	Highway Department: <ul style="list-style-type: none">• Maintain 33 miles of road• Plow snow• Mow and trim grass, weeds, and brush• Maintain and repair equipment and vehicles• Maintain road signs• Assist other agencies during natural disasters• Maintain and clean roadside ditches• Maintain drainage and culvert pipes• Pave, patch, and resurface roadways• Removed downed trees• Maintain guiderails• Assist other municipalities through shared services
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and issues permits.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Fire Departments/Town Board
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	Code Enforcement
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Surveyors	Yes	Code Enforcement performs site inspections. In terms of land surveying, the Town does not have this capability.
Emergency manager	No	-
Grant writers	Yes	Municipal Solutions
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

33.3.4 Fiscal Capability

Table 33-5 summarizes financial resources available to Olean.

Table 33-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	No
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

33.3.5 Education and Outreach Capability

Table 33-6 summarizes the education and outreach resources available to Olean.

Table 33-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Town Supervisor
Personnel skilled or trained in website development	Yes	Southern Tier West
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-

Outreach Resources	Available? (Yes/No)	Comment
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	Local Fire Department
Natural disaster/safety programs in place for schools	Yes	Fire and Severe Storm programs
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

33.3.6 Community Classifications

Table 33-7 summarizes classifications for community programs available to Olean.

Table 33-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

33.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 33-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 33-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

33.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 33-1 is responsible for maintaining this information.

33.4.1 NFIP Statistics

Table 33-9 summarizes the NFIP policy and claim statistics for Olean.

Table 33-9. Olean NFIP Summary of Policy and Claim Statistics

# Policies	18
# Claims (Losses)	26
Total Loss Payments	\$329,532.00
# Repetitive Loss Properties (NFIP definition)	3
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

33.4.2 Flood Vulnerability Summary

Table 33-10 provides a summary of the NFIP program in Olean.

Table 33-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	River Basin (East and West River Rd) Watershed areas Flood plains
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	None
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Site visits and repair estimates after events
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Zero declared
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Yes
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, the County has a GIS department capable of analyzing future flooding conditions.
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	Yes, training and funding is needed.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	None
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Building permits. Construction costs
What are the barriers to running an effective NFIP program in the community, if any?	Funding and Staffing
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: April 17, 1998 CAV: September 8, 2011

NFIP Topic	Comments
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law 1, 2000: Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	February 8, 2000
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Yes. Site Plan Review
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

33.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 33-11 through Table 33-13.

Table 33-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	4	0	0	4
Permits within SFHA	0	0	0	0
2020				
Total Permits	2	0	1	3
Permits within SFHA	0	0	0	0
2021				
Total Permits	3	0	1	4
Permits within SFHA	0	0	0	0
2022				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2023				
Total Permits	2	0	0	2
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 33-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There has been no recent major development or infrastructure between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 33-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
Wind Farm	Industrial	1	Unknown	None	Leases being acquired but construction not started
Solar Farms	Industrial	3	Unknown	None	Application process begun but construction not started

33.6 JURISDICTIONAL RISK ASSESSMENT

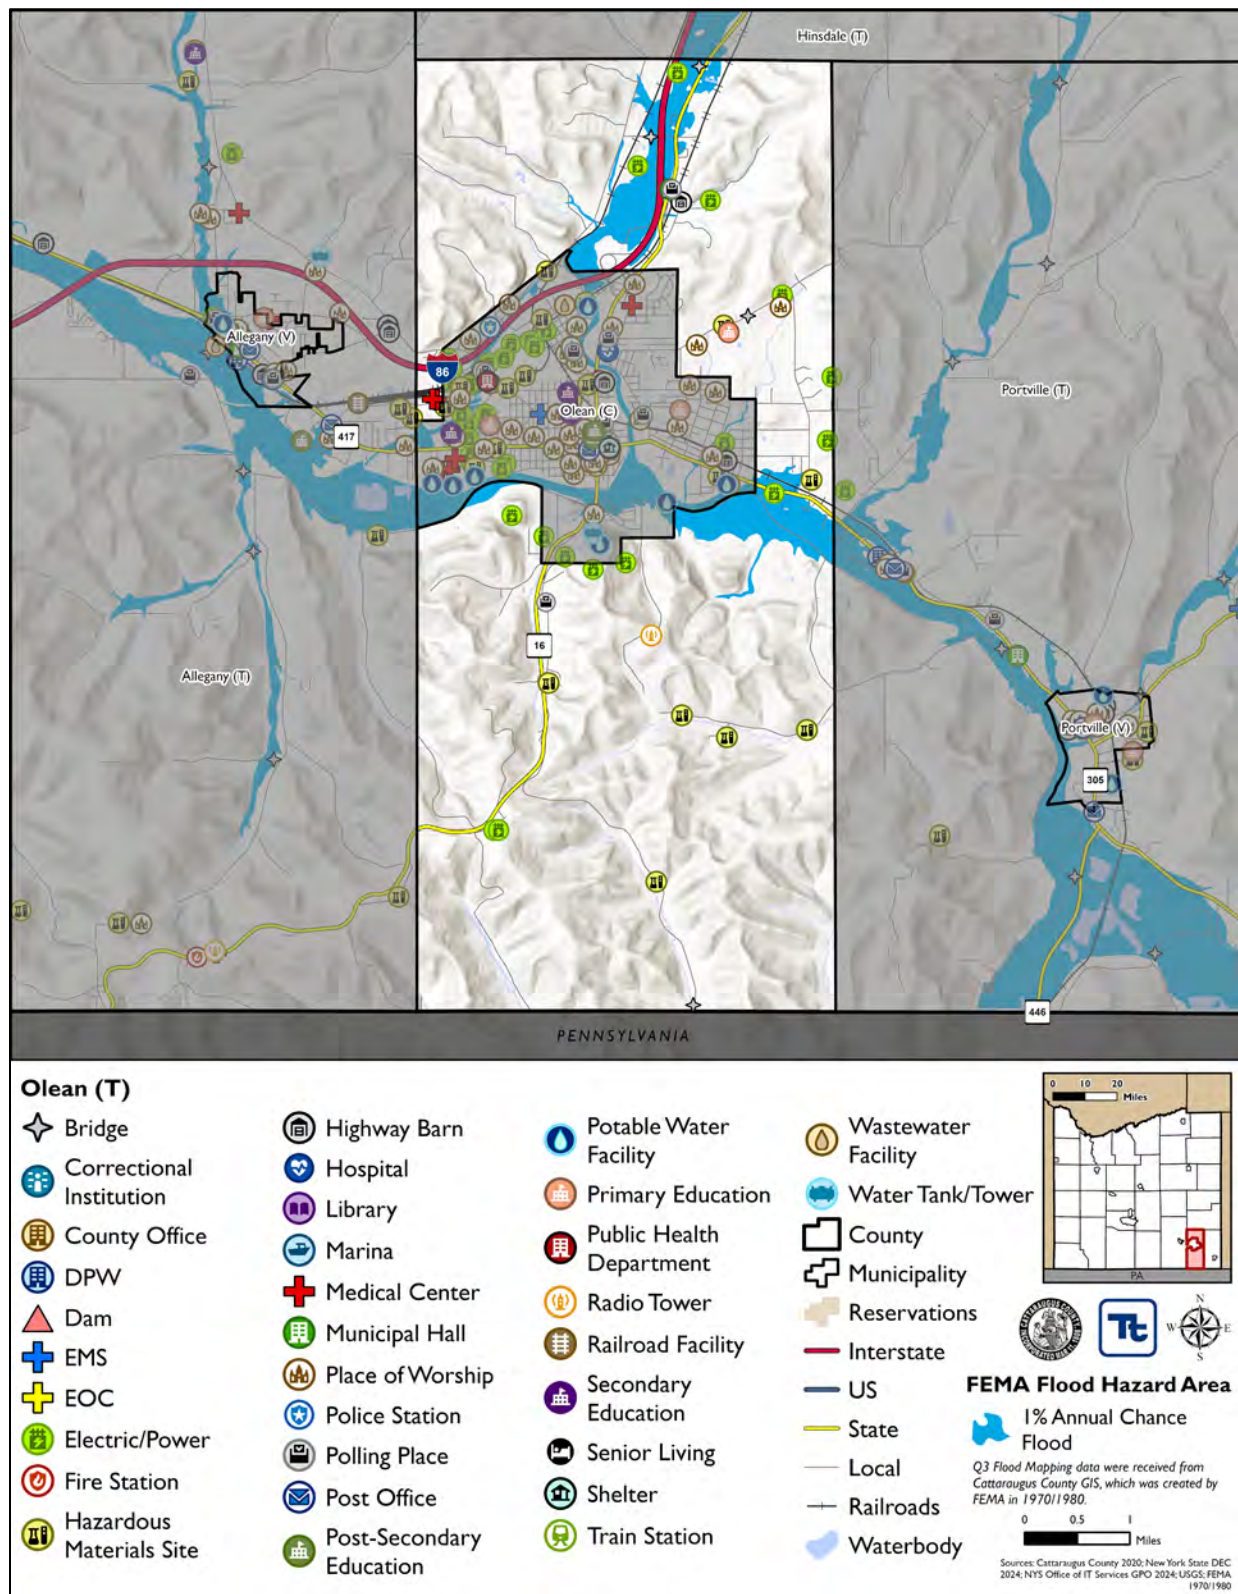

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Olean's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

33.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 33-1 through Figure 33-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Olean has significant exposure. The maps show the location of potential new development, where available.

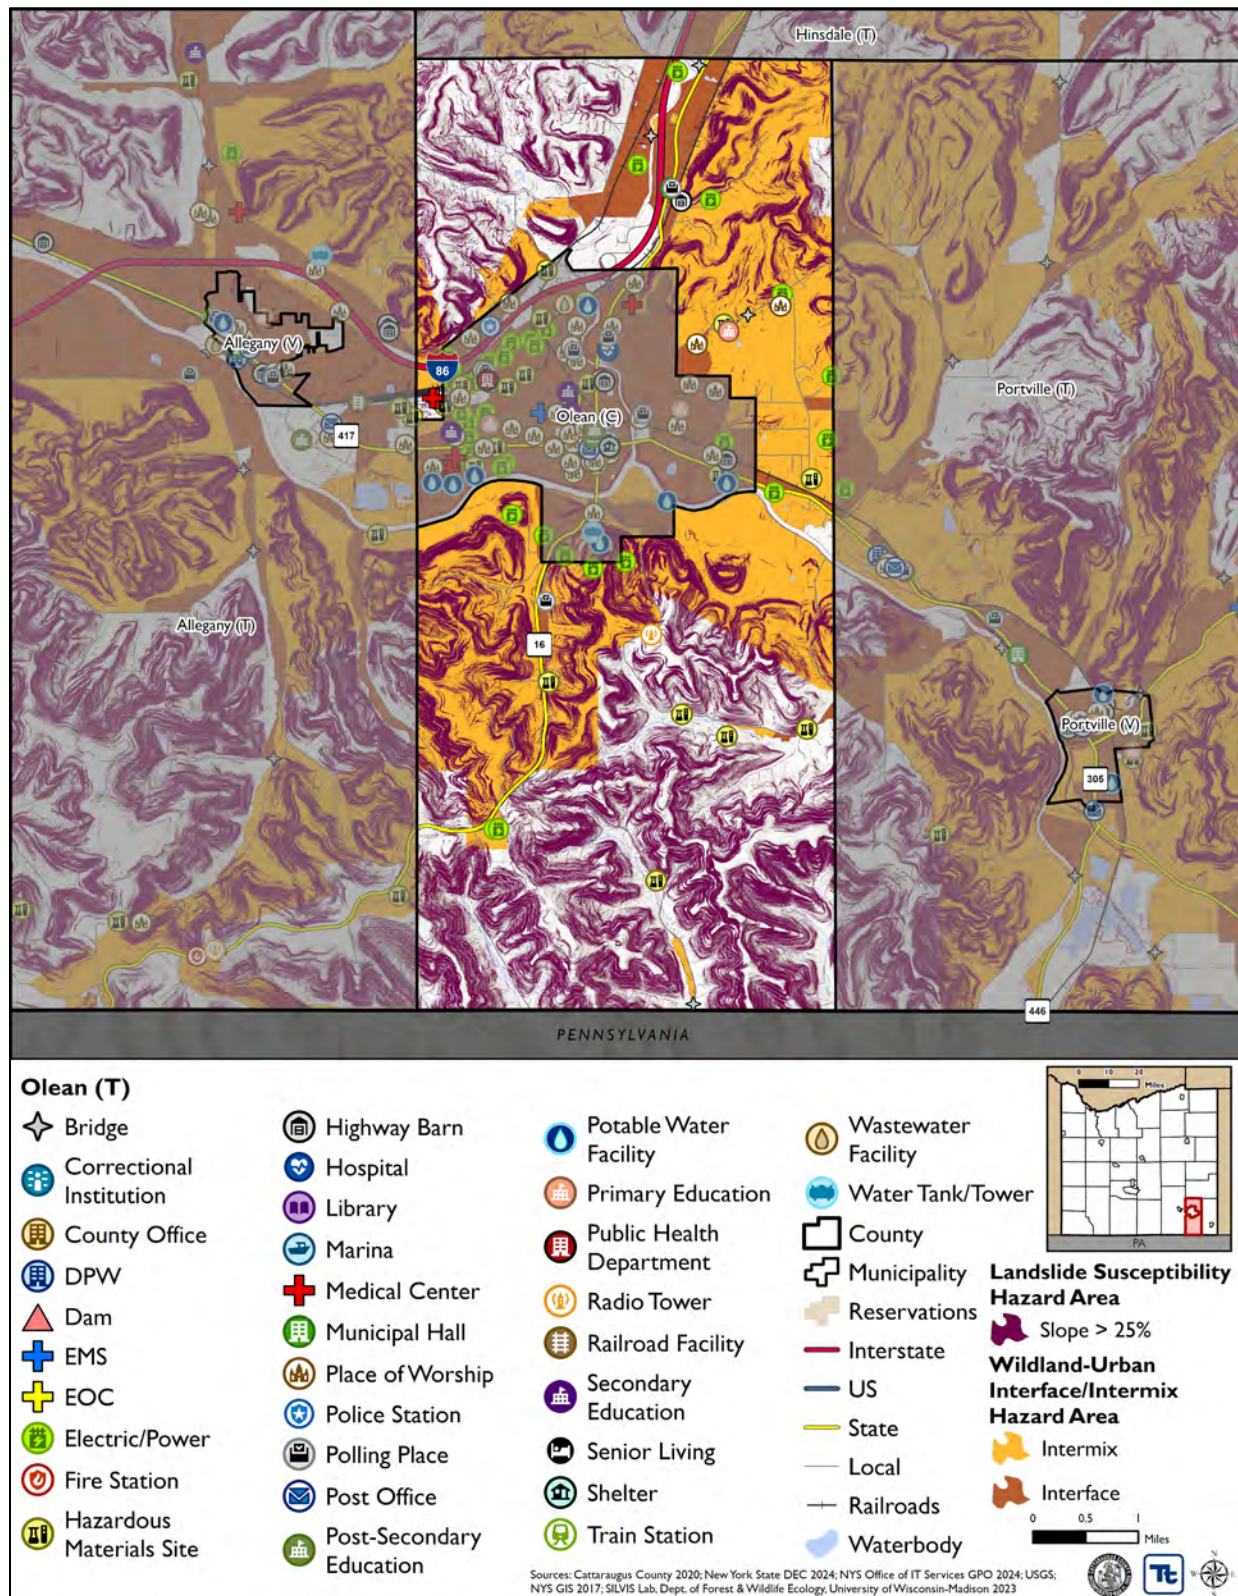

Figure 33-1. Olean Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 33-2. Olean Wildfire Hazard Area Extent and Location Map

33.6.2 Hazard Event History

The history of natural and non-natural hazard events in Olean is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 33-14 provides details on loss and damage in Olean during hazard events since the last hazard mitigation plan update.

Table 33-14. Hazard Event History in Olean

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Olean
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town experienced roadside washouts along McCann Hollow Road, Oregon Road, and Steam Valley Road.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town Highway Dept. Staff worked with minimal staff on a rotating every other week schedule. Only basic services provided due to minimal staffing.
January 12, 2020	High Wind	N/A	High wind	The Town did not experience any documented damages or losses.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town did not experience any documented damages or losses.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town experienced roadside washouts and flooding along Back Hinsdale Road, Oregon Road, and Steam Valley Road.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not experience any documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town experienced trees and power lines down along McDuffy Road.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town did not experience any documented damages or losses.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not experience any documented damages or losses.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Olean
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town did not experience any documented damages or losses.
February 18, 2022	Heavy Rain, Flooding	N/A	Multiple roadside washouts and water on roadways from excessive snow melt and rain	The Town experienced roadside washouts and flooding along Indiana Avenue, Steam Valley Road, Mueller Road, McCann Hollow Road, and Godfrey Hollow Road.
March 6, 2022	High Wind	N/A	High wind	The Town did not experience any documented damages or losses.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not experience any documented damages or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town did not experience any documented damages or losses.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

33.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Olean.

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Olean reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the hazard ranking was accurate.

Table 33-15 shows Olean's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 33-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Low
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 33-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 33-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event

Source: Cattaraugus County 2024

33.6.4 Identified Issues

After a review of Olean's hazard event history, hazard rankings, hazard location, and current capabilities, Olean identified the following vulnerabilities within the community:

- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Valley View Road
 - East River Road
 - Godfrey Hollow Road
 - McCann Hollow Road
 - Blakeslee Hollow Road

- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Oakes Road
 - Shott Avenue
 - Fairview Avenue
 - Hastings Road
 - Route 16 North
 - Route 417 East
 - East River Road
 - West River Road
- The following critical facilities are located in the special flood hazard area and may have an increased risk to flooding impacts:
 - National Fuel Gas District
 - Niagara Mohawk Power Corp
- The Town Hall, Highway Garage, and Fire Department located in the Town do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Landslide conditions exist along Stream Valley Road and Indiana Avenue. Landslides may be able to be mitigated by cutting banks to prevent erosion.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Frequent flooding events have resulted in damages to residential properties. 40 properties along East and West River Roads are exposed to flooding and the Town has three repetitive loss properties, but other properties may be impacted by flooding as well.

- The Town does not have a Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - Godfrey Hollow Road
 - McCann Hollow Road
 - Steam Valley Road
 - Oregon Road
 - Indiana Avenue
 - Mueller Road
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Olean 12
 - Olean 20

33.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

33.7.1 Past Mitigation Action Status

Table 33-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

33.7.2 Additional Mitigation Efforts

In addition to the mitigation actions completed in Table 33-17, Olean identified the following mitigation efforts completed since the last HMP:

- A large box culvert was replaced in 2023 at the intersection of Hastings Road and Back Hinsdale Road. Culvert project was funded with a Bridge NY grant awarded in 2018.

Since the adoption of the County's first HMP, Olean has made significant mitigation progress in the following areas:

- Stormwater management

Table 33-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Town of Olean-001	Replace culverts in the Town of Olean on Back Hinsdale/Valley View, East River Rd at or near 1998, 1754, and 1700, Godfrey Hollow Rd, McCann Hollow Rd, and Blakeslee Hollow Rd.	Flood, Severe Storm	Engineer, Highway Department	<p>Problem: Culverts in the town are outdated and undersized and needs to be replaced along Back Hinsdale/Valley View, East River Rd, Godfrey Hollow Rd, McCann Hollow Rd, and Blakeslee Hollow Rd.</p> <p>Solution: The town will replace and upsize the repetitively damaged/undersized culverts, following an engineering study to determine the appropriate size upgrades.</p>	<p>1. In Progress</p> <p>2. A large box culvert was replaced in 2023 at the intersection of Hastings Road and Back Hinsdale Road. Culvert project was funded with a Bridge NY grant awarded in 2018. Godfrey Hollow Culvert has been funded with a Bridge NY grant. Anticipated construction to begin in 2026. Preliminary work on the project has commenced.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Town of Olean-002	Protect the National Fuel Gas District to the 0.2% annual chance flood event.	Flood	FPA	<p>Problem: The National Fuel Gas District is in the special flood hazard area and vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood event.</p> <p>Solution: the FPA will contact the facility manger to discuss the facilities flood exposure and possible mitigation actions to protect the facility to the 0.2% annual chance flood event.</p>	<p>1. No Progress</p> <p>2. Town focused on other priority projects.</p>	<p>1. Include</p> <p>2. Update to include any additional critical facilities.</p> <p>3. Not applicable</p>
2020-Town of Olean-003	Generator for Town Hall and Highway Garage	All Hazards	Town Board, Engineer	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. Town Hall and Highway Garage lack a permanent power source. The Town Hall location houses the Town Hall, Court, and</p>	<p>1. No Progress</p> <p>2. Funding has limited progress on this action.</p>	<p>1. Include</p> <p>2. Consolidate back-up generator actions.</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				<p>Clerk. The Highway Garage houses highway equipment and vehicles.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Town Hall and Highway Garage. The town will then install a backup power generator and necessary electrical components.</p>		
2020-Town of Olean-004	Landslide study along Stream Valley and Old Rock City Road	Landslide	Engineer	<p>Problem: Landslide conditions exist along Stream Valley.</p> <p>Solution: Conduct landslide study to determine landslide risk and potential mitigation actions.</p>	<p>1. No Progress 2. Funding has limited progress on this action.</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-Town of Olean-005	Generator for Town of Olean Fire Department	All Hazards	Engineer, OEM, Fire Department	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. Fire Department lacks a permanent power source. The Fire Department houses the firefighters and fire trucks.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Fire Department. The town will then install a backup power generator and necessary electrical components.</p>	<p>1. No Progress 2. Funding has limited progress on this action.</p>	<p>1. Include 2. Consolidate back-up generator actions. 3. Not applicable</p>
2020-Town of Olean-006	Steam Valley access	Flood, Severe Storm	Soil and Water Conservation District, Engineer	<p>Problem: Steam Valley Road has limited access during flooding. Roads are prone to washout during heavy rain events.</p>	<p>1. No Progress 2. Other Town priorities have resulted in no progress on this action.</p>	<p>1. Include 2. Combine with other flood prone road actions 3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: Conduct an engineering study to determine the best action to mitigate flooding and allow road access during flooding. Carry out the identified action.		
2020-Town of Olean-007	Update Flood Damage Prevention Ordinance	Flood	Town board	Problem: The town lacks and updated flood damage prevention ordinance. Solution: The town will develop an updated flood damage prevention ordinance.	1. No Progress 2. Other Town priorities have resulted in no progress on this action.	1. Include 2. Not applicable 3. Not applicable
2020-Town of Olean-008	Floodplain Administrator to attend training on floodplain management	Flood	Cattaraugus County Emergency Management/ Cattaraugus County Codes Department	Problem: Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Solution: Obtain/host training and certification for floodplain managers.	1. No Progress 2. Other Town priorities have resulted in no progress on this action.	1. Include 2. Not applicable 3. Not applicable
2020-Town of Olean-009	Provide information to residents, business owners, and organizations about what they can do to prevent their structures from wildfires.	Wildfires	Town board	Problem: Additional public education on wildfire risk is needed. Solution: the town will develop an outreach program to educate the public about wildfires and what they can do to protect their structures.	1. No Progress 2. Other Town priorities have resulted in no progress on this action.	1. Include 2. Change to outreach program for all hazards. 3. Not applicable
2020-Town of	Relocation or elevation of Town Hall	Flood, Severe Storm	Town Board, FPA, Engineer	Problem: Town Hall located at 2634 Rt 16 is in the floodplain and exposed to flooding. Town Hall is a critical	1. Completed	1. Discontinue 2. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
Olean-010				facility and needs to be protected to the 0.2% annual chance flood event. Solution: Conduct an engineering study to determine best action (relocation or elevation) to protect Town Hall from flooding.	2. Facility was not identified as being located in the flood hazard area.	3. Facility was not identified as being located in the flood hazard area.
2020-Town of Olean-011	Relocation or elevation of properties along East and West River Rd	Flood, Severe Storm	FPA	Problem: 40 properties along East and West River Roads are exposed to flooding. Solution: Conduct an Engineering Study to determine best action (elevation or relocation) of properties to protect them from flooding. Work with property owners to implement the selected actions.	1. No Progress 2. Other Town priorities have resulted in no progress on this action.	1. Include 2. Not applicable 3. Not applicable
2020-Town of Olean-012	Trim tree limbs away from buildings and structures.	Storms (Ice, winter, severe), tornadoes	Municipalities and Hwy Dept	Problem: The town does not have a tree trimming program in place. It is unknown the safety of trees throughout the town. During wind events or heavy snow, falling tree branches can damage utilities and private property. Solution: The town will develop a tree trimming maintenance program and remove trees that pose a threat to structures.	1. Completed 2. The Town's Highway Department has this capability.	1. Discontinue 2. Not applicable 3. Existing capability
2020-Town of Olean-013	Update the Emergency Operations Plan.	All Hazards	County, Town	Problem: The town has an outdated Emergency Operations Plan.	1. No Progress 2. Town indicated in capabilities it does not have a CEMP and utilizes the County's.	1. Include 2. Change action to develop a CEMP 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: The town will update town's Emergency Operation Plan to include current hazards.		
2020-Town of Olean-014	Update Building Code	All Hazards	County, Town	<p>Problem: Building codes are outdated in the town.</p> <p>Solution: The town will update building codes, so buildings are built to withstand hazards they face.</p>	<p>1. Ongoing Capability</p> <p>2. Town codes are reviewed and updated on a scheduled basis</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. Town capability</p>
2020-Town of Olean-015	Erosion control of Godfrey Hollow Rd, McCann Hollow Rd, Steam Valley Rd, and Oregon Rd	Severe Storm, Flood	Highway Department	<p>Problem: Erosion of roadside ditches along Godfrey Hollow Rd, McCann Hollow Rd, Steam Valley Rd, and Oregon Rd due to heavy rain events.</p> <p>Solution: The town will place riprap along roadside ditches to hold soil and slow water back and prevent them from washing out roads.</p>	<p>1. No Progress</p> <p>2. Funding has limited progress on this action.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

33.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Olean participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Olean would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 33-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 33-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 33-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X			X			X			X
Flood	X	X		X	X		X		X	X
Landslide	X	X		X	X		X		X	X
Pandemic	X			X			X			X
Severe Storm	X	X		X	X		X		X	X
Severe Winter Storm	X	X		X	X		X		X	X
Utility Failure	X	X		X			X			X
Wildfire	X			X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 33-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-OleanT-01	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-OleanT-02	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-OleanT-03	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-OleanT-04	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-OleanT-05	Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High

2025-OleanT-10	Develop a Comprehensive Emergency Management Plan	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-OleanT-11	Road Erosion Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-OleanT-12	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

2025-OleanT-01. Undersized Culverts

Lead Agency:	Highway Superintendent										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:</p> <ul style="list-style-type: none">• Valley View Road• East River Road• Godfrey Hollow Road• McCann Hollow Road• Blakeslee Hollow Road										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts located in Town that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

2025-OleanT-02. Floodprone Roads

Lead Agency:	Highway Department						
Supporting Agencies:	Building Code Enforcement, Engineering						
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire					
Description of the Problem:	<p>Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none">• Oakes Road• Shott Avenue• Fairview Avenue• Hastings Road• Route 16 North• Route 417 East• East River Road• West River Road						
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none">• Elevation of roadways• Installation or improvement of drainage systems• Regrading of roadway and soils• Resurfacing or reshaping roadways						
Estimated Cost:	TBD after mitigation technique is chosen						
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS						
Implementation Timeline:	Within 5 years						
Goals Met:	1						
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.						
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.						
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.						
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.						
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.						
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.						
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

	Relocate all flood-prone road system	Not feasible
	Raise all flood prone roads	Cost prohibitive

DRAFT

Action 2025-OleanT-03. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The following critical facilities are located in the special flood hazard area and may have an increased risk to flooding impacts: <ul style="list-style-type: none">National Fuel Gas DistrictNiagara Mohawk Power Corp										
Description of the Solution:	The Town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include: <ul style="list-style-type: none">Elevation of facilityFloodproofing of facilityMobile flood barriers Once the most cost-effective option is identified, the Town will carry out the option.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Town.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-OleanT-04. Generators at Critical Facilities

Lead Agency:	Highway Department										
Supporting Agencies:	Town Board, Engineering, Fire Department										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Town Hall, Highway Garage, and Fire Department located in the Town do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facilities. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for this critical facility and its operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of a critical facility that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>-</td> </tr> <tr> <td>Microgrid</td> <td>Costly and difficult to implement.</td> </tr> <tr> <td>Solar panels and battery backup</td> <td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td> </tr> </tbody> </table>	Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement.	Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.		
Action	Evaluation										
No Action	-										
Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-OleanT-05. Landslide Mitigation

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Landslide conditions exist along Stream Valley Road and Indiana Ave, near 1464 Indiana Ave. Landslides may be able to be mitigated by cutting banks to prevent erosion.										
Description of the Solution:	The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk along Stream Valley Road and Indiana Ave, near 1464 Indiana Ave. Possible mitigation measures include: <ul style="list-style-type: none">• Construction of retaining walls, soil nailing, ground anchor walls• Install horizontal drains to reduce soil saturation• Cut banks along water ways to prevent oversaturated soils from falling• Install netting										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide along Stream Valley Road and Indiana Ave. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><tr><th>Action</th><th>Evaluation</th></tr><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Reconstruct roadway outside of hazard area</td><td>Not feasible</td></tr><tr><td>Close road and reroute traffic around hazard area</td><td>Not feasible, would cause confusion amongst travelers</td></tr></table>	Action	Evaluation	No Action	Current problem exists	Reconstruct roadway outside of hazard area	Not feasible	Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers

Reconstruct roadway outside of hazard area	Not feasible										
Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-OleanT-06. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-OleanT-07. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.										
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.										
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.										
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.										
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.										
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.										
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Update only freeboard requirements</td> <td>Other areas of the ordinance which need to be updated would not be</td> </tr> <tr> <td>Leave NFIP</td> <td>Residents lose flood insurance coverage</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Update only freeboard requirements	Other areas of the ordinance which need to be updated would not be	Leave NFIP	Residents lose flood insurance coverage
Action	Evaluation										
No Action	Current problem exists										
Update only freeboard requirements	Other areas of the ordinance which need to be updated would not be										
Leave NFIP	Residents lose flood insurance coverage										

Action 2025-OleanT-08. Comprehensive Outreach Program

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus County										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on hazard risks and methods of mitigation measures, including those for dam and levee failure, flood, landslide, pandemic, severe storm, severe winter storm, utility failure, and wildfire. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for each individual hazard of concern.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the current public education and outreach program in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the various hazards which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of potential hazards. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's already existing public education and outreach program and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from hazards and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-OleanT-09. Flood Impacted and Repetitive Loss Properties

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties. 40 properties along East and West River Roads are exposed to flooding and the Town has three repetitive loss properties, but other properties may be impacted by flooding as well.										
Description of the Solution:	The Town will conduct outreach to the flood prone properties located along East and West River Roads and will provide information on mitigation alternatives. After preferred mitigation measures are identified, the Town will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating of the affected properties that experience frequent flooding. The parameters for this initiative would be funding, benefits versus cost, and willing participation of property owners.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA FMA, FMA SWIFT, Town Budget, County Budget, Property Owners										
Implementation Timeline:	3 years										
Goals Met:	1										
Benefits:	This action would foster comprehensive floodplain management by removing at risk properties from the flood hazard area or elevating properties to reduce the flood risk.										
Impact on Socially Vulnerable Populations:	Collecting data regarding homeowners that reside within flood prone areas provides an opportunity to introduce location-specific opportunities for assistance. Socially vulnerable populations may be able to have houses elevated or acquired when it would otherwise be unaffordable.										
Impact on Future Development:	Increased outreach to homeowners within a flood prone area will limit construction in areas that are prone to hazard events. Homes may be acquired, which will remove those structures from the floodplain and prevent future development on those sites.										
Impact on Critical Facilities/Lifelines:	Removing structures from the floodplain decreases the demand on utilities and emergency services including health and medical, law enforcement, and search and rescue.										
Impact on Capabilities:	Outreach which promotes the removal of risk from the immediate floodplain via acquisition of properties will free up resources for search and rescue and other emergency operations as needed. This action will enhance the Town's current NFIP capabilities.										
Climate Change Considerations:	Climate change is likely to increase the frequency and severity of severe rainfall, flash flooding, riverine flooding, and coastal flooding from sea level rise and storm surge events. Removing structures from the floodplain will reduce the response and recovery costs as a result of these events and decrease the loss of human life as a result of these events. Elevating structures will reduce the recovery costs.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)

Levee around floodplain	Costly, not enough room.										
Deployable flood barriers	Requires deployment. Residents may not have adequate time to deploy, especially those who are elderly or disabled.										

Action 2025-OleanT-10. Develop a Comprehensive Emergency Management Plan

Lead Agency:	Town Board										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town does not have a Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town Board will lead the development of the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will create a new planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Action 2025-OleanT-11. Road Erosion Mitigation

Lead Agency:	Highway Department		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	<p>Roads in the Town have been eroded due to floodwaters stemming from severe storms and melted snow from severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none"> • Godfrey Hollow Road • McCann Hollow Road • Steam Valley Road • Oregon Road • Indiana Avenue • Mueller Road 		
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 		
Estimated Cost:	TBD after mitigation technique is chosen		
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS		
Implementation Timeline:	Within 5 years		
Goals Met:	1		
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Relocate all eroded road system		Not feasible
	Raise all eroded roads		Cost prohibitive

Action 2025-OleanT-12. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary: <ul style="list-style-type: none"> • Olean 12 • Olean 20 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove bridges</td> <td>May cause significant traffic problems</td> </tr> <tr> <td>Replace bridges</td> <td>Cost prohibitive</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove bridges	May cause significant traffic problems	Replace bridges	Cost prohibitive
Action	Evaluation										
No Action	Current problem exists										
Remove bridges	May cause significant traffic problems

34. TOWN OF OTTO

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Otto with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Otto, describes who participated in the planning process, assesses Otto's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

34.1 HAZARD MITIGATION PLANNING TEAM

The Town of Otto identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 34-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 34-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact

Name/Title: Jeff Hollar, Code Enforcement Officer Method of Participation: Provided updated information on hazard event history, NFIP, development permits.	

34.2 COMMUNITY PROFILE

The Town of Otto lies in the northwest part of Cattaraugus County in western New York. The town has a total area of 41.6 square miles. It shares its northern border with Erie County and is bordered to the east by the Town of East

Otto, to the southeast by the Town of Mansfield, to the southwest by the Town of New Albion, and to the west by the Town of Persia. There is one hamlet, Otto, located within the Town of Otto. The South Branch Cattaraugus, Cattaraugus, and Mansfield Creeks flow through the town.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 1.4 percent of the population is 5 years of age or younger, 29.6 percent is 65 years of age or older, 0.9 percent is non-English speaking, 6.3 percent is below the poverty threshold, and 20.5 percent is considered disabled.

34.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Otto performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Otto to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

34.3.1 Planning and Regulatory Capability and Integration

Table 34-2 summarizes the planning and regulatory tools that are available to Otto.

Table 34-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law #1, 2020, New York State Uniform Fire Prevention and Building Code	State and Local	Building Inspector
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
--	---------------------------------	--	---	--

This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) in this Town. This chapter is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter.

Zoning/Land Use Code	Yes	Zoning Code, 2018	Local	Building Inspector
<p>How has or will this be integrated with the HMP and how does this reduce risk? It is the purpose of this law to promote the public health, safety and general welfare. Specifically, the purpose of this law is:</p> <ol style="list-style-type: none"> 1. To retain the unique community character of the Town of Otto as a rural, agriculturally based community, while at the same time providing opportunities for compatible development. 2. To secure safety for its residents from flood, fire and other dangers, both natural and manmade. 3. To provide adequate light and air. 4. To prevent the overcrowding of land and to avoid undue concentration of population. 5. To prevent congestion on the streets and roadways in the Town. 6. To facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements. 7. To accommodate solar energy systems equipment and access to sunlight necessary, therefore. 8. To implement the broad guidelines contained in the document, Vision 2020, which has been adopted by the Town Board of the Town of Otto as a policy for future development of the Town through the year 2020. 9. To accommodate wind energy systems equipment and access to wind necessary, therefore. 10. To accommodate Electrical Vehicle Supply Equipment (EVSE). 				

Subdivision Code	Yes	Zoning Code, 2018	Local	Zoning Board of Adjustment
<p>How has or will this be integrated with the HMP and how does this reduce risk? Empowers local authoritative body to approve plats showing lots, blocks or sites, with or without streets or highways, to approve the development of entirely or partially undeveloped plats already filed and to approve preliminary plats within jurisdictional boundaries. This ensures that all approved plats for land development fall within local rules and regulations for environmental preservation, building code standards and wildfire protection ordinances.</p>				

Site Plan Code	Yes	Zoning Code, 2018; Article 8: Site Plan Review	Local	Planning Board
<p>How has or will this be integrated with the HMP and how does this reduce risk? The purpose of this article is to ensure that any new development in the Town of Otto is in harmony with the current rural character of the town and that new development meets the guidelines for development laid out in Vision 2020. An additional purpose is to evaluate site plans in order to minimize conflicts between a proposed development and neighboring existing uses and natural features of the site; this will minimize any potential adverse effects to the health, safety, and general welfare of the Town of Otto.</p>				

Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				

Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
--	-----	--	-------	--

How has or will this be integrated with the HMP and how does this reduce risk?
In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency

Environmental Protection Ordinance(s) How has or will this be integrated with the HMP and how does this reduce risk?	No	-	-	-
Flood Damage Prevention Ordinance How has or will this be integrated with the HMP and how does this reduce risk? Promotes public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas. A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program.	Yes	Local Law #1, 1988 – Flood Damage Prevention	Federal, State, County and Local	Building Inspector

RESPONSE/RECOVERY PLANNING				
Comprehensive Emergency Management Plan	Yes	Comprehensive Emergency Management Plan (CEMP)	County	OES
How has or will this be integrated with the HMP and how does this reduce risk? The CEMP defines the scope of preparedness and emergency management activities necessary in the County. This document assigns responsibility to organizations and individuals for carrying out specific actions that exceed routine responsibility at projected times and places during an emergency; sets lines of authority and organizational relationships and shows how all actions will be coordinated; identifies how people and property are protected; and identifies personnel, equipment, facilities, supplies, and other resources available within the jurisdiction or by agreement with other jurisdictions.				
Continuity of Operations Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Substantial Damage Response Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Threat and Hazard Identification and Risk Assessment	Yes	Threat & Hazard Identification & Risk Assessment (THIRA)	County	OES
How has or will this be integrated with the HMP and how does this reduce risk? The Threat and Hazard Identification and Risk Assessment (THIRA) is a three-step risk assessment process that helps the County understand its risks to natural, technological, and human-caused hazards and what must be done to address those risks.				
Post-Disaster Recovery Plan	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Public Health Plan	Yes	Health Department Strategic Plan 2022–2025	County	Health Department
How has or will this be integrated with the HMP and how does this reduce risk? The Cattaraugus County Health Department's (CCHD) Strategic Planning Process began in April 2022 using the resources of the New York State Department of Health NYS Public Health Corp Fellows. As a part of this process, the fellows reviewed the 2018–2021 strategic plan for past successes and failures and discussed what was needed for future success. Both an external assessment, in which county demographic data, economic factors, health outcomes, and community health assessment findings that have the potential to affect the agency and strategies were examined, and an internal assessment of a Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis was completed.				
Other: Community Needs Assessment and Community Health Improvement Plan	Yes	Community Needs Assessment and Community Health Improvement Plan	County	Health Department
How has or will this be integrated with the HMP and how does this reduce risk?				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
--	---------------------------------	--	---	--

The 2022–2024 OGH/BRMC Community Service Plan (CSP) and the CCHD’s Community Health Assessment and Community Health Improvement Plan (CHA-CHIP) were conducted to identify significant health needs as outlined by the New York State Department of Health’s 2022–2024 Prevention Agenda, where applicable. It also provides critical information OGH/BRMC, the CCHD, and others in a position to make a positive impact on the health of the region’s residents. The CSP/CHA-CHIP enables the health department, hospital, and other community partners to strategically establish priorities, develop interventions, and direct resources to improve the health of residents living in the service area.

The CSP/CHA-CHIP includes a detailed examination of priority areas identified in the NYS Prevention Agenda: (1) prevent chronic diseases; (2) promote a healthy and safe environment; (3) promote healthy women, infants and children; (4) promote well-being and prevent mental health and substance use disorders; and (5) prevent communicable diseases. The Prevention Agenda is a six-year effort to make New York the healthiest state. Developed in collaboration with 140 organizations, the plan identifies New York’s most urgent health concerns, and suggests ways local health departments, hospitals, and partners from health, business, education, and community organizations can work together to solve them.

34.3.2 Development and Permitting Capability

Table 34-3 summarizes the capabilities of Otto to oversee and track development.

Table 34-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Town of Otto Zoning, Special Use Permits
Do you have a buildable land inventory?	No	-
<ul style="list-style-type: none"> If you have a buildable land inventory, please describe 		
Describe the level of buildout in your jurisdiction.	N/A	There are areas in the Town which may be developed in the future.

34.3.3 Administrative and Technical Capability

Table 34-4 summarizes potential staff and personnel resources available to Otto and their current responsibilities that contribute to hazard mitigation.

Table 34-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
		the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Building Inspector charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Building Inspector; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Building Inspector enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	Yes	Fire Department, emergency manager supplied by County
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Local Highway Department
Mutual aid agreements	Yes	Cattaraugus County, NYSDOT
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Superintendent of Highways, Code Enforcement Officer
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

34.3.4 Fiscal Capability

Table 34-5 summarizes financial resources available to Otto.

Table 34-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

34.3.5 Education and Outreach Capability

Table 34-6 summarizes the education and outreach resources available to Otto.

Table 34-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	Reverse 911, NY Alert, Everbridge, IPAWS, County Administrator
Natural disaster/safety programs in place for schools	Yes	
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

34.3.6 Community Classifications

Table 34-7 summarizes classifications for community programs available to Otto.

Table 34-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

34.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 34-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 34-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Weather	Moderate
Utility Interruption	Moderate
Wildfire	Moderate
Flood	Moderate

34.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 34-1 is responsible for maintaining this information.

34.4.1 NFIP Statistics

Table 34-9 summarizes the NFIP policy and claim statistics for Otto.

Table 34-9. Otto NFIP Summary of Policy and Claim Statistics

# Policies	0
# Claims (Losses)	0
Total Loss Payments	\$0.00
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

34.4.2 Flood Vulnerability Summary

Table 34-10 provides a summary of the NFIP program in Otto.

Table 34-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Colvin Road, Traffic Street at Harvey Road, Zoar Valley North Otto Road, Thompson Road at Town line. These are just roads.
Do you maintain a list of properties that have been damaged by flooding?	No list of private properties.
Do you maintain a list of property owners interested in flood mitigation?	No known list, possible 8148 South Hill Road due to land slide.
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	Possibly 8191 South Hill Road for basement flooding. 8842 Otto-East Otto Road Town of Otto, Salt shed and land acquisition.
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No known projects.
How do you make Substantial Damage determinations?	Highway Department estimates damages, reports to County Emergency Services.
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	Last declaration that effected Otto was 2015-16.
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	No personal properties, ditches and embankments.
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	No, nothing current on mapping.
NFIP Compliance	
What local department is responsible for floodplain management?	Building Inspector
Are any certified floodplain managers on staff in your jurisdiction?	No, lack of available training to become certified.

NFIP Topic	Comments
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, Cattaraugus County GIS Coordinator.
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	Yes, no training available, funding for trainings, no local courses.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Do not allow development in flood plains, evaluation and permitting necessary, need signage for education outreach at Otto Firehall, would support whole Town.
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Code Enforcement and Insurance Adjuster
What are the barriers to running an effective NFIP program in the community, if any?	Funding, staffing, and training
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	Not aware of any.
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: February 2, 2007 CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1988 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	June 29, 1988
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets requirements.
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Do not allow the building in flood plains.
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No plan on joining, lack of staffing, not enough loss.

34.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 34-11 through Table 34-13.

Table 34-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	2	0	19	21
Permits within SFHA	0	0	0	0
2020				

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
Total Permits	0	0	15	15
Permits within SFHA	0	0	0	0
2021				
Total Permits	5	0	15	20
Permits within SFHA	0	0	0	0
2022				
Total Permits	2	0	11	13
Permits within SFHA	0	0	0	0
2023				
Total Permits	3	0	13	16
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 34-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
The Town did not indicate any recent major development or infrastructure occurred between 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 34-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
North Otto Road	Storm sewer Drainage	1	CR12 going North 900 feet	Poor drainage, water crossing road, freezes in winter	Cattaraugus County Road and job

34.6 JURISDICTIONAL RISK ASSESSMENT

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Otto's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

34.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 34-1 through Figure 34-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Otto has significant exposure. The maps show the location of potential new development, where available.

FEMA Flood Hazard Area

1% Annual Chance Flood

Q3 Flood Mapping data were received from Cattaraugus County GIS, which was created by FEMA in 1970/1980.

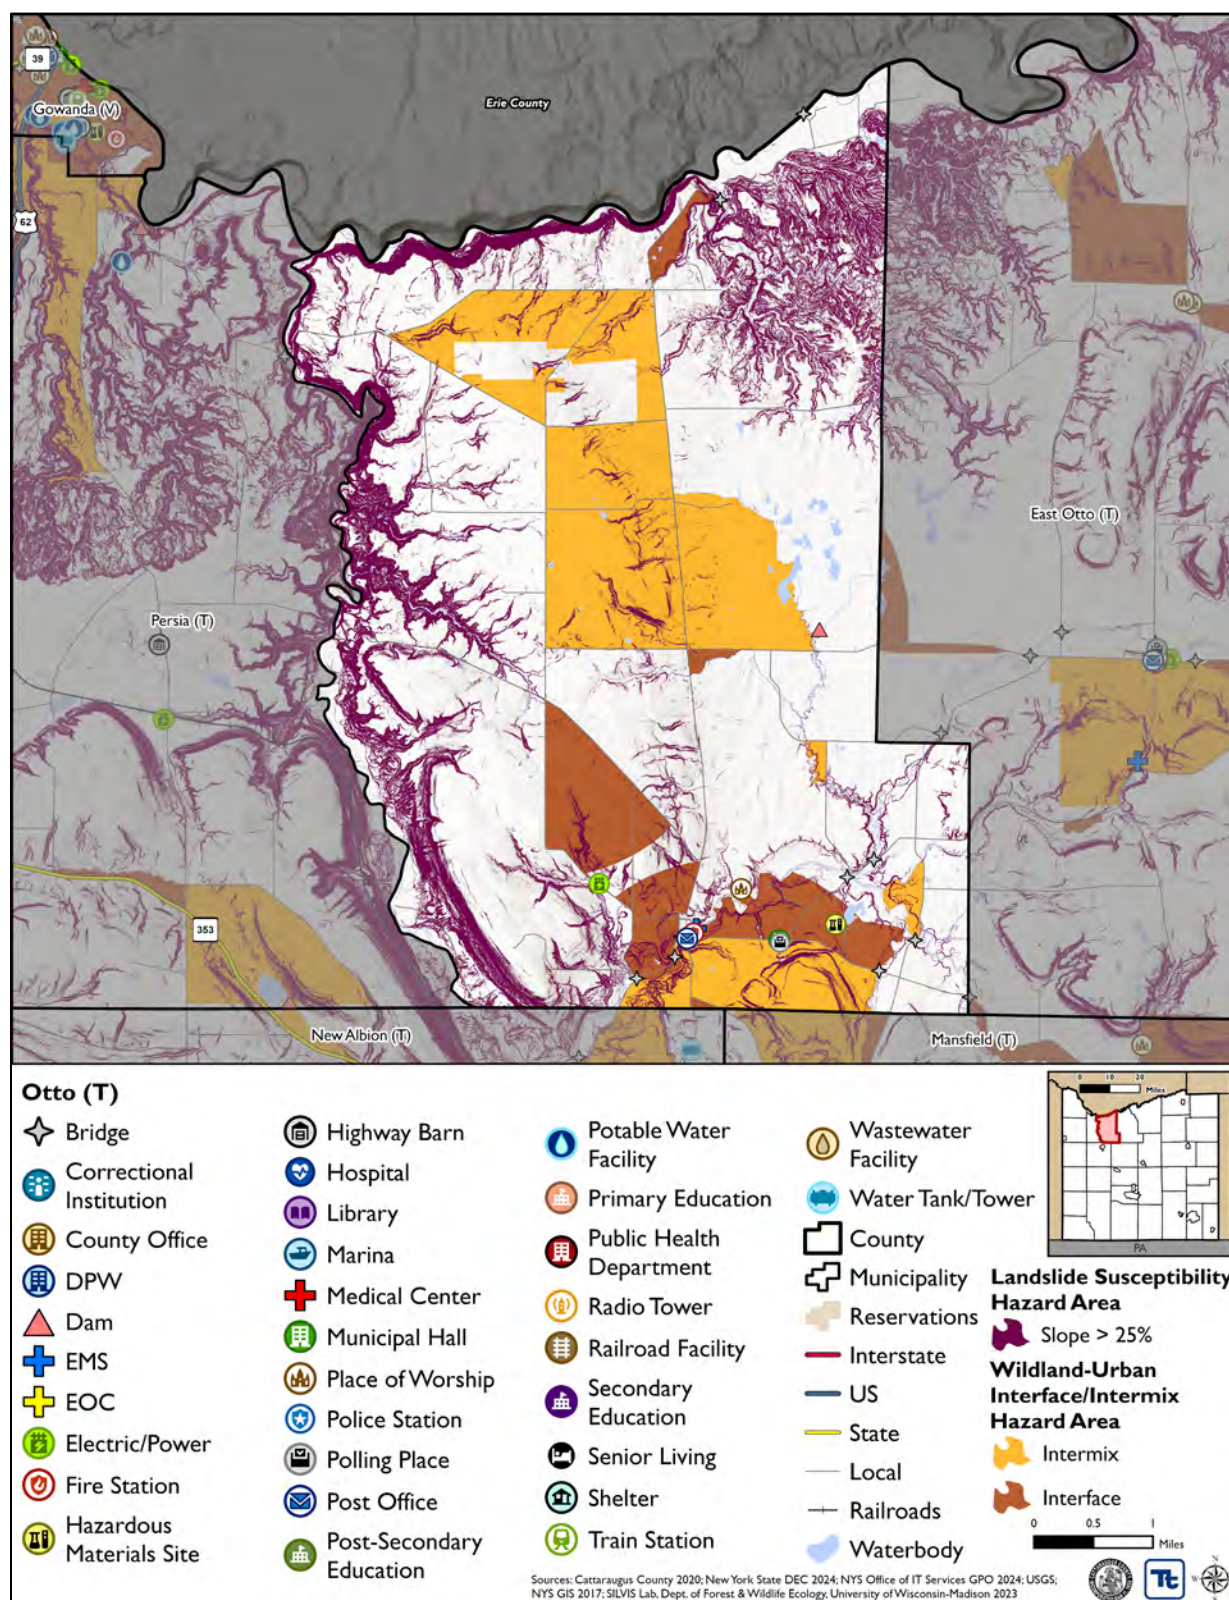

0 0.5 1 Miles

Sources: Cattaraugus County 2020; New York State DEC 2024; NYS Office of IT Services GPO 2024; USGS; FEMA 1970/1980

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 34-2. Otto Landslide and Wildfire Hazard Area Extent and Location Map

34.6.2 Hazard Event History

The history of natural and non-natural hazard events in Otto is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 34-14 provides details on loss and damage in Otto during hazard events since the last hazard mitigation plan update.

Table 34-14. Hazard Event History in Otto

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Otto
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	The Town experienced minor damages, minimal trees down.
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	The Town had quarantined personnel, stay at home for 1 week
January 12, 2020	High Wind	N/A	High wind	The Town experienced minor damages
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	The Town experienced minor damages, couple trees across roads.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	The Town did not incur any documented damages or losses.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	The Town did not incur any documented damages or losses.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	The Town did not incur any documented damages or losses.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	The Town had several trees on roadways, no major problems
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	The Town did not incur any documented damages or losses.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	The Town had several small trees down.
March 6, 2022	High Wind	N/A	High wind	The Town had limbs down.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	The Town did not incur any documented damages or losses.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	The Town experienced a typical Snowstorm, no major overtime or extra plowing necessary.

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Otto
January 11, 2024	Power Failure	N/A	Lost electric for several days, lack of backup power, stand by generator needed	The Sewer Plant and Highway Dept. lost power for several days. Threat to Cattaraugus Creek on sanitary waste overflow and trucks blocked in the garage, no heat, trucks freezing up, can't maintain roads properly in winter when events occur.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

34.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Otto.

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Otto reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town agreed with the preliminary rankings.

Table 34-15 shows Otto's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 34-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 34-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 34-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event

Otto Fire Department	EMS	X	-	2025-OttoT-01	-

Source: Cattaraugus County 2024

34.6.4 Identified Issues

After a review of Otto's hazard event history, hazard rankings, hazard location, and current capabilities, Otto identified the following vulnerabilities within the community:

- The Otto Fire Department is located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.
- Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.
- Critical facilities require backup power to ensure continuity of operations. The Sewer Plant, Water Plant, and Town Hall, do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Traffic Street at Harver Road
 - Scotts Corners Road at King Wolfs
 - Skinner Hollow Road
 - Gibson Hill Road (two locations)

- Dake Hill at Gibson Hill Road
- North Otto Road at Wickham Road

The undersized drainage pipe on North Otto Road is on private property. Flooding is caused from farmers diversion ditch being full of sediments and trees allowing water to drain to the Cattaraugus Creek.

- The intersection of Dake Hill Road, Gibson Hill Road, and Hebner Hill Road have sight distance issues which leads to dangerous conditions during severe winter storms and heavy rainfalls associated with severe storms by reducing visibility.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. South Hill Road, Skinner Hollow Road, and Dunkleman Hill Road are prone to landslides. Landslides may be able to be mitigated by cutting banks to prevent erosion.
- The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering. The Town will investigate the use of the school, highway garage, and local churches as potential locations.
- Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:
 - North Otto Road
 - Colvin Road
 - Traffic Street
 - Harvey Road
 - Thompson Road

- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The Town has dams within its jurisdiction. Despite not being identified as high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Otto 01
 - Otto 02
 - Otto 03
 - Otto 04
 - Otto 07

34.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

34.7.1 Past Mitigation Action Status

Table 34-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

34.7.2 Additional Mitigation Efforts

In addition to the mitigation actions completed in Table 34-17, Otto identified the following mitigation efforts completed since the last HMP:

- Significant amount of tree cutting to minimize the number of trees landing in roadways.

Since the adoption of the County's first HMP, Otto has made significant mitigation progress in the following areas:

- Increasing culvert size to accommodate modern water levels.
- Increasing rock in ditches and cofferdams to slow water velocity and erosion.
- Tree cutting and right of way clearing.

Table 34-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Otto-001	Otto Fire Department Flood Protection	Flood, Severe Storm	Engineer, Fire Dept	<p>Problem: The Otto Fire Department is located in the Special Flood Hazard Area. Critical facilities must be protected to the 500-year flood level.</p> <p>Solution: The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Fire Department to protect it to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">•Elevation of facility•Floodproofing of facility•Mobile flood barriers <p>Once the most cost-effective option is identified, the town will carry out the option.</p>	<p>1. No Progress</p> <p>2. Funding constraints</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Otto-002	Culvert Upgrades	Severe Storm, Severe Winter Storm	Engineer, Highway	<p>Problem: The following culverts are at Traffic Street is undersized and needs to be replaced. Flooding occurs during heavy rain events.</p> <ul style="list-style-type: none">•Traffic Street at Harver Road•Scotts Corners Road at King Wolfs•Skinner Hollow Road	<p>1. No Progress</p> <p>2. Lack of funding, excessive permitting restrictions</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				<ul style="list-style-type: none">•Gibson Hill Road (two locations)•Dake Hill at Gibson Hill Road•North Otto Road at Wickham Road•Wickham Road new North Otto Road <p>Solution: The town will replace and upsize the repetitively damaged/undersized culverts, following an engineering study to determine the appropriate size upgrades.</p>		
2020-Otto-003	Salt and Sand Barn	Flood, Severe Storm	Administration, Highway Department	<p>Problem: The town requires a sand/salt structure to protect the salt and sand supplies from exposure to precipitation and runoff. The town currently does not have room to build a facility.</p> <p>Solution: The town will identify an appropriate property for a salt and sand barn and purchase the property. The Town Highway Department will then construct a salt sand barn with a structurally sound and weather-proof structure to protect the town salt and sand supply for winter storm response.</p>	<p>1. No progress</p> <p>2. Located possible land, it's caught up in estate and is currently bank owned, would be very valuable to the Town for the future</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Otto-004	North Otto Road Drainage Pipe	Winter Storm	Engineer, FPA	<p>Problem: The undersized drainage pipe on North Otto Road leads to drainage issues. The pipe is on private property. Flooding is caused from farmers diversion ditch being full of sediments and trees allowing water to drain to the Cattaraugus Creek.</p> <p>Solution: The town will advise the property owner of the best way to replace the repetitively damaged/undersized drainage pipe in Town of Otto on North Otto Rd on private property</p>	<p>1. No progress</p> <p>2. Land owners don't want to invest in drainage, or they want a diversion ditch in their field. Funding is needed.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Otto-005	Sight Issues in Winter Storm Events	Landslide	Engineer	<p>Problem: Intersection of Dake Hill & Gibson Hill and Hebner Hill have sight distance issues which leads to dangerous conditions during winter storms.</p> <p>Solution: Investigate possible changes to intersection of Dake Hill in Town of Otto and Hebner Hill such as restructuring the roadways to reduce blind grade.</p>	<p>1. No Progress</p> <p>2. Landowner on Hebner Hill Road feels cutting road down will endanger his house and foundation. Lack of funding for engineering and inspections for seismic activity in his basement</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Otto-006	Landslide Study	All Hazards	Engineer	<p>Problem: Landslide conditions exist at South Hill, Skinner Hollow, and Dunkleman Hill Rd.</p>	<p>1. No Progress</p> <p>2. DEC and restrictions, funding for engineering</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: Conduct landslide study to determine landslide risk and potential mitigation actions.		
2020-Otto-007	Town Hall Backup Power	All Hazards	Engineer, OEM	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The Town Hall lacks a permanent power source. The Town Hall location houses the Town Hall, Court, Clerk, and DPW.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Town Hall. The town will then install a backup power generator and necessary electrical components.</p>	1. No Progress 2. Funding and lack of grant writer	1. Include 2. Add Water and Sewer Plants for backup power 3. Not applicable
2020-Otto-008	Update Emergency Operations Plan	Flood	OEM	<p>Problem: The town's Emergency Operations Plan was last updated in 2006. The Plan requires updated.</p> <p>Solution: The town will update the plan and include hazard mitigation integration concepts.</p>	1. No Progress 2. Town prioritized other projects	1. Include 2. Not applicable 3. Not applicable
2020-Otto-009	Flood Damage Prevention Ordinance	Flood	FPA	<p>Problem: The Town of Otto's flood damage prevention ordinance requires update.</p> <p>Solution: The town will adopt an updated flood damage prevention</p>	1. No Progress 2. Town prioritized other projects	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				ordinance to maintain NFIP compliance.		
2020-Otto-010	FPA Training	Wildfire	Administration	<p>Problem: Floodplain administration staff require additional training.</p> <p>Solution: The Town FPA and staff who assist with floodplain administration will attend trainings and workshops offered by FEMA and NYS to develop additional floodplain administration skills.</p>	<p>1. No Progress</p> <p>2. Limited training availability</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Otto-011	Wildfire Outreach	All Hazards	Administration	<p>Problem: Additional public education on wildfire risk is needed.</p> <p>Solution: The town will conduct outreach to residents, business owners, and organizations about what they can do to protect their structures from wildfires.</p>	<p>1. No Progress</p> <p>2. Town prioritized other projects</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Otto-012	Identification of Permanent Housing Locations	Flood	Administration	<p>Problem: The Town of Otto needs to identify locations for the placement of permanent housing.</p> <p>Solution: The Town of Otto will work with Cattaraugus County to identify regional locations for permanent housing.</p>	<p>1. No Progress</p> <p>2. Town prioritized other projects</p>	<p>1. Include</p> <p>2. Change to temporary sheltering</p> <p>3. Not applicable</p>
2020-Otto-013	North Otto Road	Flood, Severe Storm	Highway Department	<p>Problem: North Otto road experiences flooding which limits</p>	<p>1. No Progress</p> <p>2. Funding constraints.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				access and slows emergency response. Solution: The town will elevate North Otto Road 3 feet to keep the roadway surface above potential flood levels.		

34.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Otto participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Otto would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 34-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 34-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 34-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					X
Flood	X	X		X	X		X		X	X
Landslide	X	X			X					X
Pandemic	X			X			X			X
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X	X							X	X
Wildfire	X	X		X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 34-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-OttoT-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-OttoT-02	Salt and Sand Storage Shed	0	0	1	1	1	0	1	1	1	1	1	1	1	0	10	Medium
2025-OttoT-03	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-OttoT-04	Undersized Culverts and Drainage	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-OttoT-05	Line of Sight Mitigation at Intersections	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-OttoT-06	Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-OttoT-07	Comprehensive Emergency Management Plan Update	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-OttoT-08	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-OttoT-09	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-OttoT-10	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-OttoT-11	Temporary Sheltering	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-OttoT-12	Floodprone Roads	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-OttoT-13	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-OttoT-14	Dam Owner Partnership	1	1	1	1	1	1	0	1	1	0	1	1	1	0	11	High
2025-OttoT-15	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-OttoT-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Town Board										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Otto Fire Department is located in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.										
Description of the Solution:	The Town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include: <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers Once the most cost-effective option is identified, the Town will carry out the option.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Town.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)										
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-OttoT-02. Salt and Sand Storage Shed

Lead Agency:	Highway Department		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.		
Description of the Solution:	Construct a shed to house bulk salt and sand storage. The construction of this shed will reduce loss of material to erosion and leaching from rain and snow melt and ensure that there are enough critical materials for roadway treatment during storms.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Town Budget		
Implementation Timeline:	Within 2 years		
Goals Met:	1, 4, 5		
Benefits:	This action will support the continuity of operations for the critical services within the Town, including the Highway Department and first responders. The Highway Department will maintain its capability to provide road treatments in time of need, ensuring roads are accessible for first responders and regular travelers.		
Impact on Socially Vulnerable Populations:	Vulnerable populations will have access to maintained roads, ensuring safe travel,		
Impact on Future Development:	Individuals living within future development in the Town will have access to safe, treated roadways.		
Impact on Critical Facilities/Lifelines:	The construction of this structure will enhance the transportation lifeline by ensuring roads are safe to traverse during severe winter storms. Furthermore, it will create an additional critical facility.		
Impact on Capabilities:	This action will ensure the Highway Department is able to maintain its capabilities.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. These events would further expose materials stored outside to the elements, degrading not just the materials, but pushing them into the environment, potentially disrupting the ecosystem.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Install underground salt and sand facility		Not feasible
	Share a facility with another municipality		Administratively burdensome

Action 2025-OttoT-03. Generators at Critical Facilities

Lead Agency:	Engineering										
Supporting Agencies:	Town Council										
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Sewer Plant, Water Plant, and Town Hall, do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. High winds associated with severe storms and severe winter storms are known to cause utility failures, which would impact the continuity of operations at the critical facility. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.										
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facility. The Town will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for the critical facilities and their operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.										
Estimated Cost:	High										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4, 5										
Benefits:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.										
Impact on Future Development:	This action results in protection of critical facilities that could support future development.										
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of critical facilities and their essential functions during a power outage.										
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.										
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>-</td></tr><tr><td>Microgrid</td><td>Costly and difficult to implement.</td></tr><tr><td>Solar panels and battery backup</td><td>Solar power is unlikely to be able to provide battery power for extended power failure events.</td></tr></tbody></table>		Action	Evaluation	No Action	-	Microgrid	Costly and difficult to implement. Microgrid	Costly and difficult to implement.										
Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.										

Action 2025-OttoT-04. Undersized Culverts and Drainage

Lead Agency:	Highway		
Supporting Agencies:	Building Inspector, Engineer		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	<p>Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:</p> <ul style="list-style-type: none"> • Traffic Street at Harver Road • Scotts Corners Road at King Wolfs • Skinner Hollow Road • Gibson Hill Road (two locations) • Dake Hill at Gibson Hill Road • North Otto Road at Wickham Road <p>The undersized drainage pipe on North Otto Road is on private property. Flooding is caused from farmers diversion ditch being full of sediments and trees allowing water to drain to the Cattaraugus Creek.</p>		
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts in Town that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts. The Town will advise the property owner of the best way to replace the repetitively damaged/undersized drainage pipe		
Estimated Cost:	TBD after study is complete		
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget, Private Owner		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.		
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove roadway		Roadway cannot be removed

	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.
--	-------------	--

DRAFT

Action 2025-OttoT-05. Line of Sight Mitigation at Intersections

Lead Agency:	Highway Department		
Supporting Agencies:	Engineering		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The intersection of Dake Hill Road, Gibson Hill Road, and Hebner Hill Road have sight distance issues which leads to dangerous conditions during severe winter storms and heavy rainfalls associated with severe storms by reducing visibility.		
Description of the Solution:	Investigate possible changes to intersection of Dake Hill Road, Gibson Hill Road, and Hebner Hill Road such as restructuring the roadways to reduce blind grade.		
Estimated Cost:	TBD after method of reduction is selected		
Potential Funding Sources:	Town Budget, CHIPS		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2		
Benefits:	This action will increase the line-of-sight visibility when driving and turning and Dake Hill Road, Gibson Hill Road, and Hebner Hill Road. The increased visibility will reduce the likelihood of traffic incidents.		
Impact on Socially Vulnerable Populations:	Populations utilizing the identified intersections will have better visibility when turning out from the roads.		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	This action will strengthen the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's capabilities in terms of transportation.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action	Evaluation	
	No Action	Current problem exists	
	Make roadways dead ends	Not feasible	
	Knock down structures to open sight lines	Costly, property owners may protest	

Action 2025-OttoT-06. Landslide Mitigation

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. South Hill Road, Skinner Hollow Road, and Dunkleman Hill Road are prone to landslides. Landslides may be able to be mitigated by cutting banks to prevent erosion.										
Description of the Solution:	The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk near the Allegany River. Possible mitigation measures include: <ul style="list-style-type: none"> • Construction of retaining walls, soil nailing, ground anchor walls • Install horizontal drains to reduce soil saturation • Cut banks along water ways to prevent oversaturated soils from falling • Install netting 										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide near the Allegany River. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Reconstruct roadway outside of hazard area</td> <td>Not feasible</td> </tr> <tr> <td>Close road and reroute traffic around hazard area</td> <td>Not feasible, would cause confusion amongst travelers</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Reconstruct roadway outside of hazard area	Not feasible	Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers		
Action	Evaluation										
No Action	Current problem exists										
Reconstruct roadway outside of hazard area	Not feasible										
Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-OttoT-07. Comprehensive Emergency Management Plan Update

Lead Agency:	Town Council										
Supporting Agencies:	Cattaraugus Office of Emergency Services										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town has an outdated Comprehensive Emergency Management Plan (CEMP). Hazard mitigation principles need to be integrated into the CEMP. A CEMP establishes the overall authority, roles, and functions performed during incidents. Incorporating hazard mitigation principles into a CEMP ensures hazard risk is identified.										
Description of the Solution:	The Town will update the Comprehensive Emergency Management Plan (CEMP), with support from the Cattaraugus Office of Emergency Services. The CEMP will integrate hazard mitigation principles into its contents, including addresses capabilities related to reduce the risk to the identified hazards of concern identified with this Hazard Mitigation Plan. The Town will send the CEMP to the County for review, followed by a State review.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget, EMPG										
Implementation Timeline:	3 years										
Goals Met:	1, 2, 4, 5										
Benefits:	The CEMP details what the Town will do during a disaster (incident command implementation, command center location and activities, specific plans by department, etc.). The creation of a CEMP will permit the Town to integrate new plans, policies, capabilities, and hazard assessments.										
Impact on Socially Vulnerable Populations:	The section overview portion of the CEMP covers a discussion of a variety of topics, including population distribution and locations, including any concentrated populations of individuals with disabilities, others with access and functional needs, or individuals with limited English proficiency.										
Impact on Future Development:	Future development will be protected by the actions which the Town performs following the CEMP.										
Impact on Critical Facilities/Lifelines:	The section overview portion of the CEMP covers a discussion of a variety of topics, including vulnerable critical facilities (e.g. nursing homes, schools, hospitals, infrastructure).										
Impact on Capabilities:	This action will update a planning and response capability for the Town.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events. As impacts from climate change are increasingly felt, the contents in an CEMP, including in the basic plan and any annexes, may need to be updated.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Integrate hazard mitigation principles in only hazard appendices	The plan will miss integration opportunities in the basic plan and annexes										
Ask County to integrate hazard mitigation into the County CEMP	Town CEMP will remain undeveloped										

Action 2025-OttoT-08. Flood Damage Prevention Ordinance Update

Lead Agency:	Building Inspector		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-OttoT-09. Floodplain Management Training

Lead Agency:	Building Inspector		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-OttoT-10. Wildfire Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Council, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on wildfire risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the wildfire hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the wildfire hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the wildfire hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the wildfire hazard and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><tr><th>Action</th><th>Evaluation</th></tr><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Rely on state or federal resources</td><td>Resources may be generalized and not specific to the risks in the Town</td></tr><tr><td>Use only a few methods for distribution</td><td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td></tr></table>	Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance		
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-OttoT-11. Temporary Sheltering

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Council, Cattaraugus County Office of Emergency Services, Neighboring Jurisdictions, American Red Cross										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering. The Town will investigate the use of the school, highway garage, and local churches as potential locations.										
Description of the Solution:	The Town Supervisor will lead efforts to identify a suitable location to temporarily relocate residents or visitors in need of temporary sheltering. The Town will consider options to partner with neighboring jurisdictions for a regional location. The Town will contact the Cattaraugus County Office of Emergency Services for assistance as needed to identify a suitable, approved location.										
Estimated Cost:	Medium										
Potential Funding Sources:	Town Budget, County Budget, Neighboring Jurisdictions, American Red Cross, HSGP										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 4, 6										
Benefits:	Providing a safe, climate-controlled location for individuals in need following an emergency can provide a sense of gratitude and normalcy to an otherwise negative event. Removing individuals from at-risk locations and offering a temporary locations for impacted persons to gather, increases the safety of the overall community.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations are often the most risk during emergencies and disaster events. Offering a safe location for these populations can ensure their health is looked after and they are removed from harm's way.										
Impact on Future Development:	The temporary sheltering facility will be able to support population increases brought in from potential future development.										
Impact on Critical Facilities/Lifelines:	This action would create, or expand on already existing, critical facilities, as sheltering locations are critical facilities.										
Impact on Capabilities:	This action will create a new capability of the Town by offering a resource for its visitors and residents to utilize should they be in need of temporary sheltering.										
Climate Change Considerations:	The changing climate may lead to the Town, its residents, and visitors being exposed to hazards more frequently. Extreme temperatures have occurred more often in recent years which lead to drought; heavier rainfalls during severe storms have increased the occurrence of flooding. A temporary sheltering facility can provide a safe location for impacted individuals.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)

No Action	Current problem exists										
Utilize County facilities	May require signed agreements; reliant on County opening facilities										
Utilize American Red Cross facilities	Reliant on American Red Cross opening a facility										

Action 2025-OttoT-12. Floodprone Roads

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	<p>Flood prone roads not only interrupt the movement of persons and goods but can lead to isolation issues where first responders are unable to reach their destination and cause evacuation routes to be inaccessible. Flooded road ways may be caused by debris in culverts from severe storms and severe winter storms. There are multiple roads in Town which may benefit from flood mitigation strategies, such as the elevation of the roadways or the hardening of the infrastructure surrounding them to reduce likelihood of flooding including:</p> <ul style="list-style-type: none"> • North Otto Road • Colvin Road • Traffic Street • Harvey Road • Thompson Road 										
Description of the Solution:	<p>The Town will develop specific mitigation solutions for flood-prone road systems after conducting a flood study. Possible solutions may include:</p> <ul style="list-style-type: none"> • Elevation of roadways • Installation or improvement of drainage systems • Regrading of roadway and soils • Resurfacing or reshaping roadways 										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by flooding along flood-prone roads.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Relocate all flood-prone road system</td> <td>Not feasible</td> </tr> <tr> <td>Raise all flood prone roads</td> <td>Cost prohibitive</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Relocate all flood-prone road system	Not feasible	Raise all flood prone roads	Cost prohibitive		
Action	Evaluation										
No Action	Current problem exists										
Relocate all flood-prone road system	Not feasible										
Raise all flood prone roads	Cost prohibitive										

Action 2025-OttoT-13. Pandemic Education and Outreach

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Council, Cattaraugus County										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on pandemic risks and methods of mitigation measures. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for the pandemic hazard.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the public education and outreach capabilities in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the pandemic hazard which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of the pandemic hazard. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's public education and outreach capabilities and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from the pandemic hazard and how climate change may exacerbate those risks.

CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)										
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Rely on state or federal resources</td> <td>Resources may be generalized and not specific to the risks in the Town</td> </tr> <tr> <td>Use only a few methods for distribution</td> <td>Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town	Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance
Action	Evaluation										
No Action	Current problem exists										
Rely on state or federal resources	Resources may be generalized and not specific to the risks in the Town										
Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-OttoT-14. Dam Owner Partnership

Lead Agency:	Town Council										
Supporting Agencies:	NYS DEC, Dam Owners										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	The Town has dams within its jurisdiction. Despite not being high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.										
Description of the Solution:	The Town will work with the owners of the dams to ensure inspections and safety procedures are up to date. If cost-effective mitigation measures or retrofit options are identified that can increase the level of safety and length of useful life, the Dam Owner will pursue funding support, permit approval from NYS DEC, and implement the cost-effective measures.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 2, 3										
Benefits:	This action will improve the safety and security of those who live near the dams and increase the resilience of responding agencies.										
Impact on Socially Vulnerable Populations:	The action will result in better preparedness within for those living near areas where the dams are located.										
Impact on Future Development:	Future development near the dams will be more secure as safety procedures and inspections are regularly performed on the dams.										
Impact on Critical Facilities/Lifelines:	Dams are considered a critical facility. This action will create an understanding of the safety procedures in place for each identified dam and strengthen the structural integrity of dam, as needed.										
Impact on Capabilities:	This action will improve planning and response capabilities through the understanding of responsibilities and procedures.										
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to the likelihood of a dam failure event. This action will increase the capabilities to respond to these events.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Town will be unaware of any safety concerns for the dam or its condition</td> </tr> <tr> <td>Utilize information from NYS DEC</td> <td>Owners may not be required to submit a safety plan to the State</td> </tr> <tr> <td>Utilize information from the National Inventory of Dams</td> <td>Not all dams are listed on the inventory</td> </tr> </tbody> </table>		Action	Evaluation	No Action	Town will be unaware of any safety concerns for the dam or its condition	Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State	Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory	
Action	Evaluation										
No Action	Town will be unaware of any safety concerns for the dam or its condition										
Utilize information from NYS DEC	Owners may not be required to submit a safety plan to the State										
Utilize information from the National Inventory of Dams	Not all dams are listed on the inventory										

Action 2025-OttoT-15. Bridge Evaluations

Lead Agency:	Highway Department										
Supporting Agencies:	Cattaraugus County Engineering, Cattaraugus County Public Works, NYS DOT										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:</p> <ul style="list-style-type: none"> • Otto 01 • Otto 02 • Otto 03 • Otto 04 • Otto 07 										
Description of the Solution:	The Highway Department will work with Cattaraugus County Engineering and Public Works to evaluate each bridge to determine its current usability. The evaluation will indicate whether the County will need to replace or retrofit the identified bridges and causeways. This evaluation should be performed in partnership and/or with feedback from NYS DOT as necessary.										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, County Budget, BRIDGENY										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will ensure the bridges in the jurisdiction are structurally sound to continue in operation.										
Impact on Socially Vulnerable Populations:	Not applicable										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	This action will ensure transportation routes remain open and accessible to the public for daily use and evacuation needs; the bridges provide a point of access for first responders into communities that may have faced damage from a hazard event on either side of the bridges.										
Impact on Capabilities:	Not applicable										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will work to ensure the structure of the bridges are impervious to erosion at their base due to rising water levels.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low										
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Remove bridges</td> <td>May cause significant traffic problems</td> </tr> <tr> <td>Replace bridges</td> <td>Cost prohibitive</td> </tr> </tbody> </table>			Action	Evaluation	No Action	Current problem exists	Remove bridges	May cause significant traffic problems	Replace bridges	Cost prohibitive
Action	Evaluation										
No Action	Current problem exists										
Remove bridges	May cause significant traffic problems										
Replace bridges	Cost prohibitive										

35. TOWN OF PERRYSBURG

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Perrysburg with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Perrysburg, describes who participated in the planning process, assesses Perrysburg's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

35.1 HAZARD MITIGATION PLANNING TEAM

The Town of Perrysburg identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 35-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 35-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact

<i>National Flood Insurance Program Floodplain Administrator</i>	
Name/Title: David Heckman, Code Enforcement Officer Address: 10460 Peck Hill Road, Perrysburg, NY 14129 Phone Number: 716-484-3173 Email: perrysburgcodeofficer@gmail.com	

35.2 COMMUNITY PROFILE

The Town of Perrysburg lies in the northwest part of Cattaraugus County in western New York State and has a total area of 28.55 square miles, with 0.13 square miles of water body. Cattaraugus Creek partially forms the border with Erie County. The town is bordered to the north by the Cattaraugus Reservation and Erie County, to the east is the Town of Persia and the Village of Gowanda, to the south is the Town of Dayton and to the west is Chautauqua County.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 2.8 percent of the

population is 5 years of age or younger, 32.8 percent is 65 years of age or older, 0 percent is non-English speaking, 20.7 percent is below the poverty threshold, and 28.3 percent is considered disabled.

35.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Perrysburg performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Perrysburg to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

35.3.1 Planning and Regulatory Capability and Integration

Table 35-2 summarizes the planning and regulatory tools that are available to Perrysburg.

Table 35-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 1 of 2022: Enforcement of the NYS Uniform Fire Prevention and Building Code	State and Local	Code Enforcement Officer

How has or will this be integrated with the HMP and how does this reduce risk?

This local law provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this Town. This local law is adopted pursuant to section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this local law, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this local law. This law is intended to supersede and replace Local Law No. 3 of 1990, which was adopted for the same purpose, and all subsequent amendments thereof

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
Zoning/Land Use Code	Yes	Zoning Law, 2003	Local	Code Enforcement Officer

How has or will this be integrated with the HMP and how does this reduce risk?

This Local Law is adopted for the purpose of promoting the health, safety, morals, general welfare of the community and in furtherance of the following related and more specific objectives:

- To guide and regulate the orderly growth, development, and redevelopment of the municipality in accordance with a comprehensive plan and with long-term objective, principles, and standards deemed beneficial to the interest and welfare of the people.
- To protect the established character and social and economic well-being of the evolving community as it is affected by the use of both private and public property.
- To protect and preserve the natural environment ecological systems within the community through regulation of land to the most appropriate utilization.
- To secure safety from fire, panic and other dangers, and to provide adequate light, air and convenience of access.
- To prevent overcrowding of land or buildings and to avoid undue concentration of population.
- To lessen, and where possible, to prevent traffic congestion on public streets and highways. To eliminate nonconforming uses gradually.
- To conserve the value of buildings and to enhance the value of land throughout the municipality.
- To lessen the potential for excessive erosion and to conserve and reasonably to protect the natural scenic beauty of the municipality and its environment.

Subdivision Code	No	-	-	-
-------------------------	----	---	---	---

How has or will this be integrated with the HMP and how does this reduce risk?

Site Plan Code	Yes	Local Law 1 of 2022: Enforcement of the NYS Uniform Fire Prevention and Building Code	Local	Planning Board
-----------------------	-----	---	-------	----------------

How has or will this be integrated with the HMP and how does this reduce risk?

Requires a site plan prepared by a licensed and registered architect or engineer in accordance with Article 145 of the New York State Education Law and practice guidelines. Drawn to scale with an accurate boundary survey, showing the size and location of the new construction and existing structures and appurtenances on the site. Distances from lot lines, the established street grades and the proposed finished grades, and as applicable, flood hazard areas, floodways, and design flood elevations

Stormwater Management Code	No	-	-	-

How has or will this be integrated with the HMP and how does this reduce risk?

Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
--	-----	--	-------	--

How has or will this be integrated with the HMP and how does this reduce risk?

In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.

Growth Management	No	-	-	-
--------------------------	----	---	---	---

Local Law #1, 1987 – Flood Damage Prevention

Local

Building Inspector / Code Enforcement

How has or will this be integrated with the HMP and how does this reduce risk?

It is the purpose of this local law to promote the public health, safety, and general welfare, to reduce degradation of the environment, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

1. regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;
2. require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;
3. control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;
4. control filling, grading, dredging, and other development which may increase erosion or flood damages;
5. regulate the construction of flood barriers which will unnaturally divert flood waters, or which may increase flood hazards to other lands; and
6. qualify and maintain participation in the National Flood Insurance program

35.3.2 Development and Permitting Capability

Table 35-3 summarizes the capabilities of Perrysburg to oversee and track development.

Table 35-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?		
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 	Yes	Building Codes
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain, Stormwater

	Yes/No	Comment
Do you have a buildable land inventory? <ul style="list-style-type: none">If you have a buildable land inventory, please describe	No	A buildable land analysis is noted in Chapter 3 (County Profile)
Describe the level of buildout in your jurisdiction.	N/A	

35.3.3 Administrative and Technical Capability

Table 35-4 summarizes potential staff and personnel resources available to Perrysburg and their current responsibilities that contribute to hazard mitigation.

Table 35-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Code Enforcement Officer charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Code Enforcement Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	County and Towns
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	Yes	Code Enforcement
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	Yes	Town Supervisor
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

35.3.4 Fiscal Capability

Table 35-5 summarizes financial resources available to Perrysburg.

Table 35-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

35.3.5 Education and Outreach Capability

Table 35-6 summarizes the education and outreach resources available to Perrysburg.

Table 35-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Facebook
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Zoning/Planning
Warning systems for hazard events	Yes	Reverse 911, Code Red
Natural disaster/safety programs in place for schools	Yes	Reverse 911/Code Red
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

35.3.6 Community Classifications

Table 35-7 summarizes classifications for community programs available to Perrysburg.

Table 35-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	4/4	2/10/2021
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown
National Weather Service StormReady Certification	No	-	-
Firewise Communities classification	No	-	-
New York State Climate Smart Communities	No	-	-
Other: Organizations with mitigation focus (advocacy group, non-government)	No	-	-

N/A = Not applicable

— = Unavailable

35.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 35-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 35-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

35.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 35-1 is responsible for maintaining this information.

35.4.1 NFIP Statistics

Table 35-9 summarizes the NFIP policy and claim statistics for Perrysburg.

Table 35-9. Perrysburg NFIP Summary of Policy and Claim Statistics

# Policies	1
# Claims (Losses)	3
Total Loss Payments	\$2,233.85
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

35.4.2 Flood Vulnerability Summary

Table 35-10 provides a summary of the NFIP program in Perrysburg.

Table 35-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Where Village of Gowanda enters into the Town of Perrysburg and along some streams near Cattaraugus Creek
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	There have been no inquires for flood insurance
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	There has been no interest

NFIP Topic	Comments
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	None
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	None
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Building Spector / Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	Plan Review
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: Not applicable CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1987 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	July 13, 1987
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets the minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	Site plan. Planning and zoning consider efforts to reduce flood risk.

NFIP Topic	Comments
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

35.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 35-11 through Table 35-13.

Table 35-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2020				
Total Permits	1	0	2	3
Permits within SFHA	0	0	0	0
2021				
Total Permits	2	0	0	2
Permits within SFHA	0	0	0	0
2022				
Total Permits	2	0	0	2
Permits within SFHA	0	0	0	0
2023				
Total Permits	1	0	0	1
Permits within SFHA	0	0	0	0
2024				
Total Permits	0	0	0	0
Permits within SFHA	0	0	0	0

SFHA = Special Flood Hazard Area (1% flood event)

Table 35-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
------------------------------	---------------------	-------------------------	---	---------------------	-------------------------------------

There has been no recent major development or infrastructure between 2019 to present.

* Only location-specific hazard zones or vulnerabilities identified.

Table 35-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There are no known or anticipated major development or infrastructure in the next five years.					

35.6 JURISDICTIONAL RISK ASSESSMENT

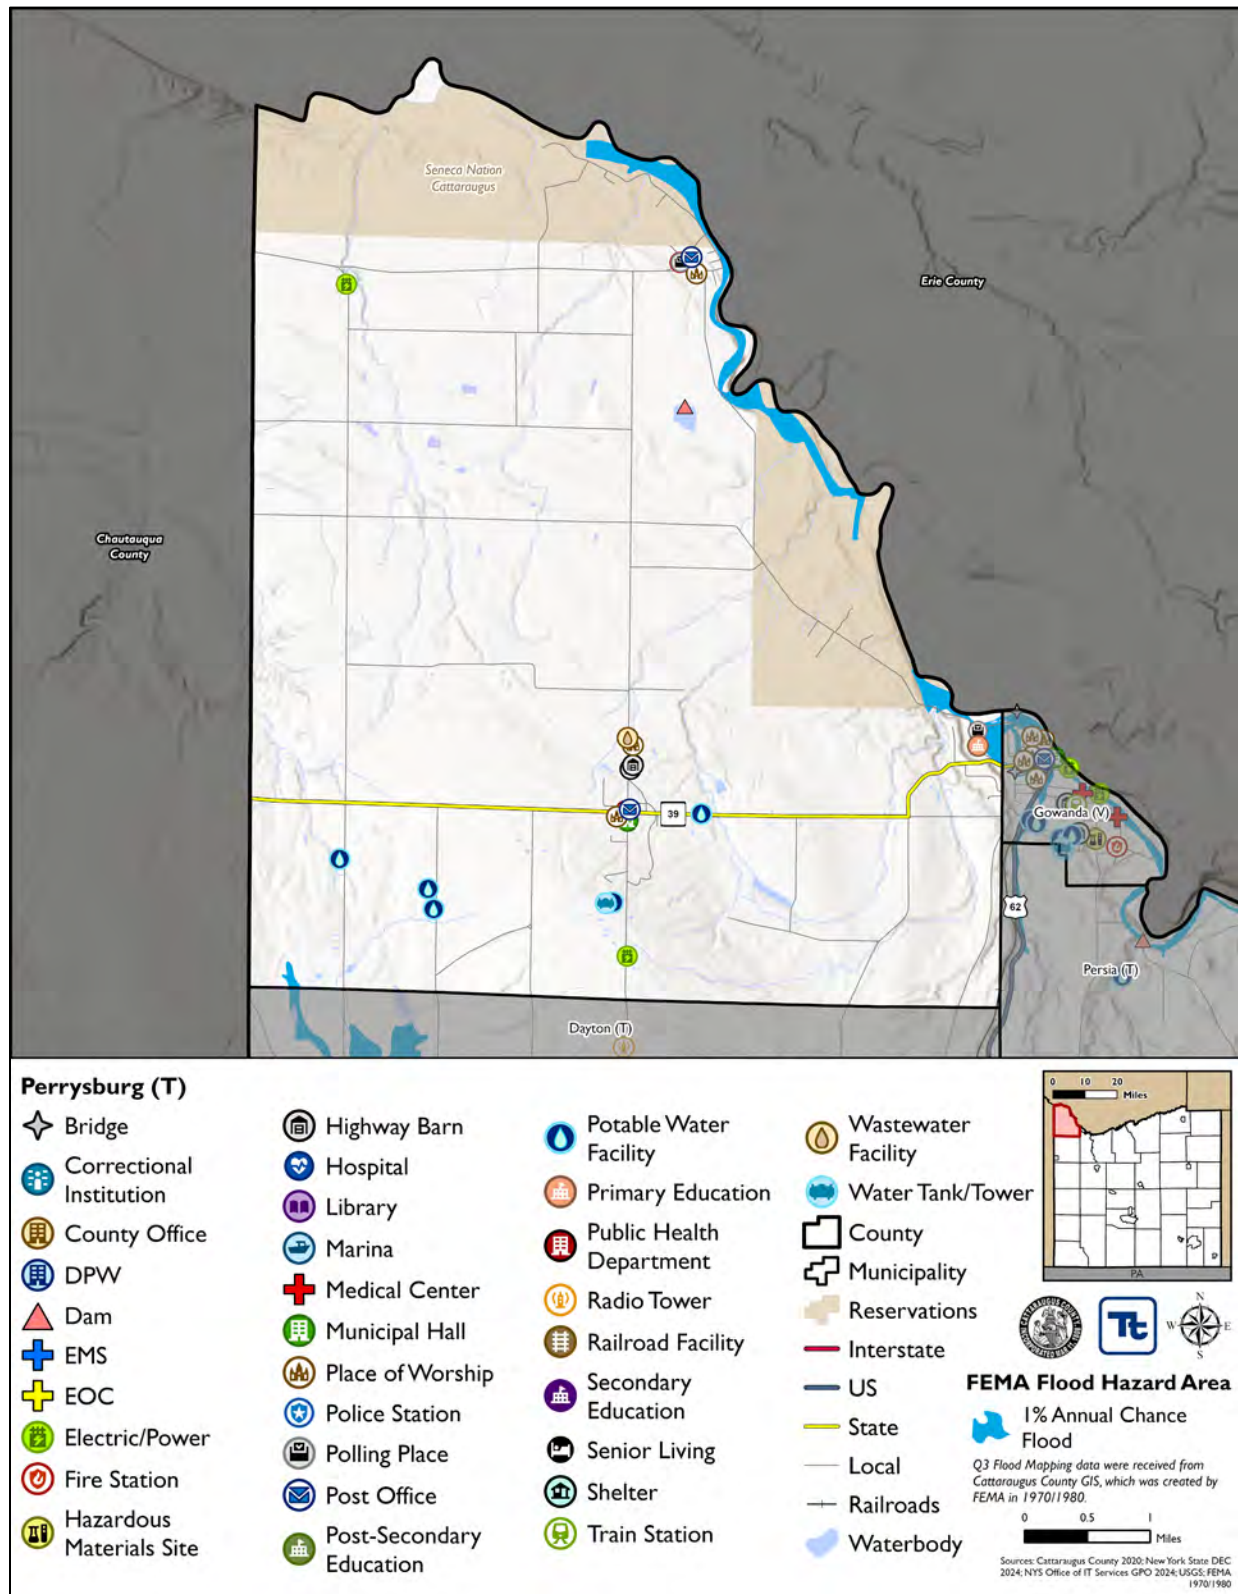

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Perrysburg's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

35.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 35-1 through Figure 35-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Perrysburg has significant exposure. The maps show the location of potential new development, where available.

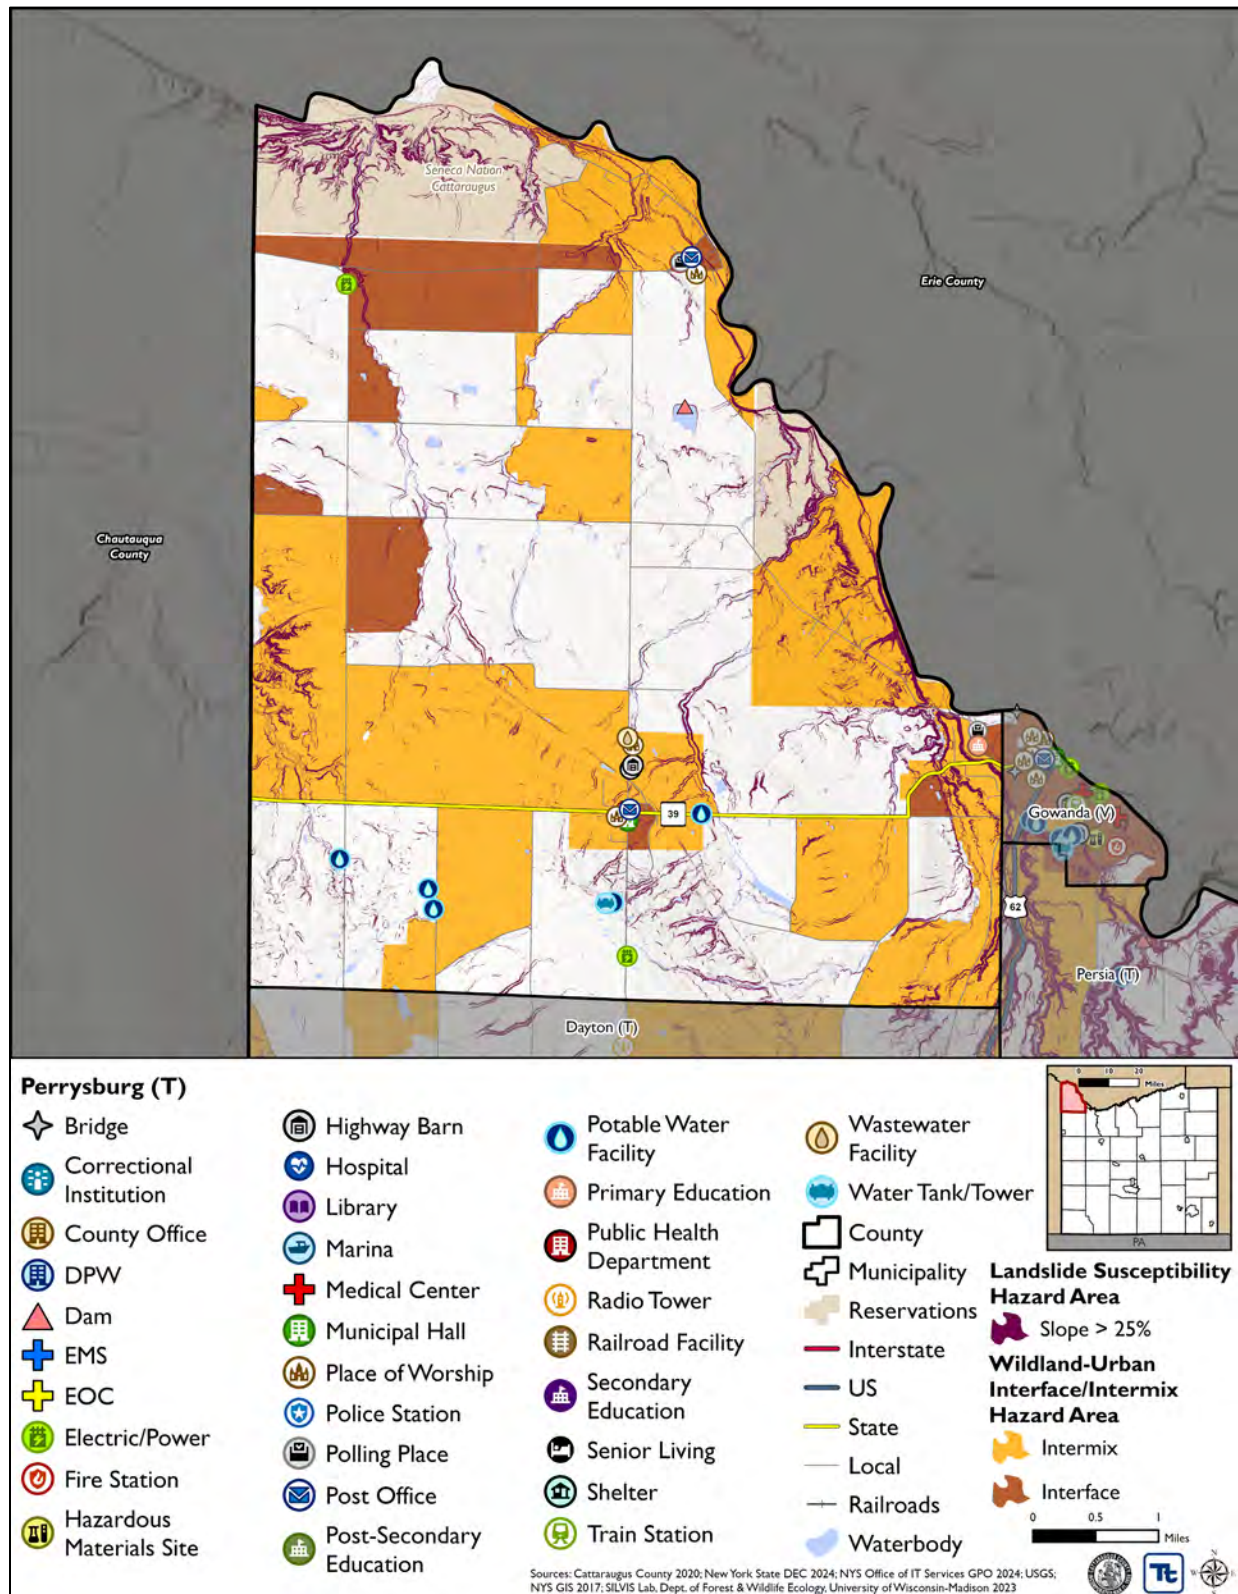

Figure 35-1. Perrysburg Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 35-2. Perrysburg Landslide and Wildfire Hazard Area Extent and Location Map

35.6.2 Hazard Event History

The history of natural and non-natural hazard events in Perrysburg is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 35-14 provides details on loss and damage in Perrysburg during hazard events since the last hazard mitigation plan update.

Table 35-14. Hazard Event History in Perrysburg

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Perrysburg
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	Trees and wires were reported down
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	Adhered to the COVID-19 guidelines
January 12, 2020	High Wind	N/A	High wind	No damages or losses incurred.
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	Trees and wires were reported down
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	Trees and wires were reported down
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	No damages or losses incurred.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	No damages or losses incurred.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	No damages or losses incurred.
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	No damages or losses incurred.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	Trees and wires were reported down
March 6, 2022	High Wind	N/A	High wind	No damages or losses incurred.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	No damages or losses incurred.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	Highway response to remove snow

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

35.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Perrysburg .

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Perrysburg reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated:

- Despite having five dams in the Town, all dams are ranked as Low Hazard Potential. The Town has chosen to decrease this hazard ranking from 'Medium' to 'Low'.

Table 35-15 shows Perrysburg's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 35-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Low
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 35-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 35-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Gowanda High School (lobby)	Polling Place	X	-	2025-PerrysburgT-01	-

Source: Cattaraugus County 2024

35.6.4 Identified Issues

After review of Perrysburg's hazard event history, hazard rankings, hazard location, and current capabilities, Perrysburg identified the following vulnerabilities within the community:

- Critical facilities in the special flood hazard area may have an increased risk to flooding impacts. Gowanda High School is located in the special flood hazard area.
- Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads:
 - Mackinaw Road
 - Wardtown Road
 - Planck Road
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Landslides may be able to be mitigated by cutting banks to prevent erosion. Streambank failure on Prospect Street poses a landslide and flood risk.
- Floodplain manager requires training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Critical facilities require backup power to ensure continuity of operations. The Sewer and Water Treatment Plant does not have automatic backup power, which could impact the continuity of operations at the facility in the event of a utility or power failure. High winds severe weather and severe winter weather are known to cause utility failures, which would impact the continuity of operations at both critical facilities.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.

35.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

35.7.1 Past Mitigation Action Status

Table 35-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

35.7.2 Additional Mitigation Efforts

Perrysburg did not identify any additional mitigation efforts completed since the last HMP.

DRAFT

Table 35-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Perrysburg-001	Culvert upgrades	Town	Flood	<p>Problem: Repetitively damaged/undersized culverts in Town of Perrysburg include east/west roads cross pipes, Mackinaw, Wardtown, and Planck lead to damages and increased flood risk.</p> <p>Solution: The town will complete engineering studies to replace and upsize the repetitively damaged/undersized culverts.</p>	<p>1. No Progress 2. Lack of funding</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-Perrysburg-002	Stream Stabilization in on Prospect Street	Town	Landslide, Flood	<p>Problem: Streambank failure on Prospect Street poses a landslide and flood risk.</p> <p>Solution: The town will continue to identify the best course of action to address streambank failure and implement the identified actions.</p>	<p>1. No Progress 2. Lack of funding</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-Perrysburg-003	Tree Maintenance Program	Town DPW	Severe Storm, Ice Storm	<p>Problem: The Town does not have a tree trimming program in place. It is unknown the safety of trees throughout the town. During wind events or heavy snow, falling tree branches can damage utilities and private property.</p> <p>Solution: The town will develop a tree trimming maintenance program. The program will</p>	<p>1. Complete 2. Responsibility of Highway Department</p>	<p>1. Discontinue 2. Not applicable 3. Existing capability</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				include conducting tree inventories to determine which ones pose a threat in the event of a storm. Once identified, the town will trim or remove trees that pose a threat.		
2020-Perrysburg-004	Certified Floodplain Manager Training	Perrysburg Code Enforcement Department	Flood	<p>Problem: Floodplain manager requires training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities.</p> <p>Solution: Obtain/host specialist training and certification for floodplain manager</p>	<p>1. No Progress 2. Limited staff leading to shifting priorities</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-Perrysburg-005	Continuous Public Education	Town	Wildfire	<p>Problem: Public needs to be educated on what they can do to protect their structures from wildfires</p> <p>Solution: Continuous Public Education. This will be done via pamphlets and website resources and include such information as: the dissemination of American Red Cross evacuation centers, supplies to have on hand, listing of emergency telephone numbers</p>	<p>1. No Progress 2. Limited staff</p>	<p>1. Include 2. Change to education on all hazards 3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Perrysburg-006	Update Zoning Ordinance	Town	Flood	<p>Problem: Perrysburg does not have flood maps but is in the process of being mapped. The Town Zoning ordinance is being rewritten and will include a new floodplain ordinance.</p> <p>Solution: The town will support FEMA's mapping process. The Town Zoning ordinance is being rewritten and will include a new floodplain ordinance.</p>	<p>1. No Progress 2. Limited staff</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>
2020-Perrysburg-007	Backup Power for Sewer & Water Treatment Plant	Engineer DPW	Utility Failure	<p>Problem: Backup power sources are necessary to maintain critical services for critical facilities. The Sewer & Water Treatment Plant requires permanent backup power.</p> <p>Solution: The Town Engineer will research what size generator is necessary to supply backup power to the Sewer & Water Treatment Plant. The town will then install a backup power generator and necessary electrical components.</p>	<p>1. No Progress 2. Lack of funding</p>	<p>1. Include 2. Not applicable 3. Not applicable</p>

35.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Perrysburg participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Perrysburg would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 35-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 35-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 35-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure				X			X			
Flood	X	X		X	X		X		X	X
Landslide		X		X	X		X			
Pandemic				X			X			
Severe Storm	X	X		X	X		X		X	X
Severe Winter Storm		X		X	X		X		X	X
Utility Failure				X			X			X
Wildfire		X		X	X		X			

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 35-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-PerrysburgT-01	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-PerrysburgT-02	Undersized Culverts	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-PerrysburgT-03	Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-PerrysburgT-04	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-PerrysburgT-05	Comprehensive Outreach Program	1	1	1	1	1	1	0	1	1	1	1	1	0	1	12	High
2025-PerrysburgT-06	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-PerrysburgT-07	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-PerrysburgT-08	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-PerrysburgT-01. Critical Facility Protection

Lead Agency:	Critical Facility Owners and Managers										
Supporting Agencies:	Town Council										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Critical facilities in the special flood hazard area may have an increased risk to flooding impacts. Gowanda High School is located in the special flood hazard area.										
Description of the Solution:	<p>The Town will notify the critical facility owners and managers of the facility's location in the flood hazard area. The Town will encourage each facility conduct a feasibility assessment to determine what additional floodproofing measures are needed at the critical facilities to protect them to the 500-year flood level. Options include:</p> <ul style="list-style-type: none">• Elevation of facility• Floodproofing of facility• Mobile flood barriers <p>Once the most cost-effective option is identified, the facility owner or manager will carry out the option.</p>										
Estimated Cost:	Medium										
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget										
Implementation Timeline:	Within 5 Years										
Goals Met:	1, 3, 5										
Benefits:	Ensures continuity of operations of several critical facilities in the Town.										
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders and emergency managers to maintain critical services that socially vulnerable populations rely on.										
Impact on Future Development:	The risk of significant damage occurring to the structure will be reduced, which will allow critical operations to be maintained or only briefly interrupted in severe events. This provides continued support to both current and future development in the service area.										
Impact on Critical Facilities/Lifelines:	This action will protect critical facilities, maintaining the critical services that it provides.										
Impact on Capabilities:	This action improves continuity of operations during a flood event, allows for a more rapid return to pre-disaster capabilities after a flood event, and faster deployment of post disaster capabilities.										
Climate Change Considerations:	This action addresses anticipated increases in flooding frequency and severity through protection to the 500-year (0.2-percent annual chance) flood level.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Relocate facility</td><td>Relocation is expensive and results in loss or delay of critical services in the immediate area</td></tr><tr><td>Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events</td><td>Reduction in response times and delay of critical services in the immediate area.</td></tr></tbody></table>	Action	Evaluation	No Action	Current problem exists	Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area	Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.		
Action	Evaluation										
No Action	Current problem exists										
Relocate facility	Relocation is expensive and results in loss or delay of critical services in the immediate area										
Establish plans to enter into MOU with neighboring critical facilities to provide service during flood events	Reduction in response times and delay of critical services in the immediate area.										

Action 2025-PerrysburgT-02. Undersized Culverts

Lead Agency:	Highway Superintendent										
Supporting Agencies:	Code Enforcement, Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire									
Description of the Problem:	Undersized culverts often result in the flooding of roadways due to the inability to handle the influx of water. Debris build-up in these undersized pipes may also result in water back-flow, leading to further roadway flooding instances and impacting the integrity of the culverts. Several culverts in the Town are undersized or have been damaged from instances of flooding and the debris caused by severe storms and severe winter winters including culverts located on the following roads: <ul style="list-style-type: none">• Mackinaw Road• Wardtown Road• Planck Road										
Description of the Solution:	The Town Engineer will complete an engineering survey of the culverts located on Mackinaw Road, Wardtown Road, and Planck Road that are undersized and contribute to flooding to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culverts.										
Estimated Cost:	TBD after study is complete										
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget										
Implementation Timeline:	Within 5 years										
Goals Met:	1, 4										
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.										
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.										
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.										
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.										
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.										
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table><thead><tr><th>Action</th><th>Evaluation</th></tr></thead><tbody><tr><td>No Action</td><td>Current problem exists</td></tr><tr><td>Remove roadway</td><td>Roadway cannot be removed</td></tr><tr><td>Raingardens</td><td>Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.</td></tr></tbody></table>			Action	Evaluation	No Action	Current problem exists	Remove roadway	Roadway cannot be removed	Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.
Action	Evaluation										
No Action	Current problem exists										
Remove roadway	Roadway cannot be removed										
Raingardens	Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.										

Action 2025-PerrysburgT-03. Landslide Mitigation

Lead Agency:	Engineering										
Supporting Agencies:	Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Landslides may be able to be mitigated by cutting banks to prevent erosion. Streambank failure on Prospect Street poses a landslide and flood risk.										
Description of the Solution:	The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk along Prospect Street. Possible mitigation measures include: <ul style="list-style-type: none"> • Construction of retaining walls, soil nailing, ground anchor walls • Install horizontal drains to reduce soil saturation • Cut banks along water ways to prevent oversaturated soils from falling • Install netting 										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide along Stream Valley Road. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Capabilities:	This action improves the Town's reliability in terms of transportation.										
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low								
Alternatives:	<table border="1"> <thead> <tr> <th>Action</th> <th>Evaluation</th> </tr> </thead> <tbody> <tr> <td>No Action</td> <td>Current problem exists</td> </tr> <tr> <td>Reconstruct roadway outside of hazard area</td> <td>Not feasible</td> </tr> <tr> <td>Close road and reroute traffic around hazard area</td> <td>Not feasible, would cause confusion amongst travelers</td> </tr> </tbody> </table>	Action	Evaluation	No Action	Current problem exists	Reconstruct roadway outside of hazard area	Not feasible	Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers		
Action	Evaluation										
No Action	Current problem exists										
Reconstruct roadway outside of hazard area	Not feasible										
Close road and reroute traffic around hazard area	Not feasible, would cause confusion amongst travelers										

Action 2025-PerrysburgT-04. Floodplain Management Training

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.		
Description of the Solution:	Where feasible, the Town will have Code staff attend trainings at FEMA's EMI in Emmitsburg Maryland for NFIP Basics and the Intermediate Floodplain management course (E0273). Where not feasible, officials will attend virtual trainings and review available resources from FEMA and ASFPM at the ASFPM (https://www.floods.org/) website. Encourage staff to become Certified Floodplain Managers via the Association of State Floodplain Manager's CFM Certification Program.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3, 4		
Benefits:	Providing an opportunity for staff and officials to become further educated on floodplain management practices and standards can aid in the development of plans and procedures in a way that is conscious of the flood hazard.		
Impact on Socially Vulnerable Populations:	Officials that are up to date on flood risk are more likely to encourage development outside areas of high flood risk, which is where socially vulnerable populations have historically resided. Safer dwellings may be developed in a less vulnerable location.		
Impact on Future Development:	Officials that understand best practices in floodplain management will have the opportunity to influence future development and prevent unsafe building in flood hazard areas.		
Impact on Critical Facilities/Lifelines:	The opportunity will exist for leaders and operators of utilities and other essential services to attend training and provide direction on ways the prepare for, plan for, and prevent interruptions in service as a result of a flood.		
Impact on Capabilities:	Officials that attend trainings will have a more confident understanding of floodplain management principles and the basics of NFIP requirements and standards.		
Climate Change Considerations:	Climate change is likely to result in stronger and more frequent rainfall events that will contribute to increased flood risk		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Hire outside contractors for floodplain administration		Costly
	Establish shared service agreements for floodplain administration from neighboring municipalities		Neighboring municipalities are unlikely to have the staff capacity to take on this role

Action 2025-PerrysburgT-05. Comprehensive Outreach Program

Lead Agency:	Town Supervisor										
Supporting Agencies:	Town Council, Cattaraugus County										
Hazard(s) of Concern:	<input checked="" type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input checked="" type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	The Town currently does not have a comprehensive education and outreach program which addresses all identified hazards of concern. There is a need to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.										
Description of the Solution:	Create outreach materials, or utilize those from Cattaraugus County, on hazard risks and methods of mitigation measures, including those for dam and levee failure, flood, landslide, pandemic, severe storm, severe winter storm, utility failure, and wildfire. Methods of distribution may include Town events, the Town newsletters, social media, the Town website, and having the materials on display for the public at Town libraries and offices. Outreach materials will be specified with education and information for each individual hazard of concern.										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	1 year										
Goals Met:	1, 2, 3, 4										
Benefits:	This action will improve the current public education and outreach program in the Town by including discussions on disaster preparedness and hazard mitigation to residents and business owners, which will contribute to the resiliency of the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations will learn how to prepare for and mitigate the various hazards which may impact them in the Town.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Businesses, which may be considered critical facilities or lifelines, would be more informed on how to prepare for emergency events and mitigate the risks of potential hazards. With these businesses becoming more resilient, this action would contribute to their continuity of operations.										
Impact on Capabilities:	This action would build upon the County's already existing public education and outreach program and adapt it to the Town's needs.										
Climate Change Considerations:	Climate change is likely to increase the intensity and frequency of many climate related disaster events. This action will inform residents and business owners of how to reduce risk from hazards and how climate change may exacerbate those risks.										
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input checked="" type="checkbox"/> Education and Awareness Programs (EAP)									
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)									
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low

Use only a few methods for distribution	Using only a few methods of distribution may hinder socially vulnerable populations from receiving the guidance										

Action 2025-PerrysburgT-06. Flood Damage Prevention Ordinance Update

Lead Agency:	Code Enforcement		
Supporting Agencies:	Town Council		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.		
Description of the Solution:	The Town will work with Cattaraugus County and NYSDEC to ensure its Flood Damage Prevention Ordinance is updated to adhere to NYS requirements. After obtaining the appropriate review and concurrence by the NFIP State Coordinator and the FEMA Regional Office, the Town will update and adopt the Flood Damage Prevention Ordinance.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	Within 3 years		
Goals Met:	1, 2, 4		
Benefits:	The updated ordinance will improve floodplain management, meet NFIP and State requirements, and increase resilience of new and substantially improved structures in the floodplain.		
Impact on Socially Vulnerable Populations:	The action will result in better regulation of construction standards within the Special Flood Hazard Area where significant risk to socially vulnerable populations exists.		
Impact on Future Development:	The action will result in stronger regulation of construction standards for future development in the Special Flood Hazard Area.		
Impact on Critical Facilities/Lifelines:	Critical facilities and lifelines located in the Special Flood Hazard Area will be required to meet the requirements set forth in the ordinance.		
Impact on Capabilities:	This action will improve floodplain management capabilities through better outlining of responsibilities and administrative procedures.		
Climate Change Considerations:	The updated ordinance includes the State's higher standards that are in place to address heightened flood risk due to climate change such as those for floodway rise and mandatory freeboard.		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low		
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Update only freeboard requirements		Other areas of the ordinance which need to be updated would not be
	Leave NFIP		Residents lose flood insurance coverage

Action 2025-PerrysburgT-07. Generators at Critical Facilities

Lead Agency:	Engineering		
Supporting Agencies:	Town Board, Facility Manager		
Hazards of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	Critical facilities require backup power to ensure continuity of operations. The Sewer and Water Treatment Plant does not have automatic backup power, which could impact the continuity of operations at the facility in the event of a utility or power failure. High winds severe weather and severe winter weather are known to cause utility failures, which would impact the continuity of operations at both critical facilities.		
Description of the Solution:	The Town Engineer will conduct a study to determine the required generator capacity to support the critical facilities. The facility will then purchase and install the generator and all necessary electrical hookup components. The installation of the back-up emergency generators will ensure continuity of operations for this critical facility and its operations during each identified hazard of concern. With expectations to provide essential services during times of emergency and otherwise, having a back-up power source is crucial. Long-term risks are mitigated through an emergency generator by reducing the likelihood of impacts from power outages, allowing essential services to continue.		
Estimated Cost:	High		
Potential Funding Sources:	FEMA HMA, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget, Utility Fees		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4, 5		
Benefits:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.		
Impact on Socially Vulnerable Populations:	Protection of critical facilities provides an opportunity for first responders, utility workers, and emergency managers to stage and deploy resources to vulnerable and hazard prone areas.		
Impact on Future Development:	This action results in protection of a critical facility that could support future development.		
Impact on Critical Facilities/Lifelines:	This action protects public health and safety and ensures continued operation of a critical facility and its essential functions during a power outage.		
Impact on Capabilities:	This action ensures continuity of operations to maintain capabilities.		
Climate Change Considerations:	Climate change is likely to increase severe weather events such as flooding, wind, and extreme temperatures that result in power failures. This action accounts for a likely increase in power failure events.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP)	<input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input checked="" type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives	Action	Evaluation	
	No Action	-	
	Microgrid	Costly and difficult to implement.	
	Solar panels and battery backup	Solar power is unlikely to be able to provide battery power for extended power failure events.	

Action 2025-PerrysburgT-08. Substantial Damage Management Plan

Lead Agency:	Code Enforcement										
Supporting Agencies:	Town Board, Highway Department										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire										
Description of the Problem:	<p>Officials in NFIP-participating communities are responsible for regulating all development in SFHAs by issuing permits and enforcing local floodplain requirements, including Substantial Damage, for the repairs of damaged buildings. After any disaster event, they must:</p> <ul style="list-style-type: none"> Determine where the damage occurred within the community and if the damaged structures are in an SFHA. Determine what to use for "market value" and cost to repair; uniformly applying regulations will protect against liability and promote equitable administration. Determine if repairing plus improving the damaged structure equals or exceeds 50% of the structure's pre-damage value. Require permits for floodplain development. <p>The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.</p>										
Description of the Solution:	<p>The Town will develop a Substantial Damage Management Plan, following the six-step planning process in 2021 Developing a Substantial Damage Management Plan (https://crsresources.org/files/500/developing_subst_damage_mgmt_plan.pdf). This plan will outline responsibilities for Substantial Damage determinations, determining market value, and permit approval processes following a disaster event.</p>										
Estimated Cost:	Low										
Potential Funding Sources:	Town Budget										
Implementation Timeline:	Within 3 years										
Goals Met:	1, 2, 4										
Benefits:	This action will provide a guidance document to determine substantial damage in the Town.										
Impact on Socially Vulnerable Populations:	Socially vulnerable populations may disproportionately be impacted by substantial damages.										
Impact on Future Development:	Not applicable										
Impact on Critical Facilities/Lifelines:	Not applicable										
Impact on Capabilities:	This action will produce substantial damage guidance for Town officials to use.										
Climate Change Considerations:	Climate change is leading to an increase in frequency and intensity of precipitation events, which also increases flooding and may lead to a main failure.										
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)

Rely on state or federal resources following disaster events	Resources may not be available during major widespread events										
Establish MOUs with outside agencies to conduct Substantial Damage Determinations	A plan outlining responsibility is still necessary to prevent missing important requirements										

36. TOWN OF PERSIA

This jurisdictional annex to the Cattaraugus County Hazard Mitigation Plan (HMP) provides information to assist public and private sectors in the Town of Persia with reducing losses from future hazard events. This annex is not guidance of what to do when a disaster occurs; its focus is on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. The annex presents a general overview of Persia, describes who participated in the planning process, assesses Persia's risk, vulnerability, and capabilities, and outlines a strategy for achieving a more resilient community.

36.1 HAZARD MITIGATION PLANNING TEAM

The Town of Persia identified primary and alternate HMP points of contact and developed this plan over the course of several months, with input from many Town departments. The Highway Superintendent represented the community on the Cattaraugus County HMP Steering Committee and supported the local planning process by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Table 36-1 summarizes Town officials who participated in the development of the annex and in what capacity. Additional documentation of the Town's planning activities through Steering Committee meetings is included in Volume I.

Table 36-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Daniel Ackley, Highway Superintendent Address: 8 West Main Street, Gowanda, New York 14070 Phone Number: (716) 353-6384 Email: persiahighway@townofpersia.com	Name/Title: John Walgus, Supervisor Address: 8 West Main Street, Gowanda, New York 14070 Phone Number: (716) 532-4042 Email: johnwalgus@townofpersia.com
National Flood Insurance Program Floodplain Administrator	
Name/Title: Melvin Shaw, Code Enforcement Officer Address: 8 West Main Street, Gowanda, New York 14070 Phone Number: (716) 861-7251 Email: mshaw@nylerr.com	

36.2 COMMUNITY PROFILE

The Town of Persia lies in the northern part of Cattaraugus County in western New York State and has a total area of 20.99 square miles. Cattaraugus Creek partially forms the northern and eastern town borders of the town. The town is bordered to the north by the Town of Collins in Erie County, to the east is the Town of Otto, to the south is the Town of New Albion, and to the west is the Towns of Dayton and Perrysburg.

Research has shown that some populations are at greater risk from hazard events because of decreased resources or physical abilities. These populations can be more susceptible to hazard events based on a number of factors including their physical and financial ability to react or respond during a hazard, and the location and construction quality of their housing. Data from the 2022 5-Year American Community Survey indicates that 11.1 percent of the

population is 5 years of age or younger, 24 percent is 65 years of age or older, 1.5 percent is non-English speaking, 11.1 percent is below the poverty threshold, and 16.9 percent is considered disabled.

36.3 JURISDICTIONAL CAPABILITY ASSESSMENT AND INTEGRATION

Persia performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Volume I describes the components included in the capability assessment and their significance for hazard mitigation planning. The jurisdictional assessment for this annex includes analyses of the following:

- Planning and regulatory capabilities
- Development and permitting capabilities
- Administrative and technical capabilities
- Fiscal capabilities
- Education and outreach capabilities
- Classification under various community mitigation programs
- Adaptive capacity to withstand hazard events

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into day-to-day local government operations. As part of the hazard mitigation analysis, planning and /policy documents were reviewed and each jurisdiction was surveyed to obtain a better understanding of their progress toward plan integration. Development of an updated mitigation strategy provided an opportunity for Persia to identify opportunities for integrating mitigation concepts into ongoing Town procedures.

36.3.1 Planning and Regulatory Capability and Integration

Table 36-2 summarizes the planning and regulatory tools that are available to Persia.

Table 36-2. Planning and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
CODES, ORDINANCES, & REGULATIONS				
Building Code	Yes	Local Law 1, 2007: New York State Uniform Fire Prevention and Building Code	State and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) in this Town. This chapter is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter.				
Zoning/Land Use Code	Yes	Zoning Ordinance, 2022	Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? For the purposes of promoting the public health, safety, and welfare; conserving and protecting property and property values; securing the most appropriate use of land; lessening or avoiding congestion in the public streets and highways;				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
securing safety from fire, flood, panic, and other dangers; providing adequate light and air; preventing the overcrowding of land and avoiding undue concentration of people; facilitating the practice of forestry; facilitating the adequate but economical provision of public improvements; and minimizing flood losses in areas subject to periodic inundation the Town Board of the Town of Mansfield finds it necessary and advisable to regulate the location, size, and use of buildings and other structures and the use of land for trade, industry, residencies, recreation, or other purposes and for such purposes divides the unincorporated area of the Town into districts or zones.				
Subdivision Code	Yes	Zoning Ordinance, 2022	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? Empowers local authoritative body to approve plats showing lots, blocks or sites, with or without streets or highways, to approve the development of entirely or partially undeveloped plats already filed and to approve preliminary plats within jurisdictional boundaries. This ensures that all approved plats for land development fall within local rules and regulations for environmental preservation, building code standards and wildfire protection ordinances.				
Site Plan Code	Yes	Zoning Ordinance, 2022	Local	Planning Board
How has or will this be integrated with the HMP and how does this reduce risk? The purpose of site plan approval is to determine compliance with the objectives of this article in zoning districts where inappropriate development may cause a conflict between uses in the same or adjoining zoning district by creating unhealthful and unsafe conditions and thereby adversely affect the public health, safety, and general welfare.				
Stormwater Management Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Post-Disaster Recovery/ Reconstruction Code	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Real Estate Disclosure Requirements	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
How has or will this be integrated with the HMP and how does this reduce risk? In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of \$500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.				
Growth Management	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?				
Environmental Protection Ordinance(s)	Yes	Zoning Ordinance, 2022; Section 9.6	Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? Without a special permit from the Board of Appeals, no person shall strip, excavate or otherwise remove top soil for sale or use other than on the premises from which the same shall be taken except in connection with the construction or alteration of a building or paved parking area on such premises and excavation or grading incidental thereto.				
Flood Damage Prevention Ordinance	Yes	Local Law #1, 1987 – Flood Damage Prevention	Federal, State, County and Local	Code Enforcement Officer
How has or will this be integrated with the HMP and how does this reduce risk? It is the purpose of this local law to promote the public health, safety, and general welfare, to reduce degradation of the environment, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:				

	Jurisdiction has this? (Yes/No)	Citation and Date (code chapter or name of plan, date of enactment or plan adoption)	Authority (local, county, state, federal)	Responsible Person, Department or Agency
<ol style="list-style-type: none"> regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters; control filling, grading, dredging, and other development which may increase erosion or flood damages; regulate the construction of flood barriers which will unnaturally divert flood waters, or which may increase flood hazards to other lands; and qualify and maintain participation in the National Flood Insurance program 				
Wellhead Protection	No	-	-	-
How has or will this be integrated with the HMP and how does this reduce risk?

36.3.2 Development and Permitting Capability

Table 36-3 summarizes the capabilities of Persia to oversee and track development.

Table 36-3. Development and Permitting Capability

	Yes/No	Comment
Do you issue development permits?	Yes	Code Enforcement
<ul style="list-style-type: none"> If you issue development permits, what department is responsible? If you do not issue development permits, what is your process for tracking new development? 		
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory?	No	-

	Yes/No	Comment
<ul style="list-style-type: none">If you have a buildable land inventory, please describe		
Describe the level of buildout in your jurisdiction.	N/A	There is land available for future development.

36.3.3 Administrative and Technical Capability

Table 36-4 summarizes potential staff and personnel resources available to Persia and their current responsibilities that contribute to hazard mitigation.

Table 36-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
ADMINISTRATIVE CAPABILITY		
Planning Board	Yes	The Planning Board makes recommendations to the Town Board regulations relating to any subject matter over which the Planning Board has jurisdiction; reviews and makes recommendations on any proposed Town comprehensive plan or amendments; has the authority to make investigations, maps, reports and recommendations relating to the planning and development of the Town; reviews all applications for special use permits, site plan review, master plan developments and amendments to the zoning ordinance; reviews all applications for subdivisions under the provisions of the Town subdivision regulations; has the authority to review and make recommendations on any other matters referred to it by the Town Board.
Zoning Board of Adjustment	Yes	With due consideration for the purpose and intent of this Zoning Law, and without limiting the powers with which the Board is vested, the Zoning Board of Appeals shall have the power and authority to hear and determine appeals from and review any order, requirement, decision or determination made by the Code Enforcement Officer charged with the enforcement of this Code. The Board may reverse or affirm, wholly or partly, or may modify the order, requirement, decision, interpretation or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the Code Enforcement Officer; hold a public hearing and approve or deny each application for a use or area variance; revoke any decision to grant a variance after a public hearing, if the owner/applicant fails to comply with any conditions of approval of the original application.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-

Resources	Available? (Yes/No)	Comment (available staff, responsibilities, support of hazard mitigation)
Public Works/Highway Department	Yes	The Highway Department maintains the Town roads and grounds.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement enforces the construction code and administers the NFIP.
Emergency Management/Public Safety Department	Yes	County EMS
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Highway Department has begun a tree maintenance program, including tree removal.
Mutual aid agreements	Yes	Fire Department, Highway Department
Human Resources Manual - Do any job descriptions specifically include identifying or implementing mitigation projects or other efforts to reduce natural hazard risk?	No	-
Other	No	-
TECHNICAL/STAFFING CAPABILITY		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazus applications	No	-
Staff that work with socially vulnerable populations or underserved communities	No	-
Environmental scientists familiar with natural hazards	No	-
Surveyors	No	-
Emergency manager	No	-
Grant writers	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

36.3.4 Fiscal Capability

Table 36-5 summarizes financial resources available to Persia.

Table 36-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvement project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

36.3.5 Education and Outreach Capability

Table 36-6 summarizes the education and outreach resources available to Persia.

Table 36-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment
Public information officer or communications office	Yes	Disaster Coordinator-Supervisor
Personnel skilled or trained in website development	Yes	Southern Tier West Regional Planning and Development Board
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Social Media, Town website
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Warning systems for hazard events	Yes	County Fire Department, E911 Dispatch
Natural disaster/safety programs in place for schools	No	-
Organizations that conduct outreach to socially vulnerable populations and underserved populations	No	-
Public outreach mechanisms / programs to inform citizens on natural hazards, risk, and ways to protect themselves during such events	No	-

36.3.6 Community Classifications

Table 36-7 summarizes classifications for community programs available to Persia.

Table 36-7. Community Classifications

Program	Participating? (Yes/No)	Classification	Date Classified
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
National Weather Service StormReady Certification	No	-	-

36.3.7 Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2022). Each jurisdiction has a unique combination of capabilities to adjust to, protect from, and withstand a future hazard event, future conditions, and changing risk. Table 36-8 summarizes the adaptive capacity for each identified hazard of concern and the Town’s capability to address related actions using the following classifications:

- Strong: Capacity exists and is in use.
- Moderate: Capacity might exist; but is not used or could use some improvement.
- Weak: Capacity does not exist or could use substantial improvement

Table 36-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak
Dam and Levee Failure	Moderate
Flood	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

36.4 NATIONAL FLOOD INSURANCE PROGRAM COMPLIANCE

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the National Flood Insurance Program (NFIP). The floodplain administrator listed in Table 36-1 is responsible for maintaining this information.

36.4.1 NFIP Statistics

Table 36-9 summarizes the NFIP policy and claim statistics for Persia.

Table 36-9. Persia NFIP Summary of Policy and Claim Statistics

# Policies	3
# Claims (Losses)	0
Total Loss Payments	\$0.00
# Repetitive Loss Properties (NFIP definition)	0
# Repetitive Loss Properties (FMA definition)	0
# Severe Repetitive Loss Properties	0

NFIP Definition of Repetitive Loss: The NFIP defines a repetitive loss property as any insurable building for which two or more claims of more than \$1,000 were paid by the NFIP within any rolling 10-year period since 1978.

FMA Definition of Repetitive Loss: FEMA's Flood Mitigation Assistance (FMA) program defines a repetitive loss property as any insurable building that has incurred flood-related damage on two occasions, in which the cost of the repair, on average, equaled or exceeded 25 percent of the market value of the structure at the time of each such flood event.

Definition of Severe Repetitive Loss: A residential property covered under an NFIP flood insurance policy and: (a) That has at least four NFIP claim payments over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or (b) For which at least two separate claims payments have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building. At least two of the claims must have occurred within any 10-year period, more than 10 days apart.

Source: FEMA 2024

36.4.2 Flood Vulnerability Summary

Table 36-10 provides a summary of the NFIP program in Persia.

Table 36-10. NFIP Summary

NFIP Topic	Comments
Flood Vulnerability Summary	
Describe areas prone to flooding in your jurisdiction.	Areas surrounding Thatcher Brook. Nash Hill Road (25.004-2-10.1) experiences localized flooding impacts during severe storms and heavy rains; property incurred damages from flooding.
Do you maintain a list of properties that have been damaged by flooding?	No
Do you maintain a list of property owners interested in flood mitigation?	No
How many homeowners and/or business owners are interested in mitigation (elevation or acquisition)?	There may be some, but no specific property owners are known.
Are any RiskMAP projects currently underway in your jurisdiction? If so, state what projects are underway.	No
How do you make Substantial Damage determinations?	Unknown
How many Substantial Damage determinations were declared for recent flood events in your jurisdiction?	No

NFIP Topic	Comments
How many properties have been mitigated (elevation or acquisition) in your jurisdiction? If there are mitigation properties, how were the projects funded?	No
Do your flood hazard maps adequately address the flood risk within your jurisdiction? If not, state why.	Will adequately address after FEMA approves an updated version
NFIP Compliance	
What local department is responsible for floodplain management?	Code Enforcement
Are any certified floodplain managers on staff in your jurisdiction?	No
Do you have access to resources to determine possible future flooding conditions from climate change?	Yes, County GIS
Does your floodplain management staff need any assistance or training to support its floodplain management program? If so, what type of assistance/training is needed?	More localized (or on site) training to Cattaraugus County so training is more feasible to do with limited staffing.
Provide an explanation of NFIP administration services you provide (e.g., permit review, GIS, education/outreach, inspections, engineering capability)	Permit Review
How do you determine if proposed development on an existing structure would qualify as a substantial improvement?	If the proposed development is more than 50 percent of the current value of the property.
What are the barriers to running an effective NFIP program in the community, if any?	Limited staffing and financial resources
Does your jurisdiction have any outstanding NFIP compliance violations that need to be addressed? If so, state the violations.	No
When was the most recent Community Assistance Visit (CAV) or Community Assistance Contact (CAC)?	CAC: Not applicable CAV: Not applicable
What is the local law number or municipal code of your flood damage prevention ordinance?	Local Law #1, 1987 – Flood Damage Prevention
What is the date that your flood damage prevention ordinance was last amended?	October 9, 1987
Does your floodplain management program meet or exceed minimum requirements? If exceeds, in what ways?	Meets minimum requirements
Are there other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements? For instance, does the planning board or zoning board consider efforts to reduce flood risk when reviewing variances such as height restrictions?	The planning board and zoning board consider efforts to reduce flood risk.
Does your community plan to join the CRS program or is your community interested in improving your CRS classification?	No

36.5 GROWTH/DEVELOPMENT TRENDS

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to appreciating a jurisdiction's overall risk to its hazards of concern. Recent

and expected future development trends, including major residential/commercial development and major infrastructure development, are summarized in Table 36-11 through Table 36-13.

Table 36-11. Number of Building Permits for New Construction Issued Since the Previous HMP

	New Construction Permits Issued			
	Single Family	Multi-Family	Other (commercial, mixed-use, etc.)	Total
2019				
Total Permits	-	-	-	5
Permits within SFHA	-	-	-	-
2020				
Total Permits	-	-	-	7
Permits within SFHA	-	-	-	-
2021				
Total Permits	-	-	-	7
Permits within SFHA	-	-	-	-
2022				
Total Permits	-	-	-	13
Permits within SFHA	-	-	-	-
2023				
Total Permits	-	-	-	14
Permits within SFHA	-	-	-	-
2024				
Total Permits	-	-	-	-
Permits within SFHA	-	-	-	-

SFHA = Special Flood Hazard Area (1% flood event)

Due to an old filing system, specific permitting types are unavailable; further, permits issued for 2024 were unavailable.

Table 36-12. Recent Major Development and Infrastructure from 2019 to Present

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
There has been no recent major development or infrastructure in the Town from 2019 to present.					

* Only location-specific hazard zones or vulnerabilities identified.

Table 36-13. Known or Anticipated Major Development and Infrastructure in the Next Five Years

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zones*	Description / Status of Development
Solar Farm	Industrial	2 farms	Broadway Road	None	2 solar farms with a combined 33 acres. Not permitted yet.

36.6 JURISDICTIONAL RISK ASSESSMENT

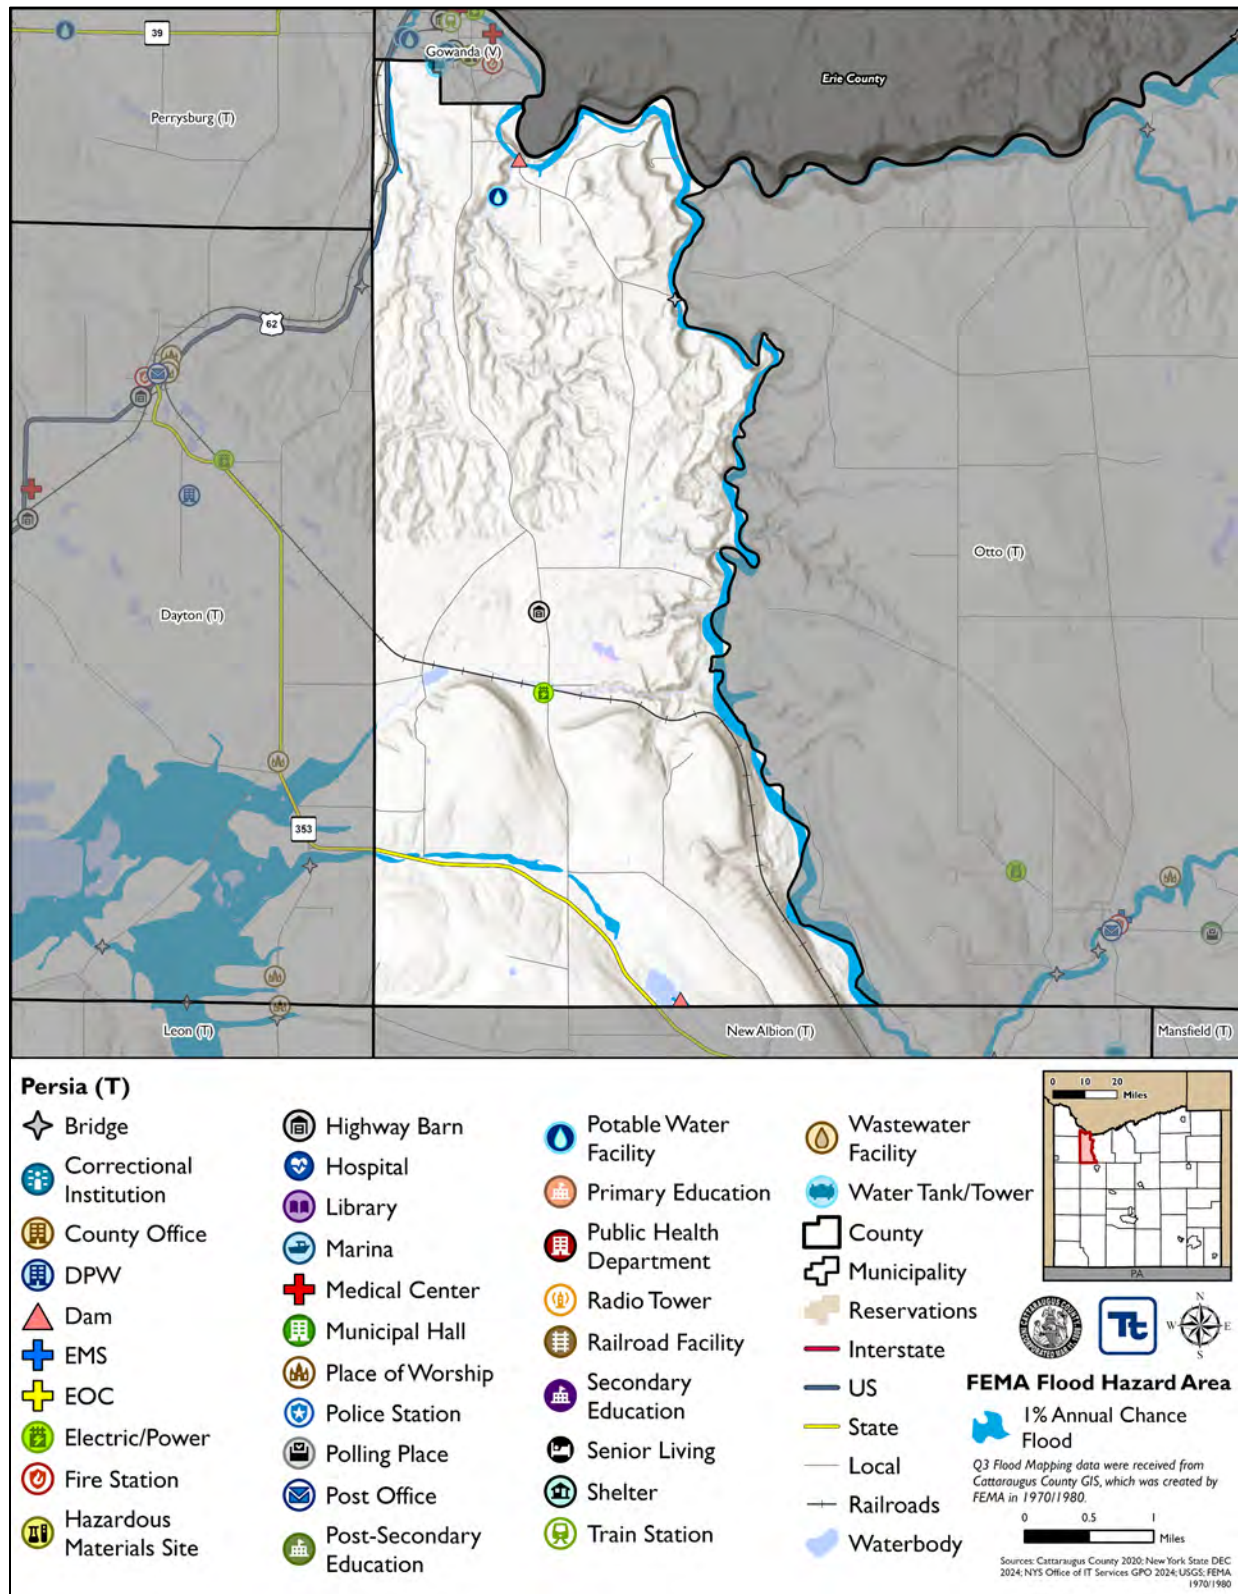

The hazard profiles in Volume I provide detailed information regarding each planning partner's vulnerability to the identified hazards, including summaries of Persia's risk assessment results and data used to determine the hazard ranking. Key local risk assessment information is presented below.

36.6.1 Hazard Area

Hazard area maps provided below illustrate the probable hazard areas impacted within the Town are shown in Figure 36-1 through Figure 36-2. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps are provided only for hazards that can be identified clearly using mapping techniques and technologies and for which Persia has significant exposure. The maps show the location of potential new development, where available.

Figure 36-1. Persia Flood Hazard Area Extent and Location Map

Note: The shown flood hazard area is limited to the FEMA-defined flood hazard areas. Areas of localized flooding are not reflected in the above Figure.

Figure 36-2. Persia Landslide and Wildfire Hazard Area Extent and Location Map

36.6.2 Hazard Event History

The history of natural and non-natural hazard events in Persia is detailed in Volume I, where each hazard profile includes a chronology of historical events that have affected the County and its municipalities. Table 36-14 provides details on loss and damage in Persia during hazard events since the last hazard mitigation plan update.

Table 36-14. Hazard Event History in Persia

Dates of Event	Event Type (Disaster Declaration)	County Designated?	Summary of Event	Summary of Damage and Losses in Persia
October 31-November 1, 2019	DR-4472	No	Severe Storms, Straight-Line Winds, and Flooding	Trees down on Nash Hill road
March 13, 2020	EM-3434 DR-4480	Yes	COVID-19 Pandemic	Adhered to masking and social distancing requirements.
January 12, 2020	High Wind	N/A	High wind	Tree down point peter road
July 16, 2020	Thunderstorm Wind	N/A	Trees and wires were reported down in Gowanda.	No damages or losses incurred.
July 19, 2020	Thunderstorm Wind	N/A	Multiple reports of trees down around Gowanda, Ashville Bay, Napoli and Portville.	No damages or losses incurred.
August 15, 2020	Flash Flood	N/A	Marble Road and Potter Road in Lime Lake were reported to be washed out by law enforcement.	No damages or losses incurred.
September 7, 2020	Thunderstorm Wind	N/A	Property damage in Olean.	Tree down across miller road on electric lines. Road was closed until electric company resolved issue.
November 15, 2020	High Wind	N/A	Property damage throughout Cattaraugus County.	Tree down across Dewey Road
July 13, 2021	Thunderstorm Wind	N/A	Several reports were received of trees down, trees on cars, trees on houses, and powerlines down in Salamanca, Olean, and Allegany.	Tree down on wires point peter road. Road was closed until electric company resolved issue.
December 11, 2021	High Wind	N/A	Dozens of reports of trees and powerlines down were received.	Minor clean up
March 6, 2022	High Wind	N/A	High wind	No damages or losses incurred.
July 24, 2022	Thunderstorm Wind	N/A	Trees and powerlines reported down in East Otto, Randolph, and South Dayton.	Tree down across dewey road. Assisted Town of Dayton with damages.
November 20, 2022	EM-3589	Yes	Severe Winter Storm and Snowstorm	Highway prepped roads for snow and performed snow removal activities.

EM = Emergency Declaration (FEMA)

FEMA = Federal Emergency Management Agency

DR = Major Disaster Declaration (FEMA)

N/A = Not applicable

36.6.3 Hazard Ranking and Vulnerabilities

The hazard profiles in Volume I have detailed information regarding each planning partner's vulnerability to the identified hazards. The following presents key risk assessment results for Persia.

Hazard Ranking

The participating jurisdictions have differing degrees of vulnerability to the hazards of concern, so each jurisdiction ranked its own degree of risk to each hazard. The community-specific hazard ranking is based on problems and impacts identified by the risk assessment presented in Volume I. The ranking process involves an assessment of the likelihood of occurrence for each hazard; the potential impacts of the hazard on people, property, and the economy; community capabilities to address the hazard; and changing future climate conditions. Persia reviewed the County hazard ranking and individual results to assess the relative risk of the hazards of concern to the community. During the review of the hazard ranking, the Town indicated the following:

- Increase the Utility Failure risk from 'Medium' to 'High', as in recent years, there have been several more utility failures during and following severe storms and winter storms.

Table 36-15 shows Persia's final hazard rankings for identified hazards of concern. Mitigation action development uses the ranking to target hazards with the highest risk.

Table 36-15. Hazard Ranking

Hazard	Rank
Dam and Levee Failure	Medium
Flood	Medium
Landslide	High
Pandemic	Medium
Severe Storm	High
Severe Winter Storm	High
Utility Failure	High
Wildfire	Medium

Note: The scale is based on the hazard rankings established in Volume I, modified as appropriate based on review by the jurisdiction

Critical Facilities

Table 36-16 identifies critical facilities in the community located in the 1 percent and 0.2 percent annual chance floodplains.

Table 36-16. Critical Facilities Flood Vulnerability

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Capic Pond Dam	Dam	X	-	2025-PersiaT-17	-

Name	Type	Vulnerability		Addressed by Proposed Action	Already Protected to 0.2% Flood Level (describe protections)
		1% Event	0.2% Event		
Persia 05	Bridge	X	-	2025-PersiaT-18	-
Point Peter Dam	Dam	X	-	2025-PersiaT-17	-

Source: Cattaraugus County 2024

36.6.4 Identified Issues

After a review of Persia's hazard event history, hazard rankings, hazard location, and current capabilities, Persia identified the following vulnerabilities within the community:

- The Zoar Valley Multiple Use Area has gained popularity in recent years as a recreational location for locals and tourists. To better understand how the Town can further benefit from recreational tourism, the Town will develop a tourism plan for the Town, focused on recreational tourism, especially along Cattaraugus Creek.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides, nor is there a local law restricting construction on areas with steep slopes.
- The culvert underneath Hawkins Road is located directly up slope (200' + -) from the Village of Gowanda's drinking water reservoir. If the culvert fails, the ensuing silt, brush, and other debris would wash down the slope into the Village's drinking water system. If enough debris is washed into the reservoir, presumably because of a severe storm and/or flood event, it could possibly plug the reservoirs outflow and cause a catastrophic event with the berm, reservoir culvert, and Point Peter Road which the culvert flows underneath on its way to the Cattaraugus Creek and Lake Erie.
- The Town does not have an established tree trimming program in place. It is unknown the safety of trees throughout the Town. During wind events or heavy snow, falling tree branches can damage utilities and private property. The Town has made progress on the tree removal aspect of maintenance.
- Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Point Peter Road has been identified as being at high risk for landslide and could result in loss of the roadway. Landslides may be able to be mitigated by cutting banks to prevent erosion.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later.
- The Town faces risk from wildfires but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- Critical facilities require backup power to ensure continuity of operations. The Town Hall and the Highway Garage do not have back up power, which could impact the continuity of operations at the facilities in the event of a utility or power failure. The Highway Garage has a portable generator, but it does not support the needs to ensure continuity of operations. High winds associated with severe storms and severe winter

storms are known to cause utility failures, which would impact the continuity of operations at both critical facilities. Rising water levels from floods could impact these facilities; back-up generators would permit any influx of water to be removed from the facilities via pumping systems.

- The Town Hall is in the special flood hazard area and may be vulnerable to flooding. Critical facilities must be protected to the 0.2% annual chance flood level.
- Debris, including sediment accumulation, fallen tree branches and limbs, and rubbish, accumulate in waterbodies when heavy rains from severe storms or heavy snowmelt from severe winter storms cause the items to collect and get taken downstream. Thatcher Brook is prone to debris jams, causing flooding on several Town roads and State Route 62. Dead trees and debris need to be removed from the Brook. There may be restrictions in place by the Army Corps and NYS DEC for the protection of the waterway.
- Open air storage of salt and sand leads to loss of materials from erosion and leaching. These materials exposed to heavy rains, snowfalls, and flooding conditions negatively impacts the environment and disrupts natural ecosystems. The loss of materials can result in the reduction in effectiveness of mitigating impacts from severe winter storms, as salt and sand is utilized to minimize potential risks on roadways, including ice and snow.
- Zoar Valley Multiple Use Area's popularity has led to issues with emergency vehicle access. As its popularity increases, there is a heightened need for search and rescue; there is a 400-foot-deep gorge that regularly results in stranded hikers during hazard events. There is also an increased wildfire risk as persons use the area's fire pits and trails. NYS DEC has been working with the Town to complete a study for the creation of an access road.
- The current flood damage prevention ordinance does not include the 2-foot mandated NYS freeboard requirements. While the existing ordinance may be compliant with NFIP requirements, State requirements which exceed NFIP requirements must be adhered to.
- Following emergency events, individuals may be unable to stay in their places of residence due to storm damages. Flooding from dam and levee failures can cause residences to become uninhabitable; wildfires and landslides can compromise the integrity of the structure; and severe storms and severe winter storms can lead to utility failures. The Town needs to identify locations for the placement of temporary sheltering and warming and cooling centers. Investigate feasibility of MOU with Gowanda Fire Department.
- The Town does not have a Substantial Damage Management Plan in place, nor do they have a formal process in place when conducting substantial damage determinations. The Town is in need of a formal process and plan to provide a framework for conducting such inspections and determinations.
- The Town faces risk from pandemic but does not have a comprehensive education and outreach program to educate residents and businesses about hazard mitigation, preparation, response, and recovery utilizing a variety of outreach methods. The Town does not currently have hazard mitigation information and outreach on the Town website.
- The Town has dams within its jurisdiction. Despite not being identified as high-hazard potential dams, these structures have the potential to impact the people, property, infrastructure, and environment nearby.
- Scour on bridges can develop due to erosion. Erosion may occur due to waters impacting the bridge's structure during severe winter storms and severe storms when the precipitation causes the water movements to be more erratic. Rising waters may cause flooding conditions to further erode the structure of the bridge. The following bridges in the jurisdiction should be evaluated to determine useability and to identify potential solutions, as necessary:
 - Persia 05

36.7 MITIGATION STRATEGY AND PRIORITIZATION

This section discusses the status of mitigation actions from the previous HMP, describes proposed hazard mitigation actions, and prioritizes actions to address over the next five years.

36.7.1 Past Mitigation Action Status

Table 36-17 indicates progress on the Town's mitigation strategy identified in the 2020 HMP. Actions that are still recommended but not completed or that are in progress are carried forward and combined with new actions as part of the mitigation strategy for this plan update. Previous actions that are now ongoing programs and capabilities are indicated as such and are presented in the capability assessment earlier in this annex.

36.7.2 Additional Mitigation Efforts

In addition to the mitigation actions completed in Table 36-17, Persia identified the following mitigation efforts completed since the last HMP:

- Highway has upsized many culverts within the jurisdiction.

Since the adoption of the County's first HMP, Persia has made significant mitigation progress in the following areas:

- Stormwater management

Table 36-17. Status of Previous Mitigation Actions

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
2020-Persia-001	Replace repetitively damaged/undersized culvert in Town of Persia on Hawkins Rd.	Flood, Severe Storm	Public Works	<p>Problem: Erosion/washout due to damaged/undersized culvert on Hawkins Rd. The Culvert underneath Hawkins Rd is located directly up slope (200' + -) from the Village of Gowanda's drinking water reservoir. If the culvert fails, the ensuing silt, brush etc. would wash down the slope into the villages drinking water system. If enough debris is washed into the reservoir, presumably because of and rain/flood event, it could possibly plug the reservoirs outflow and cause a catastrophic event with the berm, reservoir culvert and Pt. Peter Rd which the culvert flows underneath on its way to the Cattaraugus Creek and Lake Erie.</p> <p>Solution: The town will complete engineering studies to replace and upsize the repetitively damaged/undersized culvert and complete upstream and downstream improvements.</p>	<p>1. In Progress</p> <p>2. CattCo Soil and Water drew a design for the culvert replacement; however, no engineering study was performed.</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>
2020-Persia-002	Investigate a Tree Maintenance program to identify susceptible trees.	Severe Storm, Severe Winter Storm, Utility Failure	Public Works	<p>Problem: The town does not have a tree trimming program in place. It is unknown the safety of trees throughout the Town. During wind events or heavy snow, falling tree branches can</p>	<p>1. In Progress</p> <p>2. Town made progress on tree removal aspect of maintenance</p>	<p>1. Include</p> <p>2. Not applicable</p> <p>3. Not applicable</p>

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				damage utilities and private property. Solution: The town will develop a tree trimming maintenance program. The program will include conducting tree inventories to determine which ones pose a threat in the event of a storm. Once identified, the Town will trim or remove trees that pose a threat.		
2020-Persia-003	Study slide conditions in the Town of Persia near the Gowanda water reservoir on Point Peter Road.	Landslide	Town of Persia	Problem: The town needs to determine local vulnerabilities to landslides threatening property and roads. Point Peter Road has been identified as being at high risk for landslide and could result in loss of the roadway. Solution: Work with county to conduct surveys to determine local vulnerabilities to landslides threatening property and roads, coordinate with municipalities to limit development in these areas and develop remedial measures for existing vulnerabilities.	1. No Progress 2. Financial constraints	1. Include 2. Not applicable 3. Not applicable
2020-Persia-004	Implement/Encourage Training for Code Enforcement Officers.	Flood	Administration	Problem: Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. Training is sorely needed for all municipal officials and for code enforcement officials in charge of	1. No Progress 2. Training no offered	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				municipalities. Very little zoning precludes homeowners from building in floodplains, leading to problems later. Solution: Obtain/host specialist training and certification for floodplain managers.		
2020-Persia-005	Continuous Public Education	Wildfire	Town	Problem: Public needs to be educated on what they can do to protect their structures from wildfires Solution: Continuous Public Education-This will be done via pamphlets and website resources and include such information as: the dissemination of American Red Cross evacuation centers, supplies to have on hand, listing of emergency telephone numbers	1. No Progress 2. Resources not developed	1. Include 2. Not applicable 3. Not applicable
2020-Persia-006	Backup Power for Town Hall and Highway Garages	Utility Failure	OEM, DPW	Problem: Town Hall and the Highway Garages require backup power. Solution: The town will research what size generator is necessary to supply backup power to the DPW/Maintenance Facilities. The town will then install a backup power generator and necessary electrical components.	1. In Progress 2. Highway Garage has a portable generator, but it does not support the needs to ensure continuity of operations.	1. Include 2. Not applicable 3. Not applicable
2020-Persia-007	Town Hall Floodproofing	Flood, Severe Storm	DPW	Problem: Town Hall is located in the floodplain and requires floodproofing.	1. In Progress 2. Assessing proper mitigation measure	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: The town will complete an engineering study to determine the best floodproofing methods. The Town DPW will then implement the desired floodproofing actions.		
2020-Persia-008	Thatcher Brook Trash Rack	Flood	DPW, Administration	<p>Problem: Thatcher Brook is prone to debris jams which cause flooding.</p> <p>Solution: The town will work to install a trash rack along Thatcher Brook.</p>	1. No Progress 2. Funding struggles	1. Include 2. Not applicable 3. Not applicable
2020-Persia-009	Salt and Sand Barn	Severe Storm, Severe Winter Storm	DPW	<p>Problem: The town's salt and sand supply is exposed to rainfall. This leads to runoff and degradation of the Town's ability to respond to winter storm events.</p> <p>Solution: The town will construct a salt sand barn with a structurally sound and weather-proof structure to protect the Town salt and sand supply for winter storm response. The DPW will be responsible for construction and maintenance.</p>	1. No Progress 2. Funding struggles	1. Include 2. Not applicable 3. Not applicable
2020-Persia-010	Zoar Valley Emergency Access	All Hazards	Administration, NYS DEC	Problem: Zoar Valley Multiple Use Area's popularity has led to issues with emergency vehicle access, need for search and rescue, and increased wildfire risk.	1. In Progress 2. DEC has been with working the Town to complete a study for the creation of an access road.	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				Solution: The town will work with NYS DEC to increase emergency access roadways for emergency response and firefighting capabilities.		
2020-Persia-011	Zoar Valley Educational Kiosks	All Hazards	Administration, NYS DEC	<p>Problem: The town has needed to respond to members of the public which have placed themselves in hazardous situations in the Zoar Valley Multiple Use Area. Better public education is necessary to prevent emergencies.</p> <p>Solution: The town will work with NYS DEC to construct information kiosks to warn of potential hazards in the Multiple Use Area.</p>	1. Completed 2. DEC has installed warning signs	1. Discontinue 2. Not applicable 3. Project complete
2020-Persia-012	Drone for Emergency Response and Hazard Monitoring	All Hazards	OEM	<p>Problem: Remote locations in the town are not easily accessible. This makes emergency response and monitoring of potential hazard areas or ongoing hazard events difficult. The Zoar Valley Multiple Use Area in particular is a high-risk area containing a 400-foot-deep gorge that regularly results in stranded hikers during hazard events.</p> <p>Solution: The town will purchase a drone equipped with visual equipment to allow for monitoring and emergency search</p>	1. No Progress 2. Funding struggles	1. Include 2. Not applicable 3. Not applicable

Project Number	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Action Review 1. Status (In Progress, Ongoing Capability, No Progress, Complete) 2. Provide a narrative to describe progress or obstacles that have prevented implementation	Next Steps 1. Project to be included in the 2025 HMP or Discontinue 2. If including action in the 2025 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
				capabilities. Staff will undergo training.		
2020-Persia-013	Flood Damage Prevention Ordinance	Flood	FPA	<p>Problem: The Town of Persia is unaware of the location of the flood damage prevention ordinance.</p> <p>Solution: The town will adopt an updated flood damage prevention ordinance to maintain NFIP compliance.</p>	<p>1. Completed</p> <p>2. The County received the file from NYSDEC</p>	<p>1. Discontinue</p> <p>2. Not applicable</p> <p>3. The County received the file from NYSDEC</p>
2020-Persia-014	Identification of Temporary and Permanent Housing Locations	All Hazards	Administration	<p>Problem: The Town of Persia needs to identify locations for the placement of temporary housing and permanent housing.</p> <p>Solution: The Town of Persia will work with Cattaraugus County to identify regional locations for temporary and permanent housing.</p>	<p>1. No Progress</p> <p>2. Town had limited capabilities and need to focus on other priorities</p>	<p>1. Include</p> <p>2. Change to warming and cooling centers, temporary sheltering</p> <p>3. Not applicable</p>

36.7.3 Proposed Hazard Mitigation Actions for the HMP Update

Persia participated in the mitigation strategy workshop for this HMP to identify appropriate actions to include in a local hazard mitigation strategy. Its comprehensive consideration of all possible activities to address hazards of concern included review of the following FEMA documents:

- FEMA 551 “Selecting Appropriate Mitigation Measures for Floodprone Structures” (March 2007)
- FEMA “Mitigation Ideas—A Resource for Reducing Risk to Natural Hazards” (January 2013).

The action worksheets included at the end of this annex list the mitigation actions that Persia would like to pursue in the future to reduce the effects of hazards. The actions are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in Town priorities.

Table 36-18 indicates the range of proposed mitigation action categories. The four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table to further demonstrate the wide range of activities and mitigation measures selected.

Volume I identifies 14 evaluation criteria for prioritizing the mitigation actions. To assist with rating each mitigation action as high, medium, or low priority, a numeric rank is assigned (-1, 0, or 1) for each of the evaluation criteria. Table 36-19 provides a summary of the prioritization of all proposed mitigation actions for the HMP update.

Table 36-18. Analysis of Mitigation Actions by Hazard and Category

Hazard	Actions That Address the Hazard, by Action Category									
	FEMA				CRS					
	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Dam and Levee Failure	X				X					X
Flood	X	X	X	X	X		X	X	X	X
Landslide	X	X			X		X			X
Pandemic				X			X			
Severe Storm	X	X	X		X		X	X	X	X
Severe Winter Storm	X	X	X		X		X	X	X	X
Utility Failure	X		X					X		X
Wildfire	X	X		X	X		X			X

Local Plans and Regulations (LPR)—These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP)—These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct structures to reduce the impact of hazards.

Natural Systems Protection (NSP)—These are actions that minimize damage and losses and preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP)—These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

Preventative Measures (PR)—Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.

Property Protection (PP)—These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.

Public Information (PI)—Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.

Natural Resource Protection (NR)—Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.

Structural Flood Control Projects (SP)—Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.

Emergency Services (ES)—Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Table 36-19. Summary of Prioritization of Actions

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-PersiaT-01	Tourism Plan Development	0	0	1	1	1	0	1	0	1	1	0	1	0	1	8	Medium
2025-PersiaT-02	Steep Slope Ordinance	1	1	1	1	1	1	1	0	1	0	1	1	0	0	10	Medium
2025-PersiaT-03	Hawkins Road Culvert	1	1	1	1	1	0	1	0	1	1	1	1	1	0	11	High
2025-PersiaT-04	Tree Maintenance Program	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-PersiaT-05	Point Peter Road Landslide Mitigation	1	1	1	1	1	0	1	1	1	1	1	1	1	0	12	High
2025-PersiaT-06	Floodplain Management Training	1	1	1	1	1	1	1	1	1	0	1	1	0	0	11	High
2025-PersiaT-07	Wildfire Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-PersiaT-08	Generators at Critical Facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2025-PersiaT-09	Critical Facility Protection	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2025-PersiaT-10	Debris Removal	1	1	1	1	0	0	1	1	1	1	1	1	0	1	11	High
2025-PersiaT-11	Salt and Sand Storage Shed	0	0	1	1	1	0	1	1	1	1	1	1	1	0	10	Medium
2025-PersiaT-12	Zoar Valley Emergency Access	1	0	1	1	0	0	0	8	1	1	1	1	0	1	8	Medium
2025-PersiaT-13	Flood Damage Prevention Ordinance Update	1	1	1	1	1	1	1	1	1	1	1	1	0	0	12	High
2025-PersiaT-14	Temporary Sheltering	1	0	1	1	1	1	0	1	1	1	1	1	1	0	11	High
2025-PersiaT-15	Substantial Damage Management Plan	1	1	1	1	1	1	1	1	1	1	1	1	1	0	13	High

Project Number	Project Name	Scores for Evaluation Criteria															High / Medium / Low
		Life Safety	Property Protection	Cost-Effectiveness	Political	Legal	Fiscal	Environmental	Social Vulnerability	Administrative	Hazards of Concern	Climate Change	Timeline	Community Lifelines	Other Local Objectives	Total	
2025-PersiaT-16	Pandemic Education and Outreach	1	1	1	1	1	1	0	1	1	0	1	1	0	1	11	High
2025-PersiaT-17	Dam Owner Partnership	1	1	1	1	1	1	0	1	1	0	1	1	1	0	11	High
2025-PersiaT-18	Bridge Evaluations	1	1	1	1	0	0	1	1	1	1	1	1	1	0	11	High

Note: Volume I, Section 16 (Mitigation Strategy) conveys guidance on prioritizing mitigation actions. Low (0-6), Medium (7-10), High (11-14).

Action 2025-PersiaT-01. Tourism Plan Development

Lead Agency:	Town Board		
Supporting Agencies:	Cattaraugus County Economic Development, Planning & Tourism, NYS DEC		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire		
Description of the Problem:	The Zoar Valley Multiple Use Area has gained popularity in recent years as a recreational location for locals and tourists. To better understand how the Town can further benefit from recreational tourism, the Town will develop a tourism plan for the Town, focused on recreational tourism, especially along Cattaraugus Creek. Along with the development of this plan, the Town will develop a recreation-tourism brochure, which will identify various hazards tourists may be exposed to and how to mitigate the hazards while in the open area.		
Description of the Solution:	The Town will work with Cattaraugus County Economic Development, Planning & Tourism and NYS DEC to develop a recreation-focused tourism plan and a recreational-tourism brochure. The plan will provide a better understanding of how the Town can further benefit from recreational tourism.		
Estimated Cost:	Medium		
Potential Funding Sources:	Town Budget, NYS DEC, FEMA HMA		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 3		
Benefits:	The Town will have a better understanding of how it can further benefit from recreational tourism. Furthermore, the potential tourists which come to the recreational areas in the Town will be educated on the various hazards tourists may be exposed to and how to mitigate the hazards while in the open area.		
Impact on Socially Vulnerable Populations:	Not applicable		
Impact on Future Development:	Not applicable		
Impact on Critical Facilities/Lifelines:	Not applicable		
Impact on Capabilities:	The Town will have a new planning capability once the plan and brochure are developed.		
Climate Change Considerations:	Not applicable		
Mitigation Category	<input checked="" type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input checked="" type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input type="checkbox"/> High	<input checked="" type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Develop only plan and not brochure		May put visitors at risk to hazards in an unknown environment
	Develop full comprehensive plan and add tourism as an element		Would add an additional capability to the Town, but would be more costly

Action 2025-PersiaT-02. Steep Slope Ordinance

Lead Agency:	Code Enforcement		
Supporting Agencies:	Engineering, Town Board		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input type="checkbox"/> Severe Storm <input type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. The Town does not have an inventory of roads which may be impacted by landslides, nor is there a local law restricting construction on areas with steep slopes.		
Description of the Solution:	The Town Engineer will complete an assessment to identify roads in Town which have slopes at grades greater than 20 percent. Once identified, Code Enforcement will work with Engineering and the Town Board to develop a local law restricting future development in these identified hazard areas.		
Estimated Cost:	Medium		
Potential Funding Sources:	FEMA HMA, Town Budget		
Implementation Timeline:	3 years		
Goals Met:	1, 4, 6		
Benefits:	This action will identify locations with steep grades (above 20 percent) and lead to the adoption of a local law to restrict future development in these hazard areas. Furthermore, the identification of the locations with the steep grades will provide the Highway Department and Engineer with future locations to implement mitigation measures to protect any nearby property and infrastructure.		
Impact on Socially Vulnerable Populations:	This action may identify socially vulnerable populations whose properties may be at risk to the landslide hazard. If identified, the Town may educate the populations on how to mitigate potential risks.		
Impact on Future Development:	Future development will be restricted in locations with identified steep slopes.		
Impact on Critical Facilities/Lifelines:	This action has the potential to identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.		
Impact on Capabilities:	This action improves the Town's regulatory capabilities.		
Climate Change Considerations:	A warmer atmosphere means storms have the potential to be more intense and occur more often, including increased periods of intense rain events. Saturated soils can lead to an increased possibility of landslide occurrences. Conversely, drier summer conditions may fuel wildfires, leading to unstable soils and resulting in landslide occurrences.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input checked="" type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Restrict development on slopes greater than 5 percent grade		May be too restrictive and discourage any future development
	Create inventory but do not develop local law		Would not restrict future development, could increase at risk properties and structures

Action 2025-PersiaT-03. Hawkins Road Culvert

Lead Agency:	Engineering		
Supporting Agencies:	Code Enforcement, Highway Department		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic <input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire		
Description of the Problem:	The culvert underneath Hawkins Road is located directly up slope (200' + -) from the Village of Gowanda's drinking water reservoir. If the culvert fails, the ensuing silt, brush, and other debris would wash down the slope into the Village's drinking water system. If enough debris is washed into the reservoir, presumably because of a severe storm and/or flood event, it could possibly plug the reservoirs outflow and cause a catastrophic event with the berm, reservoir culvert, and Point Peter Road which the culvert flows underneath on its way to the Cattaraugus Creek and Lake Erie.		
Description of the Solution:	The Town Engineer will complete an engineering survey of the Hawkins Road to determine the proper size necessary to provide stormwater capacity. The Town Highway Department will complete the necessary upsizing for the culvert.		
Estimated Cost:	TBD after study is complete		
Potential Funding Sources:	FEMA HMA, CHIPS, Town Budget		
Implementation Timeline:	Within 5 years		
Goals Met:	1, 4		
Benefits:	Overall flooding will be reduced, which will result in less frequency of road closures and reduced damage occurring to culverts and roadways during severe events. Businesses are likely to remain in place if they are able to remain open, or re-open sooner following a flood.		
Impact on Socially Vulnerable Populations:	Areas that were previously vulnerable to frequency or severe flooding events will be less likely to be impacted by flooding events.		
Impact on Future Development:	Future development in the impacted area will be less likely to be flooded.		
Impact on Critical Facilities/Lifelines:	Transportation routes are more likely to remain open. Evacuation routes will remain intact. Access to health and medical facilities will be maintained, both for healthcare workers and the population who requires treatment for injuries and illness.		
Impact on Capabilities:	Identifying the culverts that are at greatest risk of damage or failure can allow for resource staging to take place where the need is greatest ahead of a flood event.		
Climate Change Considerations:	Climate change is likely to result in more frequent and severe rainfall events. This action upsizes culvert sizes to meet changing stormwater needs as the result of climate change.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input checked="" type="checkbox"/> Structure and Infrastructure Project (SIP) <input type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)		
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI) <input type="checkbox"/> Natural Resource Protection (NR) <input checked="" type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)		
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Remove roadway		Roadway cannot be removed
	Raingardens		Raingardens are unlikely to be able to absorb enough stormwater to prevent flooding during severe rainfall events.

Action 2025-PersiaT-04. Tree Maintenance Program

Lead Agency:	Highway Department		
Supporting Agencies:	Utility Companies, Property Owners		
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input type="checkbox"/> Flood <input type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input checked="" type="checkbox"/> Utility Failure <input type="checkbox"/> Wildfire	
Description of the Problem:	The Town does not have an established tree trimming program in place. It is unknown the safety of trees throughout the Town. During wind events or heavy snow, falling tree branches can damage utilities and private property. The Town has made progress on the tree removal aspect of maintenance.		
Description of the Solution:	The Town will pursue funding support to have a forester assess trees, complete deed searches to verify Town right of way in targeted areas and then have the tree removal completed by qualified personnel. Implement, review, and enforce municipal policies and programs to prevent trees from threatening lives and impacting power availability/interruption in conjunction with property owners and utility companies.		
Estimated Cost:	Low		
Potential Funding Sources:	Town Budget		
Implementation Timeline:	3 years		
Goals Met:	1, 2, 4		
Benefits:	This action will result in the reduction of risk surrounding power outages by minimizing potential impacts from trees on utility lines.		
Impact on Socially Vulnerable Populations:	Some socially vulnerable population rely on power utilities for everyday care. If power outages are caused by a lack of tree maintenance, lives could potentially be at risk.		
Impact on Future Development:	This action assists in the protection of future development from impacts caused by tree collapses or branch falls as a result of severe storms and severe winter storms.		
Impact on Critical Facilities/Lifelines:	Utility lines provide power to residencies, private businesses, government entities, and various providers. Not maintaining trees, tree limbs, or tree branches may impact the availability of power during severe weather and severe winter weather events.		
Impact on Capabilities:	The creation of a tree maintenance program would be a new capability for the Town.		
Climate Change Considerations:	Climate change may result in an increase in the frequency and severity of weather-related disaster events, which may contribute to trees or tree limbs/branches falling or impacting utility lines and property.		
Mitigation Category	<input type="checkbox"/> Local Plans and Regulations (LPR) <input type="checkbox"/> Structure and Infrastructure Project (SIP)	<input checked="" type="checkbox"/> Natural Systems Protection (NSP) <input type="checkbox"/> Education and Awareness Programs (EAP)	
CRS Category	<input type="checkbox"/> Preventative Measures (PR) <input type="checkbox"/> Property Protection (PP) <input type="checkbox"/> Public Information (PI)	<input checked="" type="checkbox"/> Natural Resource Protection (NR) <input type="checkbox"/> Structural Flood Control Projects (SP) <input type="checkbox"/> Emergency Services (ES)	
Priority	<input checked="" type="checkbox"/> High	<input type="checkbox"/> Medium	<input type="checkbox"/> Low
Alternatives:	Action		Evaluation
	No Action		Current problem exists
	Do not contact utility companies		Trees along utility lines may impact power during severe weather and severe winter weather events
	Do not contact property owners		Trees on private residencies may impact power during severe weather and severe winter weather events

Action 2025-PersiaT-05. Point Peter Road Landslide Mitigation

Lead Agency:	Highway Department										
Supporting Agencies:	Engineering										
Hazard(s) of Concern:	<input type="checkbox"/> Dam and Levee Failure <input checked="" type="checkbox"/> Flood <input checked="" type="checkbox"/> Landslide <input type="checkbox"/> Pandemic	<input checked="" type="checkbox"/> Severe Storm <input checked="" type="checkbox"/> Severe Winter Storm <input type="checkbox"/> Utility Failure <input checked="" type="checkbox"/> Wildfire									
Description of the Problem:	Landslide events are often driven by hazards such as heavy rain events, flooding, heavy snowmelt, and wildfires. Landslides can destroy the natural and built environments, causing detriment to the structures in its path. Point Peter Road has been identified as being at high risk for landslide and could result in loss of the roadway. Landslides may be able to be mitigated by cutting banks to prevent erosion.										
Description of the Solution:	The Town Engineer will complete an assessment to identify an appropriate, cost-effective method to mitigation landslide risk along Point Peter Road. Possible mitigation measures include: <ul style="list-style-type: none">• Construction of retaining walls, soil nailing, ground anchor walls• Install horizontal drains to reduce soil saturation• Cut banks along water ways to prevent oversaturated soils from falling• Install netting										
Estimated Cost:	TBD after mitigation technique is chosen										
Potential Funding Sources:	FEMA HMA, Town Budget, CHIPS										
Implementation Timeline:	Within 5 years										
Goals Met:	1										
Benefits:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.										
Impact on Socially Vulnerable Populations:	This action will assist socially vulnerable populations whose properties are impacted by landslide along Point Peter Road. Keeping the roadway open to traffic also permits vulnerable populations to travel to critical appointments.										
Impact on Future Development:	Future development in the impacted area will be less likely to be impacted by landslides.										
Impact on Critical Facilities/Lifelines:	This action will identify measures to protect infrastructure in the transportation lifeline, which will lead to the assurance of clear roadways for evacuations, regular travel, and emergency responses.
